Honouring Corale I. Brierley

In Memory of Arpad E. Torma

Section 1: Biohydrometallurgy

Biohydrometallurgy: What is its Future?

C.L. Brierley 3

Section II: Microbial Ecology

Microbial Ecology of a Natural Extreme Acidic Environment: Lessons from Río Tinto

R. Amils, E. González-Toril, A. Aguilera, N. Rodríguez, D. Fernández-Remolar, E. Diaz, A. García-Moyano and J.L. Sanz 13

Microbial Succession during a Heap Bioleaching Cycle of Low Grade Copper Sulphides. Does this Knowledge Mean a Real Input for Industrial Process Design and Control?

C. Demergasso 21

New Perspectives in Mine Water Microbiology

K.B. Hallberg 29

Geomicrobiology of Sulfidic Mine Dumps: A Short Review

A. Schippers and D. Kock 37

Microbes in Waste Water Samples from Mining Environments

X.H. Xie, S.M. Xiao and J.S. Liu 43

Diversity of Iron Oxidizing Bacteria from Various Sulfidic Mine Waste Dumps

A. Breuker, A. Blazejak, K. Bosecker and A. Schippers 47

Acidithiobacillus Played Important Role in Zijinshan Commercial Low-Grade Copper Bioleaching Heap

X. Liu, B.W. Chen and J.K. Wen 51

Microbial Diversity and Genetic Response to Stress Conditions of Extremophilic Bacteria Isolated from the Escondida Copper Mine

P.A. Galleguillos, K.B. Hallberg and D.B. Johnson 55

Characterization of Oxidizing Activity of a Microbial Community in an Industrial Bioleaching Heap

P. Soto, C. Meneses, Y. Contador, P.A. Galleguillos, C. Demergasso and M. Serón 59

Comparison between the Bacterial Populations from Solutions and Minerals in 1 m Test Columns and the Industrial Low Grade Copper Sulphide Bioleaching Process in the Escondida Mine, Chile

V. Zepeda, F. Galleguillos, V. Urtuvia, J. Molina and C. Demergasso 63

Acidianus Brierleyi is the Dominant Thermoacidophile in a Bioleaching Community Processing Chalcopyrite Containing Concentrates at 70°C

I.J.T. Dinkla, M. Gericke, B.K. Geurkink and K.B. Hallberg 67

Population Dynamics of a Low-Grade Chalcopyrite Bioleaching Column

L.A. Mutch, H.R. Watling and E.L.J. Watkin 71

Pyrite Oxidation by Halotolerant, Thermotolerant Bacteria

P.R. Norris, J.L.C. Nicolle, L. Calvo-Bado and V. Angelatou 75

Adaptation and Evolution of Microbial Consortia in a Stirred Tank Reactor Bioleaching System: Indigenous Population versus a Defined Consortium

C.G. Bryan, C. Joulain, P. Spolaore, S. Challan-Belval, H. El Achbouni, D.H.R. Morin and P. D'Hugues 79

Assessment of Microbial Adhesion in Mixed Cultures to Sulfide Minerals Using CARD-FISH Techniques	
A. Echeverría and C. Demergasso	83
Acidophilic Microorganisms from Geothermal Copahue Volcano System. Assessment of Biotechnological Applications	
P. Chiacchiarini, L. Lavallo, A. Giaveno and E.R. Donati	87
Molecular and Morphological Characterization of Cultures from the Extreme Environmental Area of Copahue Volcano-Argentina	
A. Giaveno, J. Huergo, L. Lavallo, W. Sand and E.R. Donati	93
Evidence for Iron- and Sulfur-Oxidizing Bacteria and Archaea in a Currently Active Lignite Mining Area of Lusatia (Eastern Germany)	
H.M. Siebert, T. Rohwerder, W. Sand, M. Strzodka and K.P. Stahmann	97
Microbial Diversity by Substrate Utilization Profiles of Lignite Mines Samples of Gujarat, India	
M. Patel, D.R. Tipre and S.R. Dave	101
Long Term Studies on the Impact of Thionic Bacteria on the Global Pollution of Waters with Toxic Ions	
V.P. Beškoski, P. Papić, V. Dragišić, V. Matić and M.M. Vrvic	105
Characterization of the Anoxic Sediments of Rio Tinto: Biohydrometallurgical Implications	
A. García-Moyano, E. González-Toril and R. Amils	109
Comparison between Acid Mine Effluents, La Zarza-Perrunal and Río Tinto (Iberian Pyritic Belt)	
E. González-Toril, A. Aguilera, V. Souza-Egipsy, M. Diez Ercilla, E. López-Pamo, F.J. Sánchez-España and R. Amils	113
Microbial Diversity in a Brazilian Acid Moderate Drainage and Experimental Nickel Bioleaching System	
L. Alves, C. Bernardelli, V.A. Leão, M. Teixeira and E.R. Donati	117
Microbial Impact on Arsenic Mobilization in Zloty Stok Gold Mine	
L. Drewniak, R. Matlakowska and A. Sklodowska	121
Isolation of Novel Iron-Oxidizing Bacteria from an Acid Mine Water Treatment Plant	
S. Hedrich, E. Heinzl, J. Seifert and M. Schlömann	125
Characterisation of Oxalate-Degrading Microorganisms in Bioreactors Treating Bayer Liquor Organic Materials	
N.J. Boxall, J.J. Plumb, A.L. Tilbury, H.J. Nyeboer, M.E. Sumich and D.C. Sutton	129
Studying and Identifying the Biocorrosion of Water Supply Pipes in Copper Mine	
S. Motamedi, R. Marandi and S.F. Mazhar	133
Diversity of Culturable Bacteria in an Alkaliphilic Sulfur-Oxidizing Microbial Consortium	
C. Granada, S. Revah and S. Le Borgne	137

