

Table of Contents

Foreword, Honouring Henry L. Ehrlich, Committees & Sponsors

Chapter 1: Geomicrobiology, Biogeochemical Cycles, Genetics and Molecular Biology

New Insights into Salt-Tolerance in Acidophilic Iron-Oxidising Bacteria D.B. Johnson, B.M. Grail and V. Bonnefoy	3
Microbial Communities in Sediments in Acidic, Metal-Rich Mine Lakes: Results from a Study in South-West Spain C. Falagan, F.J. Sánchez-España, I. Yusta and D.B. Johnson	7
Influence of Different Growth Conditions on the Composition of Extracellular Polymeric Substances of <i>Acidithiobacillus ferrooxidans</i> and <i>Acidithiobacillus ferrivorans</i> Species N.C. Teubner, S. Bellenberg, M. Vera and W. Sand	11
Comparative Genomics Underlines the Functional and Taxonomic Diversity of Novel "Ferrovum" Related Iron Oxidizing Bacteria S.R. Ullrich, A. Poehlein, R. Daniel, J.S. Tischler, S. Vogel, M. Schlömann and M. Mühlung	15
Screening and Isolation of Bacterial Strains with the Biotechnological Potential to Destruct Cyanide-Bearing Compounds under the Conditions of Extreme Continental Climate M.P. Belykh, S.V. Petrov, V.F. Petrov, A.Y. Chikin and N.L. Belkova	19
Dyp-Type Peroxidase (DypA) from the Bioleaching Acidophilic Bacterium <i>Leptospirillum ferriphilum</i> DSM 14647 M. Contreras, C. Mascayano, R. Chávez, A. Ferrer, B. Paillavil and G.J. Levicán	23
Global Transcriptional Responses of <i>Acidithiobacillus ferrooxidans</i> Wenelen under Different Sulfide Minerals	28
Comparison of Microbial and Geochemical Conditions of Lignite Coal Spoil and Overburden Areas and their Environmental Impact S. Willscher, M. Schaum, J. Goldammer, D. Knippert, D. Kühn, H. Ihling and T. Schaarschmidt	32
Characteristics of <i>Acidibacillus</i> Spp.: A Novel Genus of Acidophilic Iron-Oxidising Firmicutes R. Holanda, S. Hedrich, C. Falagán, I. Šancucheo, H. Dall'Agnol, B.M. Grail and D.B. Johnson	36
Microarray-Based Characterization of Microbial Community Functional Structure and Heterogeneity Associated with Acid Mine Drainages L. Shen, H.Q. Yin, Q. Hu, X.D. Liu and G.Z. Qiu	40
Microbial Community Structure Analysis of Blood Pond Hell Hot Spring in Japan and Search for Metal-Reducing Microbes Y. Masaki, S.I. Hirano and N. Okibe	45
Thermodynamic Modelling of Geo-Biometallurgical Oxidation of Sulfide Ores S.S. Gudkov, Y.Y. Yemelianov, L.Y. Shketova, N.V. Kopylova and T.Y. Afonina	50
Diversity of Bioleaching Microorganisms in Interfacial Emulsion of Copper Solvent Extraction X.R. Liu, C. Su, D.J. Chi, X.S. Zheng, H.L. Yu and J.H. Shen	55
Neutrophilic Microbial Community with High Rate of Elemental Sulfur Oxidation A.V. Belyi, T.F. Kondrat'eva, A. Bulaev, N.V. Solopova, N.V. Grigor'eva, M.I. Murav'yov, A.E. Panyushkina and I.A. Tsaplina	59
Organotrophic and Mixotrophic Sulfur Oxidation in an Acidic Salt Flat in Northern Chile L. Escudero, J. Bijman, G.M. Mariela, J.J. Pueyo Mur, G. Chong and C. Demergasso	63
Theoretical Model of the Structure and the Reaction Mechanisms of Sulfur Oxygenase Reductase in <i>Acidithiobacillus thiooxidans</i> X. Zhang, H.Q. Yin, Y.L. Liang, G.Z. Qiu and X.D. Liu	67
Physiological and Genetic Characteristics of Psychrotolerant Acidophile <i>Acidithiobacillus ferrivorans</i> ZB-1 and DX-1 K. Zou, X. Guo, Y.L. Liang, X. Zhang, L.Y. Ma, G.Z. Qiu, H.Q. Yin and X.D. Liu	71
Microbially Induced Corrosion in Deep Bedrock L. Carpén, P. Rajala and M. Bomberg	75

