Table of Contents

Preface, Committees

Chapter 1: Session in Memory of Eric Moreno and Odd E. Gjørv: Durability of Concrete Structures

Concrete Carbonation in Mexico and Spain: DURACON Project, Four Year Evaluation E.I. Moreno, A. Torres-Acosta, J.T. Pérez-Quiroz, M. Martínez-Madrid, W. Martínez-Molina, E. Alonso-Guzmán, P. Castro-Borges, J. Genescá-Llongueras, B. Valdez-Salas, L.E. Ariza-Aguilar, M. Baltazar, D. Nieves, F. Almeraya-Calderón, C. Gaona-Tiburcio, T. Pérez-López, E. López-Vázquez, J. Rodriguez, N. Rebolledo, C. Andrade and O. Troconis-Rincón	12
Effect of w/cm and Composition on Correlations of Concrete Electrical Resistivity and Chloride Migration Coefficients F.J. Presuel-Moreno	21
The Assessment of Flexural and Shear Strength of R/C Members with Chloride Attack D. Coronelli, R. François, H. Dang and W.J. Zhu	29
Evaluation of Additional Protection Methods to Control Reinforcement Corrosion F. Bolzoni, S. Beretta, A. Brenna, M.V. Diamanti, L. Lazzari, M. Ormellese and M.P. Pedeferri	37
Development of a New Concrete Marine Exposure Site on the Arabian Gulf-East Coast of Saudi Arabia A.M. Abd El Fattah	45
Preliminary Assessment of Durability of Sustainable RC Structures with Mixed-In Seawater and Stainless Steel Reinforcement F. Lollini, M. Carsana, M. Gastaldi, E. Redaelli, L. Bertolini and A. Naani	52
Electrochemical Tests for the Determination of the Critical Chloride Threshold of Steel in Concrete with Blended Cements	
F. Lollini, E. Redaelli and L. Bertolini Macrocell Corrosion Formation in Concrete Patch Repairs - A Laboratory Study C.A. Eldho, O. Nanayakkara, J. Xia and S.W. Jones	60 68
Quality Control and Quality Assurance for Concrete Durability O.E. Gjørv	76
Bond and Corrosion: Experimental Studies A. Cesetti, G. Mancini and F. Tondolo	84
Chapter 2: Hydration and Early Age Concrete Properties	
Effect of Internal Activation Using Porous Ceramic Aggregate on Hardness and Pore Structure of Fly Ash Cement Paste	
K. Ootaishi, P.T. Bui, Y. Ogawa and K. Kawai Assessing Viscoelastic Properties of Concrete during its Early Ages through Forced	95
Dynamic Excitation of Test Beams J.L. Granja and M. Azenha	103
Drying of Recycled Aggregate Concrete: Plastic Shrinkage, Cracking Sensitivity, and Durability	111
A.Z. Bendimerad, E. Roziere and A. Loukili Influence of Curing Temperature on Strength Development of Concrete T. Aarre and M. Kaasgaard	111 118
Design of Massive Casting Controlling Early Age Properties of Concrete G. Bertagnoli, D. La Mazza, G. Mancini and F. Tondolo	126

