Preface

Keynote Papers

	1
Aspects of Novelty Detection K. Worden, G. Manson and C. Surace	3
Identification of Structural Property Degradations by Computational Model Updating	17
Identification of Structural Property Degradations by Computational Model Updating M. Link, S. Stöhr and M. Weiland	19
Structural Identification and Health Monitoring on the Historical Architectural Heritage	35
Structural Identification and Health Monitoring on the Historical Architectural Heritage A. de Stefano	37
Structural Analysis Methods for Structural Health Management of Future Aerospace Vehicles	55
Structural Analysis Methods for Structural Health Management of Future Aerospace Vehicles A. Tessler	57
Damage Assessment of Structures-An Air Force Office of Scientific Research Structural Mechanics Perspective	67
Damage Assessment of Structures - An Air Force Office of Scientific Research Structural Mechanics Perspective V. Giurgiutiu	69
1A. Damage Location and Quantification I	75
Multi-Phased Array for Damage Localisation P. Malinowski, T. Wandowski, I. Trendafilova and W.M. Ostachowicz	77
Generalized Fourier Coefficients and Applications to Damage Detection in Rods A. Morassi	83
A Multi-Algorithm Procedure for Damage Location and Quantification in the Field of Continuous Static Monitoring of Structures F. Lanata and D. Posenato	89
Damage Localization Using Levenberg-Marquardt Optimization D.L. Parker, W.G. Frazier and M.A. Gray	95
Finite Element Model Updating of a Steel-Concrete Composite Moment - Resisting Structure with Partial Strength Joints O.S. Bursi, M. Molinari, A. Savadkoohi and D. Zonta	101
Damage Localization in Systems with Unknown Inputs D. Bernal	107

1B. Signal Processing I	113
Guided Waves in Steel Rails – Experimental Works and Wavelet Signal Processing	113
M. Rucka and K. Wilde	115
Experimental Application of a Damage Localisation Technique Based on Smoothed Proper Orthogonal Modes	121
U. Galvanetto, L. Monopoli, C. Surace and A. Tassotti	121
Vibration-Based Structural Damage Detection and Precise Assessment via Stochastic Functionally Pooled Models	127
F.P. Kopsaftopoulos and S.D. Fassois	127
On the Applicability of the Ho-Kalman Minimal Realization Theory	133
R. Spadavecchia, A. de Stefano and D. Sabia	133
A Principal Component Analysis of Acoustic Emission Signals from a Landing Gear Component	139
R. Pullin, J.J. Hensman, K.M. Holford, K. Worden and S.L. Evans	139
Damage Detection Using Prior Wavelet Decompositions	145
D. Chetwynd, K. Worden, F. Mustapha and J.A. Rongong	145
2A. Fatigue Damage	151
Monitoring of Growing Fatigue Damage Using the E/M Impedance Method	151
K.J. Xing and C.P. Fritzen	153
Fatigue Damage Prevention on Turbine Blades: Study of Underplatform Damper Shape	159
T. Berruti, C.M. Firrone, M. Pizzolante and M.M. Gola	159
In-Situ Load Testing: A Theoretical Procedure to Design a Diagnostic Cyclic Load Test on a Reinforced Concrete Two-Way Slab Floor System	165
A. De Luca, N. Galati, A. Nanni and T. Alkhrdaji	165
System Fatigue Damage Reliability Assessment of Railway Riveted Bridges	173
C.S. Wang, Y. Xu, A.R. Chen and W.Z. Chen	173
Fatigue Behavior of RC Slab Retrofitted with Carbon Fiber Mesh after Different Levels of Pre-Damage	179
S.Y. Seo, H.D. Yoon and C.W. Park	179
2B. Damage Assessment	185
Assessing the Feasibility of Monitoring the Condition of Historic Tapestries Using Engineering Techniques	185
J.M. Dulieu-Barton, M. Sahin, F.J. Lennard, D.D. Eastop and A.R. Chambers	187
Damage Assessment of Beams Using Flexural Wave Reflection Coefficients	193
S.P. Shone, B.R. Mace and T.P. Waters	193
Damage Assessment of Nanostructures	199
N.M. Pugno	199
Damage Detection in an Aluminium Plate with an Active Constrained Layer Damping Treatment	205
D. Chetwynd, T.L. Lew, K. Worden and J.A. Rongong	205
An Investigation on Damage Detection in Aircrafts Panels Using Nonlinear Time Series Analysis	213
I. Trendafilova, E. Manoach, M.P. Cartmell, W.M. Ostachowicz and A. Zak	213
3A. Condition Monitoring	219
Modal-Model Applications for Large Energetic Machines	219
P. Kurowski	221
Bayesian Approach to Condition Monitoring of PRC Bridges	227
D. Zonta, M. Pozzi and P. Zanon	227

