## Committees and Organizers

### Foreword

### Acknowledgements

### Sponsors

### Honouring Corale I. Brierley

### In Memory of Arpad E. Torma

## Section 1: Biohydrometallurgy

### Biohydrometallurgy: What is its Future?

C.L. Brierley 3

## Section II: Microbial Ecology

### Microbial Ecology of a Natural Extreme Acidic Environment: Lessons from Río Tinto

R. Amils, E. González-Toril, A. Aguilera, N. Rodríguez, D. Fernández-Remolar, E. Diaz, A. García-Moyano and J.L. Sanz 13

### Microbial Succession during a Heap Bioleaching Cycle of Low Grade Copper Sulphides. Does this Knowledge Mean a Real Input for Industrial Process Design and Control?

C. Demergasso 21

### New Perspectives in Mine Water Microbiology

K.B. Hallberg 29

### Geomicrobiology of Sulfidic Mine Dumps: A Short Review

A. Schippers and D. Kock 37

### Microbes in Waste Water Samples from Mining Environments

X.H. Xie, S.M. Xiao and J.S. Liu 43

### Diversity of Iron Oxidizing Bacteria from Various Sulfidic Mine Waste Dumps

A. Breuker, A. Blazejak, K. Bosecker and A. Schippers 47

### *Acidithiobacillus* Played Important Role in Zijinshan Commercial Low-Grade Copper Bioleaching Heap

X. Liu, B.W. Chen and J.K. Wen 51

### Microbial Diversity and Genetic Response to Stress Conditions of Extremophilic Bacteria Isolated from the Escondida Copper Mine

P.A. Galleguillos, K.B. Hallberg and D.B. Johnson 55

### Characterization of Oxidizing Activity of a Microbial Community in an Industrial Bioleaching Heap

P. Soto, C. Meneses, Y. Contador, P.A. Galleguillos, C. Demergasso and M. Serón 59

### Comparison between the Bacterial Populations from Solutions and Minerals in 1 m Test Columns and the Industrial Low Grade Copper Sulphide Bioleaching Process in the Escondida Mine, Chile

V. Zepeda, F. Galleguillos, V. Urtuvia, J. Molina and C. Demergasso 63

### *Acidianus Brierleyi* is the Dominant Thermoacidophile in a Bioleaching Community Processing Chalcopyrite Containing Concentrates at 70°C

I.J.T. Dinkla, M. Gericke, B.K. Geurkink and K.B. Hallberg 67

### Population Dynamics of a Low-Grade Chalcopyrite Bioleaching Column

L.A. Mutch, H.R. Watling and E.L.J. Watkin 71

### Pyrite Oxidation by Halotolerant, Thermotolerant Bacteria

P.R. Norris, J.L.C. Nicolle, L. Calvo-Bado and V. Angelatou 75

### Adaptation and Evolution of Microbial Consortia in a Stirred Tank Reactor Bioleaching System: Indigenous Population versus a Defined Consortium

C.G. Bryan, C. Joulian, P. Spolaore, S. Challan-Belval, H. El Achbouni, D.H.R. Morin and P. D'Hugues 79

<b>Assessment of Microbial Adhesion in Mixed Cultures to Sulfide Minerals Using CARD-FISH Techniques</b>	
A. Echeverría and C. Demergasso	83
<b>Acidophilic Microorganisms from Geothermal Copahue Volcano System. Assessment of Biotechnological Applications</b>	
P. Chiacchiarini, L. Lavalle, A. Giaveno and E.R. Donati	87
<b>Molecular and Morphological Characterization of Cultures from the Extreme Environmental Area of Copahue Volcano-Argentina</b>	
A. Giaveno, J. Huergo, L. Lavalle, W. Sand and E.R. Donati	93
<b>Evidence for Iron- and Sulfur-Oxidizing Bacteria and Archaea in a Currently Active Lignite Mining Area of Lusatia (Eastern Germany)</b>	
H.M. Siebert, T. Rohwerder, W. Sand, M. Strzodka and K.P. Stahmann	97
<b>Microbial Diversity by Substrate Utilization Profiles of Lignite Mines Samples of Gujarat, India</b>	
M. Patel, D.R. Tipre and S.R. Dave	101
<b>Long Term Studies on the Impact of Thionic Bacteria on the Global Pollution of Waters with Toxic Ions</b>	
V.P. Beškoski, P. Papić, V. Dragićić, V. Matić and M.M. Vrvić	105
<b>Characterization of the Anoxic Sediments of Rio Tinto: Biohydrometallurgical Implications</b>	
A. García-Moyano, E. González-Toril and R. Amils	109
<b>Comparison between Acid Mine Effluents, La Zarza-Perrunal and Río Tinto (Iberian Pyritic Belt)</b>	
E. González-Toril, A. Aguilera, V. Souza-Egipsy, M. Diez Ercilla, E. López-Pamo, F.J. Sánchez-España and R. Amils	113
<b>Microbial Diversity in a Brazilian Acid Moderate Drainage and Experimental Nickel Bioleaching System</b>	
L. Alves, C. Bernardelli, V.A. Leão, M. Teixeira and E.R. Donati	117
<b>Microbial Impact on Arsenic Mobilization in Zloty Stok Gold Mine</b>	
L. Drewniak, R. Matlakowska and A. Skłodowska	121
<b>Isolation of Novel Iron-Oxidizing Bacteria from an Acid Mine Water Treatment Plant</b>	
S. Hedrich, E. Heinzel, J. Seifert and M. Schlömann	125
<b>Characterisation of Oxalate-Degrading Microorganisms in Bioreactors Treating Bayer Liquor Organic Materials</b>	
N.J. Boxall, J.J. Plumb, A.L. Tilbury, H.J. Nyeboer, M.E. Sumich and D.C. Sutton	129
<b>Studying and Identifying the Biocorrosion of Water Supply Pipes in Copper Mine</b>	
S. Motamedi, R. Marandi and S.F. Mazhar	133
<b>Diversity of Culturable Bacteria in an Alkaliphilic Sulfur-Oxidizing Microbial Consortium</b>	
C. Granada, S. Revah and S. Le Borgne	137

