

Table of Contents

Preface

Chapter 1: Overview and Low Cost Processing

Cost Effective Developments for Fabrication of Titanium Components M.A. Imam, F.H.S. Froes and R.G. Reddy	3
There is Low Cost Titanium Componentry Today J.C. Withers, V. Shapovalov, R. Storm and R.O. Loutfy	11
Development of a Continuous Process to Produce Ti via Metallothermic Reduction of $TiCl_4$ in Molten Salt D.S. van Vuuren, S.J. Oosthuizen and J.J. Swanepoel	16
Behavior of Intermediate $CaTiO_3$ in Reduction Process of TiO_2 by Calcium Vapor J.G. Jia, B.Q. Xu, B. Yang, D.S. Wang, H. Xiong and D.C. Liu	25
The Production of Titanium Alloy Powder J.C. Withers, V. Shapovalov, R. Storm and R.O. Loutfy	32
The TiRO™ Process for the Continuous Direct Production of Titanium Powder C. Doblin, D. Freeman and M. Richards	37
Factors Affecting the Separation of Ti-Al Alloy in the TiPro Process K. Sichone, D.L. Zhang and S. Raynova	44

Chapter 2: Powder Consolidation and Characterization

Processing of Titanium Powder into Consolidated Parts & Sheet D. Mangabhai, K. Araci, M.K. Akhtar, N.A. Stone and D. Cantin	57
Effect of Powder Compact Holding Time on the Microstructure and Properties of Ti-6Al-4V Alloy Produced by Powder Compact Extrusion of a Powder Mixture of HDH Titanium and Al-V Master Alloy F. Yang, D.L. Zhang, B. Gabittas and H.Y. Lu	67
Consolidation of Blended Titanium/Magnesium Powders by Microwave Processing M.A. Imam, R.W. Bruce, J. Feng and A.W. Fliflet	73
The Effects of Lubrication on the Density Gradient of Titanium Powder Compacts J. Lou, B. Gabittas and D.L. Zhang	86
Parameters Optimization of γ-Ti-46.6Al-1.4Mn-2Mo Alloy by Hot-Pressing Sintering and its Microstructures X.G. Li, H.M. Lu and P.P. Wang	92

Chapter 3: Creative Processing

Electromagnetic Cold Crucible Technology Applied for Producing Big-Sized γ-TiAl Based Ingots with Directional Growth Structure H.S. Ding, G. Nie, Y.Z. Wang, R.R. Chen, J.J. Guo and H.Z. Fu	103
Economic Surface Treatment of Ti-Alloys to Improve their Resistance against Environmental High Temperature Attack A. Donchev, M. Schütze, A. Kolitsch and R. Yankov	109
Development of Low Cost and Low Elastic Modulus of Ti-Al-Mo-Fe Alloys for Automotive Applications C.L. Li, W.J. Ye, X.J. Mi, S.X. Hui, D.G. Lee and Y.T. Lee	114
The Development of a Ti-6Al-4V Alloy via Oxygen Solid Solution Strengthening for Aerospace & Defense Applications T.L. Jones, K. Kondoh, T. Mimoto, N. Nakanishi and J. Umeda	118
Titanium Based Composite Coatings Deposited by High Velocity Oxygen Fuel (HVOF) and Plasma Spraying Methods A. Salman, B. Gabittas and D.L. Zhang	127

Research and Development of Low-Cost Titanium Alloys for Biomedical Applications M. Niinomi, M. Nakai, J. Hieda, K. Cho, T. Akahori, T. Hattori and M. Ikeda	133
--	-----

Chapter 4: Low Cost Materials and Properties

Fracture Toughness of Powder Metallurgy and Ingot Titanium Alloys – A Review A.P. Singh, B. Gabbitas and D.L. Zhang	143
Comparison of Microstructure and Properties of Ti-6Al-7Nb Alloy Processed by Different Powder Metallurgy Routes L. Bolzoni, N. Hari Babu, E.M. Ruiz-Navas and E. Gordo	161
Effect of Swirly Segregation of Mo on Omega Phase Precipitation Behavior and Tensile Property of Ti-12Mo Alloy S. Emura, X.H. Min, S. Ii and K. Tsuchiya	180
Mechanical Properties of Single-Melt PAM Processed Ti-6Al-4V Forgings M. Guclu	186
Microstructure and Texture Development in Ti-5Al-5Mo-5V-3Cr Alloy during Cold Rolling and Annealing A. Ghaderi, P.D. Hodgson and M.R. Barnett	210
Phase Constitution and Heat Treatment Behavior of Low Cost Ti-Mn System Alloys M. Ikeda, M. Ueda, K. Imaizumi and M. Niinomi	217
