

# Table of Contents

## Preface

<b>Defects in Heterogeneous Solids - From Microphysics to Macrophysics</b>	
S.T. Pantelides, D. Maroudas and D.B. Laks	1
<b>35 Years of Defects in Semiconductors: What Next?</b>	
G.D. Watkins	9
<b>Optical Spectroscopy of Defects in Diamond: Current Understanding and Future Problems</b>	
G. Davies	21
<b>Isotope Dependence of the Frequency of Localized Vibrational Modes in Diamond</b>	
A. Mainwood, A.T. Collins and P. Woad	29
<b>Native Paramagnetic Defects in Diamond Films</b>	
M. Fanciulli and T.D. Moustakas	35
<b>Titanium Impurity in Diamond</b>	
A.A. Gippius, A.T. Collins and S.A. Kazarian	41
<b>Theory of Nitrogen Aggregates in Diamond: The H3 and H4 Defects</b>	
R. Jones, V.J.B. Torres, P.R. Briddon and S. Öberg	45
<b>Nitrogen and Nitrogen-Vacancy Complexes in Diamond</b>	
A. Mainwood	51
<b>Time Resolved Photoluminescence and Optically Detected Magnetic Resonance Investigations on Synthetic Diamond</b>	
E. Pereira, L. Santos and L. Pereira	57
<b>Endor and ODEPR Investigation of the Microscopic Structure of the Boron Acceptor in 6H-SiC</b>	
J. Reinke, R. Müller, M. Feege, S. Greulich-Weber and J.M. Spaeth	63
<b>Nitrogen Donors, Aluminum Acceptors and Strong Impurity Vibrational Modes in 4H-Silicon Carbide (4H-SiC)</b>	
W. Götz, A. Schöner, W. Suttrop, G. Pensl, W.J. Choyke, R. Steiner and S. Leibenzeder	69
<b>Magnetic Circular Dichroism and Optically Detected EPR of a Vanadium Impurity in 6H-Silicon Carbide</b>	
J. Reinke, H. Weihrich, S. Greulich-Weber and J.M. Spaeth	75
<b>Boron in Cubic Silicon Carbide: Dynamic Effects in ESR</b>	
V. Bratus, N.P. Baran, V.M. Maksimenko, T. Petrenko and V. Romanenko	81
<b>ODMR Studies of MOVPE-Grown GaN Epitaxial Layers</b>	
M. Kunzer, U. Kaufmann, K. Maier, J. Schneider, N. Herres, I. Akasaki and H. Amano	87
<b>Iron Acceptors in Gallium Nitride (GaN)</b>	
K. Maier, M. Kunzer, U. Kaufmann, J. Schneider, B. Monemar, I. Akasaki and H. Amano	93
<b>Donors in Wurtzite GaN Films: A Magnetic Resonance and Photoluminescence Study</b>	
W.E. Carlos, J.A. Freitas, M. Asif Khan, D.T. Olson and J.N. Kuznia	99
<b>The Bound Exciton Model for Isoelectronic Centers in Silicon</b>	
G. Davies and M.H. Nazaré	105
<b>Near-Surface Reactions of Gold and Silver in Silicon</b>	
H. Feichtinger and E. Sturm	111
<b>A New Photoluminescent Center in Mercury-Doped Silicon</b>	
A. Henry, B. Monemar, P. Bergman, J.L. Lindström, Y. Zhang and J.W. Corbett	117
<b>Electrical and Optical Characterization of Magnesium- and Calcium-Related Defect Centers in Silicon</b>	
C. Häßler and G. Pensl	123
<b>Fast Neutron Transmutation Reactions in Si - A New Way of Introduction of Mg-Related Centers</b>	
N.A. Sobolev, V.V. Emtsev, B.N. Gresserov, P.M. Klinger, D.S. Poloskin, E.P. Shabalina, E.I. Shek and Y.V. Vyzhigin	129
<b>Behaviour of Boron After Implantation into Silicon-Schottky Diodes: A <math>\beta</math>-NMR Study on the Fermi-Level Dependence</b>	
