

Table of Contents

Preface

Fundamental Defects in GaAs: Present and Prospective in GaAs Microelectronics Technology

S. Miyazawa 1

Hot Topics: Theory

A.M. Stoneham 9

AB-Initio Theory of Defects in Crystalline and Amorphous Semiconductors

Y. Bar-Yam and J.D. Joannopoulos 19

Chalcogen and Vacancy Pairs in Silicon: Electronic Structure and Stabilities

C.M. Weinert and M. Scheffler 25

Electronic Structures of Substitutional Off-Center and Small-Aggregate Defects in Silicon by Semi-Empirical Green's Function Methods

G.G. DeLeo, W.B. Fowler, G.W. Barry and M. Besson 31

Selfconsistent Tight Binding Theory of Trends for Substitutional Transition Metal Ions in Si and GaAs

C. Delerue, G. Allan and M. Lannoo 37

Tight-Binding Study of the Silicon Divacancy

P. Pecheur and G. Toussaint 43

Electronic Structure of Cationic Substitutional Cu, Ag, Au, and the Metal Vacancy in ZnS, ZnSe and CdTe

H. Chacham, J.L. Alves and M.L. de Siqueira 49

Theoretical Model of Transition Metal-Shallow Acceptor Impurity Pairs in Silicon

L.V.C. Assali and J.R. Leite 55

Calculation of the Spin-Polarized Electronic Structure of Si: Fe⁰_i in Super-Cell Full-Potential Linearized Augmented Plane Wave Method

H. Katayama-Yoshida and N. Hamada 61

Tight Binding Calculations of Optical Cross Sections for Deep Level Defects in Semiconductors

J. Petit, G. Allan and M. Lannoo 67

Accurate Prediction of Lattice Distortion for Complex Defects in Semiconductors: Extended Interstitials as Tests of Valence Force Potentials

V.J.B. Torres, P.M. Masri and A.M. Stoneham 73

Effects of Doping and Alloying on Native Defects and Complex Formation in Hg_{1-x} Cd_xTe

