

Table of Contents

Preface

Chapter 1: Mechanical Behaviour Analysis of Composite Materials

An Adaptive RVE Generation Algorithm for CFRP Composites Considering Pore Morphology and Spatial Statistics L. Yan, M.Z. Li and Q. Wang	3
A Preliminary Study on Designing a Composite Materials Hardness Testing Range Expander S.H. Weng, S.C. Weng, C.C. Chang and P.T. Weng	13
Relevance of an Equivalent Circuit Model for the Discharge Phenomenon of Fibers Containing Fine Particles T. Nakamura, T. Hayashi, M.R. Harada and H.T. Uchida	23
Dynamic Contact Area Analysis of Composite Material Tractor Tires on Rigid Surfaces Using a Validated Finite Element Model S. Phakdee, C. Suvanjumrat and R. Rugsaj	31
Investigation of Shear Band Effects on Energy Dissipation in Agricultural Non-Pneumatic Tires J. Phromjan, P. Jongpradist, S. Phakdee and P. Kamma	39
Finite Element Analysis of Ply Orientation Effects in Carbon Fiber/Epoxy Composite External Fixators K. Saensuriwong, K. Khodcharad, A. Pechbooranin, A. Ariyarat, A. Boksawat and T. Phiboon	47
Assessing the Residual Strain Development in Thick FRP Composite Laminates Using Embedded Temperature and FBG Strain Sensors S. Mohanta and S. Neogi	55

Chapter 2: Additive Manufacturing

Sustainable Ecofriendly 3D Printed Composites for Thermal and Electrical Insulation Applications K. Ramanaiah, M.S.S. Rao, H.S. Palla, K.L. Prasad and K.H. Reddy	63
Review of Process Parameters Effect on Material Properties and Performance of Steels and Their Alloys Fabricated by Wire Arc Additive Manufacturing (WAAM) D. Wicaksono, A.S. Baskoro and G. Kiswanto	73
Effect of Ultrasonic Assistance in Laser-Based Directed Energy Deposition (DED) Process: A Review C. Sukumar, C. Kumar, M. Kumar and S. Das	101
Preliminary Study of the Wire Filler Selection of Gas Metal Arc Welding-Additive Manufacturing (GMAW-AM) on Aluminum Alloys A. Sifa, A.S. Baskoro, G. Kiswanto, S. Supriadi and W. Winarto	111
Systematic Review of Anthropomorphic 3D Printed Bionic Hands U. Kohli, S. Chanda, K. Gandhi, C. Nigam, A.S. Kamal and P. Bhati	127

Chapter 3: Material Processing and Forming Technologies

Drilling of CFRP Using a Solid Carbide Twist Drill S.R. Tuisuva, J. Nomani, Z. Chen and A. Polishetty	145
Sensitivity Analysis of Input Parameters in Wire Electric Discharge Machining Using Response Surface Methodology O. Ali, A. Niaz and D.W. Jung	153
Effects of High-Pressure Coolant Supply on Tool Wear and Axial Hole Deviation in through Hole Drilling ASTM 304 Using Twist Deep Hole Drill T. Wada, K. Hiro, K. Kodama and Y. Morigo	163

Ripple Marks on Surface of Aluminum Alloy Strips Cast Using High Speed Twin Roll Caster Equipped with Nozzle T. Haga, H. Ochi, H. Fuse, H. Watari and S. Nishida	173
--	-----

Chapter 4: Biomedical Materials

Citric Acid-Derived Disulphide Polymers as Carriers for Dual Drug Delivery in Chemotherapy Applications M.Y. Siti Nur Aishah, O.H. Ching and L. Vuanghao	181
Synthesis and Structural Characterization of Gastric Mucosal Protective Agent Nano-Sucralfate Z.Y. Wu and Z.F. Wu	189
Optimization of Electrospun Surfaces Containing Functional Bioadditives for Wound Dressing Applications J. Oztemur-Sezgin, S. Ozdemir, H. Sezgin and I. Yalcin-Enis	195

Chapter 5: Materials and Technologies Used in Combustion Engines

Effect of Thermal Barrier Coating Thickness on Biofuel Operated CI Engine: A Comprehensive Study A. Kumar and S.S. Sandhu	203
Experimental Investigation into the Effects of N-Pentanol/Diesel Blends on Cyclic Variations in a Multi-Cylinder CRDI Engine S. Singh and S.S. Sandhu	219
