## Chapter 1: Synthesis and Preparation of Nanomaterials

|                                                                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Fabrication of Sub-Wavelength Antireflective Structures Using a Soft Roll-to-Plate Nanoimprinting Lithographic Method</b><br>Y. Zhou, S. Shen, J. Zhang, P.F. Jin and Y.H. Liu                                                           | 3   |
| <b>One-Pot Synthesis of Environmental Friendly Ni<sub>3</sub>S<sub>2</sub> Quantum Dots</b><br>Y.K. Wang, G.L. Wu, Z.T. Li and M.B. Wu                                                                                                      | 9   |
| <b>Palladium Nanoparticles Synthesized by Bio-Templates for Suzuki Coupling Reaction</b><br>Y.H. Wei, L.J. Wang, X.H. Zhao, C.C. Li, L.X. Kong and X.F. Zhou                                                                                | 14  |
| <b>Pd/SiO<sub>2</sub> Organic-Inorganic Hybrid Materials by Sol-Gel Method: Preparation and Thermal Stability under H<sub>2</sub> Atmosphere</b><br>J. Yang, B.S. Li, X. Huo, H. Xu and H.Y. Hou                                            | 20  |
| <b>Preparation and Comparatively Evaluation of Phenylethyl Resorcinol-Loaded Nanocarriers: Nanoemulsions and Nanostructured Lipid Carriers</b><br>C.L. Ma, C.B. Hu, S.L. Ni, A.R. Qian and Q. Xia                                           | 28  |
| <b>Study on the Preparation Conditions of Nano-Silver Substrate Used for SERS Determination of Thiophene</b><br>Z.T. Wang, J.J. Zhang, L.J. Zhou, X.W. Pei and F.Y. Wang                                                                    | 37  |
| <b>Synthesis and Characterization of In<sub>2</sub>O<sub>3</sub> Nanobelts via Hydrothermal Route</b><br>G.D. Liu, Y.G. Wang, H.B. Lu and Y. Tian                                                                                           | 43  |
| <b>Synthesis of CeO<sub>2</sub>-SiO<sub>2</sub> Composite Nanoparticles by Coprecipitation Method and Dispersion Stability of their Suspension</b><br>X.L. Song, K. Lin, H.L. Duan, Y. Xiao, H. Zhuang, H.W. Zhang and N. Jiang             | 47  |
| <b>Synthesis, Photoluminescence and Infrared Emissivity of SnO<sub>2</sub> Nanocrystalline Thin Films</b><br>J.F. Yan, F.J. Zhang, X.F. Ruan, M.Z. Xu, Z.Y. Zhang, W. Zhao and J.N. Yun                                                     | 55  |
| <b>The Standard Formation Enthalpies of Spherical ZnO Nano-Particles: Size Matters</b><br>S.X. Hu, Y. Li and X.M. Wu                                                                                                                        | 62  |
| <b>The Synthesis and Property of Neutral Silicone Glass Sealant</b><br>X. Chen, B. Yu, H. Yuan, H.L. Cong, X.D. Xu, S.J. Yang, Q.H. Peng, R.X. Yang and X.H. Gao                                                                            | 67  |
| <b>Influence of Calcination Temperature on the Performance of TiO<sub>2</sub> Films in Dye-Sensitized Solar Cells</b><br>Y.X. Wang, Y.H. Ye, J. Sun and Y.T. Shi                                                                            | 72  |
| <b>Enhancement of Luminescence of YPO<sub>4</sub>:Eu<sup>3+</sup>,Yb<sup>3+</sup> Nanophosphor Synthesized by Hydrothermal Method</b><br>J.M. Zhu, J.M. Hu, J.L. Hao, A.Y. Wang and Y.X. Pan                                                | 77  |
| <b>Effect of Sm-Au on Silver Staining Results and it's UV-Vis Absorption Spectrum</b><br>X.Z. Liu, C. Zhang, W.W. Zhu, X.Z. Liu, J. Chen and X.M. Gui                                                                                       | 83  |
| <b>Rapid, Simple and Selective Determination of 2,4,6-dinitrophenol Based on PtAg /Mesoporous SiO<sub>2</sub> Nanocomposite Sensor with Electrochemical Detection</b><br>Y.J. Feng, Y.B. Chang, G. Chen, H.Y. Zhao, S.H. Zhang and L.G. Bai | 87  |
| <b>Fabrication and Characterization of LaOBr:Eu<sup>3+</sup> Luminescent Nanofibers</b><br>W.S. Yu, C.S. Zhu, Q.L. Ma, W.W. Ma, J.X. Wang and X.T. Dong                                                                                     | 92  |
| <b>Preparation and Characterization of Nanometer Gallium Nitride by Gas-Solid Reaction</b><br>K.J. He, S.C. Wang and K.M. Wang                                                                                                              | 97  |
| <b>Refluxing Synthesis and Characterization of ZnO Nanopowders from Different Zinc Salts</b><br>M.H. Wang, X.Y. Ma and W. Jiang                                                                                                             | 103 |