Near Real-Time Monitoring of Bead Area Damage in Rolling Tires Using a Rotating Wheel Model and Multi-Directional Vibration Data	233
N.C. Yoder, T.J. Johnson and D.E. Adams	
New Image Processing Tools for Structural Dynamic Monitoring	239
J. Morlier, P. Salom and F. Bos	
Nonstationary System Monitoring Using Cointegration Testing Method	245
Z. Xu and Q. Chen	
3B. Signal Processing II	251
Wavelet Analysis for Damage Identification in Composite Structures	
J. Grabowska, M. Palacz, M. Krawczuk, W.M. Ostachowicz, I. Trendafilova, E. Manoach and M.P. Cartmell	253
Experimental Modal Analysis for Damage Detection of Buildings via Gabor Transform Technique	
C. Valente, D. Spina and S. Gabriele	259
Advanced Rolling-Element Bearing Diagnostics Based on Cyclic Spectral Analysis	
J. Antoni and R. Boustany	265
Bearing Fault Detection Using Higher-Order Statistics Based ARMA Model	
F.C. Li, L. Ye, G.C. Zhang and G. Meng	271
4A. Case Studies-Civil Structures I	277
Structural Health Monitoring on Real Scale Model of a Masonry Triumphal Arch	
G. Damonte, S. Podestà, G. Riotto, S. Lagomarsino, G. Magonette and F. Marazzi	279
Rc Infilled Frame: Shaking Table Tests on a Full Scale Model	
E. Candigliota and A. Le Maoult	285
Damage Quantification and Monitoring in Masonry Monuments through Digital Photogrammetry	
J. Armesto, P. Arias, C. Ordóñez, H. Lorenzo and N. Caparrini	291
Experimental Seismic Damage Quantification in a 3-Storey Laboratory Structure	
O.R. de Lautour and P. Omenzetter	297
4B. System Diagnosis-Aeroenautical Structures	303
A Framework for Novelty Detection in Jet Engine Vibration Data	
D.A. Clifton, P.R. Bannister and L. Tarassenko	305
Structural Health Monitoring Experimental System Implemented in a Turboprop Commercial Aircraft	
I. Bovio and L. Lecce	311
Effect of Crowning of Dovetail Joints on Turbine Blade Root Damping	
M. Allara, S. Zucca and M.M. Gola	317
Comparison of RBF Neural Network and Support Vector Machine on Aero-Engine Vibration Fault Diagnosis	
K. Xiong, D.X. Jiang, Y.S. Ding and K. Li	323
5A. Case Studies-Civil Structures II	329
Instantaneous Identification of Bouc-Wen-Type Hysteretic Systems from Seismic Response Data	
R. Ceravolo, G.V. Demarie and S. Erlicher	331
Assessment of Damage Due to Earthquake-Induced Pounding between the Main Building and the Stairway Tower	
R. Jankowski	339

The Umberto I Gallery in Naples: The Influence of Corrosion Damage on the Seismic Performance of the Iron Roofing Structure	345
R. Landolfo, G. Di Lorenzo, M.R. Guerrieri, O. Mammana and F. Portioli	
Experimental and Numerical Modal Identification of the Fossanova Gothic Cathedral	351
G. de Matteis, I. Langone, F. Colanzi and F.M. Mazzolani	
Fatigue and Fracture Evaluation of a 70 Year Old Steel Bridge	359
C.S. Wang, H. Qian, A. Zhan, Y. Xu and D.L. Hu	
The Structural Stability Analysis of a Container Crane According to the Boom Shape Using Wind Tunnel Test	365
S.W. Lee, T.W. Ahn, D.S. Han, T.H. Kim and G.J. Han	

