

Table of Contents

Abstracts of Plenary Lectures

A Century of Textile Research	1
Interactive Fiber-Based Materials for Human-Machine Interfaces and the Tactile Internet.....	1
Governing the Ungovernable: The Regulation Reshaping the Fashion and Textiles Industries	2
Textile Materials for Medical Devices: Innovations and Challenges in Design and Manufacturing	2
Functional Fibers towards Intelligent Space	3
Design and Manufacturing of Advanced Multifunctional Textile Structural Composites	3

Abstract of Oral Presentation: Session 1: Advanced Materials

Understanding the Structure-Property Relationship of Fibres from Sub-Nanoscale to Microscale Using Correlative SAXS/WAXS and Micro-CT	4
Characterization of Nanoporous Poly(Lactic Acid) Microfibers Using a Simplified Centrifugal Spinning Method	4
Multi-Scale Investigation of the Bending Behaviour of the Flax/Polyamide Fabrics	5
Cotton Fibers Characterization Depending on the Fiber's Microstructure	5
<i>In Situ</i> Measurement of Twist Propagation and Yarn Tension in Ring Spinning with a Superconducting Magnetic Bearing Twisting Element	6
Fabrication and Characterization of Carrageenan-PEG-Lecithin Hydrogel Membranes as a Wound Dressing Material	6
Evaluating the Effect of Weaving Pattern on the Mechanical Performance of Auxetic 3D Woven Composites	7
Sustainable Elastic Yarn Production	8
Melt Spinning of Elastomeric PCU Yarns	8
Characterization of Flocked Energy Absorbing Materials in Sport Helmet Padding	9
Ag Doping and rGO Coupling of TiO₂ within Polysiloxane Matrix for the Ecofriendly Development of High-Performance Cotton Fabric.....	9
Novel Functionalities on Cotton Fabric Using Inorganic and Bio-Based Ingredients	10
Novel Knit-Structure with Adjustable Tensile Behaviour Based on Combined Warp and Weftknit Technology	11
Simulation of Fabric Permeability and Inertial Coefficient in a Supercritical Carbon Dioxide Beam Dyeing Process.....	11
Silica-Containing Phosphorus-Based Sol-Gel Finishing to Improve Flame Retardant Performance of Cotton Fabrics	12

Parameter Study on Modified Polyacrylonitrile Based Precursor Fiber for Carbon Fiber Production	12
Analysis of the Influence of Fiber Orientations in Carbon Fiber-Reinforced Composites on their Structural Properties Based on Eddy Current Measurements	13
New Approaches to 3D NCF Manufacturing	13
Micromechanical Modelling of the Deformation Mechanisms of Friction-Spun Yarn from Recycled Carbon Fibres	14
Mechanical Properties of Different Yarn Structures Based on Recycled Carbon Fibre for Sustainable Thermoset Composites	15
Effect of Different Machining Processes on the Bearing Strength of Pin-Loaded Textile Composite Panels for Automotive: Experimental and FEM Analysis	15

Abstract of Oral Presentation: Session 2: Wearable Technologies

Interactive Clothing for Enhancing Pedestrian Safety at Night.....	16
Effect of Thread Consumption and Ageing on the Performance of Textile-Based Embroidered Electrodes.....	16
Weft-Knitted Strain Sensors for Motion Capture	17
Wet-Spinning of PEDOT:PSS Fibres for Use in Ionic Electroactive Actuators	18
Quantifying the Human Perception: Development and Characterization of Textile-Based Capacitive Strain and Pressure Sensors	18
Reaction Time when Wearing Clothing with a Waistband.....	19
Energy Consumption when Wearing Pantyhose.....	20
Simulation Supported Enhancement of the Performance of Thermoset Composite Actuators through Surface Modification of Shape Memory Alloy Wires and Development of Force-Optimized Woven Bindings.....	20
Developing Color-Changing Novel Dye for pH-Sensing in Wounds Dressing.....	21

Abstract of Oral Presentation: Session 3: Supply Chain/Sustainability

Disruptions and Adaptations: COVID-19's Impact on Textile Supply Chain Management	22
Fabrication of Antimicrobial Cotton Gauzes Immobilized with Alginate/ Glycerol/ Tannic Acid Blend.....	22
Bio-Mercerisation of Cotton to Improve Look, Handle and Dyeing Properties of Cotton	23
Continuous Mercerisation of Loose-Stock Cotton	23
Use of Rosa Canina Extractions in Textile Finishing	24
Dyeing Natural Fibers with Sappanwood.....	24
Biodegradation of Sheep Wool Intended for Plant Fertilization	25
Ecological Approaches in Yarn Dyeing	26
Retaining Colour in Regenerated Cellulose Fibres from Waste Textiles	26

Determination of the Degree of Fiber Mixing in Hybrid Yarns and Composites Based on Neural Networks	27
Investigation of Abrasive Pre-Treatment to Mitigate Length Loss during Mechanical Textile Recycling	27
Influence of Laccase Enzyme on the Biodegradability of Indigo Blue Dyed Fabrics	28
What is the Potential of Circular Economy in the Fashion and Textile Industry of Bangladesh?	28
Wearing Waste	29
A Standard Terminology for the Description of Fibrous Microplastics from Textiles	30
Textile Non-Regenerated Cellulose Microfibres are Pervasive, yet Overlooked, Potential Pollutants in Surface Waters: A Global Study	30

