

# Table of Contents

## Foreword

### Buried SiO<sub>2</sub> Films: Interfaces and Defects

A. Stesmans 1

### Generation and Annealing Kinetics of Oxygen Vacancy and Oxygen Excess Centers in Thin Film SiO<sub>2</sub>

M.E. Zvanut and T.L. Chen 7

### Theoretical Exploration of <sup>29</sup>Si Hyperfine and Superhyperfine Parameters of E' Centers as a Measure of Range-II Order in $\alpha$ -SiO<sub>2</sub>

A.H. Edwards, W.B. Fowler and T.S. Elicker 11

### Further Study of the Distribution of the Tunneling States in Neutron Irradiated Quartz

C. Laermans and V. Keppens 15

### Visible/Infra-Red Absorption Study in Fiber Geometry of Metastable Defect States in High-Purity Fused Silicas

D.L. Griscom 19

### Laser-Induced Luminescence in Glassy SiO<sub>2</sub> and Neutron-Irradiated Alpha-Quartz: Three Types of Non-Bridging Oxygen Hole Centers

L. Skuja and A. Naber 25

### Defects in Quartz Related to Li Ions

A. Halperin 29

### Theory of Impurity Interactions in Silicon Dioxide

W.B. Fowler and A.H. Edwards 33

### Modeling of Topologically-Disordered Tetrahedral Network Structures using Local Rules

C.E. Jesurum, V. Pulim, L.W. Hobbs and B. Berger 37

### Semiconducting Characteristics of Lithium-Doped MgO Crystals

R. Ramírez, R. González, R. Pareja and Y. Chen 41

### Positronium Hydride Defects in Thermochemically Reduced Alkaline-Earth Oxides

M.A. Monge, R. Pareja, R. González and Y. Chen 47

### Defect Properties of Beryllium Oxide

I.N. Ogorodnikov and A.V. Kruzhalov 51

### Oxygen Vacancies in Zirconia

R. Platzter, E. Karapetrova, M.O. Zacate, J.A. Gardner, J.A. Sommers and W.E. Evenson 57

### Cation Lattice Diffusion in Ytria-Stabilized Zirconia Deduced from Deformation Studies

M. Jiménez-Melendo, A. Domínguez-Rodríguez, D. Gómez-García, A. Bravo-León and J. Martínez-Fernández 61

### Point Defects in C-Doped $\alpha$ -Al<sub>2</sub>O<sub>3</sub> Crystals

A. Shmilevich, R. Chen, D. Weiss and N. Kristianpoller 65

### Radiation-Induced Defect and Charge Accumulation and Thermostimulated Relaxation Processes in Al<sub>2</sub>O<sub>3</sub> Crystals

V. Ziraps, V. Graveris and I. Kruminš 69

### Dielectric Spectroscopy of Alumina Ceramics

R. Vila, J. Mollá and A. Ibarra 73

### Anomalous Behaviour of the EPR Spectra of Defects in (Y,Sm)123 Ceramics with Oxygen Deficiency at Low Temperatures

N. Guskos, V. Likodimos, J. Typek, M. Wabia and H. Fuks 77

### Specific Properties of Undoped and Sb Doped Sol-Gel Deposited SnO<sub>2</sub> Layers

J.P. Chatelon, C. Terrier, M.G. Blanchin, J. Mugnier and J.A. Roger 81

### Anatase to Rutile Phase Transformations in K-Doped TiO<sub>2</sub> Prepared by Sol Gel

D. Bersani, R. Capelletti, P.P. Lottici, G. Gnappi and A. Montenero 87

### Thermal Conductivity as a Tool for Studying Phonon-Defect Interactions in Diamond

D.T. Morelli 91

### The Vacancy (V<sup>0</sup>, V<sup>+</sup>, V<sup>-</sup>) in Diamond: The Challenge of the Excited States and the GR2-GR8 Lines

