Preface

CHAPTER 1: ADVANCES IN SMART MATERIALS SYNTHESIS AND FUNCTIONALITY

Self-Oscillating Gel as Smart Materials

R. Yoshida 1

Bioinspired Polymer Surfaces for Nanodevices and Nanomedicine

K. Ishihara, K. Nishizawa, Y. Goto and M. Takai 5

Smart Hydrogels that Respond to Target Biomolecules

T. Miyata 15

Encouraging Nature with Ceramics: The Roles of Surface Roughness and Physio-Chemistry on Cell Response to Substituted Apatites

C. Christophy, N. Rashid, L. DiSilvio and K.A. Hing 22

Synthesis of Bioactive Hydroxyapatite-Zirconia Toughened Composites for Bone Replacement

B. Cioni, A. Lazzeri, G. Gallone and G. Levita 31

Photoluminescence Response and Particle Size Control of CdSe Quantum Dots by Wet Chemical Synthesis for Biomedical Applications

R.F. Louh, A.C.C. Chang, R. Wang and C.H. Hsiao 37

Purification, Dispersion and Biofunctionalization of Singlewall Carbon Nanotubes

C. Tripisciano, E. Borowiak-Palen and R.J. Kalenczuk 44

CHAPTER 2: ENABLING TOOLS

Biomedical Applications of Micro-Nano-Technologies

R. Wechsung 50

Microsystems for Blood Cell Counting

N. Piacentini, D. Demarchi, P. Civera and M. Knaflitz 55

The Effect of Magnetic Field on Magnetotactic Bacteria Behaviors

H. Takahashi, H. Kikura, T.S. Iwasa, S. Watanabe and M. Aritomi 61

Low Voltage Microgripper for Single Cell Manipulation

B. Solano, A.J. Gallant, G.D. Greggains, D. Wood and M. Herbert 67

Simulation of Water Flow in a Coated Nano Pore by a Molecular Dynamics

K. Yamamoto, T. Iwatsubo, K. Saitoh and T. Moriuchi 73

CHAPTER 3: MEDICAL DIAGNOSTIC APPLICATIONS

Wearable Biosensors for Monitoring Wound Healing

S. Pasche, S. Angeloni, R. Ischer, M. Liley, J. Luprano and G. Voirin 80

Intelligent Wearable Systems Achievements, Challenges and Perspectives

A. Lymberis 88

Artificial Control of the Bacterial Cell-to-Cell Communication with Autoinducer Recognition Gel

N. Kato, Y. Ozonoe, E. Umebayashi, T. Morohoshi and T. Ikeda 94

Ultrasonic Transducer Based on β -PVDF for Fluidic Microagitation in a Lab-on-a-Chip Device

V.F. Cardoso, P. Martins, J. Serrado-Nunes, L. Rebouta, J.G. Rocha, G. Minas and S. Lanceros-Méndez 99

Fabrication of a Microfluidic Device for the Detection of a Specific Biomolecule

W.J. Jeon, C.B. Shin and J.H. Yi 105

Thin Film Microsensor for Electrical and Optical Blood Diagnostics

R. Viglasky and V. Tvarozek 111

CHAPTER 4: REGENERATIVE MEDICINE AND TISSUE ENGINEERING

Novel Nitrogen Rich Polymers and Chitosan for Tissue Engineering of Intervertebral Discs F. Mwale, M.R. Wertheimer and J. Antoniou	117
Electrospun Nanofibre Membranes as Wound Dressing Materials X. Liu, T. Lin, J. Fang, G. Yao and X.G. Wang	125
Fabrication of Titanium Fiber Scaffold for Biomaterial Use S. Saito, Y. Oyake and T. Asaoka	131
Fabrication of α-TCP, HAp Functionally Graded Porous Beads Y. Kajihata, T. Asaoka, K.S. Furukawa, T. Ushida and T. Tateishi	135
Addition of Surface Function to Zirconia for Biomaterial Use N. Koide, K. Suzuki, M. Tsuda and T. Asaoka	139

CHAPTER 5: NEW THERAPEUTICS AND INTELLIGENT DELIVER SYSTEMS

Supramolecular Approach to Gene Delivery N. Yui	144
A New Drug Vehicle - Lipid Coated Biodegradable Nanoparticles J. Schäfer, J. Sitterberg, C. Ehrhardt, M.N.V.R. Kumar and U. Bakowsky	148
Base Invaders. Coupling Experiments and Multiscale Modeling of Dendrimer-Based siRNA Delivery Agents P. Posocco, G.M. Pavan, G. Scocchi, J.W. Handgraaf, A. Malek, M. Maly, M. Fermeglia, J.G.E.M. Fraaije, C.V. Catapano, A. Danani and S. Pricl	154
Trastuzumab Decorated Nanoparticles for Targeted Chemotherapy of Breast Cancer B.F. Sun and S.S. Feng	160
Inhibition of Alzheimer Amyloid Aggregation with Sulfate Glycopolymers Y. Miura, K. Yamamoto, K. Yasuda, Y. Nishida and K. Kobayashi	166
Electrical Field Responsive Polypyrrole in Poly(Acrylic Acid) Hydrogel for Transdermal Drug Delivery P. Chansai and A. Sirivat	170
Preparation and Characterization of Highly Water Soluble Drug Loaded PLA Microcapsules D. Loca, O. Pugovics, L. Berzina-Cimdina and J. Locs	176
Effect of Electric Field Strength on the Diffusion of Salicylic Acid through Polyacrylamide Hydrogels S. Niamlang and A. Sirivat	182
New Antibacterial, Antiadhesive Films Based on Self Assemblies of Modified Tetraetherlipids E. Dayyoub, J. Sitterberg, U. Rothe and U. Bakowsky	188

CHAPTER 6: MINI / MICRO IMPLANTABLE DEVICES

Energy Efficient Biomedical Signal Processing in Implantable Devices V. Öwall, L. Sörnmo and J.N. Rodrigues	195
Implantable Electronics for the Recovery of Neuromuscular Functions M. Sawan, B. Gosselin, J. Coulombe, A.E. Ayoub, A. Chaudhuri and F. Leporé	204
Towards an Integrated, Fully-Implantable Vestibular Prosthesis for Balance Restoration T.G. Constandinou, J. Georgiou and C. Toumazou	210
Estimate Biocompatibility and Injection-Molding Processability of Ti-Based Metallic Glasses for Dental Implant J.J. Oak, H. Kimura and A. Inoue	216
Polysiloxane Coatings on Biomedical Micro Devices: Plasma Etching and Properties of Protection Layer D. Szmigiel, K. Domański and P. Grabiec	220

CHAPTER 7: MEDICAL APPLICATIONS OF SHAPE MEMORY MATERIALS AND SMART TEXTILES

Theory and Experiments for Mechanically-Induced Remodeling of Tissue Engineered Blood Vessels

R.L. Gleason and W. Wan 226

Fatigue Properties of Superelastic Ti-Ni Filaments Used in Braided Cables for Bone Fixation

Y. Baril, V. Brailovski and P. Terriault 235

Design of a Progressively Expandable Stent Using Finite Elements

P. Terriault, P. Lafortune, D. Plamondon and V. Brailovski 241

Functional Materials for Wearable Sensing, Actuating and Energy Harvesting

D. De Rossi, F. Carpi and F. Galantini 247

Bio-Sensing Textile for Medical Monitoring Applications

J. Luprano 257
