## Preface, Committee and Sponsors

## Chapter 1: Materials Engineering and Technologies

|                                                                                                                                                                                                                              |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Analysis of Surface Roughness in Micro Milling of Ti-6Al-4V Titanium Alloy</b><br>D. Baldo, S.L.M. Ribeiro Filho, C.H. Lauro, A.C. dos Santos Delfino and L.C. Brandao                                                    | 3  |
| <b>The Effect of Holding Time under Heat Treatment on the Properties of T92 Steel Welding Joint</b><br>D.X. Yang, L. Yang and A.G. Huang                                                                                     | 7  |
| <b>A Study on Recycling of Paper Sludge and Steel Slag Based on Circular Economy</b><br>J. Liu, H.Z. Wu, Y.M. Cao and C.L. Yin                                                                                               | 13 |
| <b>Analysis of FRP/Concrete Interface Creep Using Fractional Derivative Rheological Model</b><br>X.M. Wang and C.W. Zhou                                                                                                     | 18 |
| <b>Experimental Study on Reinforced Concrete Framework that Reinforced by Steel Tube Concrete Wing Wall</b><br>S.W. Zhang, G.B. Zhang and Y.C. Chen                                                                          | 22 |
| <b>Magnetron Sputtering Preparation of Diamond-Like Carbon Film Adhesion Characteristics Research</b><br>D.S. Wang and Q.L. Li                                                                                               | 28 |
| <b>Mechanical Engineering Polymer Materials Research</b><br>L.Q. Ma                                                                                                                                                          | 33 |
| <b>New Catalysts of Methanol Oxidation into Formaldehyde</b><br>A.A. Zaripova, V.S. Yemelyanova, B.T. Dossumova, T.V. Shakiyeva, U.N. Dzhatkambayeva, E.Z. Aybasov and E.M. Shakiyev                                         | 37 |
| <b>Photoelectric Property Measurement of Organic Materials Based on TOF Method</b><br>Z.S. Feng, X.M. Li, T. Zhao and C.Y. Tian                                                                                              | 42 |
| <b>Preparation and Characterization of a High-Efficient Potassium Adsorbent <math>H_8Nb_{22}O_{59} \cdot 8H_2O</math></b><br>C. Wang, P.F. Cao and X.L. Zhang                                                                | 46 |
| <b>Strength Properties of Aluminum Strips Subjected to Complex KOB0 Deformation</b><br>W. Bochniak, M. Lagoda, A. Brzostowicz and M. Prokopowicz                                                                             | 50 |
| <b>Study on Aqueous Polymer Isocyanate Adhesive Pressing Changbai Mountain Abies NEPHROLEPIS Furniture Parts</b><br>X.Y. Niu                                                                                                 | 54 |
| <b>Sulfur-Extended High-Performance Green Paving Materials</b><br>V. Gladkikh, E.V. Korolev, O.I. Poddaeva and V.A. Smirnov                                                                                                  | 58 |
| <b>Synthesizing Process of Prepared Ultrafine Alumina Powder by Ammonia Precipitation Method</b><br>L.Y. Wang and N. Zhang                                                                                                   | 62 |
| <b>The Effect of the Substitution Position of Nitrogen Atoms on Copolyimide Properties</b><br>Y.H. Li and R.Z. Jin                                                                                                           | 66 |
| <b>The Influence of N Content on the Microstructure and Mechanical Property of Low Cost Q345B</b><br>X.G. Xiong, X. Luo and X.Y. Ye                                                                                          | 70 |
| <b>The Principle and Application of Plasma Surface Treatment Technology</b><br>F.Y. Yuan                                                                                                                                     | 75 |
| <b>Reclaim of Nitrous Gas Produced in the Production of Adipate</b><br>L.J. Xiang and S.K. Chen                                                                                                                              | 79 |
| <b>Effect of Carbonization Temperature on the Elastic Modulus of Resin Carbon</b><br>T.F. Ma, X.F. Wang and F.L. Yang                                                                                                        | 83 |
| <b>Ferri-Magnetic Sorbents of Heavy Metals and Radionuclides on Base of Humates, Isolated from Oxidized Coals</b><br>Z.K. Kairbekov, V.S. Yemelyanova, T.V. Shakiyeva, B.T. Dossumova, U.N. Dzhatkambayeva and E.M. Shakiyev | 88 |