H.-. Frank, E. Diehl, K.-. Ergezinger, B. Fischer, B. Ittermann, F. Mai, K. Marbach, S. Weißenmayer, G. Welker, H. Ackermann and H.J. Stöckmann	135

<b>EPR/ENDOR Investigation on the Nature of Heat Treatment Centers in Silicon</b>	141
N. Meilwes, J.M. Spaeth, V.V. Emtsev, G.A. Oganesyan, W. Götz and G. Pensl	
<b>Role of Point Defects in Oxygen Agglomeration in Si</b>	147
M. Tajima, H. Takeno, M. Warashina and T. Abe	
<b>DLTS Studies of Thermally Treated Carbon-Rich Silicon</b>	153
N.B. Urli and V. Borjanović	
<b>A Metastable Selenium-Related Center in Silicon</b>	159
A. Henry, E. Sörman, S. Andersson, W.M. Chen, B. Monemar and E. Janzén	
<b>The Excited <math>{}^5T_1</math> State of the <math>Fe_i^0</math>-Center in Silicon</b>	165
A. Thilderkvist, G. Grossmann, M. Kleverman and H.G. Grimmeiss	
<b>Identification of the Iron-Boron Line Spectrum in Silicon</b>	171
S. Ghatnekar-Nilsson, M. Kleverman, P. Emanuelsson and H.G. Grimmeiss	
<b>Ab-Initio Total Energy Calculation of Iron-Aluminum Pairs in Silicon</b>	177
H. Weihrich and H. Overhof	
<b>On the Sensitivity of Optical Reflectivity Spectra to the Bulk Defects in Semiconductors - Example of Crystalline Si</b>	183
R. Iwanowski, B.J. Kowalski, B.A. Orłowski and J. Bak-Misiuk	
<b>Detection of Defects Responsible for Lifetime in p-Type Si</b>	189
M. Zazoui, J.C. Bourgoin, D. Stiévenard and D. Deremes	
<b>Spin Dependent Photoconductivity in Silicon-on-Sapphire</b>	195
R.C. Barklie, C. O'Raifeartaigh, L. Bradley and A.M. Hodge	
<b>Group-V Antisite Defects, <math>V_{Ga}</math>, in GaAs</b>	201
U. Kaufmann	
<b>Electronic Structure of <math>P_{In}</math> Antisite in InP</b>	211
W.M. Chen, P. Dreszer, R.P. Leon, E.R. Weber, E. Sörman, B. Monemar, B.W. Liang and C.W. Tu	
<b>On the Microscopic Structures of Three Different Arsenic Antisite-Related Defects in Gallium Arsenide Studied by Optically Detected Electron Nuclear Double Resonance</b>	217
J.M. Spaeth, K. Krambrock and M. Hesse	
<b>The Electron Irradiation Induced Defect E1,E2 in GaAs: Arsenic Frenkel Pair Versus Displaced Arsenic Antisite Model</b>	223
H.J. von Bardeleben, C. Delerue and D. Stiévenard	
<b>The Assignment of the 78/203meV Double Acceptor in GaAs to <math>B_{As}</math> Impurity Antisite Centers</b>	229
R.C. Newman, B.R. Davidson, R. Addinall, R. Murray, J.W. Emmert, J. Wagner, W. Götz, G. Roos and G. Pensl	
<b>Interaction of Atomic Hydrogen with Arsenic Antisites and Arsenic Interstitials in Gallium Arsenide</b>	235
A.A. Bonapasta	
<b>Incorporation of Be Into <math>In_x Ga_{1-x} As</math> (<math>0.004 \leq x \leq 0.17</math>) Studied by Photoluminescence and Resonant Raman Spectroscopy of Local Vibrational Modes</b>	241
A.L. Alvarez, J. Wagner, F. Calle, M. Maier, G. Gutierrez, A. Sacedon, E. Calleja and E. Muñoz Merino	