Biofilm Formation and Stainless Steel Corrosion Analysis of <i>Leptothrix discophora</i>	79
C. Thyssen, D. Holuscha, J. Kuhn, F. Walter, W. Fürbeth and W. Sand	
Geomicrobiology of Río Tinto, a Model of Interest in Biohydrometallurgy	83
R. Amils	

Chapter 2: Microbe-Mineral Interactions

The Production of Soluble Ferric Sulfate via Biological and Chemical Processing of Iron Sulfides	89
D. Dreisinger, A. Dreisinger and C. Dreisinger	
Apparent Absence of Microbial Life inside an Alkaline Slag Dump	93
A. Schippers and D. Rammlmair	
Changes in <i>Acidithiobacillus ferrooxidans</i> Ability to Reduce Ferric Iron by Elemental Sulfur	97
J. Kucera, E. Pakostova, O. Janiczek and M. Mandl	
Effect of Cu(II) on Bio-Scorodite Crystallization Using <i>Acidianus brierleyi</i>	101
N. Okibe, S. Morishita, M. Tanaka, T. Hirajima and K. Sasaki	
Interspecies Interactions of Metal-Oxidizing Thermo-Acidophilic Archaea <i>Acidianus</i> and <i>Sulfolobus</i>	105
R.Y. Zhang, J. Liu, T.R. Neu, Q. Li, S. Bellenberg, W. Sand and M. Vera	
Bio-Modification of Carbonaceous Matters in Gold Ore: Model Experiments Using Powdered Activated Charcoal and Cell-Free Extracts of <i>Phanerochaete chrysosporium</i>	109
K. Twum Konadu, K. Sasaki, G. Ofori-Sarpong, K. Osseo-Asare and T. Kaneta	
Industrial Views to Microbe-Metal Interactions in Sub-Arctic Conditions	114
P. Kinnunen, M. Bomberg, P. Rajala and L. Carpén	
Reactive Oxygen Species Influence Biofilm Formation of Acidophilic Mineral-Oxidizing Bacteria on Pyrite	118
S. Bellenberg, D. Huynh, L. Castro, M. Boretska, W. Sand and M. Vera	
Characterization of Microbe-Mineral Interfacial Interaction Based on Synchrotron Radiation Techniques	123
J.L. Xia, H.C. Liu, Z.Y. Nie, H.R. Zhu, Y. Yang, L. Wang, J.J. Song, C.H. Zhao, Y.L. Ma, Y.D. Zhao, C.Y. Ma and X.J. Zhen	
Initial Attachment and Biofilm Formation of a Novel Crenarchaeote on Mineral Sulfides	127
R.Y. Zhang, Y.T. Zhang, T.R. Neu, Q. Li, S. Bellenberg, W. Sand and M. Vera	
Microbial & Mineralogical Dynamics during Copper Sulfides Bioleaching, the Search for the Missing Link	131
R.A. Bobadilla-Fazzini, P. Piña, V. Gautier, K. Brunel and P. Parada	
Antimicrobial Activity and Hardness of as Cast and as Homogenized Cu-Ti Alloys	136
D. Nurhayani and A.A. Korda	
Biofilm Formation of <i>Sulfobacillus thermosulfidooxidans</i> on Pyrite in the Presence of <i>Leptospirillum ferriphilum</i>	141
Q. Li, R.Y. Zhang, B.A. Krok, M. Vera and W. Sand	
Insight into the Sulfur Metabolism by Thermoacidophilic Archaeon <i>Metallosphaera cuprina</i> with Genomic, Proteomic and Biochemical Tools	145
J.L. Song, C. Jiang and S.J. Liu	
A Feasibility Study of Arsenopyrite-Bearing Gold Bioleaching and its Characterization	149
S. Hasni, S.X. Juan and M.S. Jian	
Biofilm Formation and Extracellular Polymeric Substances (EPS) Analysis by New Isolates of <i>Leptospirillum</i>, <i>Acidithiobacillus</i> and <i>Sulfobacillus</i> from Armenia	153
A.K. Vardanyan, N.S. Vardanyan, L. Markosyan, W. Sand, M. Vera and R.Y. Zhang	
High Copper Tolerant <i>P. lilacinum</i> Strain Isolated from a Rich Environment in Copper, Río Tinto (Sw, Spain)	157
M. Oggerin, C. Escudero, C. del Moral, N. Rodríguez and R. Amils	
Influence of Oxidation-Reduction Potential on Bio-Oxidation of Olimpiada Flotation Concentrate with High Content of Pyrrhotite	161
A.V. Belyi, S. Drozdov, A. Teleutov and N. Solopova	
Effects of Ion Stress on the Oxidation Activity of <i>Acidithiobacillus ferrooxidans</i>	165
Y.B. Dong and H. Lin	