C.G. Morgan-Pond 79

The Electronic States of a Substitutional Ytterbium Impurity in Indium Phosphide

L.A. Hemstreet 85

Defect Calculations in a Modified Haldane-Anderson Model

W.B. Fowler 91

Electronic Structure of Neutral Complex Defects in Silicon

B. Monemar, U. Lindefelt, W.M. Chen, Q.X. Zhao and H. Weman 97

High Temperature Investigations of Silicon by Means of Positron Annihilation

S. Dannefaer 103

Theoretical Determination of the Vacancy Migration Energy in Silicon

P.J. Kelly, R. Car and S.T. Pantelides 115

Diffusion without Vacancies or Interstitials: A New Concerted Exchange Mechanism

K. Pandey 121

Germanium Impurity Diffusion in Boron Doped Silicon

A.L. Bouchetout, N. Tabet and C.J.A. Monty 127

Diffusion of Tellurium in Silicon

N. Stolwijk, F. Rollert, D. Grünebaum, H. Mehrer and G. Weyer 133

Behaviour of Substitutional Gold in Silicon

M. Yoshida, M. Morooka and H. Tomokage 139

Nature and Generation Mechanism of Butterfly-Type Intrinsic Gettering Centers in Oxygen-Free Silicon Crystals	
O. Ueda, K. Nauka, J. Lagowski and H.C. Gatos	145
Distribution of Cobalt in Silicon after Phosphorous Diffusion Gettering	
R. Kühnapfel, W. Schröter and D. Gilles	151
Transient Defects Kinetics during Silicon Oxidation and Diffusion Phenomena	
D. Mathiot	157
Migration of Interstitial Boron in Silicon	
R.D. Harris, G.D. Watkins and L.C. Kimerling	163
Solubility, Diffusion and Ion-Pairing of Cobalt in Extrinsic Silicon at 700°C	
D. Gilles and W. Schröter	169
Diffusion and Conductivity of Potassium Impurity in Silicon and Germanium	
L.T. Ho	175
An Overview of Electron Paramagnetic Resonance Studies of Si-SiO₂ Interface States	
K.L. Brower	181
Manganese Luminescence in GaAs/GaAlAs Superlattices	
B. Plot, B. Deveaud, B. Lambert, A. Chomette and A. Regreny	189
Capacitance and Current Spectroscopy of Perpendicular Transport in Compensated GaAs-GaAlAs Superlattices	
H. Sibille, J.F. Palmier and H. Le Person	193
Characterization of Electron Traps in GaAs-GaAlAs Superlattices	
F. Sillion, A. Mauger, J.C. Bourgoin, B. Deveaud, A. Regreny and D. Stiévenard	199
Defect Generation in the Initial Stages of Epitaxial Growth of GaAs on Silicon by MBE	
F.A. Ponce, D.K. Biegelsen, J.C. Tramontana and A.J. Smith	205
Atomic Imaging of Surface Defects on Si	
J.E. Demuth, R.J. Hamers and R.M. Tromp	211
Influence of Strain on Silicon Surface and Silicon Oxide Interface Reconstruction	
A. Ourmazd, D.W. Taylor, J. Bevk, B.A. Davidson, L.C. Feldman and J.P. Mannaerts	217
Deep Level at Semiconductor Surfaces	
W. Platen, D. Kohl, K.A. Brauchle and K. Wolter	223
Charged Defect States at Silicon Grain Boundaries	
F.J. Stützel, L. Tapfer and H.J. Queisser	229
Bulk and Grain Boundary Defects in Polycrystalline ZnO	
F. Greuter, G. Blatter, M. Rossinelli and F. Schmückle	235
The Role of Defect Production at Surface and Interface of CdHgTe and ZnHgTe	
T. Taguchi, T. Terada, O. Ohno, T. Sasaki, M. Suita and A. Hiraki	241
Electronic Structure of As and P Antisite Defects and Ga Vacancy in GaP and GaAs	
S. Biernacki	247
EPR Spectra of AsGa Aggregates in GaAs	
E. Kaczmarek	253
Endor-Investigation of the Ga Vacancy in GaP	
J. Hage, J. Niklas and J.M. Spaeth	259
Characterization of Vacancy Defects in As-Grown and Electron Irradiated GaAs by Positron Annihilation	
M. Stucky, C. Corbel, B. Geffroy, P. Moser and P.J. Hautojärvi	265
Triplet Spin ODMR from Phosphorous Antisites in Undoped InP	
T.A. Kennedy, N.D. Wilsey, P.B. Klein and R.L. Henry	271
Electronic Structure and Positron States at Vacancies in Semiconductors	
M.J. Puska	277
Search for the Full Atomic Structure of EL₂ in GaAs	
T.A. Kennedy	283
Bistability and Metastability of V_{Ga} in GaAs	
G.A. Baraff and M. Schluter	293
EPR Observation of the Arsenic Antisite - Arsenic Vacancy Complex	
H.J. von Bardeleben, J.C. Bourgoin and A. Miret	299
A Model for the Atomic Configuration of the EL₂ Defect in GaAs	
D. Stiévenard, H.J. von Bardeleben, J.C. Bourgoin and A.M. Huber	305

