## Preface, Advisory Board and Local Organizing Committee

## I. Plenary and Invited

|                                                                                                                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Proteoglycan Analogues for Ophthalmic and Orthopaedic Applications</b><br>B. Tighe, J. Bramhill and D.C. Campbell                                                                                  | 3  |
| <b>SurgiLux: A Novel Thin Film, Laser-Activated Bioadhesive for Corneal Repair</b><br>K. Thomson, H. Marcal, J. Shabazi, S. Watson, D. Wakefield and L.J.R. Foster                                    | 7  |
| <b>Polymers, Biomanufacturing and Regenerative Medicine</b><br>G.R. Mitchell, M. Domingos and P.J. Bartolo                                                                                            | 11 |
| <b>Biomedical Polymers Materials for a New Era in Molecular Engineering</b><br>R. Molloy                                                                                                              | 15 |
| <b>Spinal Cord Repair and Regeneration: The Application of Bioadhesives and Extracellular Matrix Bioscaffolds</b><br>H. Marcal, T. Ahmed, N. Wanandy and J. Foster                                    | 19 |
| <b>Bioactive Nano-Filters to Control Legionella on Indoor Air</b><br>P.A.F. Rodrigues, S.I.V. Sousa, M.J. Gerales, M.C.M. Alvim-Ferraz and F.G. Martins                                               | 23 |
| <b>Polyelectrolyte-Enhanced Ultrafiltration (PEUF) Process for Low Level Arsenic Removal: Recovery of Polyelectrolyte from Retentate Stream</b><br>P. Pookrod, W. Dungkaew, P. Un-Arn and K.J. Haller | 27 |
| <b>Antibacterial Wound Healing Gels from Oligochitosan Salts</b><br>W. Janvikul, P. Ngamviriyavong, P. Uppanun, P. Tanjak and N. Sangjun                                                              | 31 |
| <b>Effect of Physical Aging on Physical Properties of Pregelatinized Tapioca Starch</b><br>S. Manchun, S. Piriyaprasarth, V. Patomchaiviat, S. Limmatvapirat and P. Srimornsak                        | 35 |
| <b>Novel Flexible NH<sub>3</sub> Gas Sensor Prepared by Ink-Jet Printing Technique</b><br>C. Wongchoosuk, P. Jangtawee, P. Lokavee, S. Udomrat, P. Sudkeaw and T. Kerdcharoen                         | 39 |

## II. Biomaterials Science

|                                                                                                                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Molecular Network and Crosstalk Effects for Network Reliability</b><br>N. Moongfangklang, S. Mitatha and P.P. Yupapin                                                                                         | 45 |
| <b>Blood Circulation Manipulation within Molecular Buffer and Bus Network for Molecular Diagnosis Use</b><br>N. Moongfangklang, S. Mitatha and P.P. Yupapin                                                      | 49 |
| <b>Molecular Design of a Speciality Polyester for Potential Use as a Fast-Absorbable Monofilament Surgical Suture</b><br>P. Sansurin, K. Buakem, W. Kalaithong, R. Molloy and J. Siripitayananon                 | 53 |
| <b>The Fabricated Collagen-Based Nano-Hydroxyapatite/<math>\beta</math>-Tricalcium Phosphate Scaffolds</b><br>M. Ebrahimi, N. Monmaturapoj, S. Suttapreyasri and P. Pripatnanont                                 | 57 |
| <b>Effect of Apatite Precipitation on Failure Behavior of Hydroxyapatite Coating Layer on Titanium Substrate</b><br>A.R. Nimkerdphol, T. Loanapakul, Y. Otsuka and Y. Mutoh                                      | 61 |
| <b>Fatigue Behavior and Apatite Precipitation of Plasma-Sprayed HAp Coating on Commercially Pure Titanium Substrate in Simulated Body Fluid (SBF)</b><br>T. Loanapakul, A.R. Nimkerdphol, Y. Otsuka and Y. Mutoh | 66 |
| <b>Biomass-Based Sulfonic-Functionalized Carbon Solid Acid for Esterification of Acetic Acid</b><br>W.W. Mar and E. Somsook                                                                                      | 70 |
| <b>Preparation and Characterization of Modified Biphasic Calcium Phosphate Ceramics</b><br>N. Monmaturapoj and W. Thepsuwan                                                                                      | 74 |
| <b>Hydrothermal Synthesis of Zinc Oxide Nanoparticle from Zinc-Dust Waste for Photocatalytic and Antibacterial Applications</b><br>K. Natrchalayuth, T. Wasanapiarnpong, S. Larpiattaworn and P. Sujaridworakun  | 78 |

