Computer-Aided Design, Manufacturing, Modeling and Simulation
ISBN(softcover): 978-3-03785-236-1 ISBN(eBook): 978-3-03813-547-0

Table of Contents

Preface, Committee and Reviewers

PART 1

Chapter 1: Advanced Manufacturing Technologies

Study on the Section's Extreme Position of Roadheader's Cutting Arm in Coal Mine Laneway
J. Mu, Y.B. Du, R. Li, J. Tian and M. Wu 5

Reverse Engineering in the Manufacturing of Forming Die
Z.B. Yan and H.W. Chen 10

The Determination of the Clamping Finger's Material by Magnetic-Thermal Coupled Analysis in the End Region of a Hydraulic Generator
H.X. Xia, L. Li and J.X. Yang 16

Assembly Sequence Planning for Aircraft Component Based on Improved Clashes Matrix
L.Y. Yang, G. Zhao, B.B. Wu and G.R. Yan 22

Numerical Simulation and Technology Research on the Precision Forging for Inner Ring Gear
L. Li 29

Study on Surface Roughness Based on Dynamic Minimum Thickness of Cut
K. Ji Cai 34

Numerical Simulation and Analysis of Coaxial Powder Feeding Flow during Laser Direct Deposition
W. Zhang and S.Q. Shi 38

Simulation of Temperature Field of Metal Thin Wall Parts during Laser Direct Deposition Rapid Prototyping
W. Zhang and S.Q. Shi 42

Preliminary Analysis on Inclined Concrete-Filled Steel Tubular Stub Columns with Circular Section under Axial Compression
Q.X. Ren, Y.B. Lv, L.G. Jia and D.Q. Liu 46

High Order FE Analysis for Shear-Lag Effects of Wide Flange Box Girder
S.B. Cai, C.W. Kim and P.S. Shen 50

Simulation Supersonic Steam Flow in a Converging–Diverging Nozzle Using Different State Equations
L.B. Zhou and M.H. Zhou 56

Design and Analysis of an Omni-Directional Mobile Robot with Orthogonal Wheel
W.H. Zhou, J.F. Guo, G.S. Jia and H. Liu 60

Chapter 2: Intelligent and Adaptive Control

A FPGA-Based Motion Control IC for X-Y Table
B.S. You, K.F. Liu, F.L. Zeng and L.Y. Pei 67

Extending FMCS Test for Flight Simulation
Z.H. Li and G. Li 72

Modeling and Simulation of Deceleration-Oriented Braking Control on Freight Train
M.L. Wu, T.P. Chen, Y.C. Lu and M.T. Cheng 77

The Prospect of the Modeling Simulation for the Passive Containment Cooling System of the Advanced PWR in China
Y. Wang 82

Adaptive Control of Uncertain Gun Control System of Tank
L.J. Shen, Y. Bao and J.P. Cai 88

Characteristic Study on the Dynamic Response of Block Based on the EMD Technique of Feature Extraction
X.F. Du, Z.J. Li, F.R. Bi, J.H. Zhang, X. Wang and K. Shao 93

A Measurement Method of the Interoperability of Integrated Systems Based on Process Net
F.B. Guo, M.Z. Wang and J.J. Liao 99

PID Parameters Optimization of Pressure and Phear Testing Controller Based on CLPSO Algorithm
H.J. Wu and Z.Q. Hu 104

Simpler Formulation and Numerical Validation for a Nonlinear High Order Finite Shell Element 110

A Novel Feature Extraction Method for Mechanical Part Recognition
S.Q. Cao, G.L. Yang, Q.Y. Zhu and H.F. Zhai 116

Control of Direct-Drive Compressor Based on Variable Structure Sliding Mode
M.P. Zhong and F.L. Huang 122

A Study on Shift Process Control of AMT for Battery Electric Bus
H.B. Liu, Y.L. Lei, Y. Zhang, X.L. Zhang and Y.D. Li 128

Open Problems in Deadlock Control for Flexible Manufacturing Systems by Using Petri Nets
Z.W. Li and A.M. Al-Ahmari 134

Chapter 3: Intelligent Design and Design in Collaborative

Research of Computer Aided Design for Anti-Aliasing Filter Based on MATLAB
X.M. Jiang 145

The Experiment Device Design of LPG Fire Radiation
Y. Li 150

Design of Ternary Clocked Adiabatic Synchronous Reversible Counter
F.N. Mei and P.J. Wang 154