### Section III: Microbiology, Biochemistry and Molecular Biology

<b>Comparative Genomics Begins to Unravel the Ecophysiology of Bioleaching</b>	
D.S. Holmes, J.P. Cárdenas, J.H. Valdés, R. Quatrini, M. Esparza, H. Osorio, F. Duarte, C. Lefimil and E. Jedlicki	143
<b>Analysis of Sulfur Metasecretome in Mixed Cultures of <i>Acidithiobacillus Thiooxidans</i> and <i>Acidithiobacillus Ferrooxidans</i></b>	
R.A. Bobadilla Fazzini and P. Parada Valdecantos	151
<b>Design and Use of Oligonucleotide Microarrays for Identification of Biomining Microorganisms</b>	
N. Ehrenfeld, A. Aravena, A. Reyes-Jara, M. Barreto, R. Assar, A. Maass and P. Parada Valdecantos	155
<b>Nucleic Acid Extraction from Biomining Microorganisms</b>	
C.M. Zammit, L.A. Mutch, H.R. Watling and E.L.J. Watkin	159
<b>Regulation of the Iron and Sulfur Oxidation Pathways in the Acidophilic <i>Acidithiobacillus Ferrooxidans</i></b>	
A. Amouric, C. Appia-Ayme, A. Yarzabal and V. Bonnafay	163
<b>Physiological and Phylogenetic Heterogeneity among Iron-Oxidizing <i>Acidithiobacillus</i> spp., and Characteristics of the Novel Species <i>Acidithiobacillus Ferrivorans</i></b>	
K.B. Hallberg, A. Amouric, C. Brochier-Armanet, V. Bonnafay and D.B. Johnson	167