Effect of <i>Phanerochaete chrysosporium</i> on Graphite Degradation during Pre-Treatment of Simulated Gold Preg-Robbing Ore	169
Q. Liu, H.Y. Yang, L.L. Tong, L.L. Qiao, J. Peng, Z.L. Zhang and H.L. Liu	
The Relationship between Metabolic Pathways of Bacteria and Pyrrhotite Bioleaching Behavior	175
G.H. Gu, H.S. Yang, C.Q. Wang and X.Y. Xu	
Electrochemical Research on N-Type and P-Type Semiconductor Pyrite	179
J.N. Xu and H.Y. Yang	
In Situ Characterization of Relevance of Surface Microstructure and Electrochemical Properties of Chalcopyrite to Adsorption of <i>Acidianus manzaensis</i>	183
J.L. Xia, H.R. Zhu, L. Wang, H.C. Liu, Z.Y. Nie, Y.D. Zhao, C.Y. Ma, C.H. Hong and X.J. Zhen	

Chapter 3: Technologies of Bioleaching in Hydrometallurgy

Factors Affecting the Selection of BIOX® as the Preferred Technology for the Treatment of a Refractory Gold Concentrate	191
J. van Niekerk	
Base Metal Tank Bioleaching: From Laboratory Test Work to Commercialization	197
M. Gericke	
Geobiotechnical Recovery of Metals from Manganese Nodules: First Experiments	201
C. Heller and A. Schippers	
Saline Water Bioleaching with Thermophilic Fe(II) Oxidising Microorganisms	205
M.K. Corbett, D. Collinson, D. Shiers, A.H. Kaksonen, H. Watling and E.L.J. Watkin	
Role of Microbial Activity in Bioleaching of a Pyritic and a Pure Chalcopyrite Concentrate	209
M. Khoshkhoo, M. Dopson and Å. Sandström	
Oxygen-Enriched Gas in Bioleaching Stirred Reactors and its Impact on the Consortium Behaviour	214
C. Joulian, J. Jacob, M. Beaulieu, P. d'Hugues and A.G. Guézennec	
Organic Carbon Utilisation by Iron(II)-Oxidising Bacteria <i>Sulfobacillus thermosulfidooxidans</i> and <i>Alicyclobacillus</i> Strain FP1 that Inhabit Copper Sulfide Leaching Heaps	218
D.W. Shiers, D.M. Collinson and H.R. Watling	
Effect of Different Solvent Extractants on the Activity and Community Structure of Acidophilic Microorganisms	222
B.W. Chen, W.J. Li, G.Y. Zhou, X.Y. Liu and J.K. Wen	
Ferrous Iron Oxidation in Packed-Bed Reactors at Elevated Temperatures	226
A. Bulaev	
Iron Oxidation and Jarosite Precipitation in a Continuous Two-Stage 70°C Archaeal Bioreactor	230
A.H. Kaksonen, C. Morris, J. Wylie, J. Li, K. Usher, F. Hilario and C. du Plessis	
Optode-Based Oxygen Measurements in Bioleaching Reactors	234
F. Giebner, S. Eisen, M. Schlömann and S. Schopf	
<i>Aspergillus niger</i> PSSG8 Mediated Bioleaching of Monazite for the Recovery of Rare Earth and other Metal Constituents	238
K.K. Keekan and J.C. Jalondhara	
Bioleaching of Complex Refractory Gold Ore Concentrate of China: Comparison of Shake Flask and Continuous Bioreactor	243
Y. Song, H.Y. Yang and L.L. Tong	
Comparative Experiments on Acid Leaching and Bioleaching to a Sandstone Type Uranium Ore	247
J.H. Liu, W.J. Shi, Y.J. Liu, Y.P. Zhou and Z.X. Sun	
Utilization of Metabolic Citric Acid from <i>Aspergillus niger</i> Using Corn Starch in the Nickel Leaching of Indonesian Saprolitic Ore	251
W. Astuti, T. Hirajima, K. Sasaki and N. Okibe	
Development of a Strategy for Selective Metal Recovery from Pregnant Leach Solutions of Kupferschiefer Bioleaching	255
S. Hedrich, A. Schippers and D.B. Johnson	
Interactions between Chalcopyrite and Marmatite during Bioleaching Process	259
H.B. Zhao, J. Wang, Y. Zhang and G.Z. Qiu	