A. Mainwood and A.M. Stoneham 99

|                                                                                                                                                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Photoluminescence Spectroscopy of Synthetic Diamond</b><br>M.L. Fish and J.D. Comins                                                                                                                                                                                      | 103 |
| <b>Magnetic Resonance Studies of Irradiation Damage Defects in Diamond: The Effect of Light on the Neutral and Negatively Charged Vacancy and the Di-&lt;100&gt;Split Interstitial</b><br>D. Twitchen, M.E. Newton, O.D. Tucker, J.M. Baker, W.F. Banholzer and T.R. Anthony | 107 |
| <b>EPR and Optical Studies on as Grown Polycrystalline Diamond and Diamond Films Annealed between 1100 and 1900K</b><br>D.F. Talbot-Ponsonby, M.E. Newton, J.M. Baker, G.A. Scarsbrook, R.S. Sussmann, J.R. Brandon and C.N. Dodge                                           | 111 |
| <b>Structural Studies of Nanocrystalline Diamond Thin Films</b><br>L. Nistor, J. Van Landuyt, V.G. Ralchenko, E.D. Obratzova, K.G. Korotushenko and A.A. Smolin                                                                                                              | 115 |
| <b>Defects in and Applications of III-V Nitride Semiconductors</b><br>H. Morkoç                                                                                                                                                                                              | 119 |
| <b>The Oxygen-Related Luminescence Centers in AlN Ceramics</b><br>B. Berzina, L. Trinkler, E. Palcevskis and J. Sils                                                                                                                                                         | 145 |
| <b>EPR and ENDOR of Defects in Silicon Carbide</b><br>J.M. Spaeth, S. Greulich-Weber, M. März, J. Reinke, M. Feege, E.N. Kalbukhova and S.N. Lukin                                                                                                                           | 149 |
| <b>In Situ Study of the Accumulation of Ion-Beam-Induced Damage in Single Crystal 3C Silicon Carbide</b><br>W.J. Weber and N. Yu                                                                                                                                             | 155 |
| <b>Femtosecond Time-Resolved Photoelectron Spectroscopy of GaP(110), ZnTe(110) and ZnSe(110)</b><br>M. Leblans, R.K.R. Thoma, J.L. LoPresti, M. Reichling and R.T. Williams                                                                                                  | 159 |
| <b>Effects of Thermal and Mechanical Treatment on the Luminescence of AgBr Crystals</b><br>L. Nagli, S. Shalem, A. Shmilevich, A. Katzir and N. Kristianpoller                                                                                                               | 163 |
| <b>Anomalous Heat Generation in Photosensitive Crystals</b><br>Y. Kondo and N. Sakaida                                                                                                                                                                                       | 167 |
| <b>Stability of Silver Atoms in Chlorides: An Insight into Optical and EPR Properties</b><br>I. Cabria, M.T. Barriuso, J.A. Aramburu and M. Moreno                                                                                                                           | 171 |
| <b>A Self-Trapped Hole in Cs<sub>2</sub>AgI<sub>3</sub></b><br>T. Awano and T. Matsuyama                                                                                                                                                                                     | 175 |
| <b>Phase Behavior of Complex Diblock Copolymer Blends: A Transmission Electron Microscopy Study</b><br>J.C. Fung, L. Kane, S.D. Smith, J.W. Sedat, D.A. Agard and R.J. Spontak                                                                                               | 179 |
| <b>Atomistic Simulation Investigations of the Thermochromicity of Poly(3-Alkylthiophene) Lattices</b><br>J. Corish, D.A. Morton-Blake, F. Bénérière, M. Lantoine and M. Marchetti                                                                                            | 185 |
| <b>Depolarization Currents in Low-Density Polyethylene Containing Antistatic Additive</b><br>R. Parra and A.R. Blak                                                                                                                                                          | 189 |
| <b>Time-Resolved Spectroscopic Study of the Initial Process of Photopolymerization of Diacetylene Crystal</b><br>C. Itoh, T. Kondoh and K. Tanimura                                                                                                                          | 193 |
| <b>Fluorinated Fullerenes - Optical Spectra and Photo-Desorption</b><br>K. Kan'no                                                                                                                                                                                            | 197 |
| <b>Size Effect in Optical Absorption Spectrum of Carotenoid Molecular Crystals</b><br>Y. Mori, H. Yahara, Y. Kamo, K. Hosokawa and H. Hashimoto                                                                                                                              | 203 |
| <b>Defects and Optical Dephasing of Ions in Solids</b><br>R.S. Meltzer, K.W. Jang, K.S. Hong, Y. Sun and S.P. Feofilov                                                                                                                                                       | 207 |
| <b>Luminescence and Decay Kinetics of Relaxed Bound Excitons and Impurity States in CsX:Ti<sup>+</sup> (X=Cl, Br, I)</b><br>M. Nikl, E. Mihoková, K. Polák, K. Nitsch, S. Zazubovich, V. Nagirnyi, V. Zepelin, A. Stolovich, G.P. Pazzi, P. Fabeni and L. Salvini            | 213 |
| <b>UV Emission from the Second Lowest 5d State in Ce<sup>3+</sup>: YAG</b><br>Y. Suzuki, T. Sakuma and M. Hirai                                                                                                                                                              | 219 |
| <b>Charge Transfer and Crystal-Field Transitions of Cr<sup>3+</sup> in Fluorides</b><br>J.A. Aramburu, M.T. Barriuso, M. Moreno and K. Doclo                                                                                                                                 | 223 |
| <b>Investigation of Luminescence Properties of Ce: Sc:CaF<sub>2</sub> Crystals</b><br>S.B. Mirov, A.Y. Dergachev, W.A. Sibley, V.B. Sigachev, A.G. Papashvili and T.T. Basiev                                                                                                | 227 |

|                                                                                                                                                      |     |