|                                                                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Modeling and Simulations on CO<sub>2</sub> Storage Using Graphene</b><br>Y.T. Chen and Y. Chan                                                                                                                                           | 95  |
| <b>Numerical Investigations on Characteristics of Methane-Air Premixed Flame</b><br>Y. Su and N. Wang                                                                                                                                       | 99  |
| <b>The New Methods of Deep Processing of Oil Residues in Conjunction with Shales</b><br>Z.K. Kairbekov, A.S. Maloletnev, V.S. Yemelyanova, Z.K. Myltykbaeva and B.B. Baizhomartov                                                           | 103 |
| <b>Using of Microspheres of Power Ashes for Gases Cleaning from Sulphur Dioxide</b><br>V.S. Yemelyanova, H. Kurokawa, B.T. Dossumova, Z.K. Kairbekov, T.V. Shakiyeva, Z.K. Myltykbaeva, U.N. Dzhatkambayeva, E.M. Shakiyev and E.Z. Aybasov | 110 |
| <b>Research on the Improving of Warm Mix Asphalt Technology by Adding Organic Viscosity-Reducers</b><br>T. Li, Y.P. Yin, L.N. Gao and H.X. Chen                                                                                             | 118 |

## **Chapter 2: Applied Mechanics, Geo Science, Building, Structural and Civil Engineering**

|                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Building the Simple Model of Bridge Reinforced Shallow Foundation</b><br>H. Zhang, Y.C. Ni and L. Jiao                                                                                  | 127 |
| <b>Research on Optimizing Parameters for Suppressing Vibration of MSCSS under Earthquake Excitation</b><br>T. Cai, X.A. Zhang, L. Ding and K.P. Cheng                                      | 131 |
| <b>Research on Stiffness Damage of Simply Supported Beam after Fire</b><br>D.F. Zhao, M. Liu, X.R. Song and D. Wang                                                                        | 135 |
| <b>Study of Simulation the Different Heating End for Thermal Environment in Atrium in Passive Buildings</b><br>S.J. Fu, S.Y. Zhao, Y. Jin and Y.X. Liu                                     | 140 |
| <b>Affect the Linkage Vibration Characteristic Parameter Analysis and Research</b><br>H.L. Li                                                                                              | 144 |
| <b>Effect of Chemical Admixtures on the Strength of Dian Chi Peat Soil</b><br>X.Q. Dou, M.S. Wang, C.H. Li and Q.Q. Guan                                                                   | 148 |
| <b>Evaluation of Service Performance of Recycled SBS Modified Asphalt Pavement</b><br>Y.Y. Wang and L. Sun                                                                                 | 152 |
| <b>Formation Mechanism and Treatment of the Mudstone Landslide of Xi'an-Baoji Expressway, China</b><br>Z.B. Wang                                                                           | 156 |
| <b>Low Reversed Cyclic Loading Test for New Precast Concrete Beam to Column Connection</b><br>J.B. Yu, Z.X. Guo and D.Z. Guan                                                              | 160 |
| <b>Study on the Creep Parameters of Salt Rock Constitutive Function</b><br>H.P. Zhang, Y. Jin and L. Ma                                                                                    | 166 |
| <b>Tunnel Face Stability Study in Soft Shallow Tunnel</b><br>J. Du, Z.R. Mei and Y.Z. Chen                                                                                                 | 170 |
| <b>With Different Axial Compression, the Finite Element Analysis of Concrete Frame Column that Reinforced by Assemble Inclined Web Steel Truss</b><br>S.W. Zhang, Y.C. Chen and G.B. Zhang | 177 |
| <b>A Study on the Regulations for Inspection Method of High-Rise Building Exterior Wall Tile in Taiwan and Japan</b><br>C.T. Liao, C.L. Weng and Y.S. Fang                                 | 183 |
| <b>Comparative Analysis of Sino-Foreign Wind Load Standard</b><br>C. Li                                                                                                                    | 187 |
| <b>Comparative Study on the Hysteresis Performance of the Metal Rubber Vibration Isolating Bearing with Different Height-Width Ratio Parameter</b><br>Y.G. Zhou and J. Jiang               | 191 |
| <b>CWR Study of the Mechanical Properties of the Finite Element Method-Based Bridge Vertical Plate Non-Ballasted Track</b><br>Y.T. Shen                                                    | 195 |
| <b>Development Geo-Seepage Models for Solving Seepage Problems of Large Dam's Foundations, on an Example of ANSYS Mechanical APDL</b><br>N.A. Aniskin and A.S. Antonov                     | 198 |

