

Table of Contents

Study of Conduction Mechanism in Amorphous $\text{Se}_{85-x}\text{Te}_{15}\text{Bi}_x$ Thin Films	1
A. Sharma and P.B. Barman	
Structure and Optical Properties of Magnetron-Sputtered SiO_x Layers with Silicon Nanoparticles	7
L. Khomenkova, N. Korsunska, T. Stara, Y. Goldstein, J. Jedrzejewski, E. Savir, C. Sada and Y. Emirov	
Non-Gaussian Diffusion of Phosphorus and Arsenic in Silicon with Local Density Diffusivity Model	21
F. Wirbeleit	
Artificial Aging Behavior of 6063 Alloy Studied Using Vickers Hardness and Positron Annihilation Lifetime Techniques	31
M.A. Abdel-Rahman, A. El-Deen, A.E.A. El-Nahhas, Y.A. Lotfy and E.A. Badawi	
Analysis of the Solid Solution Microstructure of (HF) Al-Zn Alloys	39
H. Bedboudi, A. Bourbia, M. Draissia, S. Boulkhessaim and M.Y. Debili	
Liquid-Phase Sintering of Tungsten Heavy Alloys	55
S.F. Moustafa, S.H. Kaitbay and G.M. Abdo	
Analysis of Stress Intensity Factor and Crack Propagation for Alloy X-750 Pressure Vessel with a Blunting Crack	63
E. Mahdavi, M.M. Mashhadi and M. Amidpour	
Effect of Microstructure upon the Wear Properties of 2.25Cr-1Mo Steel	85
B.B. Jha, B.K. Mishra, T.K. Sahoo, P.S. Mukherjee and S.N. Ojha	
Phase and Structure Formation of Metallic Materials Electrodeposited via a Liquid State Stage: New Experimental Proof	99
O. Girin	
Testing Natural Aging Effect on Properties of 6066 & 6063 Alloys Using Vickers Hardness and Positron Annihilation Lifetime Techniques	107
M.A. Abdel-Rahman, A. Aldeen Ahmed and E.A. Badawi	
Investigations of the Gyromagnetic Factors for the Ni^{3+} Center in MgO	113
X.M. Li	
Variable Range Hopping (VRH) Model in Manganese Oxides	117
A. Huda	
Theoretical Studies of the EPR Parameters for Rh^+ in NaCl	125
Z.H. Zhang, S.Y. Wu, P. Xu and L.L. Li	
The Effect of Droplet Diameter on the Separation of Heavy-Oil from Water Using a Hydrocyclone	131
F.P.M. Farias, C.J.O. Buriti, W.C.P. Barbosa de Lima, S.R.F. Neto and A.G.B. de Lima	
Spreading Exponents: Dynamics of Trisiloxane Wetting of Hydrophobic Surfaces	139
J. Radulovic, K. Sefiane and M.E.R. Shanahan	
Abstracts	147