Section III: Microbiology, Biochemistry and Molecular Biology

Comparative Genomics Begins to Unravel the Ecophysiology of Bioleaching	
D.S. Holmes, J.P. Cárdenas, J.H. Valdés, R. Quatrini, M. Esparza, H. Osorio, F. Duarte, C. Lefimil and E. Jedlicki	143
Analysis of Sulfur Metasecretome in Mixed Cultures of <i>Acidithiobacillus Thiooxidans</i> and <i>Acidithiobacillus Ferrooxidans</i>	
R.A. Bobadilla Fazzini and P. Parada Valdecantos	151
Design and Use of Oligonucleotide Microarrays for Identification of Biomining Microorganisms	
N. Ehrenfeld, A. Aravena, A. Reyes-Jara, M. Barreto, R. Assar, A. Maass and P. Parada Valdecantos	155
Nucleic Acid Extraction from Biomining Microorganisms	
C.M. Zammit, L.A. Mutch, H.R. Watling and E.L.J. Watkin	159
Regulation of the Iron and Sulfur Oxidation Pathways in the Acidophilic <i>Acidithiobacillus Ferrooxidans</i>	
A. Amouric, C. Appia-Ayme, A. Yarzabal and V. Bonnefoy	163
Physiological and Phylogenetic Heterogeneity among Iron-Oxidizing <i>Acidithiobacillus</i> spp., and Characteristics of the Novel Species <i>Acidithiobacillus Ferrivorans</i>	
K.B. Hallberg, A. Amouric, C. Brochier-Armanet, V. Bonnefoy and D.B. Johnson	167