<b>Infrared and Raman Studies of Carbon Impurities in Highly Doped MBE AlAs:C</b>	247
B.R. Davidson, R.C. Newman, R.E. Pritchard, D.A. Robbie, M.J.L. Sangster, J. Wagner, A. Fischer and K. Ploog	
<b>Theory of Carbon Complexes in Gallium Arsenide and Aluminium Arsenide</b>	253
R. Jones and S. Öberg	
<b>Incorporation of Silicon in (311)A and (111)A GaAs Grown by Molecular Beam Epitaxy</b>	259
J. Wagner, M. Ramsteiner, M.J. Ashwin, M.R. Fahy, R.C. Newman, W. Braun and K. Ploog	
<b>Si Acceptors and their Passivation by Hydrogen in p-Type Liquid Phase Epitaxial and Molecular Beam Epitaxial GaAs</b>	265
M.J. Ashwin, R. Addinall, M.R. Fahy, R.C. Newman, I. Silier and E. Bauser	
<b>The Lattice Location and Electrical Activity of Ion-Implanted Sn in InP</b>	271
G. Weyer, P. Kringshøj and K. Freitag	
<b>Nitrogen-Hydrogen Complexes in GaP and GaAs</b>	277
W.S. Hahn, B. Clerjaud, D. Côte, F. Gendron, C. Porte, W. Ulrici, D. Wasik and W. Wilkening	

<b>Recombination and Optical Excitation Properties of the Ga-O-Ga Center in Gallium Arsenide</b>	283
H.C. Alt	
<b>Direct Evidence for Gallium Defect Annealing Near 280K in N-GaAs and N-Al<sub>0.22</sub>Ga<sub>0.78</sub>As</b>	289
A.C. Irvine, D.W. Palmer and J.S. Roberts	
<b>Defects in Electron Irradiated GaP and GaInP</b>	295
M.A. Zaidi, H. Maaref, M. Zazoui and J.C. Bourgoin	
<b>Positron Lifetime Investigations of Electron Irradiated InP</b>	299
T. Bretagnon, S. Dannefaer and D. Kerr	
<b>Study of Indium Implanted GaAs: Positron Annihilation and Electrical Measurements</b>	
W. Pfeiffer, L. Liszkay, A. Burchard, M. Deicher, R. Magerle, C. Ronning, K. Saarinen and P.J. Hautojärvi	305
<b>Fine Structure of the (Fe<sup>2+</sup>, h) Bound States in GaP and InP</b>	311
L. Podlowski, R. Heitz, T. Wolf, A. Hoffmann, D. Bimberg, I. Broser and W. Ulrich	
<b>New Evidence for Bound States in the Charge Transfer Spectra of Transition-Metal-Doped III-V Semiconductors</b>	317
T. Wolf, W. Ulrich, D. Côte, B. Clerjaud and D. Bimberg	
<b>FTIR Absorption and Photoluminescence Study of a New Defect System in GaP:Fe:S</b>	323
J.M. Schneider, K. Thonke, W. Ulrich and R. Sauer	
<b>New Aspects of (Semi-Insulating) GaP:Cu</b>	329
C. Eder, V. Schlosser, R.P. Leon, K.M. Yu and E.R. Weber	
<b>Isotopic Structure and the Jahn-Teller Effect in Fe-Doped III-V Materials</b>	335
A.M. Hennel, A. Wysmolek and R. Bożek	
<b>Native Vacancies in Semi-Insulating GaAs Observed by Positron Lifetime Spectroscopy under Photoexcitation</b>	
K. Saarinen, S. Kuisma, P.J. Hautojärvi, C. Corbel and C. LeBerre	341
<b>Positron Annihilation at Ionized Acceptors and Vacancies in Indium Phosphide After Electron Irradiation</b>	
M. Törnqvist, J. Nissilä, F.M. Kiessling, C. Corbel, K. Saarinen, A.P. Seitsonen and P.J. Hautojärvi	347
<b>Properties of Important Deep Level T<sub>3</sub> in Semi-Insulating Gallium Arsenide</b>	353
U.V. Desnica, M. Pavlović, D.I. Desnica, B. Šantić and T. Šmuc	
