

Table of Contents

Preface

Chapter 1: Composite Materials

A Machine Learning Model for Flaw Identification in Fibre-Reinforced Composites W. Hall, A. Kromik, B. Miller, I. Underhill and Z. Javanbakht	5
Mechanical and Thermal Analysis of Nito Fiber Reinforced Composites R.S.B. Sosa and J.C. Millare	11
Asymmetric Four Point Bend Test Method for Interlaminar Shear Strength in Ceramic Matrix Composites P. Jadhav and C. Lande	19
Effects of Irradiation Dose of Sheet-Like Electron Beam and its Cathode Voltage on Impact Strength of Carbon Fiber Reinforced Thermoplastic Polyamide just before Shipping K. Sagawa, H. Kimura, T. Ishiwata, M.C. Faudree, H.T. Uchida and Y. Nishi	25
Microscopic Formation Mechanism and Physical Properties of Mo/Cu Composites with High Densification Q. Li, Z.D. Li, H.F. Xie, L.J. Peng and X.J. Mi	35
Handling Composites at Aircraft Accident Sites: An Evaluation of the Fracture Features in Burnt CFRP after the Application of a Fixant Solution N. Zimmermann, P.H. Wang and K. Pullen	45
A Review of Biodegradable Polymer Blends and Polymer Composite for Flexible Food Packaging Application S. Govindan, M. Ramos and A.M. Al-Jumaily	51

Chapter 2: Zirconia and Zirconia-Based Composites

The Effect of Zirconia Content on Physical and Mechanical Properties of $\text{Al}_2\text{O}_3/\text{ZrO}_2$ Composites C.F.K. Murti, P.Z.N. Nehan, A.S. Sa'adah, A.R. Setopratama, F. Munawaroh, Munaji and Triwikantoro	65
Temperature and Molarity Effects on the Synthesized Zircon Crystal Cells D.Y. Pratama, A.B.G. Valhalla, S. Ely, A.M. Hatta and P. Suminar	71
The Conductivity of PANI/Zirconia Composites: Effect of Amorphous and Crystalline Fillers Munaji, M.A.C. Azhari, Z. Arifin, M. Zainuri and Triwikantoro	77
Structural and Thermal Analysis of $\text{CaCO}_3/\text{ZrO}_2$ Composites F. Munawaroh, M.A. Baqya, Z. Arifin and Triwikantoro	83

Chapter 3: Carbon-Based Materials

Interaction of Hydrogen with Reduced Graphene Oxide Probed by Muon-Spin Relaxation Technique R. Asih, D.P. Sari, M.A. Baqya, I. Watanabe and Darminto	93
Disorder - Induced Characteristics Based on Optical Absorption of SiO_2/rGO-Like Carbon Films F. Faridawati, Sudarsono, A. Sholih, G. Yudoyono and Darminto	99
Mechanical-Thermal Stability of Micro Composite Based Porous Carbon from Coconut Shell (<i>Cocoa nucifera</i>) Charcoal M.S. Sapri and Mashuri	105
Optical Absorbance of Graphenic Carbon from Coconut Shells in Different Solvents for Film Preparation Sudarsono, A. Sholih, F. Faridawati, G. Yudoyono and Darminto	111

N-Doped Graphenic Carbon Derived from Coconut Shell as n-Type Semiconducting Layer E. Purwandari, N. Nur'aini, A.A. Firdaus, A. Sholih, R. Asih, A. Subekti and Darminto	117
Study on Optical Energy Gap and the Thickness of Boron Doped Graphenic Carbon (B-GC) Film Prepared by Nanospray Method A.A. Firdaus, E. Purwandari, R. Asih, A. Sholih and Darminto	123
Probing the Magnetic Properties of Boron-Doped Graphenic-Based Carbon Materials D. Ristiani, P.Y.D. Maulida, A.A. Firdaus, R. Asih, F. Astuti, M.A. Baqiyah, S. Tunmee, H. Nakajima and Darminto	129

Chapter 4: Functional Materials and Semiconductor Structures

Measuring the Capacity of a Proposed Vibration Isolator Using Auxetics Sheets P. Townsend, J.C. Suárez, I. Mendoza and D. Townsend	139
Comparison of Carrier Deflection between MAG-TFET and MAG-FinFET T. Boonlua, A. Poyai and T. Phetchakul	145