The Arsenic Antisite Defect in GaAs and Its Relation to EL2 B.K. Meyer, D.M. Hofmann and J.M. Spaeth	311
Observation of New EL2 Related Properties in GaAs. Photodissociation Model of EL2 Metastability W. Kuszko, P.J. Walczak, P. Trautman, M. Kaminska and J.M. Baranowski	317
Optical Transition Mechanisms via Excited State and a New Configuration Coordinate Model for EL2 in GaAs Y. Mochizuki and T. Ikoma	323
The Energy Position of the EL2 Ground State in GaAs P. Omling, P. Silverberg and L. Samuelson	329
EL2 Characteristics of In-Doped Vapor Phase Epitaxy GaAs Layers M. Lopez, E. Abril, B. Jimenez, M. Aguilar and E. Muñoz Merino	335
As_{Ga}-As_I-As_{Ga} Complex as a Model of EL2 Centre in GaAs T. Figielski	341
Optically-Assisted Thermal Anneal of Metastable Defects in GaAs J.C. Parker and R. Bray	347
Resonant Raman Scattering at Point Defects in GaAs M. Scheffler and U. Scherz	353
Infrared Investigations of Persistent Carriers, Photo-Generated during EL2 Bleaching in GaAs B. Dischler, F. Fuchs and U. Kaufmann	359
ESR Studies of Semi-Insulating GaAs Crystals J. Bittebierre, R.T. Cox and E. Molva	365
EL2 Quenching Behaviour in Infrared GaAs Transmission Images M. Castagne, J.P. Fillard, J. Bonnafe and P. Gall	371
Introduction to Metastability: Configuration Coordinate Diagrams G.A. Baraff	377
Trends in the Bistable Properties of Iron-Acceptor Pairs in Silicon A. Chantre and L.C. Kimerling	387
Metastable States of the DX Center in Al_xGa_{1-x}As T.N. Theis	393
Environmental Effects in DX (Te) Centers in GaAlAs L. Dobaczewski and J.M. Langer	399
Trapping Characteristics of the Dual States of the D-X Center in MBE Grown Si-Doped AlGaAs S.V. Subramanian, B.M. Arora, Y.N. Mahopatra and V. Kumar	405
Trapping Characteristics and Analysis of Te-Related DX Centers in AlGaAs and GaAsP E. Muñoz Merino, A. Gómez, E. Calleja, J.J. Criado, J.M. Herrero and F. Sandoval	411
Effect of the Host Band Structure on Capture and Emission Processes at DX Centers in AlGaAs P.M. Mooney, E. Calleja, S.L. Wright and M. Heiblum	417
The Ge-Related DX Level in Sn/Ge-Doped Al_xGa_{1-x}As Hetero-Junctions Grown by LPE P. Krispin and J. Maege	423
A New Model of Deep Donor Centers in Al_xGa_{1-x}As J.C.M. Henning and J.P.M. Ansems	429
Optical Nuclear Polarization and Spin-Dependent Reactions in Semiconductors N.T. Bagraev and V.A. Mashkov	435
Evidence of "Coherent" Recombination on a Deep Center from Recombination Enhanced Defect Reactions A. Sibille	445
Multiphonon Recombination by Bourgoin-Corbett Mechanism T. Markvart	451
Uniaxial Stress DLTS of Iron-Acceptor Pairs in Silicon D.D. Nolte and E.E. Haller	457
On the Behaviour of Hole Capture with Multiphonon Emission at Deep Level Defects H3 and H4 in p-GaAs P.A. Murawala, D. Stiévenard, J.C. Bourgoin and M. Lannoo	463