The Design of Earthquake Engineering Spatial Database Based on GIS Platform
Z. Ren and R. Meng 160

Sensorless Position Control of Surface Permanent Magnet Linear Synchronous Motors
H.C. Lu, M. Jiang, Q.G. Chen and L.S. Wei 165

The Application of Knowledge Discovery in Triggering Design Inspiration
H. Zhang 170

An Automatic Designing Method for Apparel
X.G. Wang, Q. Zheng and X.Z. Li 175

A Novel Apparel Designing Method Based on Graphic Image
Q. Zheng, C.Q. Cheng and X. Zhu 180

Research on Coal Mine Roadway Safety Monitoring System Based on Zigbee
Y. Ma, X.Y. Ma and G.D. Wang 185

Research on Control Strategy and Experiment of Electronic Mechanical Continuously Variable Transmission
L. Zhang, Y.C. Zhai, H.X. Zhao and G.J. Chen 191

Chapter 4: Modeling Simulation and Control of Micro/Nano Systems

Control Software Development of a Novel Rapid Prototype Laser Sintering System for Fabricating Artificial Bone
C.J. Shuai, Y. Nie, C.D. Gao, H.L. Hu, J.Y. Zhuang, Z.Z. Mao and S.P. Peng 199

Research on Configuration Design Method of Mass Customization Product Based-on Function-Structure Model
Q. Yin, Y.J. Sun, W.Z. Zhou, X.J. Ni, K.C. Chen and R.W. Li 204

Research on Deformation Prediction of Coastal Roads Based on Grey Model
M.B. Wu, X.B. Xiong, Z.Q. Fan and X.Q. Zhu 209

Modeling of Impact Behavior of Lightweight Composites under Metallic Projectile
A. Asadi and S.A. Sadough 214

A Push-Back Sequencing Model for Production Planning in Open-Pit Coal Mining
X.W. Gu, P.F. Wang, Q. Wang, Y.Y. Zheng, J.P. Liu and B. Chen 219

Prosthetic Modeling of the Femoral Head Based on Reverse Method
B. Liu, Z.H. Huang, X. Fan and H.J. Li 225

Researches on Modeling and Simulation of Continuous Wave Mud Pulser
F. Yuan and X.F. Gong 230

Parametric Modeling for Globoidal Cam Based on CATIA/CAA
G.G. Zhang, Z.B. Chang and H.T. Liu 236

Numerical Study of a Flap Rudder Based on Turbulence Model LES
S.G. Wu and H. Liu 240

Modeling and Simulation of an Improved Measure of MPPT in Photovoltaic System
S.J. Cai, P.L. Wang, Z.D. Cai and J.H. Mao 244

Modeling and Simulating of Multi-Rigid-Body System with Friction-Affected Translational Joints
H.L. Peng 250

Chapter 5: Optimization and Scheduling

Interactive Dynamic Schedule Rapidly on Steel Making-Continuous Casting
N. Zhao and Y. Liang 259

Online Scheduling on Two Parallel Identical Machines with a Non-Clairvoyant Disruption
F.F. Zheng, H.L. Wei, Y.F. Xu and M. Liu 264

The Boiler Temperature Field Reconstruction Algorithm Based on Genetic Algorithm
C.Z. Li, F.Q. Shao, Z. Kan and H.X. Fan 269

Optimization of Processing Parameters for Shell Products Based on Taguchi Method and DOE Technology
C.B. Li and X.L. Fu 274

Robust Design in Injection Molding Processing Based on Multi-Objective Ant Colonies Algorithm with Crossover and Variation
F.L. Huang, M.P. Zhong, J.M. Gu and G.W. Liu 279

Modeling and Numerical Optimal Simulation of Coal Pillar's Failure Process on Longwall Leaving Coal Pillar Mining
X.P. Shao and Y.C. Xia 285

A Web-Based Platform for Modular Design of Intelligent Instrument Based on Improved Genetic Algorithm
J. Pan, G.H. Mao and J.X. Dong 291

Research on Optimization Algorithm Applied in Plate Rolling Schedule
N.N. Chen, Q. Fei and H.P. Hu 296

Research on the Shortest Path of Mine Emergency Rescue Based on Path Weight Adaptive Ant Colony Algorithm
K. Wang, S.G. Jiang, Z.Y. Wu and W. Zou 302

