Preface

Program

Oral Presentations

1st SESSION

Quantum Optomechanics Using Ultra Coherent Mechanical Oscillators	
T. Kippenbergh	3
Selected Applications of Internal Friction in Materials Science	
Q.F. Fang, M. Sun, X.Q. Liu, H.L. Ding, T.L. Chen, X.P. Wang and X.B. Wu	4
Mechanical Spectroscopy at High Temperature in New Ti-Al-W Intermetallic	
M.L. No, J.P. Monchoux, A. Couret and J.M. San Juan	5
Internal Friction Study of the Hydrogen-Defect Interactions in Cold-Worked Steel Alloys	
L. Vandewalle, M.J. Konstantinović, T. Depover and K. Verbeken	7

2nd SESSION

Internal Friction during Martensitic Transformation in Fe-Mn-Si-Co Shape Memory Alloys	
M. Pérez-Cerrato, L. Del-Río, J.F. Gómez-Cortés, I. Ruiz-Larrea, M.L. No, I.S. Golovin and J.M. San Juan	11
Improving the Damping Capacity of NiTiHf Alloys with Nanoscale Spherical Nb Phases	
S.W. Zhang, Q.A. Li, M.J. Jin, Y.T. Zhu and W.J. Lu	13
Ultra-High Damping during Superelastic Behavior at the Nanoscale	
J.F. Gómez-Cortés, M.L. No and J.M. San Juan	15
Damping in Micro-Pillars Arrays: Experimental and Simulation Approaches	
A. Abadín, J.F. Gómez-Cortés, M.L. No, E. Ruiz-Reina, E. González and J.M. San Juan	17
CO₂ Capture: To Address Environmental Challenges with the Development of Critical Methodologies	
S.A.E. Boyer	19
Ultrahigh Temperature Modulus and Internal Friction Measurement Based on a Differential Electromechanical Impedance Method	
Z.L. Wang, M.Y. Xie and F.X. Li	21
Study of the Thermoelastic Effect in GaN	
I. Tkalcec-Vajju, N. Grandjean and D. Mari	23

3rd SESSION

Nanoscale Biomechanical Characterisation and Recognition of Proteins	
A.J. Kulik, M. Lekka, K. Mikulska-Rumińska and W. Nowak	27
Strain-Dependent Damping of the Fast-Growing and Sustainable Paulownia Wood at Room Temperature	
J. Göken	29
Electro/Magneto-Elastic and Damping Effects in Ferroelectric/Ferromagnetic Materials	
F.X. Li, B.F. Liu and M.Y. Xie	31
Mobility, Clustering and Interaction with Domain Walls of O Vacancies in (Ba,Ca)(Ti/Zr)O₃	
F. Cordero, F. Trequattrini, P. Galizia, E. Mercadelli, P.S. da Silva Jr. and M. Venet Zambrano	33

4th SESSION

Possible Evidence of Sliding Ferroelectricity from an Elastic Anomaly in the 2D Van Der Waals $Ti_3C_2T_x$ MXene

F. Cordero, H. Pazniak, T. Ouisse, J. Gonzalez-Julian, A. Di Carlo, V. Soprunguk and W. Schranz

37

Magnetic Domain Wall Freezing in Spin Glass and Re-Entrant Spin Glass Transitions of Bulk Metallic Glasses

J. Torrens-Serra, M. Stoica and S. Kustov

39

Study of Thermally Activated and Transient Anelasticity due to Phase Transitions in Fe-27Ga Alloys

I.S. Golovin, V.V. Palacheva, A.A. Shcherbakov, J. Cifre, H. Roniger and D. Mari

41

Effect of O/N Additions on Internal Friction and Mechanical Properties of BCC NbTiVZr High-Entropy Alloys

M. Sun, X.G. Wang, X.Q. Liu, X.P. Wang, X.B. Wu and Q.F. Fang

43

Dynamic Mechanical Relaxation in High-Entropy Metallic Glasses

J.C. Qiao

44

5th SESSION

Internal Friction Characterization of Tungsten-Based Nuclear Materials for Fusion Applications