<b>Chromosomal Arsenic Resistance Genes from <i>Sulfobacillus Thermosulfidooxidans</i> and a Demonstration that the Genetic Diversity of arsB among the Sulfobacilli is Similar to that of their 16S rRNA Genes</b>	
J.A. van der Merwe, S.M. Deane and D.E. Rawlings	171
<b>Characterization of Biofilm Formation by the Bioleaching Acidophilic Bacterium <i>Acidithiobacillus Ferrooxidans</i> by a Microarray Transcriptome Analysis</b>	
M.A. Vera, T. Rohwerder, S. Bellenberg, W. Sand, Y. Denis and V. Bonnefoy	175
<b>A Preliminary Differential Proteomic Analysis of the Periplasmic Fraction in <i>Acidithiobacillus Ferrooxidans</i> Planktonic and Attached Cells Exposed to Chalcopyrite</b>	
A.P. Felício, E. de Oliveira, M.A. Odena, O. Garcia Jr., M.C. Bertolini, L.F.C. Ferraz, L.M.M. Ottoboni and M.T.M. Novo	179
<b>The Secretome of the Extremophilic <i>Acidithiobacillus Ferrooxidans</i> ATCC 23270</b>	
F.A. Pagliai and C.A. Jerez	183
<b>A 300 kpb Genome Segment, Including a Complete Set of tRNA Genes, is Dispensable for <i>Acidithiobacillus Ferrooxidans</i></b>	
G.J. Levicán, A. Katz, J.H. Valdés, R. Quatrini, D.S. Holmes and O. Orellana	187
<b>Small Regulatory RNAs in <i>Acidithiobacillus Ferrooxidans</i>: Case Studies of 6S RNA and Frr</b>	
A. Shmaryahu, C. Lefimil, E. Jedlicki and D.S. Holmes	191
<b>Prediction of FNR Regulated Genes and Metabolic Pathways Potentially Involved in Anaerobic Growth of <i>Acidithiobacillus Ferrooxidans</i></b>	
H. Osorio, J.P. Cárdenas, J.H. Valdés and D.S. Holmes	195
<b>Regulation of Expression of the PetI Operon Involved in Iron Oxidation in the Biomining Bacterium <i>Acidithiobacillus Ferrooxidans</i></b>	
C. Lefimil, H. Osorio, R. Quatrini, D.S. Holmes and E. Jedlicki	199
<b>Predicting the Function of Hypothetical Genes in Genomes of Bioleaching Microorganisms</b>	
F.J. Ossandón, G. Rivera, F. Lazo and D.S. Holmes	203
<b>Gene Organization and CO<sub>2</sub>-Responsive Expression of Four <i>cbb</i> Operons in the Biomining Bacterium <i>Acidithiobacillus Ferrooxidans</i></b>	
M. Esparza, B. Bowien, E. Jedlicki and D.S. Holmes	207
<b>Protein Function in Extremely Acidic Conditions: Molecular Simulations of a Predicted Aquaporin and a Potassium Channel in <i>Acidithiobacillus Ferrooxidans</i></b>	
F. Duarte, R. Araya-Secchi, W. González, T. Perez-Acle, D. González-Nilo and D.S. Holmes	211
<b>Genomic Lessons from Biomining Organisms: Case Study of the <i>Acidithiobacillus</i> Genus</b>	
J.H. Valdés and D.S. Holmes	215
<b>Predicted CO/CO<sub>2</sub> Fixation in <i>Ferroplasma</i> spp. via a Novel Chimaeric Pathway</b>	
J.P. Cárdenas, V. Martínez, P. Covarrubias, D.S. Holmes and R. Quatrini	219
<b>C-di-GMP Pathway in Biomining Bacteria</b>	
M. Castro, L.M. Ruiz, A. Barriga, C.A. Jerez, D.S. Holmes and N. Giuliani	223
<b>Differential Gene Expression of Industrial Bioleaching Transcriptomes by <i>Leptospirillum Ferrooxidans</i> DNA Microarray</b>	
F. Remonsellez, M. Moreno-Paz, V. Parro and C. Demergasso	227
<b>Normalization of Quantitative Real-Time PCR Data of Identified Genes from an Industrial Bioleaching Operation</b>	
L. Olmos, M. Muñoz, F. Galleguillos, F. Remonsellez, M. Serón, C. Meneses and C. Demergasso	231
<b>Elemental Ultrastructure of Bioleaching Bacteria and Archaea Grown on Different Energy Sources</b>	
K.M. Usher, J.A. Shaw, J.J. Plumb and M. Saunders	235
<b>Sulfur Oxygenase Reductase in Different <i>Acidithiobacillus Caldus</i>-Like Strains</b>	
C. Janosch, C. Thyssen, M.A. Vera, V. Bonnefoy, T. Rohwerder and W. Sand	239
<b>Reduction of Cytochrome c by Tetrathionate in the Presence of Tetrathionate Hydrolase Purified from Sulfur-Grown <i>Acidithiobacillus Ferrooxidans</i> ATCC 23270</b>	
T.M. Taha, F. Takeuchi and T. Sugio	243
<b>Some Physiological Properties of Three Novel Fe(II)- and Sulfur-Oxidizing Strains Affiliated to <i>Alicyclobacillus</i></b>	
C.Y. Jiang, X. Guo, X.Y. You, Y.Y. Liu and S.J. Liu	247
<b>Substrate Utilisation by <i>Sulfobacillus Thermosulfidooxidans</i> in Mixed Ferrous Ion and Tetrathionate Growth Medium</b>	
D.W. Shiers, D.E. Ralph and H.R. Watling	251

<b>Kinetics of Ferrous Iron Oxidation by <i>Leptospirillum Ferriphilum</i> at Moderate to High Total Iron Concentrations</b>	
K. Penev and D. Karamanov	255
<b>Kinetics of Microbial Ferrous-Iron Oxidation by <i>Leptospirillum Ferriphilum</i>: Effect of Ferric-Iron on Biomass Growth</b>	
T.V. Ojumu and J. Petersen	259
<b>Experimental Study of Ferrous Iron Biooxidation by <i>Leptospirillum Ferriphilum</i> in Different Biofilm Reactors</b>	
L. Svirko, I. Bashtan-Kandybovich and D. Karamanov	263
<b>Effect of the Energy and Carbon Source Limitations and Ferric Inhibition on Metabolic Parameters of <i>Leptospirillum Ferrooxidans</i> Growing in Chemostat</b>	
M. Bastías and J.C. Gentina	267
<b>Ferrous Iron and Pyrite Oxidation by “<i>Acidithiobacillus</i>” Species</b>	
C.S. Davis-Belmar and P.R. Norris	271
<b>ATP Measurements in Iron-Oxidizing <i>Acidithiobacillus Ferrooxidans</i></b>	
M. Mandl, R. Markova and A. Lojek	275
<b>Copper Resistance Mechanisms of Biomining Bacteria and Archaea Living under Extremely High Concentrations of Metals</b>	
A. Orell, C.A. Navarro and C.A. Jerez	279
<b>The Characterization of Salt Tolerance in Biomining Microorganisms and the Search for Novel Salt Tolerant Strains</b>	
C.M. Zammit, L.A. Mutch, H.R. Watling and E.L.J. Watkin	283
<b>Interrelation between Cells and Extracellular Polymeric Substances (EPS) from <i>Acidiphilium 3.2Sup(5)</i> on Carbon Surfaces</b>	
J.M. Tapia, J.A. Muñoz, F. González, M.L. Blázquez and A. Ballester	287
<b>Reductive Action of Activated Carbon on Ferric Iron Interferes on the Determination of the Oxidative Activity of <i>Acidithiobacillus Ferrooxidans</i> on Ferrous Iron</b>	
T. Vargas, P. Diáz and B. Escobar	291