|                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Influence of the Substrate Bias Voltage on the Structure of Rutile TiO<sub>2</sub> Films Prepared by Dual Cathode DC Unbalanced Magnetron Sputtering</b>                       |     |
| P. Kasemanankul, N. Witit-Anun, S. Chaikun and P. Limsuwan                                                                                                                        | 82  |
| <b>Synthesis of Nanocrystalline <math>\beta</math>-Tricalcium Phosphate from Chicken Eggshells by Precipitation Method</b>                                                        |     |
| E. Hoonnivathana, P. Pankaew, P. Klumdong, P. Limsuwan and K. Naemchanthara                                                                                                       | 86  |
| <b>Characterization of Apatite from Human Teeth via XRD, FT-IR and TGA Techniques</b>                                                                                             |     |
| P. Pankaew, E. Hoonnivathana, S. Sujinnapram, K. Thamaphat, P. Limsuwan and K. Naemchanthara                                                                                      | 90  |
| <b>Sonochemical Synthesis of Zn<sub>3</sub>(PO<sub>4</sub>)<sub>2</sub>·4H<sub>2</sub>O and Zn<sub>3</sub>(PO<sub>4</sub>)<sub>2</sub> Powders</b>                                |     |
| M. Sutapun, B. Boonchom and N. Vittayakorn                                                                                                                                        | 94  |
| <b>Statistical Optimization of Esterification Reaction to Produce Biodiesel from the Mixture of PFAD and Palm Stearin Oil Using Two-Step Reaction</b>                             |     |
| M.M. Khine, P. Srinoppakhun, A. Thanapimmetha and M. Saisriyoot                                                                                                                   | 98  |
| <b>Blood Circulation Network Incorporation an Artificial Bone for Real Time Operation</b>                                                                                         |     |
| M. Tasakorn, N. Suwanpayak and P.P. Yupapin                                                                                                                                       | 102 |
| <b>Effect of Apatite Wollastonite Glass Ceramic Addition on Brushite Bone Cement Containing Chitosan</b>                                                                          |     |
| N. Srakaew and S.T. Rattanachan                                                                                                                                                   | 106 |
| <b>Synthesis, Processing and Testing of a Poly (DL-Lactide-co-<math>\epsilon</math>-Caprolactone) Resorbable Electrospun Membrane for Guided Tissue Regeneration</b>              |     |
| P. Piyakunakorn, B. Khumraksa, B. Thapsukhon, S. Rassameemasmaung, R. Molloy, K. Suchiva and W. Punyodom                                                                          | 110 |
| <b>Attachment and Proliferation of Cultured Human Periodontal Ligament Cells on 75:25 Poly (DL-Lactide-co-<math>\epsilon</math>-Caprolactone) Electrospun Resorbable Membrane</b> |     |
| S. Phunturug, S. Rassameemasmaung, W. Punyodom, R. Molloy, A. Sirikulsathean, K. Suchiva and P. Piyakunakorn                                                                      | 114 |
| <b>Preparation of Chitosan-Thiamine Pyrophosphate/Polyvinyl Alcohol Blend Electrospun Nanofibers</b>                                                                              |     |
| N. Charernsriwilaiwat, T. Rojanarata, T. Ngawhirunpat and P. Opanasopit                                                                                                           | 118 |
| <b>Stability and Cytotoxicity of Well-Dispersed Magnetite Nanoparticles Prepared by Hydrothermal Method</b>                                                                       |     |
| S. Ngernpimai, C. Thomas, S. Maensiri and S. Siri                                                                                                                                 | 122 |
| <b>Properties of Poly(lactic acid) (PLA)/Poly(butylene adipate-co-terephthalate) (PBAT) Blends in the Presence of Antioxidant</b>                                                 |     |
| P. Pukpanta and K. Sirisinha                                                                                                                                                      | 126 |
| <b>Preparation and Characterization of Biopolymer Film from Pomelo Pectin and Flour</b>                                                                                           |     |
| V. Trisithivanij and P. Tasaso                                                                                                                                                    | 130 |
| <b>Association Behavior of the Synthetic Protein-Lipid Complex Analogues</b>                                                                                                      |     |
| P. Punyamonwongsa and B. Tighe                                                                                                                                                    | 134 |
| <b>Spontaneous Calcium Deposition in the Scaffolds from Human Dermal Solutions</b>                                                                                                |     |
| K. Theerakittayakorn and T. Bunprasert                                                                                                                                            | 138 |
| <b>Comparison of Metal Alkoxide Initiators in the Ring-Opening Polymerization of Caprolactone</b>                                                                                 |     |
| W. Meelua, V. Bua-Own, R. Molloy and W. Punyodom                                                                                                                                  | 142 |
| <b>Apatite-Wollastonite Bioactive Glass-Ceramic Scaffolds for Hard Tissue Engineering</b>                                                                                         |     |
| P. Sooksaen, K. Chaithep, T. Saliwong and T. Duangart                                                                                                                             | 146 |
| <b>Magnesium Substitution in Hydroxyapatite Synthesized by Sol-Gel Method</b>                                                                                                     |     |
| J. Klinkaewnarong, P. Sritonwong and E. Swatsitang                                                                                                                                | 150 |
| <b>Lipase-Catalysed Polymerization of Lactic Acid and the Properties of the Polymer</b>                                                                                           |     |
| C. Chuensangjun, C. Pechyen, Y. Chisti and S. Sirisansaneeyakul                                                                                                                   | 154 |
| <b><sup>1</sup>H-NMR Analysis of Degree of Substitution in N,O-Carboxymethyl Chitosans from Various Chitosan Sources and Types</b>                                                |     |
| A. Jaidee, P. Rachtanapun and S. Luangkamin                                                                                                                                       | 158 |
| <b>Development of NLCs for Topical ATRAs Applications</b>                                                                                                                         |     |
| P. Chareanputtakhun, T. Rojanarata, P. Opanasopit and T. Ngawhirunpat                                                                                                             | 162 |
