

# Table of Contents

## Preface

<b>Vibration-Based Structural Health Monitoring – Concepts and Applications</b> C.P. Fritzen	3
<b>Applications of Spectral Kurtosis in Machine Diagnostics and Prognostics</b> R.B. Randall	21
<b>Crack Detection Using Acoustic Emission Methods – Fundamentals and Applications</b> L.M. Rogers	33
<b>Ultrasonic/Guided Waves for Structural Health Monitoring</b> W.J. Staszewski	49
<b>Identification of Crack Damage with Wavelet Finite Element</b> X.F. Chen, Z.J. He, Q. Gao and Y. Zi	63
<b>A Biological Immunity-Inspired Novelty Detection Algorithm for Rotor System Monitoring</b> Y.G. Dong, E. Dong, H. Jia and W. Lv	71
<b>Gearbox Fault Detection Using Hilbert and TT-Transform</b> X. Fan and M.J. Zuo	79
<b>Frequency-Demodulated Analysis Based on Cyclostationarity for Local Fault Detection in Gears</b> J. He, J. Chen, G. Bi and F. Zhou	87
<b>Gearbox Fault Diagnosis Using Adaptive Redundant Second Generation Wavelet</b> H. Jiang, Z.J. He, C. Duan and X.F. Chen	95
<b>Comparison of Two Software Tools for Damage Identification: Gradient-Based vs. Case-Based Approach</b> P. Kołakowski, L.E. Mujica and J. Vehi	103
<b>Identification of Impact Force for Base on Higher Order Wigner Distribution</b> S.K. Lee, S. Hwang and J. Gu	111
<b>Damage Identification of a Mechanical Structure with a Non-Minimum Phase Based on Singular Value Decomposition</b> S.K. Lee, K. Rho and J. Gu	119
<b>Wavelet Transform Domain Filter and Its Application in Incipient Fault Prognosis</b> F.C. Li, J. Chen, G.C. Zhang and Z.J. He	127
<b>Classification Using Radial Basis Function Networks with Uncertain Weights</b> G. Manson, G. Pierce, K. Worden and D. Chetwynd	135
<b>Comparison of Different Methods of Ritz Vectors Extraction</b> K. Mendrok and T. Uhl	143
<b>Considerations for Practical Neural Network Application to a Damage Detection Problem</b> G. Pierce, K. Worden and G. Manson	151
<b>Impact Load Identification Based on Local Measurements</b> M. Wiklo and J. Holnicki-Szulc	159
<b>Extracting Gear Fault Features Using Maximal Bispectrum</b> G.C. Zhang, J. Chen, F.C. Li and W.H. Li	167
<b>Data Mining for Fault Diagnosis and Machine Learning for Rotating Machinery</b> G. Zhao, D.X. Jiang, K. Li and J.H. Diao	175
<b>Vibration Based Modal Parameters Identification and Wear Fault Diagnosis Using Laplace Wavelet</b> Y. Zi, X.F. Chen, Z.J. He and P. Chen	183
<b>Detection of Fatigue Crack Growth in Aircraft Landing Gear, 4 Point Bend Test Specimens</b> M.G. Baxter, R. Pullin, K.M. Holford and S.L. Evans	193
<b>Detection of Cracks Using Piezoelectric Wafer Active Sensors</b> A. Blazewicz, A.G. Kotousov and F. Wornle	201
<b>Theoretical Models and Experimental Techniques in Nondestructive Evaluation of Concrete</b> M. Brigante and M. Modano	207
<b>Modal Analysis of Acoustic Emission Signals from Artificial and Fatigue Crack Sources in Aerospace Grade Steel</b> R. Pullin, K.M. Holford and M.G. Baxter	217