<b>Electron and Hole Traps in AlAs p<sup>+</sup>-n Junctions Grown by MBE</b>	359
P. Krispin and R. Hey	
<b>Frenkel Pairs in GaAs and InP</b>	365
K. Karsten and P. Ehrhart	
<b>Lattice Properties of GaAs Layers Grown by MBE Method at Low Temperature</b>	371
M. Leszczyński	
<b>Semiconductor Luminescence and Effects of Excitation Transfer</b>	377
G.F. Neumark	
<b>Doping of Wide-Gap II-VI Compounds for Short-Wavelength Visible Light Emitting Devices</b>	
H. Kukimoto	385
<b>Metal Vacancies in Li and In Doped ZnSe and CdS</b>	
H. Wolf, U. Hornauer, R. Lermen, Y. Endalamaw, T. Filz, T. Krings, S. Lauer, U. Ott, E. Singer, M. Tsige and T. Wichert	391
<b>The Identification of Intrinsic Vacancy Defects in CdTe</b>	
B.K. Meyer, P. Omling and P. Emanuelsson	397
<b>Photoluminescence and Optically Detected Magnetic Resonance Investigations on the Indium A-Center in CdTe:In</b>	
W. Stadler, B.K. Meyer, D.M. Hofmann, B.J. Kowalski, P. Emanuelsson, P. Omling, E. Weigel, G. Müller-Vogt and R.T. Cox	399
<b>Indium Donor Complexes with Cation Vacancies in CdTe and ZnSe</b>	
J.W. Griffith, R. Lundquist, R. Platzer, J.A. Gardner, G. Karczewski and J.K. Furdyna	405
<b>Energy Transfer between Fe<sup>2+</sup> Centers in Polymorphic ZnS</b>	
A. Hoffmann, L. Podlowski, P. Thurian, R. Heitz, I. Broser, F. Fuchs and P. Koidl	411
<b>Electron Nuclear Double Resonance Investigations on the Tellurium Vacancy in CdTe</b>	
D.M. Hofmann, B.K. Meyer, T. Pawlik, P. Alteheld and J.M. Spaeth	417

<b>Frenkel Pairs on the Te Sublattice of ZnTe? An ODMR Study</b>	423
B. Ittermann, F.K. Koschnick, W.A. Barry, M.J. Burnard and G.D. Watkins	
<b>Study of Vacancy Defects in II-VI Compounds by Means of Positron Annihilation</b>	429
R. Krause-Rehberg, T. Drost and A. Polity	
<b>Optical and Magnetic Properties of Titanium Ions in CdTe and (Cd, Zn)Te</b>	435
P. Peka, M.U. Lehr, J. Dziesiaty, S. Müller, J. Kreissl, P. Rudolph and H.-. Schulz	
<b>Time-Resolved Excitation Spectroscopy of Red-Luminescence in ZnSe:Te</b>	441
G. Račiukaitis and D. Juodžbalis	
<b>Incorporation and Interaction of Hydrogen with Acceptor Impurities in II-VI Semiconductor Compounds</b>	
L. Svob, Y. Marfaing, B. Clerjaud, D. Côte, D. Ballutaud, B. Theys, R. Druilhe, W. Kuhn, H. Stanzl and W. Gebhardt	447
<b>Ligand Induced Isotope Shifts of Transition Metal Centers in ZnO</b>	
P. Thurian, R. Heitz, S. Kleinwächter, A. Hoffmann and I. Broser	453
<b>Metal Vacancies in Li and In Doped ZnSe and CdS</b>	
H. Wolf, U. Hornauer, R. Lermen, Y. Endalamaw, T. Filz, T. Krings, S. Lauer, U. Ott, E. Singer, M. Tsige and T. Wichert	459
<b>A Positron Annihilation Study of Defects in ZnO and Their Relation to Luminescence Centers</b>	
J. Zhong, P. Mascher, W. Puff and A.H. Kitai	465
<b>Defect Control in Relaxed, Graded GeSi/Si</b>	
E.A. Fitzgerald, Y.H. Xie, D. Monroe, G.P. Watson, J.M. Kuo and P.J. Silverman	471