Overcoming the Bacteriostatic Effects of Heavy Metals on <i>A. thiooxidans</i> Direct Bioleaching of Saprolitic Ni Laterite Ores	263
H.C. Jang and M. Valix	
An <i>In Situ</i> Characterization for the Bioleaching Process of Natural Pyrite Using Electrochemical Noise Technique	268
G.B. Chen, H.Y. Yang and H.J. Li	
Organic Acid Biogeneration by <i>Aspergillus niger</i> and its Utilization for Indirect Bioleaching of Nickel Laterite Ore	273
M.Z. Mubarok, R.S. Sulistyo, S.K. Chaerun and W.P. Minwal	
Influence of Carbonate Solubilisation on Copper Leaching from Kupferschiefer with Organic Acids	278
S. Kostudis, K. Bachmann, S. Kutschke, K. Pollmann and J. Gutzmer	
Evolution of Leaching Products on the Surface of Chalcopyrite by Mesophiles and Thermophiles Based on SR-XRD and XANES Spectroscopy	282
H.C. Liu, J.L. Xia, Z.Y. Nie, H.R. Zhu, Y.D. Zhao, C.Y. Ma and L. Zheng	
Iron Oxidized Acidophiles Distribution and Activities in an Uranium <i>In Situ</i> Bioleaching Site	287
Y.J. Liu, J. Li, Y.P. Zhou, L.L. Xu, W.Y. Xu, X.G. Wang, G.B. Yang, J.H. Liu, Z.X. Sun and J.S. Liu	
Solution pH and Jarosite Management during Ferrous Iron Biooxidation in a Novel Packed-Column Bioreactor	291
M. Wanjiya, F. Chowdhury and T.V. Ojumu	
Metal Recovery and Exploitation of Lignite Ashes by Combined Physicochemical and Biotechnological Approaches	296
R. Kermer, S. Hedrich, B. Brett, D. Schrader, K. Räuchle, P. Schönher, A. Schippers, S. Reichel, F. Glombitza and E. Janneck	
Bioleaching of a Molybdenite Concentrate by Thermophilic Microorganisms in a New RELVA-RBAL 1 AIR LIFT Bio-Reactor	300
R.E. Rivera Santillan, F. Patricio Ramirez and F.A. Lopez Lopez	
Physical Peeling of Passivating Layers on Chalcopyrite Leached with Ferric Ion Using Small Alumina Balls	304
S. Joe, C. Inoue and T. Chida	
Utilisation of Inorganic Substrates by <i>Alicyclobacillus</i> - Like Strain FP1	308
H.R. Watling, D.M. Collinson, F.A. Perrot and D.W. Shiers	
Systems Biology of Acidophile Biofilms for Efficient Metal Extraction	312
S. Christel, M. Dopson, M. Vera, W. Sand, M. Herold, P. Wilmes, A. Buetti-Dinh, I. Pivkin, C. Trötschel, A. Poetsch, J. Nygren and M. Kubista	
A Study of Permeability and Diffusion at the Agglomerate-Scale in Heap (Bio)Leaching Systems	316
E. Govender, A. Kotsopoulos and S.T.L. Harrison	
Bioreactor Process Optimization for Bioleaching of Fine-Grained Residues from Copper Smelting	321
C. Klink, J. Heim, B. Daus, S. Eisen, M. Schlömann and S. Schopf	
Microstructure Evolution of Ore Particles during Bioleaching Based on X-Ray Micro-Computed Tomography Images	325
B.H. Yang, A.X. Wu, X.X. Miao and H.B. Liu	
Biooxidation of a Gold-Arsenic Sulphide Concentrate by a Two-Stage Oxidation Using Consecutively Acidophilic and Neutrophilic Bacteria	329
A.V. Belyi, N. Solopova, V. Sekachev, A. Teleutov, A. Malashonok and G. Krasilnikov	
Blue-Copper Proteins: Expression of Coding Genes from <i>Sulfobacillus</i> spp. and Iron Oxidation in Column Bioleaching Tests	333
M. Acosta, P.A. Galleguillos, S. Marín, C. Chibwana, H. Strauss and C. Demergasso	
Bioleaching of Chalcopyrite by Thermophilic Archaea	338
J.L. Song, S.J. Liu and C. Jiang	
Comparative Study of Iron and Sulfur Speciation Transformation of Pyrite and Marcasite by Extreme Thermophilic Archaea <i>Acidianus manzaensis</i>	342
H.C. Liu, J.L. Xia, Z.Y. Nie, H.R. Zhu, Y.D. Zhao, C.Y. Ma, L. Zheng and C.H. Hong	
Reductive Dissolution of Iron Oxides and Manganese Bioleaching by <i>Acidiphilium cryptum</i> JF-5	347
E. González, F. González, J.A. Muñoz, M.L. Blázquez and A. Ballester	