<b>Fatigue Damage Evaluation of Organic Coatings Subjected to Mechanical Stress</b> K. Darowicki and M. Szociński	227
<b>A Description of Damage Based on Nanoscale Modelling of Fracture</b> J. Kaczmarek and W.M. Ostachowicz	235
<b>On Fracture of Restored Teeth</b> B. Kahler, A.G. Kotousov and K. Borkowski	245
<b>Strip Yield Model for a Crack in a Plate of Arbitrary Thickness</b> A.G. Kotousov	253
<b>Simplified Methods for Prediction of Elastic-Plastic Behaviour of Complex Structures with Repeated Structural Units</b> S.B. Leen, T.H. Hyde, R. Sabesan and W. Pan	261
<b>Computation Tool for Rotor's Life Consumption in Steam Turbines According to Industrial Specifications</b> A. Lucifredi, M.E. Poldi, P. Silvestri and E. Foglino	269
<b>Damage Analysis of Internal Surface Flaws Using Thermoelastic Stress Analysis</b> N. Sathon and J.M. Dulieu-Barton	279
<b>Novel Vibration-Based Methods for Detecting Delamination Damage in Composite Plate and Shell Laminates</b> M. Gherlone, M. Mattone, C. Surace, A. Tassotti and A. Tessler	289
<b>Finite Element Model Updating for Damage Localisation and Quantification Using Experimental Modal Data</b> A.S. Kompalka and S. Reese	297
<b>Benchmark of Damage Localisation Algorithms Using Mode Shape Data</b> J. Morlier, F. Bos and P. Castera	305
<b>Damage Location in Beam and Plate Structures by Wavelet Analysis of Experimentally Determined Mode Shapes</b> M. Rucka and K. Wilde	313
<b>An Investigation on Vibration-Based Damage Detection in an Aircraft Wing Scaled Model</b> I. Trendafilova	321
<b>Example of Application of Experimental Modal Model for Damage Detection for a Rotating Shaft</b> T. Uhl and W. Lisowski	329
<b>Dynamics of Large Power Rotating Machine with Cracked Shaft</b> S. Banaszek	337
<b>Application of Degree of Cyclostationarity in Rolling Element Bearing Diagnosis</b> G. Bi, J. Chen, J. He, F. Zhou and G.C. Zhang	347
<b>Hybrid Model Based Identification of Local Rubbing Fault in Rotor Systems</b> Q.K. Han, T. Yu, H. Li, Z.Y. Qin, Z.W. Zhang and B.C. Wen	355
<b>Internet/Intranet Based Remote Condition Monitoring and Fault Diagnosis Scheme and System for Steam Turbosets</b> Y.Y. He, W.X. Lu and F.L. Chu	365
<b>Intelligent Fault Diagnosis in Power Plant Using Empirical Mode Decomposition, Fuzzy Feature Extraction and Support Vector Machines</b> Q. Hu, Z.J. He, Y. Zi, Z.S. Zhang and Y. Lei	373
<b>Magnetic Bearings for Non-Destructive Health Monitoring of Rotating Machinery Supported in Conventional Bearings</b> M. Kasarda, D.D. Quinn, T. Bash, G. Mani, D.J. Inman, R.G. Kirk and J.T. Sawicki	383
<b>Assessment of Materials and Operational Imperfections in Rotating Machinery</b> J. Kiciński	391
<b>Modeling and Analyzing of Vibration in Working Crankshaft with Cracks</b> X.Y. Lei, G.C. Zhang, X.G. Song, J. Chen and G.M. Dong	401
<b>Stability Analysis of a Flexible Bladed-Rotor</b> N. Lesaffre, J.J. Sinou and F. Thouverez	409
<b>Genetic Algorithms Based Rubbing Location Identification in a Rotor System</b> W.X. Lu, F.L. Chu and D. Guo	417
<b>Bush Skewness Defect in Journal Bearing as an Example of Knowledge Base Development</b> M. Luczak	425

<b>Acceptable Dislocation of Bearings of the Turbine Set Considering Permissible Vibration and Load of the Bearings</b> J. Rybczynski	433
<b>Effect of Shaft Unbalance on the Operation of Worm Gear Rolling Bearings</b> S. Strzelecki and Z. Towarek	441
<b>Vibration Behaviour of a Disc Assembly with a Cracked Lacing Wire</b> D. Szwedowicz, C. Acosta, J. Bedolla and E. Martinez	451
<b>Model Based SHM - Rotating Machinery Application</b> T. Uhl, T. Barszcz and J. Bednarz	459
<b>Time-Frequency Feature Extraction without Cross-Terms Based on Acoustic Signal in Rotor Malfunctions</b> F.Q. Wu and G. Meng	467
<b>Diagnosis of Local Fault and Identification of Transient Fault Force in Rotating Machinery</b> H.L. Yao, T. Yu, X.P. Li, Q.K. Han and B.C. Wen	475
<b>Multi-Fault Classifier Based on Support Vector Machine and Its Application</b> Z.S. Zhang, M. Shen, W. Lv and Z.J. He	483
<b>Detecting Damage in a Beam by Static Tests</b> S. Caddemi and A. Morassi	493
<b>Strain-Based Damage Tolerance of Cylindrical Shells Subjected to Transient Loading and Its Application</b> C.Y. Gao and Y.T. Fang	501
<b>An Experimental Rig for Damage Detection of Rolling Bearings</b> L. Garibaldi, A. Fasana and S. Marchesiello	509
<b>Identification of Discontinuities in Composite Rods and Beams Based on Lamb Wave Propagation</b> J. Grabowska and M. Krawczuk	517
<b>Application of Statistical Energy Analysis for Damage Detection in Spacecraft Structures</b> J. López-Díez, M. Torrealba, A. Güemes and C. Cuerno-Rejado	525
<b>Experimental and Numerical Investigation of Wave Propagation in Composite Beam with an Additional Mass</b> W.M. Ostachowicz, M. Krawczuk and M. Palacz	533
<b>A Combined Finite and Spectral Element Approach to Wave Scattering in a Cracked Beam: Modelling and Validation</b> S.P. Shone, B.R. Mace and T.P. Waters	541
<b>Tracking of Cracks in Airplane Components Using Nonlinear Surface Wave Propagation Techniques</b> S. Vanlanduit, P. Guillaume, J. Vermeulen and K. Harri	549
<b>Wave Propagation Based Multi-Crack Identification in Beam Structures through Anti-Resonances Information</b> D.S. Wang and H.P. Zhu	557
<b>Damage Detection in Circular Cylindrical Shells by Frequency Sensitivities and Mode Shapes</b> Z.H. Wang, J. Chen, Y. Zhao and H.W. Ma	565
<b>Health Monitoring: New Techniques Based on Vibrations Measurements and Identification Algorithms on an Aeronautical Composite Panel</b> I. Bovio, M. Della Ragione and L. Lecce	575
<b>Identification of Damage in Composite Structures Using Thermoelastic Stress Analysis</b> T.R. Emery, J.M. Dulieu-Barton and P.R. Cunningham	583
<b>Predicting Failure in Multi-Bolt Composite Joints Using Finite Element Analysis and Bearing-Bypass Diagrams</b> C.T. McCarthy, M.A. McCarthy and M.D. Gilchrist	591
<b>Simulation of Damage Scenarios in an FRP Composite Suspension Footbridge</b> R.A. Votsis, M.M. Abdel Wahab and M.K. Chryssanthopoulos	599
<b>Non-Linear Vibration of a Delaminated Composite Beam</b> A.J. Żak	607
<b>A Uniplanar Capacitive Approach for Subsurface Damage Detection of Nonmetallic Materials</b> E. Dong, Y.G. Dong, W. Lv, H. Jia and J. Li	617