## Section IV: Mineral Processing

<b>Mechanisms of Bioleaching and the Visualization of these by Combined AFM &amp; EFM</b>	
W. Sand, B.M. Florian and N. Noël	297
<b>Understanding and Modelling of Interactions in Bioleach Processes</b>	
J. Petersen	303
<b>From Laboratory to Application Heap Bioleach or not</b>	
J.A. Brierley and M.C. Kuhn	311
<b>Microorganisms in Bioflootation and Bioflocculation: Potential Application and Research Needs</b>	
K. Hanumantha Rao, A. Vilinska and I.V. Chernyshova	319
<b>FISH Analysis of Bacterial Attachment to Copper Sulfides in Bioleaching Processes</b>	
J. Huergo, C. Bernardelli, M. Viera, W. Sand and E.R. Donati	329
<b>Comparative Study of Planktonic and Sessile Cells from Pure and Mixed Cultures of <i>Acidithiobacillus Ferrooxidans</i> and <i>Acidiphilium Cryptum</i> Growing on Pyrite</b>	
S. Bellenberg, B.M. Florian, M.A. Vera, T. Rohwerder and W. Sand	333
<b>Attachment Behavior of Leaching Bacteria to Metal Sulfides Elucidated by Combined Atomic Force and Epifluorescence Microscopy</b>	
B.M. Florian, N. Noël, S. Bellenberg, J. Huergo, T. Rohwerder and W. Sand	337
<b>Visualisation of Bacterial Behaviour Using Tapping-Mode Atomic Force Microscopy</b>	
N. Gorham, T. Becker, D.W. Shiers and H.R. Watling	341
<b>Investigation and Visualisation of Microbial Attachment Trends to Sulphide Minerals in a Bioleach Environment</b>	
C.J. Africa, R.P. van Hille and S.T.L. Harrison	345
<b>Imaging of <i>Acidithiobacillus Ferrooxidans</i> by AFM and Analysis of AFM Curves</b>	
M.N. Chandraprabha and K.A. Natarajan	349
<b>Effect of Sulfuric Acid Concentration on Chalcopyrite Concentrate Chemical Leaching</b>	
S.J. Joe, T. Chida, M. Sakoda, H. Nakamura, M. Tamura and N. Sato	353

