Keynotes

Image-Based Machine Learning of *In Situ* Captured Images of Die - Workpiece Interface in Forging

| | |
|---|---|
| R. Matsumoto, S. Kunisawa, Y. Nakamura and H. Utsunomiya..... | 3 |
|---|---|

A Process-Centered Approach of Lubrication and Wear in Cold and Hot Metal Forming

| | |
|--|---|
| L. Dubar, M. Dubar, A. Dubois and P. Moreau..... | 4 |
|--|---|

Plenaries

Biotribology of Biomaterials: Orthopedic, Ophthalmologic and Oral Applications

| | |
|----------------|---|
| H.W. Fang..... | 7 |
|----------------|---|

Novel Implant Solutions for Delaying Total Knee Replacement in Young Steoarthritis Patients

| | |
|-------------------|---|
| M. Ramezani | 8 |
|-------------------|---|

Session 1: Tribology in Additive Manufacturing

Additively Manufactured Ti6Al4V with Controlled Surface Structure as a Potential Material for Small Joint Implants

| | |
|---|----|
| L. Odehnal, M. Ranuša, M. Malý and M. Vrbka | 11 |
|---|----|

Exploring the Impact of 3D Printing Variables on Gear Surface Finish and Wear Behavior

| | |
|--|----|
| S. Montava-Jordà, S. García Carrasco, S. Sánchez-Caballero,A. De La Calle Salas and B. Eixerés Tomás | 12 |
|--|----|

Influence of Post Heat Treatment on Slurry Erosion Behavior of Wire Arc Additive Manufactured (WAAAdd) Inconel-625

| | |
|--|----|
| J. Singla, V. Singh, J. Singh and R.S. Rooprai | 13 |
|--|----|

NanoFW: Low-Force Linear Friction Welding Using Energetic Nanopowders

| | |
|---|----|
| C.Holene, D. Vrettos, P. Maginn, P.Groche and S.R. Schmid | 14 |
|---|----|

Tribological Study on Burnished Surface of Additive Manufactured C300 Metal

| | |
|--|----|
| A. Travieso-Disotuar, R. Jerez-Mesa, J.A. Travieso-Rodríguez and M. Vilaseca | 15 |
|--|----|

Session 2: Tribology in Machining and Forming Processes I

A Methodological Approach to Evaluate the Tribological Performance of Tool Surface Coating in Aluminum Forming Processes at High Temperatures

| | |
|---|----|
| P. Soranansri, A. Dubois, P. Moreau, T. Funazuka, K. Dohda and L. Dubar | 19 |
|---|----|

Dry Cold Forging of AISI316 Bars by Massively Nitrogen Supersaturated CoCrMo Dies

| | |
|------------------------------|----|
| T. Aizawa and T. Fukuda..... | 20 |
|------------------------------|----|

Dry Near-Net Forging of Titanium and Titanium Alloys via Massively Carbon Supersaturated Tool Steel Dies

T. Aizawa, T. Kihara and T. Shiratori 21

Effect of Normal Load and Bulk Strain on Real Area of Contact in Aluminum Sheet Forming

F. Jalali Moghadas, M. de Rooij, T. van den Boogaard and J. Hazrati 22

Effectiveness Analysis of Minimum Quantity Lubrication Technique for the Machining of Ti48Al2Cr2Nb Aluminide

E. García-Martínez, V. Miguel, A. Martínez-Martínez and J.A. Naranjo 23

Functional Tool Surfaces with Smooth Diamond-Based Tool Coatings for the Wear-Free Forming of Aluminum Sheets

P. Scholz, C. Stein, K. Weigel, M. Höfer, S. Baron, M. Frankiewicz, M. Cwikla and M. Kempa 24

Temperature Sensing in Cold Forging with Thermochromically Enhanced Lubrication Systems

C. Kuhn and P. Groche 25

Session 3: Tribology in Machining and Forming Processes II**About the Possibility to Assess Cutting Fluids Efficiency Using an Instrumented Tribological Approach**

V. Burnichon, C. Courbon, F. Salvatore, M.A. Cruz Garcia, U. Masciantonio and J. Rech 29

Analysis of Tool Wear Rate during a Rotation of Cutter in Fly Cutting

T. Matsumura, S. Tamura and T. Aiso 30

Evaluation of Hot Tribological Properties of AZ80 Alloy by V-Groove Friction Test

T. Funazuka, S. Hosaka, K. Yamazaki and K. Dohda 31

Improved Process Efficiency with Microtextured Blanking Punches Using MHP

P. Schumann, V. Arne and P. Groche 32

Optimization of Precision Boring Conditions to Enhance the Surface Integrity of a Landing Gear Component

W. Jomaa, J. Lévesque and A. Gakwaya 33

Theoretical Modeling of Intertwined Tool Flank Wear and Cutting Forces in Machining Nickel-Based Alloys

D. Ulutan 34

Session 4: Modeling, Simulation, and Experimental Techniques**Laser-Induced Fabrication of Pd Nanostructures: A Correlation Study between their Size and Plasmonic Properties**

C. Awada and F. Ruffino 37

Effect of Surface Texture Parameters of Zinc Coated Steel Sheet on its Formability

J. Hazrati 38

Enhancement of Mixed-Lubrication Models for Cold Rolling

L. Jacobs, V. Pater and M. de Rooij 39

Enhancing Epoxy Polymer Composites with Mxene Nanosheets for Improved Thermal Performance

