

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Applied Material Science

Analysis about Drawing Broken of SWRH 72A High Carbon Steel M. Chen, Z.Q. Dong, R. Chen, X. Guan, J.L. Yuan and C. Wang	3
Flexible Rolling Technology of Spring Steel 60Si2Mn X. Guan, Z.Q. Dong, M. Chen, J.L. Yuan, J.W. Fu and Y.Y. Zhang	7
The Effects of Ultrasonic Wave on the Properties of Flax Fiber Treated in Alkali P.L. Li, Y. Guo and B.B. Zhang	11
Study on Damage Tolerance of Composite Laminates with Hole or Crack W.W. Yao, P. Zhou, S.L. Hou and M.W. Tu	16
New Optical Sensor Panel on Nanocomposite Base S. Panchenko, I. Suleimenov, Z. Sedlakova and N. Semenyakin	20
Research on Prediction Model of End Sulfur Content for Converter Smelting D. Qiu, W.J. Dai and N. Zhang	26

Chapter 2: Engineering Solutions and Designing in Machinery

Research on the Virtual Prototype of Multifunction Filter Material Detection Device J. Zhang and T. Zeng	33
Wave Spring Dynamic Characteristics Analysis M.W. Lu and T. Wang	37
Characteristic Analysis and Optimization for the Tailstock Body of the NC Lathe M.W. Lu and M.J. Li	41
The Design of Climbing Rod Car X.H. Zhang, X.M. Han, J. Hu and Y. Liu	45
Hydraulic Excavator Working Device Simulation Based on Virtual Prototype B.G. Wu, S.F. Yan and S.P. Li	49
Hysteresis Modeling and Analysis for Dynamic Compaction P.H. Shen	53
Dielectric Barrier Discharge Structure Design for Sewage Treatment J.P. Jia, L. Cai, S.B. Zhang and Y. Zhao	57
The Influence of Payload Mass and Inertia Properties on a Piloted Flight Simulator Hexapod Dynamic Performance C.P. Pan, Y. Lu and Y.J. Lin	61
Simulation Analysis on Hobbing Process and Heat Treatment of Automotive Transmission Gear Based on the MASTA Software H.M. Liu, L.L. Wan and X.H. Zhang	66
Dynamic Modeling of an Independent Wheelset Bogie with MapleSim T. Hua and Z.G. Lu	71
The Structural Optimization of Large Capacity Skip Based on ANSYS H.W. Jin and X. Zhang	75
Establish the Model of Parameters Optimization of Sheet Metal Forming in Drawing Process Based on Artificial Neural Network W.Q. Zhang, Y.X. Li and W. Wei	79
Reliability Assessment for Axle Box Spring of EMU Based on the Actual Operation Data Z. Ma, M. Luo and Z.G. Lu	83
The Research of Manufacturing Technique about Intertwined Stator Core in Automotive Alternator H.Z. Sun, W.M. Li, D.W. Ma and J. Sun	87
Research on Mobile Mechanical Products of Recycling Method X.Y. Lou	91

The Design of the Rolling-Shoe Bearing Device Based on Rotary Cylinder W. Gui, Z.C. Huang and H. Chang	95
Based on Moldflow Automobile Light Lens Mold Develop and Application X.M. Sun, L. Wei and H. Zou	99
Liquid-Solid Hydrocyclone Numerical Simulation and Separation Efficiency Analysis X.M. Sun and L. Wei	103
Study on Walking System Technology of Crawler Combine Harvester X.Y. Lou	107
Application of TRIZ Substance-Field Analysis Model in Equipment's Combat Resilience Design S.S. Ma, C.W. Zhang, Y.X. Xu and S.Y. Yang	111
New Thermal Energy Converters Based on Polyelectrolyte Hydrogels I. Suleimenov, A. Falaleev, D. Shaltykova, S. Panchenko and G. Mun	117

