

Table of Contents

Preface

Chapter 1: Computational Materials Physics

The Time-Dependent Hartree-Fock Formalism of the Double Excited States of the Helium Atom	
D. Naranchimeg, S. Ochir and G. Munkhsaikhan	3
Direct Determination of the Photoelectron Momentum Distribution from the Wave Function	
I. Adiyadoljin, Z. Gombosuren, K. Lochin, A. Ochirbat and A. Chuluunbaatar	11
Direct Determination of the Fully Differential Cross Section by the Time-Dependent Wave Function	
Z. Gombosuren, K. Lochin, A. Chuluunbaatar and A. Ochirbat	19
First-Principles Study of Structural, Electronic and Optical Properties of Trans-4-(Trifluoromethyl) Cinnamic Acid	
N. Naranbilegt, U. Nergui, B. Khongorzul, J. Davaasambuu and N. Tsogbadrakh	27
Modeling of Sound Propagation in Liquid Medium Depending on the Size of Air Bubbles	
B.B. Damdinov, A.I. Lyamkin and V.A. Prigozhikh	39

Chapter 2: Numerical Study of Structural Materials and Technologies

Predicting Engineering Stress-Strain Curve of AZ91/Graphene Composites with Linear Regression Machine Learning	
Y. Adityawardhana and S.J. Huang	49
Optimization of Honeycomb Structures for Sandwich Panels by Response Surface Methodology (RSM)	
W. Laotaweesub, K. Ubontip, P. Suwankan and S. Hoochaiyaphum	55
Evaluation of Different Die Angles in the ECAP Process of AA6061 Using Simulation Models	
N.P.N. Minh, P.Q. Trung, D.D. Khoa and N.G. Lam	61

Chapter 3: Modelling Particle Behaviour in Technological Flow

Testing Micro- and Nanoparticles in a Dynamic Environment	
V. Pasternak, A. Ruban, D. Bazaliiev, K. Pasynchuk and J. Telak	69
Application of Numerical Methods for the Analysis of Particle Agglomeration and Dispersing Processes	
V. Pasternak, A. Ruban, D. Polishchuk, O. Bilotil and R. Stawicki	81
Development of a Computer-Simulation Model for Particle Filling Based on Molecular Dynamics	
V. Pasternak, A. Ruban, V. Kovalchuk, O. Zemlianskyiy and O. Telak	93

Chapter 4: Materials for Biomedical Applications

New Trends in Enhancing Biological Efficacy and Safety of Proton Therapy: State of Art and Prospective	
A. Chirakadze, N. Khuskivadze, I. Nadiradze and Z. Buachidze	107
Development and Testing of Components for Combined Cancer Treatment in Strongly Localized Therapy: Georgian Experience	
A. Chirakadze, N. Khuskivadze, I. Nadiradze and Z. Buachidze	123
Review on Spectroscopy Methods for Studying Viral Nanomaterials	
T. Bzhalava, L. Chakhvashvili, S. Kapanadze and A. Palavandishvili	133

Study of Reduction Process of Silver Ions on G4 PAMAM (Polyamidoamine) Dendrimers with Different Terminal Functional Groups: NH_2 and OH

I. Khutsishvili, T. Giorgadze, S. Gogichaishvili and V. Bregadze

145