<b>Origin of Mosaic Structure in Relaxed Si<sub>1-x</sub>Ge<sub>x</sub> Layers</b>	
P.M. Mooney, F.K. LeGoues and J.O. Chu	483
<b>Point Defects in SiGe Epitaxial Layers and Bulk Crystals</b>	
H.B. Erzgräber, G. Kissinger, D. Krüger, T. Morgenstern, K. Schmalz, J. Schilz, M. Kurten and A. Osinsky	489
<b>Defect Characterization in P Isotype Si/SiGe/Si Heterostructures by Space Charge Spectroscopy</b>	
G. Bremond, A. Souifi, P. Degroodt, P. Warren, D. Dutartre and G. Guillot	495
<b>Test for the Impurity Wavefunction Modelling from the Alloy Broadening of the Impurity-Related Luminescence</b>	
J.M. Langer and R. Buczko	501
<b>Strain Relaxation During Epitaxial Crystallization of Ge<sub>x</sub>Si<sub>1-x</sub> Alloy Layers Produced by Ion-Implantation</b>	
R.G. Elliman and W.C. Wong	507
<b>Rapid Thermal Annealing of Ion Implanted Strained Si<sub>1-x</sub>Ge<sub>x</sub></b>	
E.V. Thomsen, A. Nylandsted-Larsen, J.L. Hansen, P. Kringshøj, S.Y. Shiryaev and G. Weyer	513
<b>Diffusion, Interface Mixing and Schottky Barrier Formation</b>	
W. Walukiewicz	519
<b>Strain Relaxation in Thin ZnTe Epilayers on GaAs and ZnSe/GaAs</b>	
S. Bauer, M. Huber, C. Rüth, P. Link and W. Gebhardt	531
<b>1D Properties of Straight Dislocation Segments in Si and Ge</b>	
E.A. Steinman	537
<b>Metastable Surface Defects in p-Type GaAs</b>	
N.T. Bagraev	543
<b>Raman Study of Misfit Dislocations in ZnSe/GaAs Structures</b>	
W. Bała, M. Drozdowski and M. Kozielski	549
<b>Electronic Properties of the (001) Surface of Diamond Covered with Hydrogen</b>	
V.I. Gavrilenko	555
<b>Characterization of Semiconductor Surfaces and Interfaces by X-Ray Reflectivity Measurements</b>	
W. Plotz, V. Holy, W.V.D. Hoogenhof, W. Ahrer, N. Frank, C. Schiller and K. Lischka	561
<b>Spatial Confinement of Misfit Dislocations at the Interfaces of Epitaxial CdSe/GaAs(111) and ZnTe/GaAs(111) Studied by TEM</b>	
A. Rosenauer, H. Stanzl, K. Wolf, S. Bauer, M. Kastner, M. Grün and W. Gebhardt	567
<b>Coulomb Energy of Traps in Semiconductor Space Charge Regions</b>	
M. Schulz	573

<b>Effect of Interface on Capture and Emission Processes via Deep Centers</b>	579
I.N. Yassievich and A.A. Pakhomov	
<b>Heteroepitaxy of GaAs on Porous Silicon: The Structure of the Interface</b>	583
T. Kovyazina, A. Kutas, V. Khitko, P. Gaiduk, F. Komarov, V. Solov'ev, V. Bondarenko and G. Troyanova	
<b>Evidence for an Assisted Defect Mechanism Leading to a Reduced Apparent Band Offset</b>	587
D. Stiévenard, X. Letartre, M. Lannoo, S. Ababou and G. Guillot	
<b>Impurity-Enhanced Disorder in Superlattices</b>	593
J. Bernholc, B. Chen, Q. Zhang, C. Wang and B. Yakobson	
<b>Exciton Spectroscopy of Near-Surface GaAs/Al<sub>0.3</sub>Ga<sub>0.7</sub>As Quantum Wells - The New Method of Band Bending Investigation</b>	599
V.N. Astratov and Y.A. Vlasov	
<b>Thermally Induced Compositional Disorder of InGaAs/GaAs and GaAsSb/GaAs Single Quantum Wells</b>	605