Chapter 3: Technologies and Tools of Measurements, Detection and Diagnosis

The Reciprocating Compressor Fault Analysis Based on ORSGWT S.Y. Zhang, R.X. Wang, Y.B. Li, M.Q. Xu and Z.Q. Cui	125
Design and Experiment of Fumigant Gas Trace Detection System Based on Photoionization S.R. Gong, Y.J. Wang, G.P. Zhang, G.P. Zhan, B. Zou, L. Li and T. Liu	129
Design the Integrated Multipurpose Instrument Calibrating Equipment Based on the PXI and LabVIEW H.M. Li, L.M. Zhang and F. Sa	134
Research on Crab Bucket's Drift Angle Detector H. Tan	139
A Temperature Measurement Method Based on RC Discharge Circuit Using Platinum Resistance X.Q. Zuo, J.P. Jia and J. Lei	143
Fuzzy Diagnosis Method of Aero-Engine Fault J. Cheng, C.M. Bao, Y.S. Huang, Y. Sun and Z.J. Yi	147
A Security UV Curing Device Based on LED Array C.M. Bao, C.L. Liu, C.J. Li, G.C. Wang, F. Gao and Z.J. Yi	152
A Kind of Resistance Capacitance Measurement Method Based on Time Constant X.Z. Wang, X.Q. Mo, L.E. Yang, Z.S. Zhai, W.C. Liu and Z. Xiong	156
The Design of Virtual Experiment Framework Based on ELVIS D.D. Li	161
Design of Examination and Adjustment Instrument of Artillery Zero Line Base on Laser Technique X.B. Liao, Q.B. Cui, L. Peng and G.S. Wen	165
Research on Gate Valve Internal Leakage Detection Based on Acoustic Emission Signal Processing L. Zhu, B. Zou, S.H. Gao, M. Jiang and Z.P. Li	169
Design and Implementation of Portable Test Diagnosis Instrument for a Type of Electronic Equipment X. Zhou, H.Y. Zhao, R.Y. Xie and Z.T. Zhu	174
A Novel Method for Measuring the Evenness of Raw Silk W.X. Tu, J.J. Li, C. Wang, Z.Y. He and B.Q. Zuo	178
Study on Detection of Black Field and Static Frame in IPTV and Mobile TV's Quality Supervision X. Lu, H.W. Ding, Y. Wang, J. Guo, H.J. Cheng and R. Zhai	182
A Research about Acquisition and Transmission of the Water Meter's Image Based on STM32 Y.L. Xue and B.W. Chen	187

Chapter 4: Mechatronics, Control and Automation

Design of Civil Aircraft Avionics System Bus Excitation System T.D. Ma and D.X. Zhou	193
Reliability Assessment Based on Performance Parameter for Micro-Gyro L.X. Yu, L. Qin and M.M. Wang	197
Complex Wireless Sensor Network Routing Strategy for Information Rapid Transmission Z. Gao, Q.B. Zhu and C.M. Wei	201
Research on Solving the Watertightness Problem of Underwater Angular Sensor Driven by New Magnetism H. Tan	205
The Design of Kiln Liquid Level Control System with Long Time-Delay P. Ai and H.S. Li	208
Simulation Analysis on Hydrostatic Transmission Based on the MATLAB/SIMULINK Z. Zhu, X. Gao, D.Y. Pan and Y. Zhu	212
Efficiency Analysis on Hydro-Mechanical Transmission Z. Zhu, X. Gao, D.Y. Pan and Y. Zhu	216
Design of LQR Controller for the Inverted Pendulum L.L. Wan, J. Lei and H.X. Wu	221
Study on Auto-Tuning PID Controller Y.P. Chen	225
Wheeled Robot Path Tracking Study Based on IMM Algorithm L. Cai and J.P. Jia	228
Design of Vehicle-Mounted Solar Photovoltaic Panels System that Change Orientation with the Light J. Lei and H.X. Wu	232
The Application of Artificial Intelligence Technology in the Selective Laser Sintering L.Y. Cai, Q.S. Wang and W. Sun	236
The Roller Speed Control of High Voltage Electrostatic Separator Based on PLC Z.S. Zhang, J. Cui, Q. Yang, S.M. Ren and B. Sun	240
Power and Vibration of Electrostatic Precipitator Control Based on FPGA Z.S. Zhang, C.S. Wang, Y. Wang, Z.Y. Wang and D.Y. Song	244
A Fuzzy Predictive Controlling Method of Fermentation Tank Temperature T. He, X. Hu, J.Y. Chen and X. Wang	248
Research on the Modeling of Hydraulic Turbine Governing System H.X. Wu and L.L. Wan	253
Nonlinear Internal Model Control for Bearingless Induction Motor Based on Inverse System Theory Z.Q. Wang and X.L. Huang	258
Paralleling Hydraulic Control of Variable Frequency Motor and Valve for the Swing Mechanism of Segment Erector X. Yang, G.F. Gong, W.Q. Wu and Y.Y. Rao	264
Design of Testing & Identification System for Recovery Material of Launch Control Device of Certain Missile X.D. Xue, X.D. Cheng, B. Xu, Y. Zheng and W. Liu	270
Research on Oil Temperature Control Technology of Mobile Machinery in Closed Hydraulic Transmission System X.Y. Lou	274
Design of Equipment Power Remote Control System Based on Ethernet L.L. Mu, C.G. Xue and S.X. Ni	278
Post Processing for Five-Axis Machine Tools with Pose Error Compensation S. Ding, X.D. Huang and C.J. Yu	283
The System Identification Analysis of the Rolling Motion Model for the Unmanned Boat W.L. Yang, S.L. Yang, S. Zhang and T.Y. Ma	288
Digital Controller Design Research Based on Series Compensation Y.C. Wu, Z.Y. Gao Xu and S.B. Ma	294
Design of a Switching Power Supply for Wheelchair Controller Based on Magnetic Isolation Technology R. Yang, L. Wang, X.F. Zhang and Y. Ma	299