<b>Studies on Thermophilic Bioleaching of Chalcopyrite toward Heap Application</b>	357
J. Vilcáez, K. Suto and C. Inoue	
<b>Advances in Tank Bioleaching of Low-Grade Chalcopyrite Concentrates</b>	361
M. Gericke, Y. Govender and A. Pinches	
<b>Sulfide Mineral Induced Oxidative Stress as a Limiting Factor in Tank Bioleaching Performance</b>	365
G. Jones, R.P. van Hille and S.T.L. Harrison	
<b>Impacts of Mineralogy on the Chemistry and Microbiology of Heap Bioleaching</b>	369
H.R. Watling, A.D. Elliot, F.A. Perrot and D.W. Shiers	
<b>Changes in an Ore Dump during a 40-Year Period of Commercial-Scale and Spontaneous Natural Bioleaching</b>	373
V.I. Groudeva, D.V. Vasilev, G.I. Karavaiko and S.N. Groudev	
<b>Investigations of Attached and Unattached Cells during Bioleaching of Chalcopyrite with <i>Acidianus Manzaensis</i> at 65°C</b>	377
H. Zhou, L. Zhang, Y. Guo, J. Peng, M. Wei, J. Ding, G. Gu and G.Z. Qiu	
<b>An Experimental Approach for Studying Chalcopyrite Leaching and Passivation in Column Bioleaching</b>	381
T. van der Meer, J. Liipo and J. Leppinen	
<b>Oxidation of Chalcopyrite (<math>\text{CuFeS}_2</math>) by <i>Acidithiobacillus Ferrooxidans</i> and a Mixed Culture of <i>Acidithiobacillus Ferrooxidans</i> and <i>Acidithiobacillus Thiooxidans</i> Like Bacterium in Shake Flasks</b>	385
E.R. Mejía, J.D. Ospina, M.A. Márquez and A.L. Morales	
<b>Rietveld Refinement of X-Ray Diffractograms Evidences Surface Texturization in Chemical and Biological Leaching of Chalcopyrite at 70°C</b>	389
P. Oyarzun, V. Gautier, M. Reich and T. Vargas	
<b>Influence of <math>\text{CO}_2</math> and <math>\text{O}_2</math> Feeding Rates on the Continuous Bioleaching of a Chalcopyrite Concentrate Using <i>Sulfolobus Metallicus</i></b>	393
D. Cautivo and J.C. Gentina	
<b>The Effect of Chloride Ions and <i>A. Ferrooxidans</i> on the Oxidative Dissolution of the Chalcopyrite Evaluated by Electrochemical Noise Analysis (ENA)</b>	397
D.G. Horta, H.A. Acciari, D. Bevilacqua, A.V. Benedetti and O. Garcia Jr.	
<b>Control of the Redox Potential by Oxygen Limitation Inhibits Bioleaching of Pyrite</b>	401
B. Wu, J.K. Wen, G.Y. Zhou and R.M. Ruan	
<b>Respirometry Studies of the Bioleaching of a Copper Ore in a Large Isothermal Column</b>	405
J. Petersen, S.H. Minnaar and C.A. du Plessis	
<b>Bioleaching of Low-Grade Copper Sulfide Ore Using a Colum Reactor</b>	409
W.Q. Qin, Y.S. Zhang, S.J. Zhen, J. Wang, J.W. Zhang and G.Z. Qiu	
<b>The Effect of Nutrient Supplementation on Growth and Leaching Performance of Bioleaching Bacteria</b>	413
R.P. van Hille, L.V. Bromfield, S.S. Botha, G. Jones, A.W. van Zyl and S.T.L. Harrison	
<b>Electrochemical Behavior of Massive Bornite Bioleached Electrodes in the Presence of <i>Acidithiobacillus Ferrooxidans</i> and <i>Acidithiobacillus Caldus</i></b>	417
W.Q. Qin, J. Wang, Y.S. Zhang, S.J. Zhen, H. Shang, Q. Liu, H.B. Shi, J.W. Zhang and G.Z. Qiu	
<b>Effect of Flotation and Solvent Extraction Reagents on the Bioleaching of a Copper Concentrate with <i>Sulfolobus Metallicus</i></b>	421
B. Escobar, L. Quiroz and T. Vargas	
<b>Leaching of Ni and Cu from Mine Wastes (Tailings and Slags) Using Acid Solutions and <i>A. Ferrooxidans</i></b>	425
A. Muñoz, D. Bevilacqua and O. Garcia Jr.	
<b>Indirect Bioleaching and ZINCEX™ Process: A Profitable Marriage to Process Zinc Polymetallic Concentrates</b>	429
C. Frías, F. Sánchez, D. Martín, G. Díaz and S. Sanguilinda	
<b>Bacterial Oxidation of Ferrous Iron and RISCs at Low Temperatures: Their Effect on Acid Mine Drainage and Bioleaching of Sulphide Minerals</b>	433
B. Escobar, S. Buccicardi, G. Morales and J.V. Wiertz	
<b>Thermodynamic Simulation of Sulphide Mineral Leaching</b>	437
L. Ahonen, P. Nurmi and O.H. Tuovinen	
<b>Thermodynamic Modelling of Iron Solubility in Sulphide Mineral Leaching</b>	441
P. Nurmi, L. Ahonen and O.H. Tuovinen	