Chromosomal Arsenic Resistance Genes from <i>Sulfobacillus Thermosulfidooxidans</i> and a Demonstration that the Genetic Diversity of <i>arsB</i> among the Sulfobacilli is Similar to that of their 16S rRNA Genes	
J.A. van der Merwe, S.M. Deane and D.E. Rawlings	171
Characterization of Biofilm Formation by the Bioleaching Acidophilic Bacterium <i>Acidithiobacillus Ferrooxidans</i> by a Microarray Transcriptome Analysis	
M.A. Vera, T. Rohwerder, S. Bellenberg, W. Sand, Y. Denis and V. Bonnefoy	175
A Preliminary Differential Proteomic Analysis of the Periplasmic Fraction in <i>Acidithiobacillus Ferrooxidans</i> Planktonic and Attached Cells Exposed to Chalcopyrite	
A.P. Felício, E. de Oliveira, M.A. Odena, O. Garcia Jr., M.C. Bertolini, L.F.C. Ferraz, L.M.M. Ottoboni and M.T.M. Novo	179
The Secretome of the Extremophilic <i>Acidithiobacillus Ferrooxidans</i> ATCC 23270	
F.A. Pagliai and C.A. Jerez	183
A 300 kpb Genome Segment, Including a Complete Set of tRNA Genes, is Dispensable for <i>Acidithiobacillus Ferrooxidans</i>	
G.J. Levicán, A. Katz, J.H. Valdés, R. Quatrini, D.S. Holmes and O. Orellana	187
Small Regulatory RNAs in <i>Acidithiobacillus Ferrooxidans</i>: Case Studies of 6S RNA and <i>Frr</i>	
A. Shmaryahu, C. Lefimil, E. Jedlicki and D.S. Holmes	191
Prediction of FNR Regulated Genes and Metabolic Pathways Potentially Involved in Anaerobic Growth of <i>Acidithiobacillus Ferrooxidans</i>	
H. Osorio, J.P. Cárdenas, J.H. Valdés and D.S. Holmes	195
Regulation of Expression of the <i>PetI</i> Operon Involved in Iron Oxidation in the Biomining Bacterium <i>Acidithiobacillus Ferrooxidans</i>	
C. Lefimil, H. Osorio, R. Quatrini, D.S. Holmes and E. Jedlicki	199
Predicting the Function of Hypothetical Genes in Genomes of Bioleaching Microorganisms	
F.J. Ossandón, G. Rivera, F. Lazo and D.S. Holmes	203
Gene Organization and CO₂-Responsive Expression of Four <i>cbb</i> Operons in the Biomining Bacterium <i>Acidithiobacillus Ferrooxidans</i>	
M. Esparza, B. Bowien, E. Jedlicki and D.S. Holmes	207
Protein Function in Extremely Acidic Conditions: Molecular Simulations of a Predicted Aquaporin and a Potassium Channel in <i>Acidithiobacillus Ferrooxidans</i>	
F. Duarte, R. Araya-Secchi, W. González, T. Perez-Acle, D. González-Nilo and D.S. Holmes	211
Genomic Lessons from Biomining Organisms: Case Study of the <i>Acidithiobacillus</i> Genus	
J.H. Valdés and D.S. Holmes	215
Predicted CO/CO₂ Fixation in <i>Ferroplasma</i> spp. via a Novel Chimaeric Pathway	
J.P. Cárdenas, V. Martínez, P. Covarrubias, D.S. Holmes and R. Quatrini	219
C-di-GMP Pathway in Biomining Bacteria	
M. Castro, L.M. Ruíz, A. Barriga, C.A. Jerez, D.S. Holmes and N. Guiliani	223
Differential Gene Expression of Industrial Bioleaching Transcriptomes by <i>Leptospirillum Ferrooxidans</i> DNA Microarray	
F. Remonsellez, M. Moreno-Paz, V. Parro and C. Demergasso	227
Normalization of Quantitative Real-Time PCR Data of Identified Genes from an Industrial Bioleaching Operation	
L. Olmos, M. Muñoz, F. Galleguillos, F. Remonsellez, M. Serón, C. Meneses and C. Demergasso	231
Elemental Ultrastructure of Bioleaching Bacteria and Archaea Grown on Different Energy Sources	
K.M. Usher, J.A. Shaw, J.J. Plumb and M. Saunders	235
Sulfur Oxygenase Reductase in Different <i>Acidithiobacillus Caldas</i>-Like Strains	
C. Janosch, C. Thyssen, M.A. Vera, V. Bonnefoy, T. Rohwerder and W. Sand	239
Reduction of Cytochrome <i>c</i> by Tetrathionate in the Presence of Tetrathionate Hydrolase Purified from Sulfur-Grown <i>Acidithiobacillus Ferrooxidans</i> ATCC 23270	
T.M. Taha, F. Takeuchi and T. Sugio	243
Some Physiological Properties of Three Novel Fe(II)- and Sulfur-Oxidizing Strains Affiliated to <i>Alicyclobacillus</i>	
C.Y. Jiang, X. Guo, X.Y. You, Y.Y. Liu and S.J. Liu	247
Substrate Utilisation by <i>Sulfobacillus Thermosulfidooxidans</i> in Mixed Ferrous Ion and Tetrathionate Growth Medium	
D.W. Shiers, D.E. Ralph and H.R. Watling	251