<b>Wireless Structural Health Monitoring Using MEMS</b> M. Krüger, C.U. Grosse and P.J. Marrón	625
<b>Multidisciplinary Software Developments in a Power Transformers Scenario</b> P. Mariño, F. Poza, S. Otero and F. Machado	635
<b>Simplified Modeling for Impedance-Based Health Monitoring</b> D.M. Peairs, G. Park and D.J. Inman	643
<b>The Kinematics and Dynamics of a Dextrous Parallel Manipulator for Structural Inspection Applications</b> M.P. Cartmell, A.R. Whittaker and A. Krimly	653
<b>Prediction of Machines Health with Application of an Intelligent Approach – a Mining Machinery Case Study</b> M. Gibiec	661
<b>Health Monitoring of Electric Circuits</b> M. Kokot and J. Holnicki-Szulc	669
<b>Damage Detection on Typical Aeronautical Structures</b> R. Rodríguez, A. Yarza, J. López-Díez, C. Cuerno-Rejado and A. Güemes	677
<b>An Analysis about Response of Small Structure Suffered Underwater Explosion</b> Q. Wan, W.K. Jiang and Z.P. Zhao	685
<b>Ultrasonic Damage Measurement in Reinforced Concrete Beams</b> R. Bairrao, M. Chrzanowski, J. Duque and P. Latus	695
<b>Instantaneous Identification of Polynomial Nonlinearity Based on Volterra Series Representation</b> G.V. Demarie, R. Ceravolo and A. de Stefano	703
<b>Impact Force Spectrum for Damage Assessment of Earthquake-Induced Structural Pounding</b> R. Jankowski	711
<b>Local and Global Damages of Quasi-Brittle Material in Uniaxial Compression Based on Gradient-Dependent Plasticity</b> X.B. Wang	719
<b>Vibration-Based Seismic Damage Identification in Buildings</b> J.L. Zapico and M.P. González	727
<b>Modal Analysis of a Reinforced Concrete Frame in Various States of Damage</b> Z. Zembaty and M. Kowalski	735
<b>Vibration-Based Condition Monitoring of Smart Prefabricated Concrete Elements</b> D. Zonta, M. Pozzi, M. Forti and P. Zanon	743
<b>Detecting Damage of Rolling Bearings Using EMD</b> Q. Gao, Z.J. He, X.F. Chen and K.Y. Qi	753
<b>Prediction of the Influence of Vibration on Structural Integrity of Elevator Suspension Ropes</b> S. Kaczmarczyk	761
<b>An Investigation into Scalpel Blade Sharpness Using Cutting Experiments and Finite Element Analysis</b> C.T. McCarthy, M. Hussey and M.D. Gilchrist	769
<b>A Correlative Method of Machine Condition Monitoring Based on the Choi-Williams Distribution</b> G. Yang, Z. Wu and J.J. Gao	777
<b>Detection of Stray Current Field Interference on Metal Constructions Using STFT</b> K. Żakowski and K. Darowicki	785
