

Table of Contents

Preface, Committee	iii
Programme Overview	v
Monday, September 2nd - Techniques Session	
Survey of Defects in some Spintronics Materials by Spin-Polarized Positrons	
A. Kawasuso	3
Experiments on Positron Moderation Efficiency of Tungsten Using a Magnetic-Bottle Trap	
A.B. Serban.....	4
Monday, September 2nd - Semiconductors Session	
Detection and Identification of Vacancy Defects in Antimony Selenide	
D.J. Keeble.....	7
Point Defects in GaN Single Crystals and Thin Films	
J. Čížek.....	8
Impact of Proton Irradiation on Donor Centers in Silicon for Quantum Technologies in Space: Challenging Issues in Identifying of Point Defects	
N.Y. Arutyunov.....	9
Monday, September 2nd - Perovskites Session	
Evidence of Different Positron Annihilation Quantum States in Methylammonium Lead Iodide Depending on Preparation	
C. Corbel	13
Lifetime Spectroscopy Experiments and Ab-Initio Calculations on Single Crystalline $\text{CH}_3\text{NH}_3\text{PbBr}_3$	
J. Schmidt.....	15
The Nature of the Bulk Defect Formation for Photonic Annealed FAPbI_3 Halide Perovskite Thin-Film	
S. Sanchez	16
Vacancy Defects in Hybrid Metal Halide Perovskites	
A. Singh	17
Monday, September 2nd - Irradiated Materials / Metals and Alloys Session	
Vacancy Defects Distribution in Self-Ion Irradiated Molybdenum	
Z. Hu	21
Slow Positron Beam Study of Lithium Implanted Boron Carbide	
N. Djourelov.....	22
Tuesday, September 3rd - Semiconductors Session	
Identification and Reversible Optical Switching of NV^+ Centers in Diamond	
M. Dickmann	25

Point Defects in Ga- and B-Doped Ge

P. Amoroso..... 26

Vacancies and Dopants in Epitaxially Grown Silicon

R. Ferragut 27

Tuesday, September 3rd - Porous Materials / Liquids / Techniques Session**Influence of Environmental Conditions on Surface Groups of Zeolite-Based Molecular Sieve**

G. Evans 31

Melting Front of Ice: What Do the Positrons can Say about it?

S.V. Stepanov..... 32

Development of a Slow Positron Beamlne Using a 30 Mev L-Band LINAC

A. Kinomura..... 33

Tuesday, September 3rd - Theoretical Session**Can Coincidence Doppler Be Used for Surface Analysis?**

A. Weiss 37

Theoretical Study on Conformer-Dependent Positron Binding Properties of Glycine

D. Yoshida 38

Quantum Monte Carlo Study on Positron Binding to Atomic Anion Dimers

M. Tachikawa..... 39

Tuesday, September 3rd - Metal Oxide / Techniques Session**Positron Annihilation Spectroscopy of La-Doped Uranium Oxide**

D.V. Popov..... 43

Characterization of LiNiO₂ Cathodes Using Positron Annihilation Lifetime**Spectroscopy**

X. Li 44

Coincidence Doppler Broadening Spectroscopy of Single Layer Graphene on Copper Using a Variable Energy Positron Beam

H. Mahdy 45

Positron Lifetime Changes in Pure Iron during Tensile Deformation and after Unloading Tensile Stress Measured by Gamma-Ray-Induced Positron Annihilation Lifetime Spectroscopy

A. Yabuuchi 46

Wednesday, September 4th - Techniques Session**The High-Intense Pulsed Positron Source MePS - Recent Developments and Future Plans**

M. Butterling 49

ReMade @ ARI: Accelerating the Circular Economy through Advanced Materials Research

E. Hirschmann..... 50

Investigation of In-Flight Annihilation of Positrons Using Coincidence Doppler Broadening Spectroscopy

L. Chryssos..... 51

Wednesday, September 4th - Bio-materials / Biology Session

Free Volume in Complex Lyophilized Formulations by Positron Lifetime Measurements

L. Chiari 55

Transforming Biomedical Imaging: Will Positron Annihilation Spectroscopy be the Promise of Preventive Diagnostics?

C. Conci 56

A New Approach for the Study of Cell Monolayers with Positron and Positronium Annihilation Spectroscopy Leveraging on Cell-Sheet Technology

M. Vicini 57

Dose Absorption in Living Cells During Positron and Positronium Annihilation Spectroscopy Studies

P. Folegati 58

Wednesday, September 4th - Metals and Alloys Session

Effect of Re on Irradiation Induced Defect Formation in W Alloys

Y. Nagai 61

Operando Positron Annihilation Lifetime Spectroscopy for Defect Detection in Hydrogen Embrittled Iron

K. Yamamoto 62

Diffusion Kinetics of Vacancies and Self-Interstitials in Multi-Principal Elemental Alloys

E. Lu 63

Wednesday, September 4th - Metals and Alloys / Techniques Session

Microstructure Analysis of Xe²⁰⁺ Irradiation and Postirradiation Corrosion of Zr-4 and Zr-1Nb Alloys by Positron Annihilation