Abstract of Oral Presentation: Session 4: Future Fashion

Australian Cotton and the Global Apparel Supply Chain: Sustainability Issues in Context	31
Development of Fashion Design through Textile-Based 3D Printing.....	31
The Development of a Base Layer for a Sensorimotor Countermeasure Skinsuit: Garment Comfort and Mobility	32
Money Talks, Fashion Walks: A Textile Motif Exploration in Womenswear Using 1960s Rupiah Banknotes	33
The Aesthetic Factors Shaping Chinese Millennial Consumers' Purchase Intentions of Luxury Pyjamas: Implications for Future Design	33
Understanding the Marketing Strategies Used by Chinese Fashion Micro-Influencers to Improve Click-through Rates	34
The Intersection of Fashion and Climate: A Comparative Examination of the Australian Fashion and Textile Industry's Approach to Climate Change	34
Treatment and Characterization of Cosmetotextiles with Antibacterial Activity	35
Improving the Tear Strength of Low Weight Wool/Lycra Flannel Fabrics by Cordura Reinforcement	36
Exploring Internet of Things in Higher Education: Students' Perceptions of Cognitive Benefits and Immersive Learning Experiences	36
Performance Properties of Swimwear Fabrics Produced from Polyester and Recycled Polyester Fiber	37

Abstract of Oral Presentation: Session 5: Biomaterials

Development of Electrospun Bioactive Polycaprolactone/ T. Arjuna Nanofiber for Biomedical Applications.....	37
Designing of Antimicrobial Polyurethane Catheter for Prevention of Infections	38
Influence of Hydroxyapatite Particle Size on PHBV Fibers for Bone Tissue Engineering	39
Development of a Composite Mesh with Dual-Sided Properties for Hernia Repair	39

Woven and Knitted Scaffolds for Tissue Engineering Applications Using a PCL-PLA Nanofibrous Core-Sheath Yarn.....	40
--	-----------

Poster Abstracts

Preparation of Cellulose/Graphene Oxide Films Crosslinked by Vinyltrimethoxysilane	41
Enhanced Side-Illumination of Etched Polymer Optical Fiber (POF)-Incorporated Woven Polyester (PET) Fabrics.....	41
Recycling Carbon Fibre Scrap into Functional Nonwovens	42
Developing Training from Industrial Design to Innovative Design in Vietnam	42
Influence of Linear Density of Polyamide Plating Yarn on the Usage and Comfort Properties of Men's Cotton Socks	43
A Recycling Approach of Thermoplastic Polyurethane Films for 3D Printing Textiles	44
Effect Evaluation of Repeated Compression for Tactile Hardening of Cotton Pile Towel by Indentation Test.....	44
Computational Evaluation of Weaving Process on Mechanical Stiffness of Plain Weave Fabric	45
Lightness and Hue Dependencies of Color Difference Thresholds in Textiles under High-Illuminance Conditions	45
Comfort Properties and Antimicrobial Activity of Cotton and Nylon/Pu Knits Treated with Microcapsules Containing Sea Buckthorn Oil	46
Improved Horizontal Wicking Test for Incontinence Applications	46
The Durable Chitosan Finishing of Cotton and Cotton/Polyester Blended Fabrics.....	47
Development of Novel Multi-Layered Nanocomposite Scaffold for next-Generation Artificial Nerve Guide Conduit	48
Moving Smart Textiles towards Sustainability: Environmentally Friendly Protective Coating for Electrically Conductive Yarns	48
Fabrication Strategies towards Mxene-Based Multi-Functional Fibers.....	49

Poster Presentations

Preparation of Cellulose/Graphene Oxide Films Crosslinked by Vinyltrimethoxysilane.....	50
Enhanced Side-Illumination of Etched Polymer Optical Fiber (POF)-Incorporated Woven Polyester (PET) Fabrics.....	51
Recycling Carbon Fibre Scrap into Functional Nonwovens	52
Developing Training from Industrial Design to Innovative Design in Vietnam	53
Influence of Linear Density of Polyamide Plating Yarn on the Usage and Comfort Properties of Men's Cotton Socks	54
A Recycling Approach of Thermoplastic Polyurethane Films for 3D Printing Textiles	55

Effect Evaluation of Repeated Compression for Tactile Hardening of Cotton Pile Towel by Indentation Test.....	56
Computational Evaluation of Weaving Process on Mechanical Stiffness of Plain Weave Fabric	57
Lightness and Hue Dependencies of Color Difference Thresholds in Textiles under High-Illuminance Conditions	58
Comfort Properties and Antimicrobial Activity of Cotton and Nylon/PU Knits Treated with Microcapsules Containing Sea Buckthorn Oil	59
Improved Horizontal Wicking Test for Incontinence Applications	60
Performance Properties of Swimwear Fabrics Produced from Polyester and Recycled Polyester Fiber	61
The Durable Chitosan Finishing of Cotton and Cotton/Polyester Blended Fabrics	62
Development of Novel Multi-Layered Nanocomposite Scaffold for Next-Generation Artificial Nerve Guide Conduit	63
Moving Smart Textiles towards Sustainability: Environmentally Friendly Protective Coating for Electrically Conductive Yarns	64
Fabrication Strategies towards Mxene-Based Multi-Functional Fibers.....	65
Analyzing Fiber Dispersion in Three-Phase Hybrid Yarns Using KI-Based Image Analysis	66