Study of a Super-High-Speed PMSM Drive with Low Eddy Current Loss Q. Zhang and M. Feng	303
Development of the HWIL Training Simulator of UAV Engine Y. Sun, C.M. Bao, Z.J. Yi, J. Cheng and Q.C. Xiao	308
Based on ARM of AC LED Intelligent Lighting System Design Y.L. Qi	313
Design of Equalizer Circuit for Lithium-Ion Batteries in Mine-Used Lifesaving Cabin Q.Z. Zhang, M. Lei and X.L. Sun	317
Optimization Algorithm of Real-Timing Signal Control for Isolated Intersections H.H. Shi, H.j. Chen and Q. He	322
On Emergency Response of Swarm Robotics for Chemical Hazards L.L. Wang and W.P. Zhou	327
Design of OPC Client Based on .NET for Advanced Control System Y. Huang and Y.L. Xue	334
The Design of Control System for Sewage Treatment Based on PLC Z.S. Zhang, Y. Wang, L. Wang, J. Cui and C.S. Wang	339

Chapter 5: Applied Computational Procedure and Algorithms in Engineering Practice

The Pattern Recognition Method for Wear Particle Image Based on Rough Sets — Neural Network Theory S.H. Bai, L.R. Guan and Y.J. Wang	345
Online Forecasting and Calculating of Steam Turbine Exhaust Enthalpy Based on RBF Process Neural Network with Two Hidden Layers H.C. Gong	349
Applied Research of Ant Colony Algorithm in Fault Diagnosis S.H. Bai, L.R. Guan and Z.W. Liu	353
Dual Objective Multidimensional Parameter Optimization of Cam Curve Based on Improved Ant Colony Algorithm Z.J. He, P. Xu and J.X. Liao	357
Layout Optimization for Deformable Trimaran Based on BP Neural Network X.Y. Xu and K. Wang	363
Research of the Interpolation Method Applied to the Numerical Simulation of the Casting Filling Process X.C. Lv, Y.J. Yin and J.X. Zhou	369
Robust Inland Waterway Ship Tracking via Hybrid TLD and Kalman Filter T. Fei, L. Qing, L. Zhu and J. Li	373
A Simaplied Adaptive Kalman Filtering Algorithm L. Bo and X.Y. Zhu	378
A Scalable D Dominant Strategy to Solve Large-Dimensional Multi-Objective Optimization Problems Q. Yuan and G.M. Dai	383
Using the Improved Genetic BP Neural Network Algorithm for Lithologic Identification S.M. He and L.W. Liu	389
Applications of Color Morphology in Image Denoising S.M. He and X.L. Li	393
A Hierarchical Feature Selection Method Based on Classification Tree for HGU Fault Diagnosis X.Y. Chen, J.Z. Zhou, X.M. Xu and Y.C. Zhang	398
BP Neural Network Based Optimization for China Railway Freight Transport Network Y. Sun, M.X. Lang and D.Z. Wang	404
A Novel Extracting Algorithm of the Low Gray Fuzzy Edges for Infrared Images D.X. Li, L. Geng, Q.J. Du, H. Ren, A.J. Li and S. Tang	411
A Fast Target Searching and Capturing Method for Phased Array Radar Q. Huang, B.H. Wu, L. Gao, D.M. Guo and M.L. Tong	416