Reductive Dissolution of Ferric Iron in Laterite Overburden Using <i>Acidithiobacillus</i> Spp. and Neutrophilic Iron-Reducing Consortia	351
J. Marrero, O. Coto and A. Schippers	
Primary Copper Ore Leaching by Leaching Solution Adjusted Oxidation-Reduction Potential in Column	355
T. Shinkawa, T. Kamiya, K. Kojima and T. Chida	
Bioprocess for Leaching of Copper Concentrate	359
M.I. Muravyov, N.V. Fomchenko and T.F. Kondrat'eva	
Bioleaching of Orpiment (As_2S_3) in Absence of Fe^{3+}	363
G.J. Zhang, Q. Yang and C. Yang	
Insights into the Active Carbon Fixation Pathways of a Microbial Community in a Chalcopyrite Bioleaching Column	367
S. Marín, M. Acosta, P. Galleguillos, C. Chibwana, H. Strauss and C. Demergasso	
Study on Bioleaching of Sulfur in Iron Ore by Mixed Culture	371
H. Shang, J.K. Wen, B. Wu and X.L. Mo	
Effect of Particle Size on the Column Bioleaching of Tibet Yulong Copper Ore	375
L. Kai, Y.G. Wang, L.J. Zhang, C. Zhu, M. Feng and H.B. Zhou	
Study on the Gold Recovery of Double Refractory Gold Ore Concentrate by Biological Oxidation Pretreatment	379
W.J. Luo, H.Y. Yang and Z.N. Jin	
Spectroscopic and Microscopic Investigation for Biohydrometallurgy	383
K. Sasaki	
Influence of Biological and Environmental Factors on Leaching Efficiency during Chalcopyrite Bioleaching Process	387
L.Y. Ma, X.J. Wang, X. Feng, X. Guo, Q. Hu, Y.H. Xiao, X.D. Hao, Y.L. Liang, H.Q. Yin and X.D. Liu	
Indium Extraction from Reiche Zeche Sphalerite and Community Analysis of Acidic Mine Water	392
N. Gelhaar, S. Schopf and M. Schlömann	
Chalcopyrite Bioleaching at High Sulfate Concentrations	396
S.M. Rea, N.J. Boxall, J. Li, C. Morris and A.H. Kaksonen	
Enhanced Column Bioleaching of Copper Sulfides by Forced Aeration	400
M.Q. Huang, Y.M. Wang, S.H. Yin and A.X. Wu	
Fluoride Toxicity in Bioleaching of Fluorapatite	406
J. Mäkinen, P. Kinnunen, M. Arnold, O. Priha and T. Sarlin	
Roles of Oligotrophic Acidophiles (<i>Alicyclobacillus</i>) in Chalcopyrite Bioleaching System: Shake Flask Evaluation	410
X.Y. Liu, M.J. Zhang, W.Y. Liu, B.W. Chen, C.Y. Meng and J.K. Wen	
Bioleaching of Aluminum Slags with Thermophilic Bacteria	414
R.E. Rivera Santillan, F. Patricio Ramirez and V.D. Aguilar Perez	
Bioleaching of Copper Sulphide Ore by a Microbial Consortium Isolated from Acid Mine Drainage: Influence of $[Fe^{2+}]$	418
L. Salcedo-Mejía, L. Ramírez-Osco, H. Cayo-Gonzales and V. Arias-Arce	
Bioleaching vs. Chloride Leaching: Real Advantages and Drawbacks for Primary Sulfides	423
R.A. Bobadilla-Fazzini, V. Gautier, H. Jordan and P. Parada	
The Microbial Ecology of Moderately Thermophilic Mineral Leaching Reactors: The Effect of Solids Loading and Organic Carbon Supplementation on Reactor Performance	427
J. Dean, R.P. van Hille and S.T.L. Harrison	
Different Leaching Efficiency and Microbial Community Structure Variation in Chalcopyrite Bioleaching Process Based on Different Initial Microbe Proportions	431
X. Feng, L.Y. Ma, Y. Deng, A.J. Chen, K. Zou, Y.L. Liang, G.Z. Qiu and X.D. Liu	
Enhance Column Bioleaching of Uranium Embedded in Brannerite by a Mesophilic Acidophilic Bacteria	436
X.G. Wang, J. Li, Z.X. Sun and Y.J. Liu	
Biooxidation of Carbonaceous Refractory Gold Ores by an Iron-Sulfur-Oxidizing Mixotrophic Bacterium at Neutral pH	440
R. Winarko, M.Z. Mubarok, I.N. Rizki and S.K. Chaerun	
Process Parameter Study of Ferric Production in an Immobilization Bioreactor	445
Y.Y. Li, J. Du, H. Zhao, J.Y. Cao, G.J. Zhang and C. Yang	