Kinetics of Ferrous Iron Oxidation by <i>Leptospirillum Ferriphilum</i> at Moderate to High Total Iron Concentrations	
K. Penev and D. Karamanev	255
Kinetics of Microbial Ferrous-Iron Oxidation by <i>Leptospirillum Ferriphilum</i>: Effect of Ferric-Iron on Biomass Growth	
T.V. Ojumu and J. Petersen	259
Experimental Study of Ferrous Iron Biooxidation by <i>Leptospirillum Ferriphilum</i> in Different Biofilm Reactors	
L. Svirko, I. Bashtan-Kandybovich and D. Karamanev	263
Effect of the Energy and Carbon Source Limitations and Ferric Inhibition on Metabolic Parameters of <i>Leptospirillum Ferrooxidans</i> Growing in Chemostat	
M. Bastías and J.C. Gentina	267
Ferrous Iron and Pyrite Oxidation by “<i>Acidithiomicrobium</i>” Species	
C.S. Davis-Belmar and P.R. Norris	271
ATP Measurements in Iron-Oxidizing <i>Acidithiobacillus Ferrooxidans</i>	
M. Mandl, R. Markova and A. Lojek	275
Copper Resistance Mechanisms of Biomining Bacteria and Archaea Living under Extremely High Concentrations of Metals	
A. Orell, C.A. Navarro and C.A. Jerez	279
The Characterization of Salt Tolerance in Biomining Microorganisms and the Search for Novel Salt Tolerant Strains	
C.M. Zammit, L.A. Mutch, H.R. Watling and E.L.J. Watkin	283
Interrelation between Cells and Extracellular Polymeric Substances (EPS) from <i>Acidiphilium 3.2Sup(5)</i> on Carbon Surfaces	
J.M. Tapia, J.A. Muñoz, F. González, M.L. Blázquez and A. Ballester	287
Reductive Action of Activated Carbon on Ferric Iron Interferes on the Determination of the Oxidative Activity of <i>Acidithiobacillus Ferrooxidans</i> on Ferrous Iron	
T. Vargas, P. Díaz and B. Escobar	291

Section IV: Mineral Processing

Mechanisms of Bioleaching and the Visualization of these by Combined AFM & EFM	
W. Sand, B.M. Florian and N. Noël	297
Understanding and Modelling of Interactions in Bioleach Processes	
J. Petersen	303
From Laboratory to Application Heap Bioleach or not	
J.A. Brierley and M.C. Kuhn	311
Microorganisms in Bioflotation and Bioflocculation: Potential Application and Research Needs	
K. Hanumantha Rao, A. Vilinska and I.V. Chernyshova	319
FISH Analysis of Bacterial Attachment to Copper Sulfides in Bioleaching Processes	
J. Huergo, C. Bernardelli, M. Viera, W. Sand and E.R. Donati	329
Comparative Study of Planktonic and Sessile Cells from Pure and Mixed Cultures of <i>Acidithiobacillus Ferrooxidans</i> and <i>Acidiphilium Cryptum</i> Growing on Pyrite	
S. Bellenberg, B.M. Florian, M.A. Vera, T. Rohwerder and W. Sand	333
Attachment Behavior of Leaching Bacteria to Metal Sulfides Elucidated by Combined Atomic Force and Epifluorescence Microscopy	
B.M. Florian, N. Noël, S. Bellenberg, J. Huergo, T. Rohwerder and W. Sand	337
Visualisation of Bacterial Behaviour Using Tapping-Mode Atomic Force Microscopy	
N. Gorham, T. Becker, D.W. Shiers and H.R. Watling	341
Investigation and Visualisation of Microbial Attachment Trends to Sulphide Minerals in a Bioleach Environment	
C.J. Africa, R.P. van Hille and S.T.L. Harrison	345
Imaging of <i>Acidithiobacillus Ferrooxidans</i> by AFM and Analysis of AFM Curves	
M.N. Chandrababha and K.A. Natarajan	349
Effect of Sulfuric Acid Concentration on Chalcopyrite Concentrate Chemical Leaching	
S.J. Joe, T. Chida, M. Sakoda, H. Nakamura, M. Tamura and N. Sato	353