## Chapter 2: Nanotechnologies and Nanomaterials: Frontiers of Application and Properties

|                                                                                                                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Structural and Optical Properties of Be-Doped GaAs Grown by MBE</b><br>H.M. Jia, J.L. Tang, L. Chang, D. Fang, X. Fang, X.H. Wang, X.H. Ma, L. Xu and Z.P. Wei                                                                            | 111 |
| <b>The Influence of Emulsifiers on the Formation of Res-Loaded Nanostructured Lipid Carriers</b><br>T.K. Xing, R. Sun, H. Zhang and Q. Xia                                                                                                       | 118 |
| <b>Near-Infrared Reflection Spectra of Copper Nanowire Array Structures</b><br>W.L. Dou, W. Xu, S.H. Xu, G.T. Fei and Y.M. Xiao                                                                                                                  | 125 |
| <b>Investigation onto Nanometer Delay Charges for Millisecond Blasting Caps</b><br>H.S. Zhou, X.H. Xie and S.L. Yan                                                                                                                              | 129 |
| <b>Investigation of Cu Species in CuBTC: Active Sites for Selective Catalytic Reduction of NO with NH<sub>3</sub></b><br>C.Y. Li, Y. Shi, H. Zhang and F.H. Xue                                                                                  | 133 |
| <b>Influence of Exposure Time on the Photosensitive Properties of Borosilicate Photosensitive Glass-Ceramics</b><br>T. Zheng, X. Xu, Z.Y. Li, S. Jiang, Y. Zhang and J.W. Lv                                                                     | 142 |
| <b>A Theoretical Study of Nonlinear Optical Properties for Stilbene Grafted to Carbon Nanotubes</b><br>S. Li, Y.X. Wang and Z.D. Yang                                                                                                            | 149 |
| <b>The Surface and Photoluminescence Properties of GaAs Passivated by Wet Chemical Method</b><br>F. Chen, J.L. Tang, G.J. Liu, D. Fang, X. Gao, Z.K. Xu, X. Fang, X.H. Ma, L. Xu, X.H. Wang and Z.P. Wei                                         | 154 |
| <b>The Surface Plasmon Resonance Absorption of Indium Tin Oxide Nanoparticles and its Control</b><br>Y.F. Tuo, Y.P. Wu, M. Huang, K. Wang, Y. Huang, Z.H. Zhou and S. Shen                                                                       | 160 |
| <b>1200 Mesh Silicon Carbide Corona Protection Varnish with Epoxy/OMMT Nano-Composite Adhesive</b><br>C.X. Hu, Y.N. Zhao, H.B. Hou and X.H. Zhang                                                                                                | 166 |
| <b>A Novel hig E Aptamer Biosensor Base on Core-Shell Fe<sub>3</sub>O<sub>4</sub>@Au Magnetic Composite Nanoparticles</b><br>G.Y. Huang, L.F. Ma, M.Y. Guan, J.T. Liang, Y. Huang and G.Y. Li                                                    | 170 |
| <b>Brominated Poly(2,6-dimethyl-1,4-phenylene oxide)/Carbon Materials Nanocomposite Membranes for CO<sub>2</sub>/N<sub>2</sub> Separation</b><br>L. Guo, B. Yu, H.L. Cong, X.L. Zhang, Z.J. Li, X.M. Liu, F. Zhai, H. Yuan and T.Z. Hao          | 176 |
| <b>Deposition Voltage Research of CdSe Quantum Dots Sensitized TiO<sub>2</sub> Solar Cell</b><br>L.Y. Zhao, F.F. Zhou, P. Hu, S.J. Han and P. Wang                                                                                               | 182 |
| <b>Design of Temperature Signal Detection System in Electrolysis Cell of Nano-Carbon</b><br>H. Gao                                                                                                                                               | 186 |
| <b>Membrane Modification of Ceramic Membrane and its Application in Separation of Waste o/w Emulsion</b><br>J.E. Zhou, Q.B. Chang, Y.Q. Wang, X.Z. Zhang, J. Liang and X. Wang                                                                   | 190 |
| <b>Performance Study of Zinc Oxide Nanoparticles for Lubricant Oil</b><br>W.G. Xue, Z.H. Zhao, P. Wang, Z.L. Jin, X.H. Xu and X.G. Zhou                                                                                                          | 195 |
| <b>Promotion Effects of La<sub>2</sub>O<sub>3</sub> on Ni/Al<sub>2</sub>O<sub>3</sub> Catalysts for CO<sub>2</sub> Methanation</b><br>W.C. Chen, W. Yang, J.D. Xing, L. Liu, H.L. Sun, Z.X. Xu, S.Z. Luo and W. Chu                              | 205 |
| <b>The Influence of Yb<sup>3+</sup>/Er<sup>3+</sup> Co-Doped β-NaYF<sub>4</sub> Up-Conversion Micron Tubes on Photocatalytic Activity of TiO<sub>2</sub> for Degradation of Organic Dyes</b><br>Y.L. Ma, X.R. Zheng, W. Liu, H.Q. Li and H.M. Ji | 211 |
| <b>The Fabrication of TiN Thin Film and its Inhibition of Secondary Electron Emission Properties</b><br>F.Z. Song, X.P. Huang, M.X. Qi, K. Chen, Y.L. Liu, X. Wang, T.Y. Yan, W.K. Li, J.M. Wang and Q. Zhao                                     | 217 |