Parameters Selection of LLE Algorithm for Classification Tasks F. Hu, C.T. Wang, Y.C. Wu and L.Z. Fan	422
Info-Dynamics Functionals in the Study of Fields of Anisotropy of a Microrelief Spinning Tapes A.M. Frolov, G.S. Kraynova and S.V. Dolzhikov	428

Chapter 6: Applied Information Technologies in Design and Research

Design of Interlnk Protocol Packet at Embedded Linux J.W. Xue, Q. Ma, Z. Liu, R.L. Li and H.L. Li	435
Research on the Loading Pattern of Embedded System Z. Gao, Q.B. Zhu and S.L. Tang	440
The Study of the Trust Mechanism Based on Mobile Agent in the E-Commerce Agricultural Commodity Trade C. Zhang and X.M. Wei	444
Research of the Technology and Application of Process Digital Mock-Up for Spacecraft Assembly Based on the MBD W.X. He, B.L. Wan, B. Zhang and X.H. Wu	447
Research on Virtual Real-Time Simulation System Based on EON T. He, X. Wang, X. Hu, J. Xiong and Y.C. Deng	453
Design for Virtual Laboratory of Mechanical Drawing on Web L.H. Qiu and G. Wang	457
Development and Application of CAD Technology Y. Chen	461
Research on Key Technologies for Construction of Three-Dimensional Machining Procedure Model Based Definition H.L. Zhang, Y. Guo, Z. Cui, Y. Zeng and T.J. Yuan	464
Development and Application of CAD Technology in Railway Vehicle Studying X.X. Wang, G.Z. Hu, S.N. Xiao and Y.M. Tang	468
A Novel USB3.0 High Definition 3D Video Camera Based on ARM P.P. Lian	474

Chapter 7: Engineering Provision and Production Management

Study on Novice Drivers' Fixation Features under Different Car-Following Risk Levels M.H. Zhang, Z.H. Jiang and Q. Zhang	481
Group Technology Applied in Quality Management System Y.J. Li and Y.L. Wang	486
Possibility Theory on Economic Problems H.Z. Tian, Z.Q. Dong, W.Q. Huang, W.X. Li and Y. Yang	490
Knowledge Management for Product Development: A Review B. Lan	494
Research on Production Schedule Online Processing Management of Sand Casting Workshop Based on Single Piece Management Model J.X. Zhou, H. Yang and X.Y. Ji	499
Quantum Evolutionary Algorithm for Chemical Batch Scheduling Problem Q. Tang, P. Liu and J.X. Tang	506
Particle Swarm Optimization for Chemical Multi-Stage and Parallel Batch Scheduling Q. Tang, P. Liu and J.X. Tang	510
Heuristic Particle Swarm Optimization for Scheduling Chemical Flowshop with Limited Intermediate Product Storage Q. Tang, X.Y. Zhou and J.X. Tang	514
Extracting Cognitive Maps for Intelligent Conceptual Product Design M.W. Wang and J.T. Zhou	518
The Ordering Strategy of ES Model and Option Contract X.W. Wang, J. Meng and P. Jiang	522

A Method for Air Material Failure Prediction Based on Weibull Analysis J. Wang, L. Jiang and M.M. Shen	526
Development and Application of the Performance Evaluation System for Integrated Supply Chain L.Z. Du, D.X. Tao and L.Q. Yu	532
Activation Factors and Sliding Mechanism of Ancient Landslide in Huale Coal Mine J.C. Peng, S.L. Wang and P. Lv	536
Study on the Development Model of Green Products Based on Concurrent Engineering X.Y. Lou	540
To Analyse the Timely Maintenance System Usability by Stochastic Process Z.H. Yuan, W. Sun and Y.C. Yuan	544
Risk Analysis about Operation of UHV Power Grid Operation and Maintenance Based on Security Benchmarks Y.G. Zan and X.L. Hou	548
Simulation and Optimization of Productive Process of Titanium Sponge L.L. Feng and Y. Liu	553
Application of RFID in a Flexible Assembly Production Line Based on Tracking Algorithm B.F. Liu and G. Li	557
Information Application of Production Line in the New Energy Automobile Based on RFID X.J. Ruan	561
Research on the Harm Mechanism and Related Standards of Children's Toys X. Liu and H.Q. Luo	565
