

Table of Contents

Preface and Organising Committee

Chapter 1: Civil Engineering

Application of Multiple Linear Regression Analysis for Compressive Strength Prediction of Compressed Stabilized Earth Blocks A. Hammas and M. Mahdad	3
Elastic Wave Propagation Characteristics of Periodic Track Structure in Urban Rail Transit P.C. Li, M. Abdel Wahab and Z.P. Zeng	4
Develop a Tool for Democratising Knowledge within Small and Medium Enterprises in Simulations C. Scott-Russell, S.M. Barrans and P. Hudson	5
The Local Radial Polynomials Method for Solving Laplace Equation W.C. Yeih, T.A. Chen and J.H. Chen	6
A Localized Multi-Level Method of Fundamental Solutions Applied to Steady Heat Transfer Problems C. Gáspár	7
Compact and Mobile Educational Aquaponics for Food Security and Sustainability H. Abdulmouti, Z. Skaf, W. Minhas, M. Saleh and N. Ismael Ibrahim	9
Damage Assessment of Girder Bridge Using Blood-Sucking Leech Optimizer N.N. Lan, N.L. Nguyen and M. Abdel Wahab	10

Chapter 2: Mechanical Engineering

Game-Theoretical Approach to Optimal Design V. Kobelev	13
A Meshfree Method for Nonlinear Deformation Problems Z.Y. Xue, L.H. Wang and M. Abdel Wahab	14
Investigation of the Effect of Axial Stress Ratios on Fretting Fatigue Crack Initiation and Propagation C. Wang and M. Abdel Wahab	15
Enhanced ANN Predictive Model Based on Blood-Sucking Leech Optimizer for Fatigue Life of Dovetail Joints J.F. Bai and M. Abdel Wahab	16
Numerical Modeling of the Effect of Fretting Wear on Fatigue Life of Steel Wires M. Imran and M. Abdel Wahab	17
Effect of Reentrant Auxetic Core on the Ballistic Response of Hemispherical Sandwich Shell Structure U. Hamid and M. Abdel Wahab	18
A Transfer Learning Method for Deep Drawing Force Y.J. Guo and M. Abdel Wahab	19
Finite Element Study on Strength Optimization of Joints with Functionally Graded Adhesives Y.A. Zhang and M. Abdel Wahab	20
Internal Failure Detection in Laminated Rubber Bearing Using Deep Learning Techniques Z. Adnan, J.H. Ho, A.B. Chai, H.C. How, T.Y. Chai and S. Kamaruddin	21
Performance Aspects and Error Analysis of the Finite Difference Method Applied to Functional Electric Stimulation A. Kuhar and B. Glushica	23
A Fuzzy Logic Based Fretting Fatigue Crack Initiation Analysis B. Ahmed, C. Wang and M. Abdel Wahab	25

A Modified Critical Distance Approach for Predicting Fretting Fatigue Life in Dovetail Joints	
Q.Q. Xiao and M. Abdel Wahab	26
A Study on Irradiation and Non-Isothermal Creep-Fatigue Behavior of Eurofer97 Steel Based on a Multi-Mechanism Coupling Model	
J.X. Liu, X.W. Wang and M. Abdel Wahab	27
Analysis of Factors Affecting Contact Stresses in Multi-Bolt Connections Using Finite Element Analysis	
M.P. Zheng, Z.F. Liu and M. Abdel Wahab	28
Investigation of Ballistic Behavior of Functionally Graded Sandwich Structures	
I. Bozkurt and M. Abdel Wahab	29
A Comparative Study of Creep-Fatigue Damage Prediction Models for Nickel-Based Superalloys	
K. Fan, J.B. Yan, P. Liu, L.H. Huang, Z. Yang, Y. Yuan and M. Abdel Wahab	30
Two-Roller Vertical Flow Forming Process for EN36B Steel	
A.C. Kocabiçak, K. Nelson and M. Abdel Wahab	31
Unified Micromechanics of Matrix Composites	
V. Buryachenko	33
X-Ray Diffraction (XRD) Characterization and Photocatalytic Performance Testing of the PDMS/TiO Nanocomposites	
B. Nadir, A. Bessi, M. Mohamed, T.R. Ahmed and B. Amel	35
