

Table of Contents

Preface

Chapter 1: Bridges

Execution of Repair Works on the Trogir –Čiovo Island Bridge A. Kelava, A. Mlinar, L. Pavić and A. Buzov	3
Development of Conceptual Design of Bridges J.L. Vitek	15
The Past Decade of UHPFRC Bridges in the Czech Republic J. Marek, J. Prchal, J. Kolisko, D. Čítek, P. Tej and L. Vrablik	23
Bridge Modelling and Structural Analysis in BIM J. Bleziffer and M. Miloš	47
Building Information Modelling of Concrete Bridges and Residential Building Structures P. Hawryszkow and M. Knawa-Hawryszkow	57

Chapter 2: Reliability Assessments and Health Monitoring

Design of FLM71 Fatigue Loading Model for Fatigue Assessment of Bridge Structures P. Miklas, I. Broukalova and M. Foglar	67
Probabilistic Model for Thermal Actions on Concrete Bridges Based on Meteorological Measurements - Case Study M. Sýkora, M. Holly, J. Marková, A. Mezera and A. Valík	75
Smart Health Monitoring of Concrete Bridges Using Digital Twin and Ai Applications A. Al-Hijazeen and K. Koris	83

Chapter 3: Concrete Technologies

Review Paper Properties of Fibers and Mortar of Slurry Infiltrated Fiber Concrete (SIFCON) W.K. Tuama and G.L. Balazs	101
Enhancing Concrete Durability Through Hybrid Waste Tire Steel Fiber Integration A. Zia, I. Holly, J. Prokop and A. Ondak	111
Model Uncertainty in European UHPC Standards: Insights from SIA-2052 and NF P18-710 Flexure Models L. Simwanda, M. Sýkora and J. Marková	119
An Innovative Approach to Evaluating the Freeze-Thaw Resistance of Concrete Using the Ultrasonic Pulse Velocity Test D. Kocab and R. Dvořák	129
Decarbonization of Concrete Structures from a Structural Engineer's Perspective W. Derkowski	135
Creep and Shrinkage Measured on Different Concretes for Bridges V. Němčic and J.L. Vitek	143
The Properties of Hardened Concrete with Different Dosages of Recycled Concrete Aggregates A. Ondak, I. Holly, J. Prokop, A. Zia and H. Kamal	151

Chapter 4: Concrete Structures

Determination of the Deformation Behavior of Concrete Structures Reinforced with FRP Bars: A Theoretical Study K. Mrkvova, D. Vašátko, F. Girgle and P. Štěpánek	159
--	-----

The Sweating Slab Syndrome - A Scientific Analysis	169
M. Kehrer and T. Nelson	
Post-Tensioned Slabs in Garages – A Rational Choice	181
J. Galic, P. Presecki and V. Miljanovic	
Minimum Reinforcement against Brittle Failure in Concrete Structures	191
M. Słowiak and I. Skrzypczak	
Multicriteria Optimization of Reinforced Concrete Floor Slabs	197
A. Horakova, A. Kohoutkova and I. Broukalova	
Experimental Verification of Punching Shear with FRP Reinforcement: Innovations in the New Eurocode Generation	211
D. Vašátko, K. Mrkvová, F. Girgle, V. Kostiha and P. Štěpánek	
Anomaly of the Course of the Internal Forces of the Ring Slabs	221
J. Vaskova and P. Mateckova