|                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Low Atmospheric Pressure on Air Content of Fresh Concrete</b><br>X.F. Li, Z. Fu and Y.X. Hui                                                                  | 202 |
| <b>Evaluation Model of Bridges Health State Based on DHNN</b><br>M. He, R.G. Hu, S. Le and L. Chen                                                                         | 207 |
| <b>Experimental Research on Dynamic Behavior of the Masonry Pagoda Based on Soil-Structure Interaction</b><br>J.L. Yuan, L. Rong and H. Fan                                | 212 |
| <b>Experimental Study on Seismic Behavior of Recycled Aggregate Concrete Torsion Beams with ABAQUS</b><br>J.L. Fu, B.K. Liu, J.W. Ma and H. Zhou                           | 220 |
| <b>Experimental Research on Improvement of Railway Subgrade Loess Fills Using Lime in Northwest China</b><br>X.Y. Liu, Y.H. Yang and G.Y. Xu                               | 226 |
| <b>Exploring the Traditional Adobe Dwellings in Hexi Corridor, Gansu Province</b><br>J. Li and J. Yang                                                                     | 233 |
| <b>Improving the Systems of Compensation for Land Access for Mineral Exploration in China</b><br>S.Q. Zhang                                                                | 237 |
| <b>In Northern Shaanxi Soil Nailing Wall Slope Protection Design</b><br>X.Q. Wu                                                                                            | 242 |
| <b>Probabilistic Approach to Stability Analysis of a Reinforced Concrete Retaining Wall</b><br>D. Pustka                                                                   | 248 |
| <b>Research on Passive Planning and Design of Green Campus in Subtropical Region</b><br>J. Li, D.W. Xiao, J. Fu, D.D. He and C. Wei                                        | 252 |
| <b>Research on Static Load Tests of Damaged Bridge Strengthened with Pre-Stressed HFRP</b><br>C.N. Cai, S. He, L.N. Liu and S.K. Ou                                        | 258 |
| <b>Stochastic Three-Dimensional Joint Geometry Model and the Properties of REV for a Jointed Rock Mass</b><br>W.H. Tan, Z.H. Sun, N. Li and X.H. Jiang                     | 266 |
| <b>Studding of Geo-Seepage Mode of Large Dams Foundations with Allowance Failure Antifiltering Elements</b><br>N.A. Aniskin and A.S. Antonov                               | 272 |
| <b>Study of the Crack Propagation Mechanism in the Process of Projectile Penetration into Target</b><br>H. Xu, J. Yang and Y. Liu                                          | 276 |
| <b>Study on Bridge Deck Link Slabs of Simply Supported Girder Bridges</b><br>H.Y. Liu, S.C. Zhao and L. Li                                                                 | 280 |
| <b>Study on Deformation Law of Longitudinal Seam between Shield Tunnel Segments under Staggered Seam Assembling</b><br>Z.F. Hu and X. Wen                                  | 286 |
| <b>Study on Seismic Performance for Long-Span Continuous Rigid Frame Bridge</b><br>Y.X. Hui, W.J. He and X.F. Li                                                           | 292 |
| <b>Subway Tunnel Cross-Section Surveying Based on Ground 3D Laser Scanning Data</b><br>X.G. Cao, J.L. Yang, X.L. Meng and W.C. Zhang                                       | 296 |
| <b>The Crack Control of Reinforced Concrete Structures</b><br>G. Wang                                                                                                      | 300 |
| <b>The Influence of Different Reynolds Number on Flow across Three Tandem Cylinders with Different Diameter</b><br>X.J. Gao, H.Q. Zhang, H.C. Dai and G.W. Rong            | 304 |
| <b>The Study of the Construction Waste Brick Powder's Activity</b><br>C.Z. Xue, A.Q. Shen, Y.T. Chang and D. Liang                                                         | 309 |

| <b>Acousto-Optic Double Control Automatic Alarm and Lighting Circuit Design</b><br>Z.J. Zhang                                                    | 1053 |
| <b>Design and Implementation of Smart Home System Based on RFID Technology</b><br>W. Xu and D. Li                                                | 1057 |
| <b>Design of Computer Vision and Image Processing Technology Based Car Keys Tooth Identification Detection System</b><br>H.Y. Li                 | 1061 |
| <b>Guard against Theft Detector Design Based on Single Chip Microcomputer Signal Processing Technology</b><br>X.F. Li                            | 1064 |

