

## Table of Contents

<b>Data Section: Solid Metals and Alloys</b>	1
<b>Simple and Complex Oxides</b>	58
<b>Semiconductors</b>	75
<b>Halides and other Ionic Substances</b>	87
<b>Carbides, Hydrides, Nitrides, Organic Solids, Miscellaneous Materials, Liquid Metals and Alloys, Liquid Halides and Carbonates and Liquid Oxides</b>	121
<b>Additional References: Diffusion Processes, Electrical Conduction and Electrotransport, Temperature Gradient Effects, Atomic Ordering, Point Defects and Dislocations</b>	152
<b>Planar Defects, Stacking Faults, Twins, Deformation Effects, Boundaries, Surfaces, Interfaces, Miscellaneous Defect Structures, Irradiation Effects, Ion Bombardment, Ion Implantation, Proton Irradiation, Neutron Irradiation, Electron Irradiation, Laser Irradiation, Color Centers and Liquid State Properties</b>	184
<b>New Books</b>	217
<b>Subject Index</b>	219
<b>Materials Defect Properties Index</b>	223