Study on Model and Method for Production Scheduling on Hot Rolling Section
Y.J. Yang, Z.Y. Jiang and X.X. Zhang 307

Chapter 6: Power and Control Electronics

Researching on Synthesis of Epoxy/Montmorillonite Composite Material and Dielectric Property
Y.L. Feng and L.J. Yu 317

The Ground State Energy of the Electron in Quantum Ring Induced by the Rashba Effects
H.F. Li, W.Y. Qimuge, X.L. Liu and C.L. Eerdun 321

Performance Analysis of Dual V_t Domino Circuits with P-V-T Variations
J.H. Wang, N. Gong, G. Liu, S.Q. Geng and W.C. Wu 326

The Stochastic Resonance Driven by Two Frequency Signals and its Application
M.L. Zhang and M. Lin 331

Design of Absolute Magnetic Grid Displacement Sensor Based on Encoding Principle
J.Z. Liu, S.H. Hao and T. Chen 336

Study on Heterodyne Stochastic Resonance System for Weak Signal Detection
J.J. Yao, Y.M. Huang, L.Q. Hu and M. Lin 341

Emulation and Analysis on the ESD Sensitive Port of High-Frequency Low-Power Silicon Dynatrons
J. Yang, Y.Z. Hu and Z.C. Wu 346

Position Sensorless Control Based on Augmented Extended Kalman Filter for Permanent Magnet Linear Synchronous Motor
H.C. Lu, M. Jiang, L.S. Wei and B.Y. Liu 350

Design on the Electromechanical Shift Mechanism of AMT
J.L. Tao, H. Jin, W.S. Yuan and H.Y. Chen 355

Properties of Elements in Fault Delivering in Power System
J.H. Li and J. Hu 360

Improved Hilbert-Huang Transform Applied in Power Quality Detection in Ship Power System
Y.X. Su, G.P. Liu, L. Li and X.Q. Shen 365

A Generalized Three-Phase Multilevel Current-Source Inverter Topology
J.Y. Bao, W.B. Bao and Z.C. Zhang 373

L1-Norm Sparse Learning and its Application
X.F. Zhu, B. Li and J.D. Wang 379

Research of Key Nodes of Botnet Based on P2P
J. Gao, K.F. Zheng, Y.X. Yang and X.X. Niu 386

PART 2

Chapter 7: Simulation, Software Development

Simulation of Concrete Temperature Cracking Process Based on EFGM
X.H. Liu, X.L. Chang and W. Zhou 395

An Effective Classification Procedure for Plastic Food Packaging Based on NIRS
J.J. Wang, D.X. Hou, B.L. Wu, S.L. Ye and H. Yang 399

The Impact Factors of Numerical Computation to Cavitating Flow
W.B. Xu, C. Wang, M. He, S. Huang and X. Chang 404

3-D Numerical Simulation and Analysis on V-Cone Flowmeter Based on LES Method
W.B. Zhu, J.L. Meng and Z.Q. Yin 408

Software Development Based on Object-Oriented Design for Parachute Design and Performance Analysis
L. Yu, H. Cheng and Z.W. Yin 413

Simulation of the New Dynamic Combined Separator
Y. Fang, J. Wu and Z. Li 418

A Preliminary Study of Ecopath with Ecosim to the Shrimp Pond Ecosystem
T.W. Zhang, Y.P. Su and S. Ma 423

A Light RSSI-Based Three Dimensions Location Estimation Algorithm for Indoor ZigBee Network
B. Xu, Z. Yu, Y.J. Ge and P.Y. Han 427

Using Evolving Fuzzy Models to Predict Crude Oil Distillation Side Streams
J.J. Macías-Hernández, P. Angelov and X.W. Zhou 432

Research on Integrated Navigation Algorithm Based on ANFIS
T.L. Xu and Y. Tian 438

The Realization and Application of Mineral Resources and Reserves Estimation Based on MapGIS
J.K. Zhang, Q.H. Wu and J.Q. Deng 442

Construction of Coal Mine Comprehensive Informatization Based on Kilomega Fiber-Optic Industry Ether Ring Network
T. Zhong, P.J. Lou, H.X. Ruan and B. Zhang 448

Design of Acoustical System of Cellphone Screen Abrasive Shock Machining
Y.D. Zhang, Z.J. Teng and H.W. Ji 454