Stress Effects of Deep Centers in Si, New Method to Determine Old Parameter Ξ_{μ} M.F. Li, J.X. Chen, X.S. Zhao and Y.J. Li	469
Cathodoluminescence Contrast from Localized Defects in Semiconductors A. Jakubowicz	475
A Study of Electron Capture Cross Sections of A-Center and Gold Acceptor in Silicon under Uniaxial Stress J. Mou, X. Yao and G. Qin	481
Transition Metal Impurities-Induced Nonradiative Recombination Processes in the ZnS Lattice M. Godlewski, A.J. Zakrzewski and M.Z. Cieplak	487
Zero-Phonon Line of Deep-Level Luminescence in GaAs M. Tajima	493
Accurate Determination of Capture Time Constant of Interface States in MOS Structures D. Vuillaume, J. Barrier, D. Stiévenard and J.C. Bourgoin	499
Application of Optically Detected Magnetic Resonance to the Characterization of Point Defects in Semiconductors J.M. Spaeth	505
Constant Photo-EPR: A New Method for Deep Level Characterization W. Jantsch, G. Brunthaler and G. Hendorfer	515
Characterization of Deep Levels by Microwave Absorption Spectroscopy G. Ferenczi, D.L. Huber, W. Jantsch and G. Brunthaler	521
Profiling of Vacancy Defects in Ion-Implanted Si by Slow Positron Beam P.J. Hautojärvi, H. Huomo, J. Lahtinen and J. Mäkinen	527
Analysis of the Electric Field Influence on the Emission Rate of the Te-Related Center in GaAs_{0.6}P_{0.4} J.R. Morante, P. Roura, A. Pérez-Rodríguez, J. Samitier, A. Cornet and A. Herms	533
Optical Isothermal Transient Spectroscopy: Application to the Boron Implantation in GaAs J. Samitier, J.R. Morante, A. Cornet, A. Herms, P. Roura and A. Pérez-Rodríguez	539
Scanning Transmission Electron Beam Induced Current in Polycrystalline Silicon C. Cabanel, J.L. Maurice and J.Y. Laval	545
On the Formation of ¹¹¹In-Donor Atom Pairs in Silicon as Observed by PAC T. Wichert, M. Swanson and A.F. Quenneville	551
Acceptor-Donor-Interactions in Silicon Studied by the Pac-Method D. Forkel-Wirth, H. Foettinger, M. Iwatschenko-Borho, S. Malzer, F. Meyer, W. Witthuhn and H. Wolf	557
Hydrogen Behavior and Hydrogen-Related Defects in Single Crystal Silicon G. Qin, Y. Du, J. Wu and X. Yao	563
Hydrogen Diffusion and Hydrogen-Dopant Reactions in Crystalline Silicon S.T. Pantelides	573
Photoluminescence Detection of the Shallow Impurity Neutralization in GaAs J. Weber, F. Bantien, S.J. Pearton and W.C. Dautremont-Smith	579
Selective Hydrogen Passivation of Oxygen-Related Thermal-Donor Clusters in Silicon N.M. Johnson, S.K. Hahn and H.J. Stein	585
Correlation between Hydrogen Diffusion and Donor Neutralization in Hydrogenated n-GaAs: Si J. Chevallier, A. Jalil, R. Azoulay and A. Mircea	591
In Studies of the Electron-Irradiated Silicon Crystal Grown in Hydrogen Atmosphere T.S. Shi, G.R. Bai, M.W. Qi and J. Zhou	597
The Optical Cross-Section of 3d Impurity Induced Transitions in III-V and II-VI Semiconductors G. Martinez	603
Transition-Metal Luminescence in III-V Alloys S. Nilsson and L. Samuelson	615
The Importance of Random Strain in Deep Level Jahn-Teller Systems Studied by TD-EPR C.A. Bates, J.L. Dunn, J. Handley, A.F. Labadz, M. Darcha, M.E.-. Naqadi and A.M. Vasson	621
Identification of the Co¹⁺ Double Acceptor State in GaAs D. Wasik and M. Baj	627