Reductive Leaching of Jarosites by <i>Shewanella putrefaciens</i> - Influence of Humic Substances and Chelators in Mineral Dissolution	450
L. Castro, J.A. Muñoz, F. González, M.L. Blázquez and A. Ballester	
Additions of Pyrite or Chalcopyrite Alters the Microbial Community Diversity, Composition and Function in Sphalerite Bioleaching Systems	454
Y.H. Xiao, X.D. Liu, H.Q. Yin, W.L. Dong, Y.L. Liang, L.Y. Ma and G.Z. Qiu	
Column Bioleaching of Refractory Gold Ores	459
A. Bulaev, Z.K. Kanayeva, M.I. Muravyov, A.T. Kanayev and T.F. Kondrat'eva	
Differential Surface Properties and Iron Distribution of <i>Acidianus manzaensis</i> YN25 Grown on Four Different Energy Substrates	463
Z.Y. Nie, H.C. Liu, J.L. Xia, Z.W. Yin, L.Z. Liu, J.J. Song, H.R. Zhu, Y. Yang, X.J. Zhen and G.Z. Qiu	
Study of Microorganism Trench-Leaching of a Chinese High Fluorine-Bearing Uranium Ore	468
X.L. Mo, J.K. Wen, C.Y. Xu, B. Wu, B.W. Chen and H. Shang	
Microbial Leaching of Copper from Tailings of Low Grade Sulphide Ores in Zambia	473
Y.L. Liang, H.Q. Yin, Y.H. Xiao, M. Tang, X. Feng, Z.Y. Xie, G.Z. Qiu and X.D. Liu	
New Technology of Base Metals Precipitation by Hydrogen Sulfide Obtained Using <i>Desulfurella acetivorans</i> and <i>Desulfurella kamchatkenis</i>	477
A.N. Mikhailova, A.A. Faiberg, S.S. Gudkov and V.Y. Dementev	

Chapter 4: Bioflootation, Biobeneficiation, Biosorption and Bioaccumulation

Influence of Bacterial Detachment on the Bioflootation of Malachite	485
G.H. Kim, S.Y. Park, K.Y. Park, J.Y. Choi, S.Y.Q. Choi, S.K. Kim and H.J. Kim	
Isolation and Selection of Halophilic Ureolytic Bacteria for Biocementation of Calcium and Magnesium from Seawater	489
D. Arias, P. Valdes, L.A. Cisternas and M. Rivas	
Possible Role of the Biosurfactant-Producing and Fe-S-Oxidizing Bacterium in Silicate and Sulfide Bioflootation Processes	493
E. Sanwani, R. Zendy Mirahati and S.K. Chaerun	
Uranium (VI) Sorption Using Functionalized-Chitosan Magnetic Nanobased Particles	499
A.A. Galhoum, M.G. Mahfouz, N.M. Gomaa, T. Vincent and E. Guibal	
FTIR Analysis on Organic Sulfur Distribution: Aliphatic Mercaptans in Lignite, Prior and after Multistage Artificial Biotreatment Process	503
I. Handayani, Y. Paisal, S.K. Chaerun and S. Soepriyanto	
Biopolymers as Encapsulating Agents for the Immobilization of Prussian Blue and Analogues for the Sorption of Cesium	507
C. Vincent, Y. Barré, T. Vincent and E. Guibal	
Selective Recovery of Au(III) from Binary Metal Solution Using Aliquat-336-Impregnated Alginate Capsule	511
W. Wei, M.H. Song, S. Kim, J.K. Bediako and Y.S. Yun	
Assessment of Surface Properties of Silica-Bacterial Cell Complex: A Potential Application for Silicate Bioflootation Processes	515
E. Sanwani, T. Wahyuningsih and S.K. Chaerun	
Adsorption Kinetics and Surface Characterization of Microorganisms Grown under Different Conditions	519
Z.L. Wu, W.Z. Kong, J.Y. Liu, Z. Wu, S.P. Zhong and Y.G. Zhu	
Organic Sulfur Reduction on Lignite Coal Using Multistage Artificial Biotreatment (A-Bmt)	524
Y. Paisal, I. Handayani, S.K. Chaerun and S. Soepriyanto	
Biopolymer Encapsulation of PEI-Derivatives for Heavy Metal Sorption	529
C. Bertagnolli, T. Vincent and E. Guibal	