Studies on Thermophilic Bioleaching of Chalcopyrite toward Heap Application J. Vilcáez, K. Suto and C. Inoue	357
Advances in Tank Bioleaching of Low-Grade Chalcopyrite Concentrates M. Gericke, Y. Govender and A. Pinches	361
Sulfide Mineral Induced Oxidative Stress as a Limiting Factor in Tank Bioleaching Performance G. Jones, R.P. van Hille and S.T.L. Harrison	365
Impacts of Mineralogy on the Chemistry and Microbiology of Heap Bioleaching H.R. Watling, A.D. Elliot, F.A. Perrot and D.W. Shiers	369
Changes in an Ore Dump during a 40-Year Period of Commercial-Scale and Spontaneous Natural Bioleaching V.I. Groudeva, D.V. Vasilev, G.I. Karavaiko and S.N. Groudev	373
Investigations of Attached and Unattached Cells during Bioleaching of Chalcopyrite with <i>Acidianus Manzaensis</i> at 65°C H. Zhou, L. Zhang, Y. Guo, J. Peng, M. Wei, J. Ding, G. Gu and G.Z. Qiu	377
An Experimental Approach for Studying Chalcopyrite Leaching and Passivation in Column Bioleaching T. van der Meer, J. Liipo and J. Leppinen	381
Oxidation of Chalcopyrite (CuFeS₂) by <i>Acidithiobacillus Ferrooxidans</i> and a Mixed Culture of <i>Acidithiobacillus Ferrooxidans</i> and <i>Acidithiobacillus Thiooxidans</i> Like Bacterium in Shake Flasks E.R. Mejía, J.D. Ospina, M.A. Márquez and A.L. Morales	385
Rietveld Refinement of X-Ray Diffractograms Evidences Surface Texturization in Chemical and Biological Leaching of Chalcopyrite at 70°C P. Oyarzun, V. Gautier, M. Reich and T. Vargas	389
Influence of CO₂ and O₂ Feeding Rates on the Continuous Bioleaching of a Chalcopyrite Concentrate Using <i>Sulfolobus Metallicus</i> D. Cautivo and J.C. Gentina	393
The Effect of Chloride Ions and <i>A. Ferrooxidans</i> on the Oxidative Dissolution of the Chalcopyrite Evaluated by Electrochemical Noise Analysis (ENA) D.G. Horta, H.A. Acciari, D. Bevilaqua, A.V. Benedetti and O. Garcia Jr.	397
Control of the Redox Potential by Oxygen Limitation Inhibits Bioleaching of Pyrite B. Wu, J.K. Wen, G.Y. Zhou and R.M. Ruan	401
Respirometry Studies of the Bioleaching of a Copper Ore in a Large Isothermal Column J. Petersen, S.H. Minnaar and C.A. du Plessis	405
Bioleaching of Low-Grade Copper Sulfide Ore Using a Colum Reactor W.Q. Qin, Y.S. Zhang, S.J. Zhen, J. Wang, J.W. Zhang and G.Z. Qiu	409
The Effect of Nutrient Supplementation on Growth and Leaching Performance of Bioleaching Bacteria R.P. van Hille, L.V. Bromfield, S.S. Botha, G. Jones, A.W. van Zyl and S.T.L. Harrison	413
Electrochemical Behavior of Massive Bornite Bioleached Electrodes in the Presence of <i>Acidithiobacillus Ferrooxidans</i> and <i>Acidithiobacillus Caldus</i> W.Q. Qin, J. Wang, Y.S. Zhang, S.J. Zhen, H. Shang, Q. Liu, H.B. Shi, J.W. Zhang and G.Z. Qiu	417
Effect of Flotation and Solvent Extraction Reagents on the Bioleaching of a Copper Concentrate with <i>Sulfolobus Metallicus</i> B. Escobar, L. Quiroz and T. Vargas	421
Leaching of Ni and Cu from Mine Wastes (Tailings and Slags) Using Acid Solutions and <i>A. Ferrooxidans</i> A. Muñoz, D. Bevilaqua and O. Garcia Jr.	425
Indirect Bioleaching and ZINCEX™ Process: A Profitable Marriage to Process Zinc Polymetallic Concentrates C. Frías, F. Sánchez, D. Martín, G. Díaz and S. Sanguilinda	429
Bacterial Oxidation of Ferrous Iron and RISCs at Low Temperatures: Their Effect on Acid Mine Drainage and Bioleaching of Sulphide Minerals B. Escobar, S. Buccicardi, G. Morales and J.V. Wiertz	433
Thermodynamic Simulation of Sulphide Mineral Leaching L. Ahonen, P. Nurmi and O.H. Tuovinen	437
Thermodynamic Modelling of Iron Solubility in Sulphide Mineral Leaching P. Nurmi, L. Ahonen and O.H. Tuovinen	441

