

Table of Contents

The Characterization of Structures and Defects by Means of Electron Microscopy and Electron Diffraction S. Amelinckx, G. Van Tendeloo and J. Van Landuyt	1
Hetero-Epitaxy H. Beneking	28
Morphology of Modulated, Quasicrystals and Organic Crystals P. Bennema	46
Growth of Ternary Compound Semiconductors by Liquid Zone Transport K.W. Benz and G. Bischof	63
Advances in the Bulk Growth of GaAs and InP by the Lec and VGF Techniques A.S. Jordan and E.M. Monberg	73
Growth Inhibitors and Promoters Exemplified on Solution Growth of Paraffin Crystals R. Kern and R. Dassonville	96
Recent Progress in the Growth of II-VI Compounds J.B. Mullin	115
Quality Improvement of CdTe and Related Compounds Grown by the Bridgman Method M. Mühlberg, P. Rudolph and A. Wenzel	129
The Role of Marangoni Convection in the Growth of GaAs Crystals by the Floating Zone Technique under Microgravity G. Müller and R. Rupp	138
Floating Zone Silicon Crystal Growth W. Schröder	155
Liquid Phase Electroepitaxy Y.V. Shmartsev	173
Fractal Growth of Crystals T. Vicsek	206
Kinetics of LPE Growth of Garnet Films	217
Growth and Characterization of $\text{BaFe}_{12-2x}(\text{Ti},\text{Co})_x\text{O}_{19}$ Hexagonal Ferrite Crystals	222
Crystal Growth and Characterization of Bismuth Cuprate Bi_2CuO_4	227
Dissolution Forms of Ca Garnet Single Crystal Spheres	233
Growth of $\text{BaFe}_{12}\text{O}_{19}$ Single Crystals from a Sodium Oxide Flux - Physical Properties of Some Solutions of the Pseudo-Binary System $\text{BaFe}_{12}\text{O}_{19}$	239
The Influence of History and Aluminium Ions on the Kinetics of the IV - III Polymorphic Phase Transition in Ammonium Nitrate	248
Industrial Bridgman Growth of Large Size BGO Crystals with Special Shapes	258
Core-Free Growth of Three Inch Diameter $\text{Li}_2\text{B}_4\text{O}_7$ Crystal for Saw Devices	262
Uptake of Metal Ions in Calcium Sulfate Hemihydrate Crystals	268
Phase Composition and Morphology of Particulates Crystallised within the Na_2CO_3-Na_2SO_4-H_2O System	279
Crystal Growth and Characterization of a Piezoelectricmaterial: Berlinit, AlPO_4	289
<i>In Situ</i> Observation of Diffusion Limited Aggregation in Systems with High Melting Temperature	298
The Lithium Niobate Single Crystals of High Optical Quality for Polarizing Devices	305
Pressurized Powder of CdTe and HgTe as Feed Material for Crystal Growth of (Hg,Cd)Te by Travelling Heater Method	312
CdZnTe Single Crystals Grown by the Vertical Gradient Freeze (VGF) Technique with Homogeneous Zn Distribution	319
Growth, Linear and Nonlinear Optical Properties of Thin Cds and ZnSe Films	327
Magnetic Resonance and Photoluminescence Investigations in CdTe	336
Observation of Discrete Birefringence Changes in Flux Grown Potassium Titanyl Phosphate (KTP)	346
Mixed CaNdAlO_4 and SrLaAlO_4 Crystals	355

Crystal Growth of Magnetoplumbite Type Laser Materials	360
MnIn₂Se₄ and Mn₂In₂Se₅, Crystal Growth, Structural and Electronic Properties	368
Growth of Non Magnetic Garnet Films by Liquid Phase Epitaxy	377
Growth and Characterization of CaMoO₄:Nd³⁺:Cr⁶⁺ Single Crystals	385
Complex Microscopic Investigations on the As-Grown Cracks in Optical Single Crystals	391
Defects in Shaped Calcium Fluoride Crystals	400
Growth and Spectroscopic Investigation of GGG:Nd,Cr and GGG:Nd,Cr,Ce Crystals for Laser Applications	406
Large Dimension ND: YSAG Laser Crystal Growth Using the Bridgman-Stockbarger Process	415
Horizontal Zone-Melting Nd³⁺: YAG Crystal Growth: Comparison of Predicted Interface Relocation with Operating Data	420
Growth and Characterization of Alpha- and Beta-Barium Metaborate Single Crystals	425
Growing Large Crystals of Y-Al Perovskite	432
Liquid-Phase Epitaxy of (Hg,Cd)Te on CdTe Substrates by a Vertical Dipping Technique	434
The Peculiarities of Receiving of Thin Film Single Crystal Oxide Luminophores	442
A Predictive Approach to Modelling the Morphology of Organic Crystals Based on Crystal Structure Using the Atom-Atom Method	450
An Unique Zone Refining Apparatus for Purification of Low Melting Point Organic Materials	460
Organic Crystals for Non Linear Optics	470
Crystallization of Calcium and Magnesium Phosphates in a Fluidized Bed	479
On Morphology of Crystals of Triclinic Even Normal Alkanes: Theory and Observation	489
Study of the Twinning Phenomenon in the LEC Growth of III-V Compound Single Crystals	499
Study of Inhomogeneity of GaAs Single Crystals Grown in Magnetic Field by Scanning Electron Microscopy and AB Etching Technique	509
Microdefects and their Effect on Minority Charge Carrier Lifetime in Dislocation-Free Float-Zoned Silicon	513
Growth of III-V- Semiconductors from Metallic Solutions by Applying Magnetic Fields	514
Growth of InP and GaAs Crystals by Liquid Encapsulated Vertical Freezing in Open Ampoule	522
Influence of the Solid-Liquid Interface Shape on the Defect Structure and on the Twinning Probability of Lec-Grown GaAs	528
Charge Carrier Concentration Across Growth Striations in N-GaAs	534
AlN: An Alternative Material for LEC GaAs Crystal Growth	543
The Nature of Nucleation Centers of Liquid Phase under Flash Thermotreatment of Single Crystal Silicon	548
Morphology and Structure Especialities of Semiconductor Whiskers Grown by CVD-Method	556
Structure Regularities of Cracking and Crystallization Processes of Thick Amorphous Silicon Films on Crystalline Substrate	565
Interface Symmetry and Phase Epitaxy in the Ni/GaAs System	574
New Version of InGaAsP/InP Buried Lasers Based on the Selectivity of the Regrowth Process	580
Liquid Phase Epitaxy of GaAs Quantum well Structures from Bi-Ga-Al Melts	585
Influence of Backside Layers on Wafers Flatness during Epitaxial Deposition	596
Structure Change and Crystallization Process Peculiarities of Polysilicon Layers under Laser Irradiation Effect	604
Study of Microloops and Associated Particles in Si-Doped HB GaAs by TEM, DSL Photoetching and Laser Scattering Tomography	610
Comparison of the Structural Quality of the Conventional (ca. 2000 Å⁰) and Superthin (ca. 200 Å⁰) InGaAsP Layers Grown by LPE	616
Molecular Beam Epitaxy of InGaAs on Si	623
Liquid Phase Electroepitaxy of GaAs Bulk Crystals	633