Chapter 5: Bioremediation and Bio Recovery of Metals from Wastes, Impact of Mining Technologies on the Environment

Biometal Demonstration Plant for the Biological Rehabilitation of Metal Bearing-Wastewaters (Biometal Demo)	
M.R. Jimeno, A. Ballester, M.G. Roig, E. Guibal and M.C. Costa	535
Dynamic Modelling of Biofilm Reactors with Immobilised Sulfate-Reducing Bacteria	
A. Hatzikioseyan, P. Kousi, E. Remoundaki and M. Tsezos	539
Biorecovery of Rare Earth Elements: Potential Application for Mine Water Remediation	
A.J. Murray, S. Singh, M.R. Tolley and L.E. Macaskie	543
Passive System for Bio-Recovery of Copper from Acid Mine Drainage	
A. Schwarz, G. Chaparro and N. Pérez	547
Bioremediation and Metal Resistant Bacteria in a Closed, Cold Northern Mine	
M. Bomberg, M. Arnold and P. Kinnunen	551
Biosynthesis of Zinc Sulfide Quantum Dots Using Waste Off-Gas from Metal Bioremediation Process	
J. Roussel, A.J. Murray, J. Rolley, D.B. Johnson and L.E. Macaskie	555
Enhancing ARD Mitigation by Application of Benign Tailings to Reduce the Permeability of Waste Rock Dumps	
A. Kotsopoulos and S.T.L. Harrison	560
Metal Removal from Spent Catalyst Using <i>Microbacterium liquefaciens</i> in Solid Culture	
N.G. Rojas-Avelizapa, M. Gomez-Ramirez and A.M. Diana Grecia	564
Study on As Uptake and Rhizobacteria of Two as Hyperaccumulators Forward to As Phytoremediation	
M.F. Chien, R. Makita, K. Sugawara and C. Inoue	568
Phytoremediation of Heavy Metal Contaminated Soil by Selection of Plant Species	
T. Luo, B.K.C. Chan and R.Y. Wang	572
Ruthenium Recovery from Acetic Acid Waste Solution by Using PEI-Coated Biomass-Chitosan Composite Fiber	
J.A. Kim, M.H. Song and Y.S. Yun	577
Enrichment and Isolation of Acidophilic Microorganisms from Sediments of Gold Mine Waste Leachate	
A. Bulaev, N.V. Pimenov, D.A. Ivasenko and O.V. Karnachuk	581
Isolation and Characterization of Toxic Metal Removing Bacterial Bioflocs	
K. Karthiga Devi and K.A. Natarajan	585
Culture/Co-Culture Dependent and Independent Identification of Bacterial Communities along a Chronosequence of Spontaneous Reclamation on Gold Mine Spoils in Peru	
M. Cornejo, K. Pretell, A. Arévalo, Y. Sernaqué and E. Mialhe	589
pH and Concentration Dependent Heavy Metal Uptake by <i>Helianthus tuberosus</i> in Phytoremediation Experiments	
L. Jablonski, Z. Fona, R. Rahmi, J. Wittig and S. Willscher	594
The Effect of <i>Streptomyces</i> sp. Isolated from Acidic Cultures of Minerals on Plant Development in Environments Polluted with Mercury	
S.L. Pacheco, P. Sheen and J. Hurtado	598
Prevention of the Generation of Acid Mine Drainage in a Dump Rich-In Pyrite Uranium Ore	
V. Groudeva, R. Ilieva, M. Iliev and S.N. Groudev	602
Combined Recovery of Copper and Mitigation of Pollution Potential of a Synthetic Metal-Rich Stream Draining a Copper Mine in Brazil	
A.L. Santos and D.B. Johnson	606
Effects of Mining Pollution on the Longjiang River in China	
M.J. Zhang, F.K. Huang, N. Wang, G.Y. Wang, X.Y. Liu, J.K. Wen, X.S. Zhang and Y.S. Huang	610
Analysis of the Microbial Community Associated with a Bioprocess System for Bioremediation of Thiocyanate- and Cyanide-Laden Mine Water Effluents	
R.J. Huddy, R. Kantor, W. van Zyl, R.P. van Hille, J.F. Banfield and S.T.L. Harrison	614
Biogeotechnology Application in the Recovery of Metals from the Wastes of Processing Plants	
A.N. Seleznev, S.V. Balikov, L.Y. Shketova and N.V. Kopylova	618
Potential for Conversion of Waste Platinum Group Metals in Road Dust into Biocatalysts for Cracking Heavy Oil	
A.J. Murray, J. Omajali, Y. Del Mastio, A. Hart, J. Wood and L.E. Macaskie	623