<b>Thermodynamic Modelling of Phosphate and Chloride Effects on Solid and Solution Phase Ferric Iron Speciation</b>	445
O.H. Tuovinen, P. Nurmi and L. Ahonen	
<b>Adhesion of <i>Acidithiobacillus Caldus</i> and <i>Leptospirillum Ferriphilum</i> on Pyrite and their Effect on Surface Properties of Sulfide Minerals</b>	449
G. Gu, L.J. Su, G.Z. Qiu and Y. Hu	
<b>Precipitation of Iron Oxyhydroxides and Basic Sulphates from Bioleach Liquors Generated by Thermophilic Micro-Organisms</b>	453
K.A. Mchibwa, S. Ndlovu and S. Iyuke	
<b>Bioleaching of Uranium Ore by a Novel Acidophilic Consortium at Different Acid Concentrations</b>	457
Y.J. Liu, J. Li, X.L. Li, W.J. Shi, Z.X. Sun, L.L. Xu, J.H. Liu and F. Gao	
<b>New Biox® Agitator Concept Testwork</b>	461
J.R. Van Deventer and B. Gigas	
<b>Recent Advances in the BIOX® Technology</b>	465
J.A. van Niekerk	
<b>Biooxidation of Refractory Gold Ores by Mixed Moderate Thermophiles in Airlift Bioreactor</b>	469
X.H. Xie, S.M. Xiao, H.T. Wang and J.S. Liu	
<b>Oxidative Capacity of Native Strains from Copahue Geothermal System in the Pretreatment of a Gold Sulfide Ore</b>	473
A. Giaveno, P. Chiacchiarini, C. Cordero, L. Lavalle, J. Huergo and E.R. Donati	
<b>Biooxidation of Refractory Gold Sulfide Concentrate of Olympiada Deposit</b>	477
V.K. Sovmen, A.V. Belyi, M.Y. Danneker, A.A. Gish and A.N. Teleutov	
<b>Mineralogical Characterization of a Polymetallic Concentrate Portovelo Mining District. Bioleaching by a Native Bacterial Consortium</b>	481
F. Gordillo, J.P. Suarez, V. Sanmartín, P. Aguirre, J.C. Gentina and E.R. Donati	
<b>Bioleaching of Enargite by Arsenic-Tolerant <i>Acidithiobacillus Ferrooxidans</i></b>	485
K. Sasaki, K. Takatsugi, T. Hirajima, N. Kozai, T. Ohnuki and O.H. Tuovinen	
<b>Improvement in Metal Recovery from Laterite Tailings by Bioleaching</b>	489
I. Hernández Díaz, F. Galizia, O. Coto and E.R. Donati	
<b>The Microbial Assisted Leaching of Nickel Laterites Using a Mixed Culture of Chemolithotrophic Microorganisms</b>	493
S. Ndlovu, G.S. Simate and M. Gericke	
<b>In Situ Application of Bioleaching for Improving the Quality of Quartz Sand</b>	497
I. Štyriaková, K. Jablonovská and A. Mockovčiaková	
<b>The Influence of Disimilatory Fe(III) Reducers on Iron Ore Dissolution</b>	501
C. García-Balboa, D. Cautivo, M.L. Blázquez, F. González, J.A. Muñoz and A. Ballester	
<b>Bacterial Removal of Iron from Bauxite Ores: A Comparative Study Using Three Dissimilatory Iron Reducing Microorganisms</b>	505
N. Papassiopi, K. Vaxevanidou and A. Kontogianni	
<b>Microbially Induced Flotation of Galena and Quartz from Pyrite</b>	509
H. Sarvamangala and K.A. Natarajan	
<b>Status of Coal Biotechnology in Pakistan</b>	513
M.A. Ghauri, M.A. Anwar, N. Akhtar, R. Haider and A. Tawab	

## Section V: Bioremediation, Environmental Protection and New Biomaterials

<b>Interaction of Chitosan with Metal Ions: From Environmental Applications to the Elaboration of New Materials</b>	519
E. Guibal, T. Vincent and J. Roussy	
<b>Metal - Microbes Interactions: beyond Environmental Protection</b>	527
M. Tsezos	
<b>In Situ Bioremediation of Contaminated Soils in Uranium Deposits</b>	533
S.N. Groudev, I. Spasova, M. Nicolova and P.S. Georgiev	