## **Chapter 6: Engineering Management, Business and Economics**

|                                                                                                                                                |      |
|------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Problems and Optimization Recommendations Exist in Manufacturing Logistics Cost Accounting</b><br>Y.H. Dai and X.N. Ge                      | 1071 |
| <b>Study on Contract Credit Structure of Construction Project Based on SEM</b><br>H. Liu and Z. Li                                             | 1075 |
| <b>The Application of Logit Model in College Students' Financial Investment Behavior</b><br>S.Y. Wang                                          | 1080 |
| <b>Based on the Fault Tree of Public Housing BOT Project Risk Assessment</b><br>W. Zhang and Y.H. Shang                                        | 1084 |
| <b>Based on the Coordinated Development of CGE Model of Affordable Housing and Commercial Housing Research</b><br>M. Sun and Y. Zhou           | 1089 |
| <b>Study on the Influencing Factors of the Western Provincial Capital Cities' Housing Price Differences</b><br>X.L. Liu and J.P. Yang          | 1093 |
| <b>Using TAM to Explore Vocational Students' Willingness to Adopt a Web-Based BIM Cost Estimating System</b><br>Y.W. Wu, I.T. Hsu and H.Y. Lin | 1098 |

|                                                                                                                                                                                   |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Design and Implementation of Enterprise Invoicing Management System</b><br>Y.Y. Tang and S.Y. Li                                                                               | 1103 |
| <b>Based on Asp Sales Management System Design and Implementation</b><br>B. Liu                                                                                                   | 1107 |
| <b>Chinese Enterprises in the Competition in the International Project Bidding Analysis</b><br>Y.H. Li                                                                            | 1111 |
| <b>Construction Project Costs Management Research</b><br>L. Liu                                                                                                                   | 1115 |
| <b>Knowledge System Development Based on the Primitives of Sheet Metal</b><br>X.F. Zhang, Y. Cao and Y. Bai                                                                       | 1119 |
| <b>An Analysis of Economic Management Mode under the Network Information Resources</b><br>Y. Lai, H. Dang and J.H. Yan                                                            | 1123 |
| <b>Analysis of the Formation Path of the Residual Value Risk in Public Private Partnership Projects Based on SEM Method</b><br>T.L. Teng, J.F. Yuan and Q.M. Li                   | 1126 |
| <b>Build on Strength of China Aerospace to Serve Social Development and Economic Construction</b><br>Q.W. Cheng                                                                   | 1131 |
| <b>CAFTA Construction Trades Effect Analysis to our Country</b><br>P. Zhang                                                                                                       | 1134 |
| <b>City Public Facilities System's Design and Implementation under the Horizon of Environment Behavior</b><br>H.P. Liu                                                            | 1138 |
| <b>Competitiveness of Nano Technology</b><br>T. Tambovceva and A. Tambovcevs                                                                                                      | 1142 |
| <b>Design and Construction of Electronic Government Affair System Scheme</b><br>X.R. Wang                                                                                         | 1149 |
| <b>Design and Implementation of Coal's Production and Business Planning of Management System Based on B/S</b><br>Q. Mu and Q. Niu                                                 | 1153 |
| <b>Discussion about the Influence of the Computer Information Technology on the Logistics Management</b><br>H. Dang, J.H. Yan and Y. Lai                                          | 1158 |
| <b>Discussion on the Synergy Mechanism of Diversified Coal Enterprises</b><br>X.M. Sun and X. Luo                                                                                 | 1162 |
| <b>Enterprise Equipment Category of Fixed Assets Evaluation and Management</b><br>L.R. Wang                                                                                       | 1166 |
| <b>Hidden-Trouble Safety Management and Modification Research of Mechanical Manufacturing</b><br>L. Fang, J.F. Li and L.L. Si                                                     | 1169 |
| <b>Logistics Enterprise Management Analysis of Basic Data Mining Technology</b><br>Y.J. Hua, L. Yan and D. Hui                                                                    | 1173 |
| <b>Monitoring Model on the Supply &amp; Demand Equilibrium of Housing Provident Fund Market – Taking Shanghai and Xi'an for Instances</b><br>B. Guo and Y. Wen                    | 1177 |
| <b>Research and Design of the Coal Mine Employee Management System Based on the Mobile Internet</b><br>J. Li                                                                      | 1183 |
| <b>Research of Factors of Regional Product Quality Based on Gray Relational Analysis</b><br>S.B. Wang                                                                             | 1189 |
| <b>Research on the Long-Term Memory of Commodity Housing Price Volatility Based on the FIGARCH Model</b><br>F. Lan and B.H. Chen                                                  | 1194 |
| <b>Statement of the Main Challenges of the Real Estate Market in China</b><br>C. Fan, P. Chang and R.H. Xie                                                                       | 1199 |
| <b>Study on Income Heterogeneous Expectations and Commercial Housing Price Fluctuations – Analysis Based on Regions of the East and the West in China</b><br>F. Lan and Y.C. Wang | 1203 |

|                                                                                                                                                                       |      |