Chapter 8: Sustainable Materials and Sustainable Development

Investigation on Supersmooth Surface Machining with Stable Eccentric Immersed Polishing
Z.J. Wang and R.H. Liang 461

Finite Element Analysis on the Mechanism of Axial Turning-Grinding of Engineering Ceramics
X.L. Tian, Y.T. Mao, F. Guo, B.G. Zhang and J.Q. Wang 465

Numerical Simulation of Heat and Moisture Transfer in System of Human-Clothing with Phase Change Materials-Environment
F.Z. Li, P.F. Wang and Y. Li 470

3-D Simulation of Heat and Moisture Transfer in Human-Clothing-Environment System
F.Z. Li, Y. Li and M.G. Lin 475

Study on the Film Coating Methods on Inner Surface of Long-Straight Tubes
S.W. Zhang, Y.C. Han and J. Han 481

A Method to Compute Siphons Based on Matrix Manipulation
X.P. Chen, L.X. Zhao, S.F. Lin and W.H. Wu 486

Patch Reconstruction with T-Splines Iterated Fitting for Mesh Surface
X.J. Zhao, M. Lu and H.X. Zhang 491

Study on Adsorption Properties of Fe^{3+} by Modified Hunan Black Tea
J.J. Song and L. Tu 497

Harm and Trapping Strategy Research on Tiny Dusts PM2.5
C.F. Wang and X.D. Shi 503

Expressions for the G-Drazin Inverse of Additive Perturbed Elements
L. Guo and Y.J. Liu 509

Analysis of Aircraft Composite Structural Health Monitoring and Life Prediction Technology
X.C. Tao and C. Lu 515

Computational Analysis of Natural Gas Delivery Discrepancy
V. Seleznev, V. Kiselev and S. Pryalov 524

Evolutionary Fuzzy Support Vector Machine Forecast Model (EFSVM) for Predicting Diaphragm Wall Deflection in Deep Excavations 531

Contourlet Transform Based Texture Analysis for Smoke and Fog Classification
Y. Zhao, J.H. Zhao, J. Huang, S.Z. Han, C.J. Long, Z.Y. Yuan and D.Y. Zhang 537

Chapter 9: System Design and Optimization

Design of Pressure Sensor in Common Rail System by ANSYS Tools
F. Ye and Z.M. Wang 545

Study on Wind Turbine Blade Design Method and Modeling Technology
W.X. Tang, C. Cheng, Y.D. Cai and F. Wang 549

Reliability Assessment of Power System Using Importance Sampling Technique Based on Layer Optimization Simulation
B. Wang 554

Integration and Conversion of 3D Models from 3DS to OpenFlight
Y. Luo and A.Z. Ren 559

A Study on Analysis and Improved Methods for Noise and Vibration of Compressor Motor
X.Y. Qian and P.P. Wang 564

MBD Based Automotive Products Process Planning Technology
Q.Z. Zhou and L.Y. Deng 570

Collaborative Design and Manufacturing in Research Flowchart for Large Aircraft
S.C. Liu and G.R. Yan 576

Optimization Method of Hoisting Points Schemes Using Strain Energy Criterion
S.G. Li and H. Li 583

Hardware Design of Diameter Analyzing System for Liquid and Gas Pipeline
L.Y. Sun and Y.B. Li 587

Optimization Design of Crank Rocker Mechanism for a Torque Exciter
X. Zhang, G.J. Bi, L.W. Li, W.W. Cui, J.J. Cui, Y. Cao and H.R. Zhao 592

Two-Dimensional Sine Filter Fingerprint Enhancement Algorithm Based on Block Level
X.S. Zhan and Y.Y. Chu 596

Regularization Method for System Error Estimation Based on One Measurement Element
F. Wang and M.H. Xie 604

Design and Realization of Automatic Mapping System for Borehole Data
J.Q. Deng, Z.H. Zuo, L. Yang and Q.H. Wu 610

The Generalized Cross-Power Spectrum Method for Estimation of Time Delay in Acoustic Pyrometer
C.Z. Li, F.Q. Shao, Z. Kan and H.X. Fan 615

Chapter 10: Vibration, Dynamics and Acoustic Control

Finite Element Analysis of Vibratory Stress Relief Process
X.C. Zhao, Y.D. Zhang and Y.J. Ma 623

