

Table of Contents

Some Applications of Mechanical Spectroscopy and Magnetic Relaxation Techniques to the Examination of Diffusion Processes in Metals and Alloys G. Haneczok and J. Rasek	3
Positron Diffusion Influence on the Annihilation Characteristics in Condensed Matter J. Dryzek	21
On the ‘Mature’ Wind Force and a ‘Laggard’ Direct Force in Electromigration A. Lodder	37
The Creep of Nanocrystalline Metals and its Connection with Grain Boundary Diffusion Q.P. Kong, B. Cai, L. Lu and K. Lu	45
Self-Interstitial Atoms at High Temperatures in Dense Metals K. Nordlund and R.S. Averback	59
Atomistic Study of Diffusional Mass Transport in Metals Y.N. Osetsky	71
Defects and Diffusion in Al and Al-Cu Alloy C.L. Liu, X.Y. Liu and L.J. Borucki	93
An Edge Dislocation Near to a Coated Inhomogeneity in a Metal-Matrix Composite Z.M. Xiao and B.J. Chen	101
Modelling of Trap-Controlled Hydrogen Diffusion in Steel T. Kasuya	115
Nitrogen Diffusion in Austenitic Stainless Steel and the Formation of Expanded Austenite S. Mändl and B. Rauschenbach	125
On the Accommodation of Grain Boundary Sliding by Crystallographic Slip A.D. Sheikh-Ali	137
A Comparative Study of the Diffusion Processes in Liquid Binary Alloys with a Tendency to Aggregation and Segregation A. Baumketner, Y. Chushak and Y. Hiwatari	143
SEM-ECC Investigation of Dislocation Arrangements in Cyclically Deformed Copper Single Crystals with Different Crystallographic Orientations X.W. Li, Z.F. Zhang, Z.G. Wang, S.X. Li and Y. Umakoshi	153
Dislocation Structure in Precipitation-Hardened Ir-Based Binary Alloys Y. Yamabe-Mitarai, Y. Ro, S. Nakazawa, T. Maruko and H. Harada	171
Influence of Grain Boundary Phase Transitions on the Properties of Cu-Bi Polycrystals B.B. Straumal, N.E. Sluchanko and W. Gust	185
Abstracts	1