Potentials of some Waste Biomaterials as Sorbents for Gold- and Silver-Cyanide Removal from Aqueous Matrices	627
Y. Patil, S. Gaddi and R. Hunashal	
Sorptive Removal of Cadmium Ions from Solution Phases Using Textile Fiber Waste Coated with Carboxymethyl Cellulose	631
J.K. Bediako, W. Wei and Y.S. Yun	
Assessing Environmental Risks Associated with Ultrafine Coal Wastes Using Laboratory-Scale Tests	635
A.K.B. Opitz, J.L. Broadhurst and S.T.L. Harrison	
A Novel Biological Strategy for the Management Industrial Effluents with Simultaneous Recovery of Metal Resource	640
Y. Patil and P. Rao	
Mining Impacts on the Environment - Water Footprint Assessment of Copper Cathode and Copper Concentrate	644
B.K.C. Chan, M.Y. Xiong and G.P. Zhang	
Bioremediation of Steel Plant Wastewater and Improved Electricity Generation in Bio-Electrochemical Desalination Cell	648
H. Pradhan, O.A. Shinde, M.M. Ghargrekar and S. Sarkar	
Microbially Supported Recovery of Precious Metals and Rare Earth Elements from Urban Household Waste Incineration Slag	652
E.M. Muehe, C. Schmidt, J. He, T. Helle and A. Kappler	
Natural Organic Matter Affects the Treatment of Mine Tailings through Bioleaching Processes	656
R.A. Silva, J.H. Park, J.S. Hong, H.J. Kim, J.H. Park and H.J. Kim	
Acid Leaching of Cu and Zn from a Smelter Slag with a Bacterial Consortium	660
O.H. Tuovinen, S. Särkijärvi, E. Peuraniemi, S. Junnikkala, J.A. Puhakka and A.H. Kaksonen	
Biotechnological Recovery of Valuable Metals from Lignite Ash	664
S. Hedrich, S. Bellenberg, R. Kermer, T. Gehrke, W. Sand, A. Schippers, S. Reichel, F. Glombitza and E. Janneck	
Gold Biodissolution from Electronic Scrap and Biomineralization of Bacterial Gold Nanoparticles	668
S. Das, B. Dong and Y.P. Ting	
Novel Filamentous Fungi for Metal Removal from Spent Catalyst	673
M. Gómez-Ramírez, A. Plata-González, G. Fierros-Romero and N.G. Rojas-Avelizapa	
Research Progress on Recovering Valuable Metals from Wasted Circuit Board by Bio-Hydrometallurgy Technology	677
H. Lin, Y.B. Dong and X. Wang	
The Re-Usability of <i>Ecklonia maxima</i> (Brown Seaweed) in the Treatment of Mine Effluent	681
A.B. Marshall and D.I.O. Ikuo-Omoregbe	
Removal of Cd(II) from Water System Using Novel Biosorbent Derived from Persimmon Fallen Leaves	685
R.Y. Fan, Q.P. Yi, Q.L. Zhang and Z.R. Luo	
Biosorptive Removal of Hexavalent Chromium from Aqueous Industrial Solutions by a Novel Wood Apple Shell Powder Biomass	689
N. Itankar and Y. Patil	
Adsorption and Desorption Potential of Cadmium Using Green Algae: Equilibrium and Kinetic Studies	693
Z.S. Birungi and E.M.N. Chirwa	
An Innovative Model of Managing Silver Metal from Electronic Scrap Using a Combination of Chemical Leaching Followed by Biosorption and Biodegradation	697
Y. Patil, V. Bhat and P. Rao