A.A. Janjua, M.S. Saharudin, A.E. Okechukwu, M. Younas and N. Faisal 40

Tribo-Corrosion Wear Mechanisms of NiTiNOL60 Alloy in Aqueous Sodium Hydroxide

A. Okoani, A. Nand and M. Ramezani 41

Using Non-Linear Regression to Determine the Amount of Lubricant Needed to Reduce the Friction into a System

F.A. Ardelean and C.M. Dragan 42

Session 5: Environmentally Friendly Tribological Solutions

Bio-Inspired Surfaces for Friction Control and Energy Efficiency Purpose

J.S. Rudas, L.M. Ballesteros, E. Rave, C. Isaza and A. Toro 45

Comparison and Sustainability Enhancement of Oxide Coatings by Reactive and Non-Reactive Radio Frequency Magnetron Sputtering Technique

R.R. Srivastava, S. Ghosh and P.V. Rao 46

Development of Oil Free Lubricants for Cold Rolling of Low-Carbon Steel

L. Jacobs, D. Reche, V. Diegelmann, V. Colla, O. Toscanelli, M. Raulf, M. Schlupp, B. Smeulders, M. Cook and W. Filemon 47

Effects on Tool Life and Hole Quality through Application of Various Cooling Methods within Deep Small Hole Drilling of AISI 304L

J.M. Scholey, K.K. Wika, A. Wright and T.S. Sihra 48

Enhancing Machinability of Nimonic 90 Alloy by Micro-Texturing Based Solid Lubricant on AlTiN Coated Carbides: A Sustainable Approach towards Commercialization

G. Kumar, S. Ghosh and P.V. Rao 49

Session 6: Surface Engineering and Coatings

Acetone Polishing of 3D-Printed ABS Parts

A.D.L. Calle Salas, S. García Carrasco, F.J. Parres García, M.Á. Peydró Rasero and B. Eixerés Tomás 53

Dynamic Mechanical Properties and Corrosion Resistance of Epoxy Coatings Enhanced with Mxene and Diverse Nanofillers

M.S. Saharudin, N.A.C. Nasir, A.A. Janjua, A.E. Okechukwu, N.F. Haque and E.Z. Ahmad 54

Effect of Xenon Ion Irradiation on the Properties of AISI 316 Steel

P. Budzyński, M. Kamiński, Z. Surowiec and M. Wiertel 55

Exploring the Effects of Surface Modification on the Mechanical Properties of Biodegradable Microspheres for Application in Transarterial Embolization

I.C. Chen, L.H. Chen, Y.C. Chang and H.W. Fang 56

Influence of Microtextures on the Lubrication of Joint Implant Articular Surfaces Produced from Ti6Al4V

M. Ranuša, L. Odehnal, O. Kučera and M. Vrbka 57

Influence of PTFE as Thin Top Layer on Hydrophobicity and Wear Behaviour of HVOF Sprayed TiC+50%NiCr Coating on SS410 Steel

A. Bansal, V. Singh and A.K. Singla 58

Investigating the Corrosive Resistance of Ti-Al Coating on Structural Steel Component

T.Z. Deng, S. Ramhormozian, M. Ramezani 59

Mechanical Properties and Wear Performance of Multicomponent-And-Multilayered Hard Nitride Coatings on High-Entropy Alloys

Y.Y. Chang and H.Q. Feng 60

Micro-Raman Spectroscopic Study of the Tribology of AlCrN Coated Cemented Tungsten Carbide Pins Dry Sliding on Hardened Steel Discs

K.C. Solasa, A. Bhattacharyya, P.R. Choudhury and N.V. Venkataraman 61

Surface Wettability Response of Hydroxyapatite-Doped Coatings on Metallic Biomaterials: A Concise Review

I.A. Gul, A.M. Abdul-Rani, A. Ahmad, M.A. Amin, A.A. Aliyu and E. Garba 62

Session 7: Advanced Lubricants and Lubrication Techniques**Effect of Stress during Press-Fitting on Tribological Behavior of Self-Lubricating Composite Liners in Spherical Plain Bearings**

H.T. Chen, L.L. Zhu, X.G. Huang, J.J. Zhang and C.L. Hu 65

Effect of Micro-Dimples on Lubrication in Ironing of Stainless Steel

K. Kitamura, T. Makino and M. Nawa 66

Improvement in Surface Quality of Ironing Product Using Low-Viscosity Lubricant Oil

K. Asai, K. Kitamura, T. Nishi 67

Investigating the Potential Lubricating Mechanism of Alginate Acid and Carrageen in Orthokeratology Lenses

Y.C. Chang, C.Y. Su and H.W. Fang 68

Investigating the Protection of Conformational Change of Albumin by Polysaccharides in the Artificial Joint System

C.Y. Su and H.W. Fang 69

Graphene Nano-Lubricant for the Improved Rolling Contact Fatigue (RCF) Life of AISI 4140 Steel under Rolling with Slip Conditions

M.R. Ranju and D. Kesavan 70

Use of Liquid Lubricant with Glass Microspheres in Suspension to Permanently Improve the Tribological Behavior of PPS

S. García Carrasco, S. Sánchez-Caballero, M.A. Sellés Cantó, S. Montava-Jordà and A.D.L. Calle Salas 71
