PREFACE

Assessment of Structural Integrity under Dynamic Loading F.M. Burdekin, W. Zhao, K. Kuntiyawachai and W.G. Xu	3
The Use of Vibration Signatures to Detect Flexural Cracking in Reinforced Concrete Bridge Decks S.R. Pearson, J.S. Owen and B.S. Choo	17
Damage Detection of Plate-Like Structures M. Battipede, R. Ruotolo and C. Surace	27
An Experimental Appraisal of the Strain Energy Damage Location Method K. Worden, G. Manson and D.J. Allman	35
Development and Use of Smart Acquisition Systems for Bridge Monitoring C. Cremona and J. Carracilli	47
An Experimental Study of the Use of Vibration Testing to Predict Buckling Failure J.A. Badham, C.A. Featherston and J.A. Brandon	57
Model-Based Damage Identification from Changes of Model Data - A Comparison of Different Methods C.P. Fritzen and K. Bohle	65
Self-Monitoring and Self-Healing Jointed Structures G. Park, D.E. Muntges and D.J. Inman	75
Pattern Recognition Methods for Damage Diagnosis in Structures from Vibration Measurements I. Trendafilova	85
International Research Projects on Structural Damage Detection H. Van der Auweraer	97
An Investigation into the Condition Monitoring Strategy for a Large Reversible Francis Pump-Turbine S. Roberts and J.A. Brandon	113
Mistuning Parameters Identification of a Bladed Disk F. Pichot, F. Thouverez, L. Jezequel and E. Seinturier	123
Influence of Bearing Pre-load Coefficient on Shaft Vibration and Pad Temperature in a Hydroturbine Generator Unit - A Case Study F.Z. Feng, F.L. Chu, D. Guo and W.X. Lu	133
Fuzzy Model-Based Fault Diagnosis of an AC Motor X.Z. Sun, J.E.T. Penny, N.R. Fahmi and Q.M. Zhu	143
The Application of a Lifetime Observer in Vehicle Technology S. Wedman and J. Wallaschek	153
Rub Fault Diagnostics by Dynamic Characteristics Analysis of a Multi-Disk Rotor System W.X. Lu and F.L. Chu	163
Application of High Frequency Monitoring for Classification of Rolling Element Bearing Failures E.D. Price, A.W. Lees and M.I. Friswell	173
On Modelling of Structural Stiffness Loss Due to Damage W.M. Ostachowicz and M. Krawczuk	185
Inverse Methods in Structural Health Monitoring M.I. Friswell and J.E. Mottershead	201
Beat-Frequencies for Damage Detection M.M. Abdel Wahab and J.E. Mottershead	211
Detection and Configuration of the Shaft Crack in a Rotor-Bearing System by Genetic Algorithms Y.Y. He, F.L. Chu and D. Guo	221
Developments and Comparisons on the Definition of an Instantaneous Damping Estimator for Structures under Natural Excitation R. Ceravolo, A. de Stefano and F. Molinari	231

Spectral Finite Element and Genetic Algorithm for Crack Detection in Cantilever Rod M. Krawczuk and W.M. Ostachowicz	241
Auto-Regression and Statistical Process Control Techniques Applied to Damage Indication in Telecommunication Masts P.J. Fanning and E.P. Carden	251
An Error Estimate for CVA A. Fasana, L. Garibaldi, S. Marchesiello and S. Sorrentino	261
Diagnostics of a System with an Interface Nonlinearity using Higher Order Spectral Estimators K.K. Teng and J.A. Brandon	271
The Multi-Agent Based Fault Diagnosis Prototype System Z.Y. Chen, Y.Y. He, F.L. Chu and J.Y. Huang	287
Built-In Diagnostics for Monitoring Crack Growth in Aircraft Structures J. Ihn, F. Chang and H. Speckmann	299
Damage Assessment Using Acoustic Emission J.R. Watson, P.T. Cole, K.M. Holford and A.W. Davies	309
Novel Sensors for Damage Detection P. Marin-Franch, T. Martin, D.L. Tunnicliffe and D.K. Das Gupta	319
Establishment of Traceable Measurement Standards for Acoustic Emission Energy Calibration T. Yan and B.E. Jones	331
Correlation of Crack Propagation and Acoustic Emission Rates M. Talebzadeh and T.M. Roberts	341
Wavelet Signal Processing of Acoustic Emission Data W.J. Staszewski and K.M. Holford	351
On the Long-Term Stability of Normal Condition for Damage Detection in a Composite Panel G. Manson, G. Pierce and K. Worden	359
Structural Health Monitoring of a Carbon Fibre Structure Using Low Profile Piezoelectric, Optical and MEMS Sensors T. Martin, A. Jones, I. Read, S. Murray, D. Haynes, P. Lloyd, P. Foote, R. Noble and D.L. Tunnicliffe	371
Lifetime Predictions for Orthopaedic Implants P.J. Gregson and M. Browne	383
Impact Location on Stiffened Composite Structures Using Neural Networks N. Liu, J.E.T. Penny, C.Y. Wei, P.E. Irving, N.D. Dykes and Q.M. Zhu	395
Damage Assessment of Composite Structures Using Inverse Analysis and Genetic Algorithms P.J. Sherratt, D.C. Panni and A.D. Nurse	409
Evaluation for Fatigue Limit Reliability of High Strength Steel from Meso-Scale Characteristics H. Noguchi, T. Miyazaki and M. Kage	419
Mesomechanical Modeling of Quasihomogeneous Damage V. Kafka	433
Full Scale Accelerated Testing of Bituminous Road Pavement Mixtures M.D. Gilchrist, A.M. Hartman, P.M.O. Owende and S.M. Ward	443
Thermoelastic Characterisation of Damage Around a Circular Hole in a GRP Component P.R. Cunningham, J.M. Dulieu-Barton, A.G. Dutton and R.A. Shenoi	453