<b>Today's Wastes, Tomorrow's Materials for Environmental Protection</b>	
L.E. Macaskie, I.P. Mikheenko, P. Yong, K. Deplanche, A.J. Murray, M. Paterson-Beedle, V.S. Coker, C.I. Pearce, R.A.D. Patrick, D. Vaughan, G. van der Laan and J.R. Lloyd	541
<b>Isolation of Mesophilic Sulphate-Reducing Bacteria from a Microbial Community: Comparative Study of the Effect of pH and Dissolved Heavy Metals on the Reduction of Sulphate</b>	
P. Kikot, M. Viera, C. Mignone and E.R. Donati	549
<b>Low Temperature Sulfate Reduction for AMD Treatment</b>	
L.M. Nevatalo, H. Auvinen, M.F.M. Bijmans, A.H. Kaksonen, P.N.L. Lens and J.A. Puhakka	553
<b>Recovery of Copper from Acid Mine Drainage by an Integrated Sulphate Reducing Process</b>	
B.W. Chen, J.K. Wen and X.Y. Liu	557
<b>Copper Biosorption and Bioprecipitation by <i>Eichhornia</i> spp. and Sulphate Reducing Bacteria</b>	
S.R. Dave, M.S. Damani and D.R. Tipre	561
<b>Sulphate Reducing Bacteria for the Treatment of Heavy Metals Contaminated Waters in Permeable Reactive Barriers</b>	
C. Cruz Viggi, F. Pagnanelli, A. Cibati, C. Berteletti and L. Toro	565
<b>Effects of Different COD/Sulfate Ratios on the Growth of Metal Tolerant Sulfate Reducing Bacteria (SRB)</b>	
L.P. Barbosa, S.M. Bertolino, P.C. Freitas, V.A. Oliveira, P.D. Pina, V.A. Leão and M. Teixeira	569
<b>Testing of Different Substrate Materials for Sulphate Reducing Reactive Barrier to Treat Acid Mine Drainage</b>	
E.A. Vestola	573
<b>Heavy Metals Immobilization in Contaminated Smelter Soils Using Microbial Sulphate Reduction</b>	
M. Almendras, J.V. Wiertz and R. Chamay	577
<b>Bioprecipitation of Arsenic Sulphide at Low pH</b>	
F. Battaglia-Brunet, D.H.R. Morin, S. Coulon and C. Joulian	581
<b>Biosorption of Mercury(II) with Different Marine Algae</b>	
M. Reategui, H. Maldonado, M. Ly and E. Guibal	585
<b>Characterization of <i>Sargassum</i> sp. from Brazil and Evaluation of Cu<sup>2+</sup> and Ni<sup>2+</sup> Biosorption</b>	
S.J. Kleinübing, E. Guibal and M.G.C. da Silva	589
<b>Cr (VI) Ion Uptake by the Yeast <i>S. Cerevisiae</i> UCM Y-1968 and its Protoplasts</b>	
O.G. Mameeva and V.S. Podgorsky	593
<b>Waste Biomass from Marine Environment as Arsenic and Lead Biosorbent</b>	
F. Beolchini, C. Pennesi, B. Testaferri, C. Totti, I. De Michelis and F. Vegliò	597
<b>Cadmium and Zinc Biosorption by <i>Macrocystis Pyrifera</i>: Changes in the Biomass</b>	
J. Plaza, E. Guibal, J.M. Taulemesse, M. Viera and E.R. Donati	601
<b>Study of Biosorption of Rare Earth Metals (La, Nd, Eu, Gd) by <i>Sargassum</i> sp. Biomass in Batch Systems: Physicochemical Evaluation of Kinetics and Adsorption Models</b>	
R.C. Oliveira and O. Garcia Jr.	605
<b>Bioaccumulation of Metals in Different Parts of Weed Species at Proposed Bauxite Mines</b>	
R. Chandra and P.A. Azeez	609
<b>X-Ray Absorption Spectroscopy Applied to Metal Accumulation</b>	
R. Pinto de Carvalho, G.C. Silva, M.S.S. Dantas, I.F. Vasconcelos and V.S.T. Ciminelli	613
<b>Nickel and Cobalt Removal Capacities of Native Metal-Resistant Bacteria</b>	
J. Marrero, A. Diaz, A. Valle, D. Cantero, J.M. Gómez and O. Coto	617
<b>Biorecovery of Uranium from Minewaters into Pure Mineral Product at the Expense of Plant Wastes</b>	
M. Paterson-Beedle, L.E. Macaskie, J.E. Readman and J.A. Hriljac	621
<b>Sequenced Bioleaching and Bioaccumulation of Phosphorus from Sludge Combustion – A New Way of Resource Reclaiming</b>	
J. Zimmermann and W. Dott	625
<b>Arsenic Immobilization by Biological Scorodite Crystallization: Effect of High Ferric Concentration and Foreign Seeds</b>	
P. González Contreras, J. Weijma and C.N.J. Buisman	629
<b>Selective Sorption of Ce<sup>3+</sup> over La<sup>3+</sup> Ions on Biogenic Manganese Oxides</b>	
K. Sasaki, T. Kaseyama and T. Hirajima	633

