ISBN(softcover): 978-3-03835-013-2 ISBN(eBook): 978-3-03826-394-4

Table of Contents

Preface and Organizing Committee

Chapter 1: Materials Science and Materials Processing Technology

Precise Determination of Band Gap Naturally via Absorption/Reflectance/Transmission Spectra
Y.J. Liu and N. Zhu 3

Preparation and Rheological Characterization of Cross-Linked Dialdehyde Carboxymethyl Cellulose
W.H. Li, J. Ye and J. Xiong 9

The Curing Behavior of Organosilicone Materials for Large-Power LED Packaging
M.S. Yang, R. Yan, Y.H. Yan and Y. Liu 15

The Status and Development of ECAP
Y.X. Zhu, X.D. Luo, H. Liu and Q.X. Wang 20

Chapter 2: Mechanics

Dynamic Torsional Response of a Pile Partially Embedded in Saturated Soil
R.F. Qin, Z.Q. Zhang and R.F. Chen 27

Research on Internal Flow Field Simulation of Hydropower Station Pressure Steel Pipe Based on FLUENT
Z.L. Liu 34

A Discrimination Method of Saturated Sand Liquefaction Possibility Based on Support Vector Machine
Z.J. Fan, Y.Q. Leng, Y.L. Xu, Z.J. Meng and J.W. Xu 38

Dragon Boat Straight Road Racing Rowing Technique Mechanical Movement Analysis
J. Liu and B. Li 44

Dragon Boat Technology on the Influence of Fluid Mechanics Research
J. Liu and B. Li 47

Vortex Stability Analysis Based on Coupling the Rubbing with BTA Boring Bar
W. Zhao, D.J. Chen and Z.Q. Hu 50

Development and Application on Ultrahigh Speed Grinding Processing Technology
J. Yang 56

Chapter 3: Modelling, Design and Manufacturing

Multi-Objective Optimization of Vehicle Air Suspension Based on Simulink-Mfile Mixed Programming
J.H. Li, J. He and X.H. Li 63

Impacts of Solder Voids on Power Devices' Thermal Characteristics
X. Zhang and S.J. Zhang 70

Research on Five-Axis NC Machining Simulation for Four-Blade Propeller Based on UG&VERICUT
Y. Wu, K. Zhou, G. Zheng and E.G. Zhang 75

Investigation on Aerodynamic Configuration of Monitoring Long Endurance UAV
D.L. Ma, Y.H. Qiao and M.Q. Yang 80

Passenger Vehicle Clutch Reliability Optimization Based on the Stress-Strength Interference Model
Z.F. Yan and G.H. Li 86

Modularization Technology Development Prospects
Y. Wei, D.F. Wang, J.Y. Liu, C.L. Yu, T. Cheng and D.G. Zhang 92

Design and Manufacture of a Forehand Attack Exercising Device for Teaching and Training of Table Tennis
X.H. Zhang 96

Development and Manufacture on the New Yoga Exercising Device
M. Yang and X.H. Zhang 101

Research on Compensation Correction of Leak Impact Factor of Kent Index Method
J. Xu, B.L. Shao and Q. Wu 105

Application of MATLAB in Mechanical Optimal Design
J. Yang 111

Analysis of Performance of Automotive Exhaust Muffler Based on ANSYS Finite Element
J.H. Ma and P. Guo 118

Theoretical Research on a New Type Tube-in-Tube Evaporative Condenser
R.H. Ma 123

Study on 3D Modeling and Flow Field Simulation of Urea-SCR Catalytic Converter
Z.L. Liu 129

Numerical Simulation for Perforation-Caused Leakage Diffusion of Buried Gas Pipeline
J. Cui, S.Y. Ma, Y.P. Liang, Y.H. Guo, X.B. Zhao and L.X. Shi 135

Numerical Study on Heat Exchange Characteristics of Runways with Snow-Melting System Using Geothermal Sources
J. Cui, Y.P. Liang, Y.H. Guo, X.B. Zhao, S.Y. Ma and L.X. Shi 141

Research of the Assembly Model Based on Parts Attribute Semantic
Y.J. Yang, H.G. Fang, H. Luan and T.G. Jin 147

Chapter 4: Automation, Control, Information Technology and MEMS

Slant-Face Fiber Side Coupling of Vertical Cavity Surface Emitting Laser
Y.Y. Liu, R.C. Liu and X. Chen 155

The Relationships of Prior Information and Interval Partition on the Forecasting Effect of Fuzzy Time Series Two-Factor Model
Y.J. Lin and C.C. Wang 159

Research on the Behavior of Intelligent Role in Computer Games Based on Behavior Tree
L.X. Ji and J.H. Ma 165

Building the Audit Information System in Cloud Computing Environment
X.J. Wei 170

Study of Map-Reduce over Hadoop Based Cloud Computing Environment
W.M. Pan and L.B. Ha 175

Key Performance Information Collection Architecture Based on Cloud Computing
B. Chen, Z.J. Wang, R.Z. Qi and X. Lv 182

Analysis of the Development of Fire Control System
Y.G. Ji, X.G. Ge, Z.H. Lan, C.Y. Tian and C. Chen 189

An Interactive and Artistic Monitoring System for Machine Condition
L. Luo, F.W. Hu and N.S. Zhang 192

Research and Development of Flash-Based Online Virtual Laboratory
W.Y. Liang 198

Construction of Stereoscopic Teaching Resources under the Support of Modern Information Technology
W.Y. Liang 202

LQG Controller Design for Heavy Vehicle Active Suspension Based on OT-AHP Method
J.H. Li, J. He and X.H. Li 206

Research on Closed-Loop Control Algorithm of Pneumatic Clutch Based on Optimizing Engaged - Schedule
X.Z. Li, Y.L. Lei and S.H. Sun 213

Energy-Saving Design of Villa Air-Conditioning System
R.H. Ma 218

Research on Identifying and Avoiding Counterfeit Electronic Components
Z.P. Chen, S.J. Zhang and L. Zhang 223