Kinetics of Thin-Solution Epitaxial Growth of GaAs Layers	646
Electrochemical Method for the Measurement of Doping Profiles in Silicon	651
Progress in the Growth of (Ga,In)(As,P)/InP Heterostructures by Chloride Vapour Phase Epitaxy: Application to Optoelectronic Integrated Circuits (OEICs)	657
The Nature and Formation of Oval Defects during MBE Growth of Gallium Arsenide Layers	666
Interface Formation in Soi-Structures by Laser Epitaxy of Polysilicon Layers	676
Heteroepitaxy of A^3B^5 Multicomponent Antimonides	683
Transient Stages during Epitaxy of Heterostructures on InP in a H.V.P.E. Reactor. Application to InP/InAs/InP Multiquantum Wells Growth	696
A New Approximation of Determining of the Charge Carrier Concentration in Silicon Epitaxial Layers	705
LPE Growth of Undoped GaAs and GaAlAs Layers	712
Epitaxial Growth of GaAs Films on the Silicon Substrates after Transition Layer Formation by Ion Implantation	722
Liquid-Phase Epitaxy of $(Ge_2)_{1-x}(GaAs)_x$ and $(Si_2)_{1-x}(Gap)_x$ Solid Solutions	731
Structure of GaAs VPE Layers	735
Layer Thickness Limitation in a GaAs Chloride VPE System	741
Se-Doped GaAs Active Layer Grown with MOCVD for Microwave Application	746
Optical Properties of $Al_xGa_{1-x}As_ySb_{1-y}$ by Liquid Phase Epitaxy	751
Crystal Growth of V_3Si and $(V_xCr_{1-x})_3Si$ by Zone Floating	760
Structure of $CaNdAlO_4$ and $SrLaAlO_4$ Compounds	769
Crystallization of $CaNdAlO_4$ and $SrLaAlO_4$ Compounds	776
Interpretation of Twinned Structures in $YBa_2Cu_3O_{7-\Delta}$ Single Crystals	781
Properties of $YBa_2Cu_3O_{7-\Delta}$ Crystals Grown by an Alkali halide Flux Route	789
Crystal Growth of 90k YBCO from Alumina Crucibles: Control of Crucible Corrosion and Crystal Contamination	794
Growth, Physical Properties of Crystalline and Noncrystalline $(GeTe)_{1-x}R_x$ Films ($R=Y, Gd, Tb$)	800
A Mathematical Description of the Evolution of the Halfthickness of a Single Crystal Sheet Grown from the Melt in a Vacuum by the E.F.G. Method	802
The Use of Moments of Momenta to Predict Crystal Habits and Species in Solution	812
Global Time-Dependent Simulation of Crystal Growth	818
On the Statistical Models of Crystal Morphology	829
A Temperature Field Investigation in Case of Crystal Growth from the Melt with a Plane Interface on Exact Determined Thermal Conditions	839
Ordering Mechanism of III-V Semiconductor Alloys	847
An Extrapolation Method for Approximating Melt Convection in a Czochralski Furnace	851
Thermochemical Aspects by the Synthesis of Single Crystals in the Temperature Gradient - Binary Compounds	862
General Prediction of Crystal Growth Rates	873
The Improved Model of Steady-State LPE Growth from Solution	882
Heat Transfer Analysis in Shaped Fluorite Crystals	894
Morphological Behaviour under Diffusional Control – A Computer Simulation	902
Cellular-Dendritic Transition during Directional Solidification	912