Spectroscopy of GaAs and InP Grown in the Presence of Rare Earth Elements A. Stapor, J. Raczynska, H. Przybylinska, A. Sienkiewicz, K. Fronc and J.M. Langer	633
Vanadium in GaAs and GaP W. Ulrici, L. Eaves, K. Friedland, D.P. Halliday and J. Kreissl	639
Properties of Titanium in GaAs and InP A.M. Hennel, C.D. Brandt, K.Y. Ko and L.M. Pawlowicz	645
Study of Transition Metal Deep Donor Levels in InP B. Lambert, Y. Toudic, R. Coquille, G. Grandpierre and M. Gauneau	651
The Donor Level Ti^{3+}/Ti^{4+} in InP: Electrical and Optical Properties G. Bremond, G. Guillot, A. Nouailhat, B. Lambert, Y. Toudic, M. Gauneau and B. Deveaud	657
Study of the Cr^{2+} Luminescence in GaAs as a Function of Hydrostatic Pressure M. Zigone, H. Roux-Buisson and G. Martinez	663
Optical, Electrical and EPR Studies of GaAs:Ni W. Ulrici, L. Eaves, K. Friedland, D.P. Halliday, J. Kreissl and B. Ulrici	669
The Luminescence at 0.844 eV in GaAs:Cr - A Zeeman Spectroscopy V. Thomas, J.J. Barrau, G. Armelles, B. Deveaud and B. Lambert	675
Optical Detection of Magnetic Resonance in the Optically Excited $^2F_{5/2}$-State of Yb^{3+} in InP R. Kallenbach, H.J. Reyher, J. Unruh, A. Winnacker and H. Ennen	681
On the Evidence for the Effect of Local Symmetry on the Photoionization Spectrum of Fe^{2+} in InP P. Motisuke, F. Iikawa, M.J. Caldas, A. Fazzio and J.R. Pereira Neto	687
Non-Stationary Infrared-Optical Processes Involving Deep Impurities in III-V Compound Semiconductors J.H. Crasemann and H.-. Schulz	693
Optically-Detected Magnetic Resonance of Gold Centres in Zinc Selenide N.R.J. Poolton, J.E. Nicholls, J.J. Davies and B.J. Fitzpatrick	699
Structure of Pd, Pt and Au Impurities in Silicon: The Energy Levels under Uniaxial Stress and Hydrostatic Pressure W. Stöffler and J. Weber	705
Interstitial 3d Transition Metal Impurities in Silicon: An Ab Initio Cluster Study G. Aissing, R. Broer, W.C. Nieuwpoort and L.F. Feiner	711
Photoluminescence Studies on Gallium-Related Defects in Silicon K. Thonke, U. Schall, R. Sauer and N. Bürger	717
Identification of the Energy Levels of Si:Pd by DLTS J. Zhou, S.Y. Ruan, H. Hong and W.K. Ge	723
Electrons of 3d Transition Metals in Silicon E.G. Sieverts, D.A. Van Wezep, R. Van Kemp and C.A.J. Ammerlaan	729
High Resolution Transmission Electron Microscopy of Semiconductors and Their Defects A. Ourmazd	735
Classification of Defects in Plastically Deformed Silicon C. Kisielowski-Kemmerich, J. Czauschke and H. Alexander	745
The Growth Mechanism of Dislocation Loops in Arsenic Implanted Silicon K.S. Jones, S. Prussin and E.R. Weber	751
The Role of Point Defects in the Nucleation of Film Edge Induced Dislocations in Silicon J. Vanhellemont, C. Claeys and J. Van Landuyt	757
Structural Features in the Photoluminescence from Widely Dissociated Straight Partial Dislocations in Silicon R. Sauer, H. Alexander and C. Kisielowski-Kemmerich	763
Defect-Related Luminescence in Molecular Beam Epitaxy Grown CdTe Films* W.J. Choyke, M.G. Burke, Z.C. Feng, M. Hanes and A. Mascarenhas	769
Structure of Dislocations in Plastically-Deformed, High Purity GaAs F.A. Ponce, G.B. Anderson, P. Haasen and H.-. Brion	775
Dislocation Substructures and Plasticity of GaAs below 400°C as a Function of Doping P. Boivin, J. Rabier and H. Garem	781
The Electrical Activity of Dislocation Slip Planes in Semiconductor Crystals E.B. Yakimov, I.E. Bondarenko and N. Yarykin	787