Chapter 3: New and Special Concrete for Severe and Ultra Severe Conditions

Concrete Concrete	
D. Dobiáš, R. Pernicová and T. Mandlík	137
Autogenous Shrinkage in High Performance Concrete with Chemical Admixtures J.A. Canul-Polanco, A. Durán-Herrera and P. Valdez-Tamez	143
High Stiffness Concrete for Tall Buildings under Severe Conditions: Mix Design and Structural Member Test T.Y. Fan and Z. Li	150
Material Properties of Ultra - High Performance Concrete in Extreme Conditions D. Čítek, M. Rydval, S. Rehacek and J. Kolísko	157
Impact Properties of Hemp Fibre Reinforced Cementitious Composites X.M. Zhou, R. Madanipour and S. Ghaffar	163
Ultra High Performance Fiber Reinforced Concrete Behavior under Static and High Velocity Impact	171
C. Pontiroli, B. Erzar and E. Buzaud	171
The Influence of Steel Fibers on the Dynamic Response of Self-Compacting Concrete M. Pająk and T. Kühn	179
Effect of Fiber Type and Fiber Hybrids on Strain-Hardening and Multiple Cracking Properties of the Ultra-High Performance Cementitious Composites under Uniaxial Loads L.P. Guo and D.Y. Lei	187
Multi-Scale Characterization of Corrosion Initiation of Preloaded Hybrid Fiber-Reinforced	
Concrete Composites W. Nguyen, J.F. Duncan, P.J.M. Monteiro and C.P. Ostertag	195
Durability of Lightweight Slurries for Oilwell Cementing V.K.C.B.L.M. Balthar, R.D. Toledo Filho, E. de Moraes Rego Fairbairn and C.R. de Miranda	203
Bond Properties in Lightweight Self-Compacting Concrete G. Muciaccia and G. Rosati	211
Evaluation of the Mechanical Properties of Self-Compacting Lightweight Concrete Exposed to Wet and Dry Cycles in Saltwater S. Yehia and S. Farrag	218
Concrete Reinforced with Recycled Steel Fibers from End of Life Tires: Mix-Design and Application	22.4
G. Centonze, M. Leone, F. Micelli, D. Colonna and M.A. Aiello	224
Effect of Multi-Walled Carbon Nanotubes on Mechanical Properties and Durability of Latex-Modified Cement Mortar L.S. Meng, C.K.Y. Leung and G.Y. Li	232
Effect of Carbonation and Sulphate on Chloride Ingress in Cement Pastes and Concretes	232
with Supplementary Cementitious Materials M. Saillio, V. Baroghel-Bouny and S. Pradelle	241
Synthesis of SiO ₂ -PCE Core-Shell Nanoparticles and its Modification Effects on Cement Hydration Y. Gu, Q.P. Ran, X. Shu, C. Yu, H.L. Chang and K. Lv	249
Influence of Nanoclay on Concrete Subjected to Freeze-Thaw Cycles and Bond Behavior between Rebar and Concrete	256
Y.F. Fan, S.Y. Zhang and S.P. Shah	256
Siloxanes in Concrete: From Manual Application of Water-Proofing Treatments to Mix- Design Addition for Concrete Hydrophobicity L. Ferrara and A. Pattarini	263
Effect of Limestone Fillers on Ca-Leaching and Carbonation of Cement Pastes Q.T. Phung, N. Maes, D. Jacques, G. de Schutter and G. Ye	269
The Durability of Partially-Damaged Concrete with the Addition of Silica Fume and Ground Granulated Blast Furnace Slag	
W.A. Al-Kutti and N.M. Al-Akhras	277

Chapter 4: Performance of Concrete under Severe Environment and Loading

Risk of Delayed Ettringite Formation in Concrete Heated at a Mature Stage: Experimental Quantitative Evidence	
B. Kchakech, R.P. Martin, O. Omikrine-Metalssi and F. Toutlemonde	287
Effects of Water-Cement Ratio on Concrete Sulfate Corrosion Rate J.M. Du, X.L. Han, Z.T. Li, G. Li and Y.S. Ji	295
Mechanical Properties of Concrete in Compression Exposed to Sulfuric Acid M. Hasan, S. Husin and C. Nursaniah	302
Degradation of Concrete Structures due to External Sulfate Attack N. Cefis and C. Comi	310
Durability of Concrete under Combined Exposure Conditions of Chlorides and Sulfates K.J. In, Y.R. Jiang, S.H. Jung, M.K. Lee, S.W. Yoo and B.H. Oh	319
Real Case: Assessing Sulfate Resistance of Coastal Protection Precast Elements F. Aracil, G. Dufour, P. Wauters, G. de Schutter and R. Torrent	327
Resistance of Concrete to Na₂SO₄ Freeze-Thaw Cycles and Failure Mechanism Analysis G. Li, J.M. Du, X.S. Wu and K. Yang	335
Effect of Rapid Hardening Cement and Setting Accelerator on the Freeze-Thaw Durability	
of Fly Ash Concrete A. Badr, S. Ioannou and H. Al Maroof	343
Lattice Modelling of the Onset of Concrete-Ice Abrasion N. Ramos, G. Shamsutdinova, M.A.N. Hendriks and S. Jacobsen	351
Influence of Frost Damage on Chloride Penetration into Concrete P. Zhang, F.H. Wittmann, Y.R. Wang, T.J. Zhao and G. Ting	359
Chloride Distribution Feature in Surface Layer of Cement Paste under Cyclic Drying-	
Wetting Condition H.L. Chang, S. Mu and J.Z. Liu	367
Chloride Proofing Performance and Rebar Corrosion Protection Performance of SHCC Having Bending Cracks K. Kobayashi, Y. Hara, Y. Kojima and K. Rokugo	375
Influence of Seawater in Strengths of Concrete Mix Design when Used in Mixing and	
Curing T.I. Abdel-Magid, O.M. Osman, O.H. Ibrahim, R.T. Mohammed, S.O. Hassan and A.A.H. Bakkab	382
Lessons Learned from the Treat Island Marine Exposure Site M. Thomas	390
Effects of the Hygrothermal Conditions on the Fracture Energy of the Concrete H. Kallel, H. Carré, C. La Borderie, B. Masson and N.C. Tran	397
Experimental Study on Temperature Response in Damaged Concrete under Atmospheric Environment	
H.G. Min, W.P. Zhang and X.L. Gu	404
UHPC and FRC in Severe Environmental Conditions S. Rehacek, I. Simunek, D. Čítek and J. Kolísko	412
High Absorptive Normal Weight Aggregates Used as Internal Curing Agents to Reduce Hot Weather Concreting and Curing Detrimental Effects A.P. Savva, G.D. Nicolaides and F.M. Petrou	420
Durability of Ordinary Concrete after Heating at High Temperature H. Carré, C. Perlot, A. Daoud, M.J. Miah and B. Aidi	428
Experimental Study on Chloride Diffusion, Strength and Fresh Properties of Ion-Exchange Resin Mixed Grout O. Sanada, H. Mutsuyoshi, L. Yao and A. Sumida	436
Performance Based Specifications for Durability of Mass Concrete Blocks Subjected to Harsh Arabian Gulf Marine Environment	
K.R. Muhammad, A.O. Zaki, I. Mohammed, A.N. Fahad and S.B. Mohammed	444