X.B. Wu, B.L. Zhao, M. Sun, W.B. Jiang, T. Hao and Q.F. Fang

49

Internal Friction Determination of the Atomic Diffusion Coefficients in γ -TiAl Intermetallics

J.M. San Juan, M. Oehring, H. Clemens and M.L. No

50

Change in Anelasticity of CrCoNi Medium Entropy Alloy by Annealing

H. Tanimoto and Y. Okayasu

52

Thermomechanical Stability and Damping Mechanisms in Multifunctional 3D-Printed PCL-Based Composites

F.D. Lambri, F.G. Bonifacich, O.A. Lambri, B. Weidenfeller, G.I. Zelada, M.L. Lambri, V. Recarte, V. Sánchez-Alarcos and J.I. Pérez-Landazábal

54

DMA/TMA Study of Relaxations in Metallic Glasses

V. Soprunguk and W. Schranz

56

6th SESSION

Mechanical Spectroscopy Data from Comet 67P

W. Arnold, M.M. Becker, H.H. Fischer, B. Ibrahim, M. Knapmeyer and H. Krüger

61

Twin and Dislocation (Micro) Plasticity: Temperature Scaling beyond Seeger Law

S. Kustov

62

Anelastic Skyrmion Dynamics in a Chiral Liquid Crystal

C. Bachmann, D. Mari and G. Gremaud

64

Mechanical Spectroscopy Study of High-Purity Nickel Single Crystals

A. Nastruzzi, D. Mari, I. Tkalcec-Vajju, J.C. Chen and M.A. Pouchon

66

7th SESSION

Loss Angle and Raman Measurements of High Index Glasses SF11 and SF66

V. Spagnuolo, A. Amato, J. Steinlechner, V. Martinez, H. Saint-Olive and G. Cagnoli

71

Optimisation of Low Mechanical Damping and Optical Loss Thin-Film Materials for Future Gravitational Wave Detectors

G. McGhee, S. Hill, P.G. Murray, S. Rowan, J. Steinlechner and I.W. Martin

73

Monitoring and Quantification of Ultrasonic Fatigue Damage in Metals Based on Internal Friction Measurement

B.F. Liu and F.X. Li

75

Posters

Mechanical Spectroscopy Study of the Relaxation Processes in Fe-Mn-Cr-Co-Ni Cantor High Entropy Alloy	
L. Del-Río, J.M. San Juan, G. Laplanche and M.L. No	79
Acoustic Investigation of Magnetic Viscosity and Domain Wall Fluctuations in Dysprosium Helical Antiferromagnet	
A. Sedda, E. Lahderanta and S. Kustov	81
Internal Friction in Thermally- and Stress-Induced Martensites of Fe-Mn-Si Functional Shape Memory Alloys	
B. Kustov, E. Lahderanta and J. Torrens-Serra	83
Magneto-Mechanical Damping and Phase Transformations in Iron-Based Alloys	
I. Tkalcec-Vaju, D. Mari, M. Kabchou and I.S. Golovin	85
Vortex Strain Glass in Type II Superconductors Evidenced in a Torsion Pendulum	
D. Mari and T. Ejikeme	87
Anelasticity due to Point Defects and Ordering in Fe-(Ga+Al) Alloys	
V.V. Palacheva, J. Cifre, H.W. Chang and I.S. Golovin	89
Single Twin Boundary Mobility in Domain-Engineered Ni-Mn-Ga Single Crystals in Acoustic and Macroscopic Experiments	
A. Saren, A. Sozinov, B. Kustov, K. Ullakko and S. Kustov	90
Using a Granular Materials to Dampen Sloshing in a Rocket Fuel Tank	
M.C.N. Roux, B.A.H. Meunier, L. Cordey and D. Mari	92
Influence of Polymer Matrix Stiffness on Multifunctional Composites Analysed by ROM and Halpin-Tsai Models	
F.D. Lambri, F.G. Bonifacich, O.A. Lambri, B. Weidenfeller, G.I. Zelada, M.L. Lambri, V. Recarte, V. Sánchez-Alarcos and J.I. Pérez-Landazábal	94
From the Maxwell's Equations of Lattice Deformations to the Description of the Universe by a «Crystalline Ether»	
G. Gremaud	96