TEM Observation of Dislocations in In Doped GaAs after High Temperature Plastic Deformation	
M. Jiménez-Melendo, A. Djemel, J.P. Riviere and J. Castaing	791
Dislocations in Plastically Deformed GaAs:Cr Thermal Conductivity Measurements	
J. Jouglar and P.L. Vuillermoz	797
Glide of α and β Dislocations in GaAs	
G. Feuillet and D. Cherns	803
Plasticity of $\text{Cd}_{0.66}\text{Hg}_{0.34}\text{Te}$ TEM Observations of Dislocations	
J.F. Barbot, G. Rivaud and J.C. Desoyer	809
Dangling Bonds in a Dislocation Core in Ge. Do They Exist?	
B. Pohoryles	815
On the Mobility of 1/6 (112) Partial Dislocations under High Stress in Semi-Insulating GaAs	
Y. Androussi, P. François, J. Di Persio, G. Vanderschaeve and A. Lefebvre	821
ODMR Observation of Close Frenkel Pairs in Electron-Irradiated ZnSe	
F.C. Rong and G.D. Watkins	827
Electrical Compensation, Electron and Hole Traps in Electron Irradiated ZnSe	
A. Heurtel, R. Legros, Y. Marfaing and R. Triboulet	833
Radiation Damage Experiments with ZnO at Low Temperatures	
G. Pazonis and H.-. Schulz	839
Saturation Spectroscopy and Fluorescence in ZnO:Co^{2+}	
R.M. Macfarlane and J.C. Viala	845
ODMR-MCD Study of the Zinc Vacancy and Related Complexes in ZnSe	
D.Y. Jeon, H.P. Gislason and G.D. Watkins	851
Photoluminescence Spectroscopy of Proton Implantation Induced Defects in CdTe and ZnTe	
L. Svob and Y. Marfaing	857
Acceptors and Donors in the Wide-Gap Semiconductors ZnO and SnO_2	
H. Wolf, S. Deubler, D. Forkel-Wirth, H. Foettinger, M. Iwatschenko-Borho, F. Meyer, M. Renn, W. Witthuhn and R. Helbig	863
On the Influence of Doping and Annealing on Oxygen-Related Defects in Silicon	
P. Mascher, S. Dannefaer, D. Kerr and S.K. Hahn	869
The Electronic Structure of the Oxygen-Vacancy Complex in Silicon	
R. Van Kemp, E.G. Sieverts and C.A.J. Ammerlaan	875
Influence of Oxygen Precipitates on the Solution of Transition Metals in Silicon	
E.G. Colas, E.R. Weber and R. Hull	881
Enhanced Oxygen Diffusion in Silicon at Low Temperatures	
A.K. Tipping, R.C. Newman, D.C. Newton and J.H. Tucker	887
The 3942 cm^{-1} Optical Band in Irradiated Crystalline Silicon	
G. Davies, E.C. Lightowers, M. Stavola, K. Bergman and B.G. Svensson	893
N-Concentration Dependence of Thermal Annealing Behavior of Substitutional N Impurities in Pulsed-Laser Annealed Silicon	
H. Itoh, K. Murakami, K. Takita and K. Masuda	899
Theoretical Investigation of Deep Level Complexes Related to Carbon and Oxygen Impurities in Silicon	
V.M.S. Gomes and J.R. Leite	905
Chalcogen Double Donors in Silicon	
G. Pensl, G. Roos, C. Holm and P. Wagner	911
The Ultraviolet Absorption due to Single Substitutional Nitrogen in Diamond	
M.H. Nazaré	917
The ESR Investigation of a Singly Ionized Sulphur Centre in Ib Diamonds	
J.A. Van Wyk and J.H.N. Loubser	923
Electronic and Vibrational Absorption of Interstitial Carbon in Silicon	
R. Woolley, E.C. Lightowers, A.K. Tipping, M. Claybourn and R.C. Newman	929
Ion-Implanted Oxygen Isotopes in Silicon	
H.J. Stein	935
Far-IR Spectroscopy of Oxygen Donors in Germanium	
P. Clauws and J. Vennik	941