Y.C. Wu 67

Vacancy-Type Defects just below the Intergranular Fracture Surface of Pure Ni by Positron Probe Microanalyzer

H. Abe 68

Recent Development of New Experimental Technologies for Positron Annihilation Spectroscopy at University of Science and Technology of China

H.J. Zhang 69

Thursday, September 5th - Techniques / Metals and Alloys Session

Towards the Investigation of Positronium Interactions in Laser-Written Buried Microcavities with the New Bunched Positron Beam at the Antimatter Lab of Trento

S. Mariazzi 73

Real Time Monitoring of Defect Evolution and Relaxation by *In Situ* Positron Annihilation Spectroscopy (iPAS)

F.A. Selim 74

TwinPALS: A Digital Twin for Laboratory-Based Positron Annihilation Lifetime Spectroscopy

T.E.M. Staab 75

Thursday, September 5th - Metal Oxides Session**Ion Driven β - to γ -Ga₂O₃ Phase Transition and Resulting Defect Microstructure**

I. Makkonen 79

Phase Transition and Structural Defects in Complex Iron-Containing Oxide Glasses Probed by Positron Annihilation

T. Kavetskyy 80

Layered Structure of Amorphous PbO Photoconductive Films Revealed by Variable-Energy Positron Annihilation Spectroscopy

J.M. Gaudet 82

Positron Drift in the Oxide and the Depletion Region of a Metal-Oxide Silicon Device Biased to Accumulation, Depletion and Inversion

R. Helm 83

Thursday, September 5th - Theoretical Session**Primary Thermodynamic Defects in Al+H and Feal Systems**

J. Kuripach 87

Unveiling Ultra-Fast Charging Mechanisms in Graphene-Layered Cathodes through Positron Annihilation Spectroscopy and Density Functional Theory

M.Y. Zheng 88

Diffusion-Reaction Model of Positron Trapping and Annihilation for Complex Defect Pattern

P. Brunner 89

Thursday, September 5th - Techniques Session**Variability in Feb Pair Association Rates in Silicon under Ultrasound Loading; Effects of Acoustic Wave Types**

O. Olikh 93

Positron Annihilation Spectroscopy in the H-Embrittled Iron-Based Materials

M. Fujinami 94

Poster Session - Metal Oxides**Decoupling the Interplay between Structural Defects and Luminescence Properties in Metal-Ion Co-Doped Gadolinium Vanadate**

A.G. Attallah 97

Characterization of Defects in TiO₂ Films Prepared by Pulsed Laser Deposition

O. Melikhova 98

Probing the Defects in Nd³⁺-Substituted Bismuth Ferrite Nanocrystallites

S. Mukherjee 99

Positron Annihilation Lifetime Spectroscopy for the Microstructural Behavior of NIR-Driven Photocatalytic Nanoparticles

J.D. Liu..... 100

Poster Session - Perovskites

Positron Annihilation Studies of CsPbBr₃

A. Singh 103

Poster Session - Techniques

Upgrading the Coincidence Doppler Broadening Spectrometer at FRM II

D.R. Russell 107

Lifetime Assessment Model of Positron Annihilation for the Evolution of the Relevant Defects under Fusion Environment Simulation Experiments

V. Krsjak 108

High-Temperature Portable PAS-Oriented Sample (HIPPOS) Chamber

G. Evans 109

Model for Analyzing Positron-Electron Annihilation Spectra from Short Positron Bursts Containing many Positrons

G.G. Cecchini..... 110

Micrometer Positron Beam at the Scanning Positron Microscope (SPM)

J. Mitteneder..... 111

Positron Annihilation in PTFE by Using PALSfit and Scilab Programs

H.A. Al-Droubi 112

The Time Separation Ability (FWHM) of Exponential Gaussian Function Used in Positron Annihilation

A.M. Soufan..... 113

Towards the Formation of Ps: First Stability Analysis by using Photoelectric Effect

M. Bayo and A. Galanti 114

Poster Session - Porous Materials, Polymers, Ice and Liquids

Free Volumes in Electron-Irradiated Biodegradable Polymers Using Positron Annihilation Lifetime Spectroscopy

K. Fedus 117

Metal Powders Study Using Conventional Positron Annihilation Spectroscopy

M.W. Halimi 118

Poster Session - Metals and Alloys

Onset of Vacancy Formation in Strained Al Alloys Studied by *In Situ* PALS

L. Mathes 121

The S-Phase Formation in a High-Purity Al-Cu-Mg Alloy Monitored by Truncation during Heating-up

T.E.M. Staab 122

Defects in Materials: Limitations of the Trapping Model - The Influence of Corrupt Components in Positron Lifetime Spectra

T.E.M. Staab 123

**Effect of Local Chemical Order on Vacancy Diffusion in NiCoCr Medium Entropy
Alloys**

X. Gui..... 124

Keyword Index 125
