

Table of Contents

Preface

Part I Multiscale Understanding in Fundamentals of Diffusion

Growth Kinetics on Nanoscale: Finite Diffusion Permeability of Interfaces

D.L. Beke and Z. Erdélyi 1

Diffusion Mechanisms in Nanocrystalline and Nanolaminated Au-Cu

A.F. Jankowski 13

Modelling of Oxygen Diffusion and Segregation at Interfaces in Ag-MgO Composites

I.V. Belova, A. Öchsner, N. Muthubandara and G.E. Murch 29

Stability and Shrinkage by Diffusion in Hollow Nanotubes

A.V. Evteev, E.V. Levchenko, I.V. Belova and G.E. Murch 39

A Molecular Dynamics Study of Self-Diffusion in the Core of a Screw Dislocation in Al

G.P. Purja Pun and Y. Mishin 49

A Mathematical Formulation for Interfacial Diffusion, Incorporating Deviation from the Classical Random Walk Theory

N.S. Raghavan and A.H. King 63

First-Principles Computation of Transition-Metal Diffusion Mobility

K.S. Chan, Y.M. Pan and Y.D. Lee 73

An Examination of Diffusion Paths in Terms of Interdiffusion Fluxes and Interdiffusion Coefficients

K.M. Day and M.A. Dayananda 83

Diffusion in Metallic Melts

A. Griesche, M.P. Macht and G. Frohberg 101

Diffusion in Bulk Glass Forming Alloys— from the Glass to the Equilibrium Melt

K. Rätzke, V. Zöllmer, A. Bartsch, A. Meyer and F. Faupel 109

Non-Random Interaction of Vacancies with Atoms during Interdiffusion and Ionic Conductivity in Materials

I.V. Belova and G.E. Murch 119

Part II Enabling Knowledge of Diffusion in Critical Technologies

Interdiffusion Behavior in γ -Phase U-Mo Alloy versus Al-6061 Alloy Couples Fabricated by Friction Stir Welding

D.D. Keiser 131

Growth Kinetics of Intermetallic Phases in U-Mo vs. Al Alloy Diffusion Couples Annealed at 550°C

E. Perez, N. Hotaling, A. Ewh, D.D. Keiser and Y.H. Sohn 149

The Influence of Solid State Diffusion on Microstructural Development during Solidification

J.N. DuPont 157

Calculation of Gas Carburizing Kinetics from Carbon Concentration Profiles based on Direct Flux Integration

O. Karabelchtchikova and R.D. Sisson 171

Assessment of Ternary Multicomponent Diffusion in Alloy 22 (Ni-Cr-Mo)

A.V. Jaques and J.C. LaCombe 181

Interdiffusion in (fcc) Ni-Cr-X (X = Al, Si, Ge or Pd) Alloys at 700°C

N. Garimella, M.P. Brady and Y.H. Sohn 191

VisiMat[®]—Educational Tool for Multicomponent Diffusion in 2 and 3 Dimensions

C.J. O'Brien, W. Yang, A. Lupulescu and R. Ozisik 199