Identification of the Carbon Associated Radiation Damage Levels in Silicon G. Ferenczi, C.A. Londos, T. Pavelka, M. Somogyi and A. Mertens	947
Thermal Donors in Silicon - 1986 G.D. Watkins	953
Preferential Alignment of Thermal Donors in Si P. Wagner, H. Gottschalck, J.M. Trombetta and G.D. Watkins	961
Time Resolved Study of Thermal Donor Related Luminescence Lines in Silicon A. Dörnen and A. Hangleiter	967
Effects of 450°C Thermal Annealing Upon Oxygen Precipitation in B-Doped CZ Si Wafers S.K. Hahn, S. Shatas, H.J. Stein, M. Arst, D.K. Sadana, Z.U. Rek and V. Stojanoff	973
Evidence for an Inhomogeneous Distribution of Thermal Donors in Silicon from Electrical and Optical Measurements J. Weber, K. Köhler, F.J. Stützler and H.J. Queisser	979
The New Donors in Silicon: The Effect of the Inversion Layers Surrounding Precipitates A. Henry, J.L. Pautrat and K. Saminadayar	985
Early Stage of the New Donors Formation in Cz-Silicon P. Vendange, A. Henry, K. Saminadayar, N. Magnea and J.L. Pautrat	991
Properties of the Shallow Thermal Donors in CZ-Silicon as Studied by Photothermal Ionization Spectroscopy (PTIS) J.A. Griffin, H. Navarro, J. Weber and L. Genzel	997
Electronic Properties of Deep Level Defects in Thermally Annealed CZ Silicon S. Matsumoto, H. Kaneko and T. Sasao	1003
Oxygen Endor of Thermal Donors in Silicon D.A. Van Wezep, T. Gregorkiewicz, H.H.P.T. Bekman and C.A.J. Ammerlaan	1009
A Model for the Density of Oxidation Induced Stacking Faults in Silicon F.G. Kuper, J.T.M. de Hosson and J.F. Verwey	1015
Enhanced Oxygen Diffusion in Silicon at Thermal Donor Formation Temperature S.T. Lee and P. Fellinger	1021
Radiative Defects in Electron Irradiated InP A. Constant and B.W. Wessels	1027
Thermal Transformation of the Electron-Irradiation-Induced Defect H₄ in p Type InP T. Bretagnon, G. Bastide and M. Rouzeyre	1033
Study of Electron Irradiation-Induced Defects in N-Type Active Layer of GaAs Mesfet F.M. Wu, Q.J. Lai, L. Xu, B.R. Gong and X.M. Zhou	1039
Electron Microscope Observation of Highly Disordered Regions in Neutron Irradiated Germanium M. Kiritani and M. Hirata	1045
Climbing of Nearly Screw Dislocations in InSb Thin Foils Irradiated in a High Voltage Electron Microscope B. Legros-de Mauduit, M. Fnaiech and F. Reynaud	1051
Comparison of Electron Paramagnetic Resonance and Transport Data during Thermal Recovery of Fast Neutron Irradiated GaAs A. Goltzene, B. Meyer and C. Schwab	1057
Endor Study of Radiation Induced Defects in Semi-Insulating GaP R.J. Gurbiel, B.M. Hoffman and B.W. Wessels	1063
Low Temperature Electron Irradiation Induced Defects in N-GaSb P.A. Murawala, B.M. Arora and S.S. Chandvankar	1069
Electron Hopping between Bombardment Induced Defects in Gallium Arsenide S. Makram-Ebeid and P. Boher	1075
Ga Antisite Defects in Neutron Irradiated and Annealed GaAs? J.D. Collins, G.A. Gledhill and R.C. Newman	1081
Annealing of Irradiated Highly Phosphorous-Doped Czochralski Silicon B.G. Svensson and J.L. Lindström	1087
Cu-Related Deep Levels in Si and the Interaction between Cu and Irradiation Defects K. Chen and G. Qin	1093
Subthreshold Radiation Damage in Silicon: Carbon Isotope Measurements on C_s-Si_l-C_s Complexes L.T. Canham and E.C. Lightowlers	1099