5B. Sensors and Measurement Strategies I

	373
Measurement of Acoustic Emission Signals: Influence of the Couplant	
A. Fasana and L. Garibaldi	375
A Numerical Determination of Acoustic Emission Sensor Response in Plates Using Dispersion Curves	
R. Pullin, P.T. Theobald, K.M. Holford and S.L. Evans	381
Sensor Fault Identification Using Autoregressive Models and the Mutual Information Concept	
P. Kraemer and C.P. Fritzen	387
Design and Numerical Simulation of an Optic Fibre Sensor for Damage Assessment of Structures	
C. Delprete and C. Rosso	393
Broadband Source-Based Interrogation Scheme of Fiber Bragg Grating Sensors for Structural Health Monitoring	
D. Tosi, M. Olivero and G. Perrone	399
Energy Harvesting for Autonomous Sensing	
D.J. Inman, J. Farmer and B.L. Grisso	405

6A. Damage Location and Quantification II

	411
Crack Detection in Beams by Means of the Driving Force Parameters Variation at Non-Linear Resonance Vibrations	
A.P. Bovsunovsky and O. Bovsunovsky	413
Minimum Relative Entropy Criterion for Damage Detection and Location	
A. Kyriyanou, C. Mares, C.D. Charalambous and J.E. Mottershead	421
Structural Damage Identification Using Low Frequency Non-Resonance Harmonic Excitation	
A. Świercz, P. Kołakowski and J. Holnicki-Szulc	427

6B. Damage Mechanisms

	433
Modelling Damage Progression by a Statistical Energy-Balance Algorithm	
F. Bosia, N.M. Pugno, G. Lacidogna and A. Carpinteri	435
Finite Element Analysis of an Improved Center Crack Specimen	
M.R. Ayatollahi, M.R.M. Aliha and S. Rahamanian	441
Distributions of Local Damage Variable and Local Plastic Tensile Strain and Precursors to Failure of Quasi-Brittle Pure Bending Beam	
X.B. Wang	447

7A. System Diagnosis-Output Only Vibration Based Methods

	453
Using the Detection and Relative Damage Quantification Indicator (DRQ) with Transmissibility	
N.M.M. Maia, A.M.R. Ribeiro, M. Fontul, D. Montalvão and R.P.C. Sampaio	455

An Updated Comparison of the Force Reconstruction Methods M. Klinikov and C.P. Fritzen	461
Output-Only Technique for Parameter Identification of Nonlinear Systems Working under Operational Loads J. Iwaniec	467
Combining Cyclostationarity and the Frequency Domain Subspace Technique for Operational Modal Analysis J. Antoni, D. Hanson and B. Randall	473
Automated Operational Modal Analysis as Structural Health Monitoring Tool: Theoretical and Applicative Aspects C. Rainieri, G. Fabbrocino and E. Cosenza	479
7B. Sensors and Measurement Strategies II	
	485
Plastic Optical Fiber Displacement Sensor for Cracks Monitoring M. Olivero, G. Perrone, A. Vallan and S. Abrate	487
Dynamics of Structures with Piezoelectric Sensors and Actuators for Structural Health Monitoring D. Mateescu, Y. Han and A. Misra	493
Wireless Sensor Network Based Bridge Monitoring System T. Uhl, A. Hanc, K. Tworkowski and Ł. Sekiewicz	499
Structural Health Monitoring of Aerospace Structures with Sol-Gel Spray Sensors A. Ouahabi, M. Thomas, M. Kobayashi and C.K. Jen	505
Displacement Measurement of an Existing Long Span Steel Box-Girder Using Terrestrial Laser Scanning H.M. Lee, Y.H. Kwon, H.S. Park and I. Lee	511
Computing Method for Estimating Strain and Stress of Steel Beams Using Terrestrial Laser Scanning and FEM D.S. Kang, H.M. Lee, H.S. Park and I. Lee	517
8A. Modelling and Assessment in Composites	
	523
Damage Assessment of Adhesively Bonded FRP Beams Using Modal Parameters A.M. Ali, M.M. Abdel Wahab, A.D. Crocombe and I.A. Ashcroft	525
Dynamic Behaviour of Undamaged and Damaged Multilayered Composite Plates M. Gherlone and M. Di Sciuva	531
Influence of Temperature Fields on Wave Propagation in Composite Plates P. Kudela, W.M. Ostachowicz and A. Zak	537
On the propagation of Lamb Waves in Viscoelastic Composites for SHM Applications M. Calomfirescu and A. Herrmann	543
8B. Numerical Modelling	
	549
An Interval Uncertainty Based Method for Damage Identification S. Gabriele, C. Valente and F. Brancaleoni	551
Experimental and Numerical Coupling Proof of Conical Frictional Joints D. Szwedowicz and J. Bedolla	557
Computational Approaches for Good Alternative Solutions Based Load Resistance Capacity in Design of Steel Moment-Resisting Frames B.H. Choi	563
An Interval Parameter Perturbation Method for Predicting the Natural Frequency Bounds of Intelligent Truss Structures with Uncertain-But-Bounded Parameters W.Y. Chen, F.L. Chu, S.Z. Yan and K.Y. Wang	569
9A. Damage Location and Quantification III	
	575