Thermodynamic Modelling of Phosphate and Chloride Effects on Solid and Solution Phase Ferric Iron Speciation O.H. Tuovinen, P. Nurmi and L. Ahonen	445
Adhesion of <i>Acidithiobacillus Caldus</i> and <i>Leptospirillum Ferriphilum</i> on Pyrite and their Effect on Surface Properties of Sulfide Minerals G. Gu, L.J. Su, G.Z. Qiu and Y. Hu	449
Precipitation of Iron Oxyhydroxides and Basic Sulphates from Bioleach Liquors Generated by Thermophilic Micro-Organisms K.A. Mchibwa, S. Ndlovu and S. Iyuke	453
Bioleaching of Uranium Ore by a Novel Acidophilic Consortium at Different Acid Concentrations Y.J. Liu, J. Li, X.L. Li, W.J. Shi, Z.X. Sun, L.L. Xu, J.H. Liu and F. Gao	457
New Biox[®] Agitator Concept Testwork J.R. Van Deventer and B. Gigas	461
Recent Advances in the BIOX[®] Technology J.A. van Niekerk	465
Biooxidation of Refractory Gold Ores by Mixed Moderate Thermophiles in Airlift Bioreactor X.H. Xie, S.M. Xiao, H.T. Wang and J.S. Liu	469
Oxidative Capacity of Native Strains from Copahue Geothermal System in the Pretreatment of a Gold Sulfide Ore A. Giaveno, P. Chiacchiarini, C. Cordero, L. Lavalle, J. Huergo and E.R. Donati	473
Biooxidation of Refractory Gold Sulfide Concentrate of Olympiada Deposit V.K. Sovmen, A.V. Belyi, M.Y. Danneker, A.A. Gish and A.N. Teleutov	477
Mineralogical Characterization of a Polymetallic Concentrate Portovelo Mining District. Bioleaching by a Native Bacterial Consortium F. Gordillo, J.P. Suarez, V. Sanmartín, P. Aguirre, J.C. Gentina and E.R. Donati	481
Bioleaching of Enargite by Arsenic-Tolerant <i>Acidithiobacillus Ferrooxidans</i> K. Sasaki, K. Takatsugi, T. Hirajima, N. Kozai, T. Ohnuki and O.H. Tuovinen	485
Improvement in Metal Recovery from Laterite Tailings by Bioleaching I. Hernández Díaz, F. Galizia, O. Coto and E.R. Donati	489
The Microbial Assisted Leaching of Nickel Laterites Using a Mixed Culture of Chemolithotrophic Microorganisms S. Ndlovu, G.S. Simate and M. Gericke	493
<i>In Situ</i> Application of Bioleaching for Improving the Quality of Quartz Sand I. Štyriaková, K. Jablonovská and A. Mockovčíaková	497
The Influence of Disimilatory Fe(III) Reducers on Iron Ore Dissolution C. García-Balboa, D. Cautivo, M.L. Blázquez, F. González, J.A. Muñoz and A. Ballester	501
Bacterial Removal of Iron from Bauxite Ores: A Comparative Study Using Three Dissimilatory Iron Reducing Microorganisms N. Papassiopi, K. Vaxevanidou and A. Kontogianni	505
Microbially Induced Flotation of Galena and Quartz from Pyrite H. Sarvamangala and K.A. Natarajan	509
Status of Coal Biotechnology in Pakistan M.A. Ghauri, M.A. Anwar, N. Akhtar, R. Haider and A. Tawab	513

Section V: Bioremediation, Environmental Protection and New Biomaterials

Interaction of Chitosan with Metal Ions: From Environmental Applications to the Elaboration of New Materials E. Guibal, T. Vincent and J. Roussy	519
Metal - Microbes Interactions: beyond Environmental Protection M. Tsezos	527
<i>In Situ</i> Bioremediation of Contaminated Soils in Uranium Deposits S.N. Groudev, I. Spasova, M. Nicolova and P.S. Georgiev	533