A. Kozanecki, W.P. Gillin, B.J. Sealy and K.E. Singer	
<b>Alloy Dependence of the Carrier Concentration and Negative Persistent Photoconductivity in Ga<sub>1-x</sub>Al<sub>x</sub>Sb/InAs/Ga<sub>1-x</sub>Al<sub>x</sub>Sb Single Quantum Wells</b>	611
H.J. von Bardeleben, M.O. Manasreh and C.E. Stutz	
<b>Tuning of 2DEG Mobility by Modification in Ordering of Remote Impurity Charges in GaAs/AlGaAs Heterostructures</b>	617
P. Wiśniewski, T. Suski, L.H. Dmowski, I. Gorczyca, P. Sobkowicz, J. Smoliner, E. Gornik, G. Böhm and G. Weimann	
<b>DX Centers in Reduced Dimensionality n-Type AlGaAs Structures</b>	623
I. Izpura, E. Muñoz Merino, E. Calleja and F. Garcia	
<b>Non-Radiative Recombination via Deep Level Defects in Undoped GaAs/AlGaAs Quantum Wells</b>	629
P. Bergman, P.O. Holtz, B. Monemar, M. Sundaram, J.L. Merz and A.C. Gossard	
<b>Photoluminescence in MOVPE-Grown Pseudomorphic InGaAs/GaAs Quantum Wells on Vicinal GaAs Surfaces</b>	635
J.R. Botha and A.W.R. Leitch	
<b>Influence of DX Center Structure on Si Modulation δ-Doping in AlGaAs/GaAs Quantum Wells</b>	641
G. Brunthaler, M. Seto, G. Stöger, G. Ostermayer and K. Köhler	
<b>Si Diffusion out of δ-Planes in a GaAs Superlattice</b>	647
L. Hart, P.F. Fewster, M.J. Ashwin, M.R. Fahy and R.C. Newman	
<b>Luminescence of a Delta Doping Related Exciton in GaAs:Si</b>	653
J.C.M. Henning, Y.A.R.R. Kessener, P.M. Koenraad, M.R. Leys, W.C. van der Vleuten, J.H. Wolter and A.M. Frens	
<b>Confinement Effects on the Electronic Structure of Shallow Acceptors in GaAs/AlGaAs Quantum Wells</b>	657
P.O. Holtz, Q.X. Zhao, B. Monemar, M. Sundaram, J.L. Merz and A.C. Gossard	
<b>The Influence of Silicon Diffusion on the Transport Properties of the 2DEG in Si δ-Doped GaAs</b>	663
P.M. Koenraad, I. Bársny, A.F.W. van der Stadt, J. Perenboom and J.H. Wolter	
<b>Electronic States of n-Type δ-Doping in GaAs Heterostructures</b>	669
L.M.R. Scolfaro, J.R. Leite, C.A.C. Mendonça, D. Beliaev, S.M. Shibli, E.C.F.d. Silva and E.A. Meneses	
<b>Phonon Spectroscopy of Defects Correlated with the Diffusion of Zn into Si</b>	675
J. Staiger, P. Gross, K. Lassmann, H. Bracht and N. Stolwijk	
<b>High Spectral Resolution Study of Shallow Donors in GaInAs</b>	681
K. Karpińska, S. Dedulewicz and M. Godlewski	
<b>The Influence of Spin and Composition Fluctuations on Shallow Donor States in Semimagnetic Semiconductors</b>	687
Y.G. Semenov and V.A. Stephanovich	
<b>Sc Impurity in CdSe and Cd<sub>1-x</sub>Mn<sub>x</sub>Se</b>	693
P. Głód, T. Dietl, T. Fromherz, H. Krenn, G.H. Bauer and I. Miotkowski	
<b>The Theory of Rare-Earth Impurities in Semiconductors</b>	699
C. Delerue and M. Lannoo	

<b>The Physics and Application of Si:Er for Light Emitting Diodes</b>	707
J. Michel, F.Y.G. Ren, B. Zheng, D.C. Jacobson, J.M. Poate and L.C. Kimerling	
<b>PL and EPR Studies of Er-Implanted FZ- and CZ-Si</b>	715