Damage Mechanisms Interpreted by Acoustic Emission Signal Analysis	577
A. Carpenteri, G. Lacidogna and A. Manuello	
Locating Damage In Waveguides From Point FRF Measurements	583
S.P. Shone, B.R. Mace and T.P. Waters	
Damage Localization Based on Power Spectral Density Analysis	589
S.E. Fang, R. Perera and M.C. Huerta	
Application of the Higher Modes to Crack Identification in a Cantilever Beam	595
Y.X. Liu, W.W. Zhang and H.W. Ma	
Incipient Crack Identification in Beam Structures Using the Slope of the Anti-Resonance Curve	601
D.S. Wang, H.P. Zhu and B. He	
Leak Location in a T-Shaped Pipe with CFD Modelling	607
M. Taghvaei, S.B.M. Beck, W.J. Staszewski and J.B. Boxall	

9B. Advanced Methods of NDT

	613
Structural Integrity Monitoring of Composite Pipes	
N. Constantin, A. Mihai, M. Găvan, Ş. Sorohan, C. Dumitraşcu and V. Anghel	615
Damage Monitoring of Composite Materials Using Pulsed Phase Thermography and Thermoelastic Stress Analysis	
T.R. Emery and J.M. Dulieu-Barton	621
Experience and Technologies in NDT of Ropes	
V. Carriatore, A. Canova, A. Vallan and B. Vusini	627
A Novel Ultrasonic Technique to Detect Damage Evolution in Quasi-Brittle Materials	
P. Antonaci, P.G. Bocca, D. Masera, N.M. Pugno, M. Scalerandi and F. Sellone	633
Acoustic Techniques for Wind Turbine Blade Monitoring	
K. Burnham and G. Pierce	639
Vibration-Based Damage Assessment for Controller Reconfiguration: Application to an Oilpan	
B. Peeters, S. Kanev, M. Verhaegen and H. Van der Auweraer	645

10A. System Diagnosis - Impact

	651
Effect of Impact-Fatigue on Damage in Adhesive Joints	
J.P. Casas-Rodriguez, I.A. Ashcroft and V.V. Silberschmidt	653
Robust Post-Accident Reconstruction of Loading Forces	
L. Jankowski, M. Wiklo and J. Holnicki-Szulc	659
Damage Assessment through Impact Force History Recording	
N. Constantin, M. Găvan, M. Sandu, Ş. Sorohan and V. Anghel	665
Effect of the Strain Rate on the Mechanical Behaviour of Epoxy Adhesives	
L. Goglio, M. Peroni and M. Rossetto	671

10B. System Diagnosis - Vibration Based Techniques

	677
Real-Time Flutter Detection from In-Flight Vibration Data	
T. Uhl and M. Petko	679
Lateral Vibration of Footbridges under Crowd-Loading: Continuous Crowd Modeling Approach	
J. Bodgi, S. Erlicher and P. Argoul	685
Reconstruction Problem of Reinforced Concrete Beams under Harmonic Excitations	
S. Kokot and Z. Zembaty	691
Active Vibration Control of a Cracked Composite Beam by MSM Actuators	
K. Majewska, A. Zak and W.M. Ostachowicz	697