Chapter 5: Session in Honor of 75th Birthday of Prof. Pietro Gambarova: Concrete Behavior at High Temperatures - Session Coordinated by: P. Bamonte and R. Felicetti

Mechanical Behavior and Recovery of FRC after High Temperature Exposure A.H. Akca and N. Özyurt	457
Combined Effects on Residual Strength of a High Performance Concrete Exposed to Fire E. Annerel and L. Taerwe	465
Effects of Mix Proportion on the Strength and Elasticity of Concrete Subjected to High Temperatures up to 800C H. Nishi, H. Kasami and T. Tayama	472
Fibre Cocktail to Improve Fire Resistance G.L. Balázs and O. Czoboly	480
Mechanical Properties and Damage Evolution of Siliceous Concrete Subjected to Elevated Temperatures	
H.Y. Chu, J.Y. Jiang, W. Sun and M.Z. Zhang Concrete Fire Testing - A Review of the Thermal Boundary Conditions	488
C. Maluk Mechanical Properties of Oven-Dried Mortar Exposed to High Temperature Considering Different Raw Material	496
O. Rongviriyapanich, Y. Sato and W. Pansuk	504
Crack Growth Resistance in Fibre Reinforced Geopolymer Concrete Exposed to Sustained Extreme Temperatures V. Bindiganavile, J.R.A. Goncalves and Y. Boluk	511
Effects of Exposure Term on the Strength and Elasticity of Concrete Subjected to Elevated Temperature up to 175°C	311
K. Matsuzawa, Y. Kitsutaka, M. Abe, H. Kasami, T. Tayama and H. Nishi	519
Load Induced Thermal Strains in Steel Fibre Reinforced Concrete Subjected to Uniaxial Compression T.E.T. Buttignol, M. Colombo and M. di Prisco	525
Degradation of Reinforced Concrete Structures of Aluminum Electrolysis Plants Subjected to Elevated Temperature and Cyclic Load	522
H. Kasami and T. Tayama Concrete Permeability and Explosive Spalling in Fire	533
F.X. Lu and M. Fontana	541
Fire Spalling Behaviour of Concrete: Role of Mechanical Loading (Uniaxial and Biaxial) and Cement Type M.J. Miah, F. Lo Monte, R. Felicetti, H. Carré, P. Pimienta and C. La Borderie	549
Concrete Exposed to Fire: From Fire Scenario to Structural Response F. Pesavento, M. Pachera, P. Brunello and B.A. Schrefler	556
Fire Performance of Columns Made of Normal and High Strength Concrete: A Comparative Analysis	7 C 4
T. Gernay Statistical Comparison of the Results of Applying Several Methods in Checking Concrete Columns' Fire Resistance	564
M.A.B. Ramalho and M.C. Gonçalves	572
On the Structural Behavior of Reinforced Concrete Walls Exposed to Fire P. Bamonte, R. Felicetti, N. Kalaba, F. Lo Monte, N. Pinoteau, M.J. Miah and P. Pimienta	580
Modelling the Response of Simply-Supported Two-Way Reinforced Concrete Slabs Exposed to Fire	
E. Baharudin, L. Bisby and T. Stratford	588
Chapter 6: New Design Concepts and Methods for Long-Term Performance, Robustness with Respect to Loading Hazards and Sustainability of Concrete Structures	
The Quest for Absolute Concrete Durability Performance Criteria G. de Schutter	599
Achieving Concrete Durability in Chloride Exposures R.D. Hooton	607

