

Table of Contents

Preface

Table of Contents

Chapter 1: Diamondoid Hydrocarbons

1. Introduction	3
2. An Introduction to Diamondoids	4
3. Higher Diamondoids in Oil	7
4. Properties of Diamondoids	10
5. Conclusions	21
References	22

Chapter 2: Carbon Nanotubes as Electron Sources

1. Introduction	29
2. The Field Emission Process	31
3. Carbon Materials for Field Emission	33
4. Motivation for Carbon Nanotube Emitters	36
5. Growth of Carbon Nanotubes	40
6. Field Emission Devices that Utilize Carbon Nanotubes	43
7. Summary	57
References	58

Chapter 3: Nanocrystalline Diamond Coatings for Advanced Acoustic Devices

1.Introduction. 2.Diamond Acoustic Devices	67
3. Thickness Shear Mode Biosensors (QCM)	70
4.Towards the Diamond TSM Sensor	71
5.Experimental Methods. 6.Results and Discussion	72
7. Conclusions	78
References	79

Chapter 4: Deposition of Nanocrystalline Diamond by Ar/H₂/CH₄ Microwave Discharges

1. Introduction	85
2. NCD Deposition Process	86
3. NCD Film Characteristics	88
4. Moderate Pressure Ar/CH ₄ /H ₂ Plasma Characteristics	97
5. Summary and Conclusion	106
References	108

Chapter 5: Growth, Properties and Application of Thick Self-Standing MWCNT Blocks

1. Introduction. 2. Thermal CVD Growth of CNTs from Solid Precursors	113
3. Characterization of MWCNTs Structures	121
4. MWCNTs Purification and Functionalization	135
5. Summary. Acknowledgements	138
References	139

Chapter 6: Chemical Vapour Deposition – A Route to Microcrystalline, Nanocrystalline, Ultrananocrystalline and Single Crystal Diamond Films

1. Introduction	147
2. Microcrystalline Diamond Films	149
3. Single Crystal Diamond Films	158
4. Nanocrystalline Diamond Films	162
5. Ultrananocrystalline Diamond Films	166
6. Conclusions. 7. Acknowledgements. 8. References	169

Chapter 7: Synthesis, Atomic Structures and Properties of Carbon Nanostructured Materials

1. Introduction	179
2. Synthesis Methods. 3. Metallofullerenes	181
4. Carbon Onions and Nanotubes	187
5. Carbon Nanocapsules	193
6. Properties of Carbon Nanomaterials	196
7. Summary	203
Acknowledgment. References	204

Chapter 8: Chemical Vapour Deposited Diamond for Thermoplastic Injection Moulds

1. Introduction	211
2. Thermoplastic Injection Moulding and Tools	213
3. Polycrystalline Diamond Coatings	215
4. Diamond Deposition on Steel: Detailed Review	221
5. Performance of Diamond Coated Mould Tools	229
6. Conclusions	251
References	252

Chapter 9: Carbon Nanotubes/Polymer Composites for Biomedical Applications

1. Introduction	257
2. Carbon Nanotubes-Ultrahigh Molecular Weight Polyethylene (UHMWPE) Nanocomposites	262
3. Carbon Nanotubes-High Density Polyethylene (HDPE) Nanocomposites	266
4. Carbon Nanotubes - Polymer Blend (UHMWPE-HDPE) Nanocomposites	269
5. Carbon Nanotubes - Polymethylmethacrylate (PMMA) Nanocomposites	271
6. Carbon Nanotubes - Polyetheretherketone (PEEK) Nanocomposites. 7. Other Carbon Nanotubes - Biopolymer Nanocomposites	273

8. Prediction of Mechanical Properties of Nanocomposites	275
9. Conclusions	278
Acknowledgement. References	279

Chapter 10: Nanostructured Coatings

1. Introduction	287
2. Design of Nanocomposite Coatings for Optimal Properties	289
3. Structure of Nanocomposite Coatings	292
4. Mechanical Properties of Nanocomposite Coatings	300
5. Deformation Behavior of Nanocomposite Coatings	307
Conclusions	317
References	318
Appendix 1	319
Appendix 2	321
