

Table of Contents

Foreword

Table of Contents

CHAPTER 1 Health Hazards of Manufactured, Natural Environmental and Other Anthropogenic Atmospheric Nanoparticulate Materials: Past, Present and Future

1. Introduction	3
2. Examples of Nanomaterials in the Past Millennia: Applications, Benefits and Health Hazards	6
3. Health Hazards of Environmental Dusts, Industrial PM and other Atmospheric PM	12
4. Nanotechnology in the Future: Health Hazard Potential of Nanoparticulates and Lessons from the Past	43
5. Summary. 6. Acknowledgements	46
7. References	47

CHAPTER 2 Integration of Microfabrication and Surface Functionalization Strategies for Analysis of Cell-Surface Interactions

1. Introduction	59
2. Basic Principles for Protein and Cell Interactions with Solid Surfaces	60
3. Microfabrication and Photolithography Based Strategies for Mammalian Cell Patterning	66
3.2 Soft Lithography	77
4. Applications and Perspectives from Microfabricated Cell Patterns	92
5. Conclusion	99
6. Acknowledgment	100
7. References	101

CHAPTER 3 Mechanics of Biomimetic/Biological Vesicles

1. Background	117
2. Vesicle Systems	119
3. Experimental Methods	120
4. Mathematical Modeling	126
5. Summary	130
Acknowledgements. References	131

CHAPTER 4 Engineered Titanium Surface Promoting Osseointegration

1. Introduction	137
2. Surface Modifications Enhance Osseointegration	139
3. Summary. 4. Acknowledgements	153
5. References	154

CHAPTER 5 Electrospinning of Micro and Nano Fibers for Biomedical Applications

1. Introduction	169
2. Electrospinning Setup	170
3. Theory	176
4. Materials and Fiber Processing Techniques	187
5. Materials Characterization	195
6. Medical Applications	200
7. Conclusions	211
Acknowledgements. References	212

CHAPTER 6 Bioactive Glasses, New Opportunities for Tissue Engineering

1. Introduction	219
2. Bioactive Glasses: Examples of Second and Third Generation Materials	222
3. New Opportunities for Regenerative Medicine	232
4. Micro-Gravity Experimentation: Examples of on-Ground and in-Orbit Investigation	241
5. Summary	247
6. References	249

CHAPTER 7 Ordered Nanoporous Silica Materials for Biomolecular Systems

1. Introduction	253
2. Surface Functionalisation of Nanoporous Silica Materials	257
3. Drug Delivery Using Nanoporous Silicas	263
4. Enzyme Immobilisation Using Nanoporous Silicas	267
5. Separation of Biomolecules Using Nanoporous Materials	272
6. Nanocasting Technology for “Smart Materials” in Biotechnology	273
7. other Biomedical Applications. 8. Concluding Remarks	276

CHAPTER 8 Biomaterials for Bone Regeneration: from Tissue Replacement to Tissue Engineering

1. Introduction	285
2. Osteoconductive Biomaterials	293
3. Osteoinductive Biomaterials	299
4. Biomaterials for Bone Tissue Engineering	301
5. Future Prospects	313
6. References	314

CHAPTER 9 Biomimetic Approaches to Synthesize Mineral and Mineral/Organic Biomaterials

1. Introduction	327
2. Biomimetically Precipitated Mineral	330

3. Mineral-Organic Hybrids	336
4. Summary and Future Applications	360
5. References	363

CHAPTER 10 Fluoridated Hydroxyapatite Coating on Metallic Implant for Stability

LIST OF SYMBOLS AND ABBREVIATIONS

1. Introduction	379
2. Fluoridated Hydroxyapatite	380
3. Preparation of Fluoridated Hydroxyapatite Coatings	381
4. Physical and Chemical Properties	383
5. Mechanical Properties	390
6. <i>In Vitro</i> and <i>In Vivo</i> Performance	398
7. Future Considerations for FHA Coated Implants. 8. Acknowledgement. References	413

CHAPTER 11 Physiological Insights of Pharmacokinetics and Host Response for Drug Delivery System Design

1. Introduction	423
2. Pharmacokinetics	424
3. Therapeutic Peptides and Proteins	437
4. Immunogenicity	441
5. Body Response To Biomaterials	451
6. Summary	464
7. Rerences	465

CHAPTER 12 Biomedical Devices: Microbiological Aspects

1. Biomedical Devices and Biofilms	475
2. <i>In Vitro</i> Considerations	481
3. Factors Affecting Microbial Colonization of Biomaterials	488
4. Prevention And Treatment	497
5. Conclusions	507
6. References	508

CHAPTER 13 Adsorption of Proteins and Amino Acids onto Surfaces

1. Introduction. 1.1 Biomaterials	525
1.2 Biomedical Implants	527
1.3 Diamond Implants	528
1.4 Proteins and Amino Acids	530
1.5 Characteristics of Glycine	534
1.6 Amino Acid Attachment to Diamond Surfaces	535
1.7 Adsorption of Glycine onto Various Surfaces	543
1.8 Conclusions. Acknowledgments. References	551