Utilization of Fabric Formwork for Improving the Durability of Concrete from Supersulfated Cement	
S. Ioannou, A. Badr, K. Kostova, K. Paine and T. Ibell	615
Durability Modeling for Enhancing the Service Life of a Building Constructed on a Reclaimed Land in the Sea	
K.R. Muhammad, I. Mohammed, A.O. Zaki, S.B. Mohammed and A.N. Fahad Evaluation of Water Permeability in Fibre Reinforced Hydraulic Lime Mortar Intended for	622
Conservation V. Bindiganavile, M.T. Islam and N. Suresh	630
Influence of Sustained Load on Durability and Service Life of Reinforced Concrete Structures P.G. Wang, F.H. Wittmann, W.P. Lu and T.J. Zhao	638
Drying Depth and Size Effect on Long-Term Behavior of Concrete H. Samouh, E. Roziere and A. Loukili	645
Thermoviscoelastic Analysis of Concrete Creep at Mesoscale B. Bary, C. Bourcier and T. Helfer	652
Deterioration of Concrete Immersed in Sulfuric Acid for a Long Term K. Tsubone, Y. Yamaguchi, Y. Ogawa and K. Kawai	659
Strength and Deformation Properties of Alkali-Silica Reaction (ASR) Damaged Concrete Exposed to External Alkalis	
O. Mielich, H.W. Reinhardt and H. Özkan	665
Experimental Study on Effects of Fatigue Loading History on Bond Behavior between Steel Bars and Concrete Z. Ye, W.P. Zhang, Y. Hu and X.L. Gu	673
Cyclic Behavior of Composite Truss Beam-to-RC Column Joints in MRFS P. Colajanni, L. La Mendola, A. Monaco and N. Spinella	681
Performance of Fibre Reinforced Concrete Structures - Modelling of Damage and Reliability R. Pukl, T. Sajdlová, J. Červenka and V. Červenka	690
Compressive Membrane Action Effects on Punching Strength of Flat RC Slabs R. Cantone, B. Belletti, L. Manelli and A. Muttoni	698
Design Issues about the Bar Lay-Out at the Dapped Ends of Simply-Supported One-Way R/C Slabs P.G. Gambarova and F. Lo Monte	706
Alkali-Silica Reaction in Concrete Pavements	706
K. Voland, F. Weise and B. Meng	714
Modelling the Swelling due to Delayed Ettringite Formation - Application to a Real Bridge O. Omikrine-Metalssi, B. Kchakech, S. Lavaud and B. Godart	722
Recycled Concrete Mixes for Slip-Form Paving of Roads and Airports M. Crispino, E. Toraldo, F. Giustozzi and E. Mariani	730
Performance Assessment of Precast RC Flooring Units Exposed 40 Years in Aggressive Industrial Environment	
R. Pascu, D.P. Georgescu and A. Apostu	737
Impact Resistant Behavior of RC Beam Damaged by Freeze-Thaw Action Y. Kurihashi, M. Mizuta, A. Shimata and N. Kishi	745
An Experimental Study on Carbonation in the Tensile Zone of Fatigue-Damaged Plain Concrete Beams C. Jiang, X.L. Gu and W. Zou	751
High Corrosion Resistant GFRP-UFC Composite Beams for Short Span Pedestrian Bridges S.K.W. Isuru and H. Mutsuyoshi	759
Fire Protection of Concretes: Formulation, Performances and Pathology C. Lanos, C. Baux and Y. Melinge	767
Fire Behavior of Sandwich Panels for Roofing Applications G. Zani, M.C. Rampini, M. Colombo and M. di Prisco	775
Behavior and Design of Post-Installed Rebar Connections under Temperature G. Muciaccia, A. Consiglio and G. Rosati	783
Tensile Behaviour of Reinforcing Steels at High Strain Rate and High Temperature E. Cadoni, M. Dotta and D. Forni	791