<b>Mercury Reduction by Bacteria Isolated from Informal Mining Zones</b>	637
J. Sánchez Dávila and J. Hurtado Custodio	
<b>Aerobic Reduction of Uranium(VI) by <i>Acidithiobacillus Thiooxidans</i> Cultures</b>	641
R.M. Gargarello, D. Di Gregorio, H. Huck, J. Fernandez Niello and G. Curutchet	
<b>Microbial Aspects of Acid Generation and Bioremediation with Relevance to Indian Mining</b>	645
K.A. Natarajan	
<b>Recovery of Nickel and Zinc Using Biogenerated Sulphuric Acid</b>	649
N. Yagnentkovsky, M. Viera and E.R. Donati	
<b>Reduction of Heavy-Metal Content in Overburden Material by Bacterial Action</b>	653
I. Hernández Díaz, F. Galizia, O. Coto Pérez and E.R. Donati	
<b>Bioleaching of Nickel, Vanadium and Molybdenum from Spent Refinery Catalysts</b>	657
F. Beolchini, V. Fonti, F. Ferella, M. Centofanti and F. Vegliò	
<b>Gold Bioleaching of Electronic Waste by Cyanogenic Bacteria and its Enhancement with Bio-Oxidation</b>	661
V.A. Pham and Y.P. Ting	
<b>Fungal Bioleaching of Spent Hydroprocessing Catalyst: Effect of Decoking and Particle Size</b>	665
M. Islam and Y.P. Ting	
<b>Biohydrometallurgy as a Remediation Strategy for Marine Sediments Contaminated by Heavy Metals</b>	669
F. Beolchini, A. Dell'Anno, L. Rocchetti, F. Vegliò and R. Danovaro	
<b>Biological Solubilisation of Metals from Solid Waste Materials from Copper, Steel and Recycling Industries</b>	673
E.A. Vestola, M.K. Kuusenaho, H.M. Närhi, O.H. Tuovinen, J.A. Puhakka, J.J. Plumb and A.H. Kaksonen	
<b>Preliminary Study of Neutralization and Inhibition of Chemolithotrophic Bacteria in an Acid Mine Drainage from Rio Tinto Site</b>	677
D. Carnicer, E. Díaz, O. Escolano, D. Rubinos, O. Ballesteros, M.T. Barral, R. Amils and F.J. García Frutos	
<b>Inhibition of Iron Oxidizing Bacteria Involved in the Generation of Acid Mine Drainage</b>	681
C. Cruz Viggi, F. Pagnanelli, M. Sabattini and L. Toro	
<b>Process Decisions Focused on the Prevention of AMD Formation on Beneficiating Sulfide Minerals</b>	685
S.T.L. Harrison, A.H. Hesketh, R.P. van Hille and J.L. Broadhurst	
<b>Competition between Lactate Oxidisers and Fermenters under Biosulphidogenic Conditions: Implications in the Biological Treatment of AMD</b>	689
O.O. Oyekola, R.P. van Hille and S.T.L. Harrison	
<b>Sulfidogenesis at Low pH by Acidophilic Bacteria and its Potential for the Selective Recovery of Transition Metals from Mine Waters</b>	693
D.B. Johnson, E. Jameson, O.F. Rowe, K. Wakeman and K.B. Hallberg	
<b>Comparison of Differently Remediated Hard Coal Overburden and Tailings Dumps: Conclusions a few Decades after Remediation</b>	697
S. Willscher, T. Hertwig, M. Frenzel and M. Felix	
<b>Environmental Impact after 30 to 60 Years of Remediation: Microbial Investigation of Hard Coal Mining Dumps in Germany</b>	701
S. Willscher, S. Starke and M. Felix	
<b>Phytoremediation as an Alternative Way for the Treatment of Large, Low Heavy Metal Contaminated Sites: Application at a Former Uranium Mining Area</b>	705
S. Willscher, J. Wittig, H. Bergmann, G. Büchel, D. Merten and P. Werner	
<b>Biotransformation of Metalloporphyrins by Microorganisms Isolated from Organic-Rich Metal-Bearing Black Shale</b>	709
R. Matlakowska and A. Skłodowska	
<b>Ex Situ Biostimulation of Hydrocarbon Degradation by Organic and Inorganic Amendments</b>	713
I. Štyriaková, R. Hampl and I. Jech	
<b>Bioremediation of a Cyanide-Contaminated Site Using E<sub>H</sub>-/PH-Controlled Conditions (ENA)</b>	717
P. Harborth, M. Thieme and K. Fricke	
<b>Biological Production of Selenium Nanoparticles from Waste Waters</b>	721
M. Lenz, A.C. van Aelst, M. Smit, P.F.X. Corvini and P.N.L. Lens	

<b>Biomineralised Palladium is an Effective Hydrogenation Catalyst</b>	
I.P. Mikheenko, J.A. Bennett, I.J. Shannon, J. Wood and L.E. Macaskie	725
<b>Biorecovery of Precious Metals from Wastes and Conversion into Fuel Cell Catalyst for Electricity Production</b>	
P. Yong, I.P. Mikheenko, K. Deplanche, F. Sargent and L.E. Macaskie	729
<b>Chitosan-Based Hydrogels for the Recovery of Precious Metals</b>	
D. Sicupira, K. Campos, T. Vincent, V.A. Leao and E. Guibal	733
<b>Electron Paramagnetic Resonance Analysis of Active Bio-Pd-Based Electrodes for Fuel Cells</b>	
R. Pinto de Carvalho, P. Yong, I.P. Mikheenko, M. Paterson-Beedle and L.E. Macaskie	737
<b>A Study of Biofilm and Non-Line-of-Sight Bio-Hydroxyapatite Coatings Using a <i>Serratia</i> sp.</b>	
P. Yong, M. Paterson-Beedle, W. Liu, Z. Zhang, D.A. Beauregard, M.L. Johns and L.E. Macaskie	741
<b>Existence of Ferrous Iron-Dependent Mercury Reducing Enzyme System in Sulfur-Grown <i>A. Ferrooxidans</i> MON-1 Cells</b>	
T. Sugio, T.M. Taha, A. Negishi and F. Takeuchi	745
