

Table of Contents

Preface**Nucleation**

J. Nyvlt 1

Phenomenological Aspects of Crystal Growth

C. Paorici and G. Attolini 25

Thermodynamic and Structural Aspects of Crystal Growth from Solutions

R. Rodríguez-Clemente 43

Kinetics of Crystallization from Highly Supersaturated Solutions

I.V. Melikhov 69

The Uses of Crystal Growth in Gels and other Diffusing-Reacting Systems

J.M. García-Ruiz 87

Powder Production from Aqueous Solutions for Ceramics Application

M.A. Blesa and R.J. Candal 107

Preparation and Characterization of Hexaferrite Powders

P. Gönert, E. Sinn and M. Rösler 129

Molecular Beam Epitaxy and Electronic Materials

S. Franchi 149

Melt Growth Processes for Semiconductors

H.-. Sell 169

Chemical Etching: Principles and the Present Status

K. Sangwal 187

Structural Characterization of Single Crystals

A. Damle 205