Simulation of Liquid Flowing over Surfaces with Micro-Structure
Z.J. Xi and G. Li 628

The Preliminary Research on Health Management of Stratospheric Airship
M. Huang, Z.X. Xia and Q.H. Zeng 632

FEM Simulation of Anisotropic Parameters Influencing the Earing in Sheet Metal Deep Drawing Process
L. Chen 638

Simulation Analysis on a Special Air-Heating Collector
L. Qiu, Y. Zou and L. Huang 642

Research on Bending Fatigue of Cylindrical Gear Based on ANSYS Workbench
X.Y. Li, S.S. Li, S.B. Jiang and P.S. Zhong 647

Adaptive Friction Compensation for Mechanical Systems with Unknown Deadzone
J.P. Cai and Y.J. Zhang 652

Dynamic Modelling and Simulation of Pneumatic Actuators
Y.F. He, S.N. Yu, Q.L. Shang and F.K. Deng 657

Simulation of Responses of Liquid Filled Double Bottom Structures Subjected to a Closely Underwater Explosion Shock Loading
T. Tang, L.J. Wang and J.B. Ma 662

An Experiment-Based Comparative Study between Mechanical Testing and Artificial Testing for Putonghua Proficiency Test
L. Jiang, X.N. Wang, H.C. Liu, C.D. Zhang and S.Y. Kang 668

Study on Dynamic Mechanical Response of TC21 Alloy
S.Z. Zhao, X.W. Cheng and F.C. Wang 674

Paraboloid of Revolution Part Hydromechanical Deep Drawing and Finite Element Simulation of Stress Analysis
Y. Chang, X.S. Li and R.L. Du 679

Dynamics Simulation Study on Transmission Mechanism of Cross Rudder for Sightseeing Mini-Submarine
X. Zhang, T. Chen, L.W. Li, W.W. Cui, J.J. Cui, Y. Cao and H.R. Zhao 684

Research on Processing Techniques of Logging-While-Drilling Signal Based on BPSK Continuous Wave
F. Yuan and X.F. Gong 688

Chapter 11: Virtual Manufacturing and Networked Manufacturing

A New Approach to Reconstructing 3D Solid from the Two 2D Views Based on AutoCAD
H.S. Zhao, Y.X. Wu and Y.Z. Wu 697

Multiple Digital Watermarking Techniques for CAD Models
N. Liu, Y. Zhang and S.Y. Zhang 703

The Research and Application of Vehicle Identification Using KPCA Based on the Car Networking Environment
W. Xu, R.C. Wang, H.P. Huang and L.J. Sun 709

Application of Multi-Sensor Information Fusion Technology in Machine-Tool Monitoring
Z.Q. Sheng, C.P. Tang, H.T. Fan and C.B. Zhang 714

Modeling of Bridge Collapse in Virtual Scene Based on Finite Element Simulation
Z. Xu, A.Z. Ren and X.Z. Lu 718

Research on Product Modeling Method for Supporting the Networked Manufacturing
G.H. Mao, J. Pan and L.F. Lin 723

Virtual Instrument Based Control System for the Heating Box
L.P. Zhang and B. Cheng 730

Research of the Finite Element Method to Welding Simulation in Virtual Manufacture Environment
J.G. Yang, W. Fu, J.S. Gao, X.S. Liu, Z.B. Dong and H.Y. Fang 735

Hybrid Experimental-Dynamical Modelling of Cutting Considering the Complex Chip Geometry
T. Szalay, M. Horváth and B. Tukora 741

Effects of Circular Groove Angle on Static Characteristics of Journal Bearing Using CFD Method
H. Liu 746

Research and Application of Computer Aided to the Automobile Outline Design
Z.F. Zheng and J.X. Li 750

Analysis of 3D Terrain Reconstruction Model Based on Bezier Triangular Surface
B.Y. He and J.J. Cui 755

Systematization Education Discussion and Application Research of Architecture Major in Higher Education
B. Wang, X. Zhao, X.W. Bian, J.G. Li, Z.J. Ren and W. Liu 759

The Research of Data Mining Based on Fuzzy Cluster
F.G. Fang 763

Effect of Limestone Powder on Autogenous Shrinkage of Concrete
B. Wang, Y.P. Ding, J. Gao, J.F. Sun, M.M. Cui and L. Han 767
