

# Table of Contents

<b>Thick GaN Films Grown on Sapphire: Defects in Highly Mismatched Systems</b> T. Paskova, E. Valcheva and B. Monemar	1
<b>Novel Defect-Related Properties of Silicon</b> S.M. Prokes and R.C. Cammarata	29
<b>The Search for Tunnelling States in Bulk Silicon Disordered by Fast Neutron Irradiation</b> M. Coeck and C. Laermans	47
<b>Residual Shallow Donor- and Acceptor-Impurities in SSD- and LEC-Grown High-Purity InP Crystals</b> E. Kubota, S. Yamada and K. Ando	67
<b>Dislocations in Semiconductors: Core Structure and Mobility</b> J.F. Justo	97
<b>Analysis of Radiation-Induced Defects in InGaP Materials and Solar Cells</b> A. Khan	107
<b>A Perspective from Crystal Growth and Wafer Processing on the Properties of Intrinsic Point Defects in Silicon</b> R.J. Falster and V.V. Voronkov	125
<b>Copper Complexes in Silicon Crystals</b> M. Nakamura	135
<b>The Effect of Implant Temperature and Pre-Annealing on Defect Formation after Laser Thermal Processing</b> H.B. Banisaukas, K.S. Jones, S. Talwar and D.C. Jacobson	145
<b>X-Ray Topographic Analysis of Misfit Dislocation Distribution in InGaAs and GeSi/Si Partially Relaxed Heterostructures</b> C. Ferrari	153
<b>Processing-Induced Defects in Epitaxially Grown p- and n-Type SiGe</b> M. Mamor, F.D. Auret and S.A. Goodman	161
<b>Quantitative Measurements of Vacancy Defects in High-Energy Ion-Implanted Si</b> R. Kalyanaraman, T.E. Haynes, V.C. Venezia, D.C. Jacobson, H.J.L. Gossmann and C.S. Rafferty	177
<b>Positron Annihilation Studies of Vacancy Defects in Crystalline and Amorphous Si</b> G. Amarendra	189
<b>Modelling Cu Diffusion into a Ta Barrier</b> C.L. Liu	219
<b>Transmission Electron Microscopy of the Configuration of Cracks and the Defect Structure near to Cracks in Si</b> H. Saka and Suprijadi	225
<b>Study of the Localized Modes in ZnSe:P for the Elucidation of Site Symmetry</b> N. Sankar and K. Ramachandran	247
<b>EBIC/XPS Study of Antimony Equilibrium Segregation at the Germanium Surface</b> N. Tabet	259
<b>Abstracts</b>	1