Experimental Study of Divacancy in Silicon J. Tatarkiewicz and R. Iwanowski	1105
New Impurity-Defect Reactions in Silicon A. Chantre, J.L. Benton, M.T. Asom and L.C. Kimerling	1111
Photoluminescence Study of Fe²⁺ in InP_{1-x}As_x:Fe Alloys P.B. Klein, S.G. Bishop, R.L. Henry, A.M. Kriman and N.D. Wilsey	1117
Electron Microscopy Data for Threshold Energy of Point Defect Creation in Silicon L.I. Fedina, A.L. Aseev, S.G. Denisenko and L.S. Smirnov	1123
Beam-Induced Annealing of Defects Created by Implantation at 30 K in Si B.B. Nielsen and J.U. Andersen	1129
Annealing Behaviour of High Concentration of Sn and Sb Implanted in Silicon G. Weyer, A. Nylandsted-Larsen, F.T. Pedersen, R. Galloni and R. Rizzoli	1135
Structural Defects in Ion-Implanted Silicon Observed by Perturbed Angular Correlation M. Deicher, G. Grübel, E. Recknagel and T. Wichert	1141
Defects Related to Nitrogen Implantation in Silicon Single Crystals M. Bode, A. Jakubowicz and H.U. Habermeyer	1147
Precipitate Morphologies in Oxygen - Ion Implanted Silicon: A High Resolution Electron Microscopy Study G. Vanderschaeve, R.W. Carpenter, J.C. Barry, C.J. Varker and S.R. Wilson	1153
Dose Dependence of Defects in Silicon Produced by High Dose, High Temperature O⁺ Implantation A. Hobbs, R.C. Barklie, K.J. Reeson and P.L.F. Hemment	1159
Investigation of the Lattice Defects in P Ion Implanted Silicon H. Bender, D. Avau, W. Vandervorst, J. Van Landuyt and H.E. Maes	1165
Interaction of Point Defects with Implanted Hydrogen in Undoped Germanium K. Ito, I. Baba, K. Mizuno and T. Ito	1171
Evolution of Defect Structures around Te Implanted in GaAs during Solid Phase Epitaxial Regrowth D. Schroyen, P. Hendrickx and G. Langouche	1177
As-Implanted Lattice Sites of Dopants in Semiconductors H. Hofsäuss, G. Lindner, S. Winter, B. Besold, E. Recknagel, G. Weyer and J.W. Petersen	1183
Defect Structures in Ion-Implanted InSb G. Weyer, H. Grann and F.T. Pedersen	1189
Defects and Optically Active Transition and Rare Earth Elements in III-V and II-VI Semiconductors and Diamond A.A. Gippius, V. Vavilov, V.V. Ushakov, V.M. Konnov, N.A. Rzakuliev, S.A. Kazarian, A.A. Shirokov and V.N. Jakimkin	1195
Zn-Impurity-Induced Structural Disorder in AlGaAs Alloy T. Kamijoh, A. Hashimoto, N. Watanabe and M. Sakuta	1201
Study of Deep Levels in Al_yGa_xIn_{1-x-y} P Material Grown by MOVPE E. Dupont-Nivet, J.N. Patillon, J.P. Andre and G.M. Martin	1207
Effects of Annealing on Electron Trap and Free Carrier Concentration in n-Type GaAs C. Ghezzi, E. Gombia and L. Vanzetti	1213
Donor Identification in Bulk Gallium Arsenide T.D. Harris and M.S. Skolnick	1219
Observation of Stoichiometry Changes Beneath Metal Contacts on GaAs Z. Liliental-Weber, E.R. Weber, N. Newman, W.E. Spicer, R. Gronsky and J. Washburn	1223
Photoluminescence Studies near Residual Dislocations in In-Alloyed GaAs P. Bunod, E. Molva, A. Chabli, F. Bertin, J. Blétry and L.S. Dang	1229
Spatial Distribution of Point Defects and Complexes in Semi-Insulating LEC and Si-Doped GF Grown GaAs Crystals J.A. Mareš, J. Oswald and J. Pastrňák	1235
Detection of Non Stoichiometric Vacancy Defects in CdTe, HgTe and Hg_{1-x}Cd_xTe by Positron Annihilation B. Geffroy, C. Corbel, M. Stucky, R. Triboulet, P.J. Hautojärvi, F. Plazaola, K. Saarinen, H. Rajainmäki, J. Aaltonen, P. Moser, A. Sengupta and J.L. Pautrat	1241
Native Defects in β-SiC P.J. Lin-Chung and Y.Z. Li	1247

Photoluminescence of Defects Produced by Reactive Ion Etching of Silicon G.A. Northrop and G.S. Oehrlein	1253
Semi-Insulating Behavior in Undoped LEC InP after Annealing in Phosphorous P.B. Klein, R.L. Henry, T.A. Kennedy and N.D. Wilsey	1259
Radiative Recombination Mechanism of Deep Levels in GaAs M. Tajima, H. Tanino and K. Ishida	1265