Dynamic Shear Resistance of RC Beams Based on Modified Compression Field Theory K. Fujikake and A. Somraj	799
Utilization of the Capacity for Energy Absorption of Concrete Structures under Impact C. Zanuy, G. Ulzurrún and I.M. Díaz	806
Robustness of Reinforced Concrete Framed Buildings: A Comparison between Different Numerical Models	814
G. Bertagnoli, D. Gino, L. Giordano, D. La Mazza and G. Mancini A Reformulation of a Multi-Axial Failure Criterion for the Concrete	814
S. Coccia, M. Como and F. di Carlo	822
An Experimental Study on the Equation of State of Cementitious Materials Using Confined Compression Tests Y.S. Karinski, S. Zhutovsky, V.R. Feldgun and D.Z. Yankelevsky	830
Some Insights on the Role of Relative Humidity and Compaction on the Carbonation Rate	030
of CaO/SiO ₂ (50/50) Clinker M. Agnelli, B. Huet, V. Briaud, E. André and A. Pisch	837
Cracking Analysis of FRC Beams under Sustained Long-Term Loading L. Candido, F. Micelli, E. Vasanelli, M.A. Aiello and G.A. Plizzari	844
Underground Tunnels Exposed to Internal Blast: Effect of the Explosive Source Position	
M. Colombo, P. Martinelli and M. di Prisco	852
Chapter 7: Special Session: Assessment of Nuclear Containment Vessels in Severe Conditions - Session Coordinated by: Alain Sellier and Benoit Masson	
The PACE-1450 Test Campaign - Leakage Behaviour of a Pre-Stressed Concrete	
Containment Wall Segment N. Herrmann, H.S. Müller, C. Niklasch, S. Michel-Ponnelle and B. Masson	863
Induced Anisotropic Gas Permeability of Concrete due to Coupled Effect of Drying and	
Temperature M. Ezzedine El Dandachy, M. Briffaut, S. Dal Pont and F. Dufour	871
Modelling Basic Creep of Concrete at Elevated Temperatures and Stresses J.M. Torrenti	879
Transient Thermal Creep at Moderate Temperature H. Cagnon, T. Vidal, A. Sellier and J.M. Torrenti	885
Development of a Size Effect Law for RC Structures M. Ghannoum, J. Baroth, C. Rospars and A. Millard	892
Material and Geometric Heterogeneity Consideration for Cracking Risk Prediction of Young Age Behavior of Experimental Massive Reinforced Concrete Structure	
P. Chhun, L. Buffo-Lacarriere and A. Sellier	900
Experimental Investigations on the Influence of Temperature on the Behavior of Steel Reinforcement (Strands and Rebars) W. Toumi Ajimi, S. Chataigner, Y. Falaise and L. Gaillet	908
Requirements for the Modeling of Medium-Term Behavior of Nuclear Containment	700
Concrete for a "Loss of Coolant Accident" Analysis A. Sellier, T. Vidal, H. Cagnon, L. Buffo-Lacarriere and S. Multon	916
A Simplified Approach to Analysis of Reinforced Concrete Slabs Subjected to Hard Missile Impacts	
A. Lulec and F.J. Vecchio	924
Shell Modelling of a 1/13 Scaled RC Containment Vessel under Cyclic Actions with PARC_CL Crack Model	
B. Belletti, M. Scolari and A. Stocchi	932
Chapter 8: Repair and Strengthening of Under-Performing Structures	
Steel Reinforcement Corrosion in a Low Calcium Fly Ash Geopolymer Concrete M. Babaee and A. Castel	943

M. Schneider, S. Aufer and A. Buchegeger Safety Assessment of Existing Reinforced Concrete Beams Using Probabilistic Methods at Different Levels A. Roy, S. Robuschi, M.A.N. Hendriks and B. Belletti Seismic Performance of a Concrete Highway Tunnel Using a Concrete Damage Plasticity Model J.M. Dulinska and I.J.