### **Chapter 3: Frontiers of Micro-Materials and Technologies, Applications**

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Biocompatible Microcapsule of Carboxymethyl Cellulose/Chitosan as Drug Carrier</b><br>F.J. Wang, F.S. Lu, M. Cui and Z.Q. Shao | 227 |
| <b>Fabrication of BPPO Isoporous Membranes for Water Treatment</b><br>H. Yuan, B. Yu, H.L. Cong, Q.H. Peng, Y.L. Luo and M. Chi   | 237 |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Mesoporous Sulfur-Doped TiO<sub>2</sub> Microspheres for Catalytic Degradation of Methylene Blue under Visible Light</b>             |     |
| Z.W. Ding, S. Chen, Z.Q. Liu, C.F. Jiang and W. Chu                                                                                     | 242 |
| <b>Negative Ion Release of an Anion PP Fiber Covered Colored Cotton Textile</b>                                                         |     |
| J. Liu and Y.G. Zhuo                                                                                                                    | 251 |
| <b>Textural and Fractal Characteristics of KOH-Activated Microporous Carbon Materials and their Carbon Dioxide Storage Performances</b> |     |
| Y.Y. Feng, W. Yang, T. Lin and W. Chu                                                                                                   | 255 |
| <b>YMgAl-LDO Synthesis and its Catalytic Performance for Preparation of Isophorone by Condensation of Acetone</b>                       |     |
| Y. Liu and W.Y. Luo                                                                                                                     | 265 |
| <b>The Electrical Characteristics of GaAs-MgO Interfaces of GaAs MIS Schottky Diodes</b>                                                |     |
| X. Gao, J.L. Tang, D. Fang, F. Chen, S.P. Wang, H.F. Zhao, X. Fang, X.H. Wang, Z.K. Xu, X.H. Ma, L. Xu and Z.P. Wei                     | 270 |
| <b>Formulation of the Spectral Reflective Properties of Coating System</b>                                                              |     |
| S.Q. Zhang, H. Yang and J.L. Pan                                                                                                        | 276 |
| <b>Creep and Microstructure of an Anion PP Fiber Covered Colored Cotton Textile Yarn</b>                                                |     |
| Y.G. Zhuo, J. Liu, S.Z. Du and Q.S. Li                                                                                                  | 283 |