Today's Wastes, Tomorrow's Materials for Environmental Protection L.E. Macaskie, I.P. Mikheenko, P. Yong, K. Deplanche, A.J. Murray, M. Paterson-Beedle, V.S. Coker, C.I. Pearce, R.A.D. Patrick, D. Vaughan, G. van der Laan and J.R. Lloyd	541
Isolation of Mesophilic Sulphate-Reducing Bacteria from a Microbial Community: Comparative Study of the Effect of pH and Dissolved Heavy Metals on the Reduction of Sulphate P. Kikot, M. Viera, C. Mignone and E.R. Donati	549
Low Temperature Sulfate Reduction for AMD Treatment L.M. Nevatalo, H. Auvinen, M.F.M. Bijmans, A.H. Kaksonen, P.N.L. Lens and J.A. Puhakka	553
Recovery of Copper from Acid Mine Drainage by an Integrated Sulphate Reducing Process B.W. Chen, J.K. Wen and X.Y. Liu	557
Copper Biosorption and Bioprecipitation by <i>Eichhornia</i> spp. and Sulphate Reducing Bacteria S.R. Dave, M.S. Damani and D.R. Tipre	561
Sulphate Reducing Bacteria for the Treatment of Heavy Metals Contaminated Waters in Permeable Reactive Barriers C. Cruz Viggi, F. Pagnanelli, A. Cibati, C. Berteletti and L. Toro	565
Effects of Different COD/Sulfate Ratios on the Growth of Metal Tolerant Sulfate Reducing Bacteria (SRB) L.P. Barbosa, S.M. Bertolino, P.C. Freitas, V.A. Oliveira, P.D. Pina, V.A. Leão and M. Teixeira	569
Testing of Different Substrate Materials for Sulphate Reducing Reactive Barrier to Treat Acid Mine Drainage E.A. Vestola	573
Heavy Metals Immobilization in Contaminated Smelter Soils Using Microbial Sulphate Reduction M. Almendras, J.V. Wiertz and R. Chamy	577
Bioprecipitation of Arsenic Sulphide at Low pH F. Battaglia-Brunet, D.H.R. Morin, S. Coulon and C. Jouliau	581
Biosorption of Mercury(II) with Different Marine Algae M. Reategui, H. Maldonado, M. Ly and E. Guibal	585
Characterization of <i>Sargassum</i> sp. from Brazil and Evaluation of Cu²⁺ and Ni²⁺ Biosorption S.J. Kleinübing, E. Guibal and M.G.C. da Silva	589
Cr (VI) Ion Uptake by the Yeast <i>S. Cerevisiae</i> UCM Y-1968 and its Protoplasts O.G. Mameeva and V.S. Podgorsky	593
Waste Biomass from Marine Environment as Arsenic and Lead Biosorbent F. Beolchini, C. Pennesi, B. Testaferri, C. Totti, I. De Michelis and F. Vegliò	597
Cadmium and Zinc Biosorption by <i>Macrocystis Pyrifera</i>: Changes in the Biomass J. Plaza, E. Guibal, J.M. Taulemesse, M. Viera and E.R. Donati	601
Study of Biosorption of Rare Earth Metals (La, Nd, Eu, Gd) by <i>Sargassum</i> sp. Biomass in Batch Systems: Physicochemical Evaluation of Kinetics and Adsorption Models R.C. Oliveira and O. Garcia Jr.	605
Bioaccumulation of Metals in Different Parts of Weed Species at Proposed Bauxite Mines R. Chandra and P.A. Azeez	609
X-Ray Absorption Spectroscopy Applied to Metal Accumulation R. Pinto de Carvalho, G.C. Silva, M.S.S. Dantas, I.F. Vasconcelos and V.S.T. Ciminelli	613
Nickel and Cobalt Removal Capacities of Native Metal-Resistant Bacteria J. Marrero, A. Diaz, A. Valle, D. Cantero, J.M. Gómez and O. Coto	617
Biorecovery of Uranium from Minewaters into Pure Mineral Product at the Expense of Plant Wastes M. Paterson-Beedle, L.E. Macaskie, J.E. Readman and J.A. Hriljac	621
Sequenced Bioleaching and Bioaccumulation of Phosphorus from Sludge Combustion – A New Way of Resource Reclaiming J. Zimmermann and W. Dott	625
Arsenic Immobilization by Biological Scorodite Crystallization: Effect of High Ferric Concentration and Foreign Seeds P. González Contreras, J. Weijma and C.N.J. Buisman	629
Selective Sorption of Ce³⁺ over La³⁺ Ions on Biogenic Manganese Oxides K. Sasaki, T. Kaseyama and T. Hirajima	633

