

Table of Contents

Preface and Organizers

Ductile Fracture in Metal Forming: A Review of Selected Issues S. Alexandrov and E. Lyamina	1
Propagation of Random Waves in Elastic Media with Microheterogeneities A. Belyaev	13
Finite Element Analyses of Extrusion with a Two Stage Die and Manufacturing of Gradient Micro-Structures Y.M. Hwang, S. Alexandrov, Y.R. Jeng, T.H. Huang and O.B. Naimark	23
Some Mechanical Models of Chemical-Mechanical Polishing Processes R.V. Goldstein and N.M. Osipenko	33
Fluid Flow Control in Micro- and Nanochannels D.A. Indeitsev and A.K. Abramyan	45
Bulk and Surface Stability of Materials N.F. Morozov and P.E. Tovstik	51
Accumulation and Healing of Damage during Plastic Metal Forming Simulation and Experiment S.V. Smirnov	61
A Correlation between the Magnetic Behaviour and Damage of Metal Materials under Plastic Deformations E.S. Gorkunov	71
Limit Plastic State of Notched Stripes with Stress State Dependent Properties E.V. Lomakin and A.M. Melnikov	79
Modes of Stability Loss of Materials S. Kashtanova, N.F. Morozov and P.E. Tovstik	89
Identification of Defects in an Elastic Body by Means of the Boundary Measurements E.I. Shifrin and P.S. Shushpannikov	101
Effect of Strain-Hardening Induced Grain Refinement on Springback in Microtube Press Bending Process C.P. Jiang	111
Investigation of the Asymptotic Behavior of Stresses at the Tip of Wedge- and Cone-Shaped Cracks T. Korepanova, V.P. Matveenko and N. Sevodina	119
3-D Model of the Periodic Structure Punch Sliding upon the Viscoelastic Base with Incompressible Fluid in the Contact Gap I.G. Gorycheva and A.G. Shpennev	127
Grain Refinement of AZ61/SiCp Magnesium Matrix Composites for Tubes Extruded by Hot Extrusion Processes S.J. Huang, Y.M. Hwang and Y.S. Huang	135
Theory of Phase Transformations in the Mechanics of Solids and its Applications for Description of Fracture, Formation of Nanostructures and Thin Semiconductor Films Growth S.A. Kukushkin and A.V. Osipov	145
Development of Innovative Algorithm for Nanomechanics and its Applications to the Characterization of Materials Y.R. Jeng	165