Mercury Reduction by Bacteria Isolated from Informal Mining Zones J. Sánchez Dávila and J. Hurtado Custodio	637
Aerobic Reduction of Uranium(VI) by <i>Acidithiobacillus Thiooxidans</i> Cultures R.M. Gargarello, D. Di Gregorio, H. Huck, J. Fernandez Niello and G. Curutchet	641
Microbial Aspects of Acid Generation and Bioremediation with Relevance to Indian Mining K.A. Natarajan	645
Recovery of Nickel and Zinc Using Biogenerated Sulphuric Acid N. Yagnentkovsky, M. Viera and E.R. Donati	649
Reduction of Heavy-Metal Content in Overburden Material by Bacterial Action I. Hernández Díaz, F. Galizia, O. Coto Pérez and E.R. Donati	653
Bioleaching of Nickel, Vanadium and Molybdenum from Spent Refinery Catalysts F. Beolchini, V. Fonti, F. Ferella, M. Centofanti and F. Vegliò	657
Gold Bioleaching of Electronic Waste by Cyanogenic Bacteria and its Enhancement with Bio-Oxidation V.A. Pham and Y.P. Ting	661
Fungal Bioleaching of Spent Hydroprocessing Catalyst: Effect of Decoking and Particle Size M. Islam and Y.P. Ting	665
Biohydrometallurgy as a Remediation Strategy for Marine Sediments Contaminated by Heavy Metals F. Beolchini, A. Dell'Anno, L. Rocchetti, F. Vegliò and R. Danovaro	669
Biological Solubilisation of Metals from Solid Waste Materials from Copper, Steel and Recycling Industries E.A. Vestola, M.K. Kuusenaho, H.M. Närhi, O.H. Tuovinen, J.A. Puhakka, J.J. Plumb and A.H. Kaksonen	673
Preliminary Study of Neutralization and Inhibition of Chemolithotrophic Bacteria in an Acid Mine Drainage from Rio Tinto Site D. Carnicero, E. Díaz, O. Escolano, D. Rubinos, O. Ballesteros, M.T. Barral, R. Amils and F.J. García Frutos	677
Inhibition of Iron Oxidizing Bacteria Involved in the Generation of Acid Mine Drainage C. Cruz Viggì, F. Pagnanelli, M. Sabattini and L. Toro	681
Process Decisions Focused on the Prevention of AMD Formation on Beneficiating Sulfide Minerals S.T.L. Harrison, A.H. Hesketh, R.P. van Hille and J.L. Broadhurst	685
Competition between Lactate Oxidisers and Fermenters under Biosulphidogenic Conditions: Implications in the Biological Treatment of AMD O.O. Oyekola, R.P. van Hille and S.T.L. Harrison	689
Sulfidogenesis at Low pH by Acidophilic Bacteria and its Potential for the Selective Recovery of Transition Metals from Mine Waters D.B. Johnson, E. Jameson, O.F. Rowe, K. Wakeman and K.B. Hallberg	693
Comparison of Differently Remediated Hard Coal Overburden and Tailings Dumps: Conclusions a few Decades after Remediation S. Willscher, T. Hertwig, M. Frenzel and M. Felix	697
Environmental Impact after 30 to 60 Years of Remediation: Microbial Investigation of Hard Coal Mining Dumps in Germany S. Willscher, S. Starke and M. Felix	701
Phytoremediation as an Alternative Way for the Treatment of Large, Low Heavy Metal Contaminated Sites: Application at a Former Uranium Mining Area S. Willscher, J. Wittig, H. Bergmann, G. Büchel, D. Merten and P. Werner	705
Biotransformation of Metalloporphyrins by Microorganisms Isolated from Organic-Rich Metal-Bearing Black Shale R. Matlakowska and A. Sklodowska	709
Ex Situ Biostimulation of Hydrocarbon Degradation by Organic and Inorganic Amendments I. Štyriaková, R. Hampl and I. Jech	713
Bioremediation of a Cyanide-Contaminated Site Using E_H-/PH-Controlled Conditions (ENA) P. Harborth, M. Thieme and K. Fricke	717
Biological Production of Selenium Nanoparticles from Waste Waters M. Lenz, A.C. van Aelst, M. Smit, P.F.X. Corvini and P.N.L. Lens	721

Biomineralised Palladium is an Effective Hydrogenation Catalyst I.P. Mikheenko, J.A. Bennett, I.J. Shannon, J. Wood and L.E. Macaskie	725
Biorecovery of Precious Metals from Wastes and Conversion into Fuel Cell Catalyst for Electricity Production P. Yong, I.P. Mikheenko, K. Deplanche, F. Sargent and L.E. Macaskie	729
Chitosan-Based Hydrogels for the Recovery of Precious Metals D. Sicupira, K. Campos, T. Vincent, V.A. Leao and E. Guibal	733
Electron Paramagnetic Resonance Analysis of Active Bio-Pd-Based Electrodes for Fuel Cells R. Pinto de Carvalho, P. Yong, I.P. Mikheenko, M. Paterson-Beedle and L.E. Macaskie	737
A Study of Biofilm and Non-Line-of-Sight Bio-Hydroxyapatite Coatings Using a <i>Serratia</i> sp. P. Yong, M. Paterson-Beedle, W. Liu, Z. Zhang, D.A. Beauregard, M.L. Johns and L.E. Macaskie	741
Existence of Ferrous Iron-Dependent Mercury Reducing Enzyme System in Sulfur-Grown <i>A. Ferrooxidans</i> MON-1 Cells T. Sugio, T.M. Taha, A. Negishi and F. Takeuchi	745
