

Table of Contents

Preface

Chapter I

Superstructure Transformations in High-Temperature Intermetallic Nanolayers: Atomistic Simulation

M. Kozlowski, R. Abdank-Kozubski and C. Goyhenex

3

Chapter II

A Morphology of Diffusion Zone from Entropy Production Calculations

M. Danielewski, B. Wierzba and K. Tkacz-Śmiech

31

Chapter III

The Decisive Contributions by L. Boltzmann and C. Matano to the Quantitative Analysis of Diffusion Phenomena

W. Sprengel and M. Koiwa

49

Chapter IV

Hollow Hemisphere Shell Formation by Pure Kirkendall Porosity

C. Cserháti, G. Glodán and D.L. Beke

61

Chapter V

Molecular Dynamics of the Transport of Ions in a Synthetic Channel

D.A. Morton-Blake

77

Chapter VI

Grain Boundary Diffusion and Grain Boundary Segregation in Metals and Alloys

B. Bokstein and A. Rodin

99

Chapter VII

Diffusion in Glassy Metals

H. Mehrer

125

Chapter VIII

Defects and Sintering-Induced Diffusion Processes in Yttria-Stabilised Zirconia Nanomaterials Studied by Positron Annihilation Spectroscopy

I. Procházka, J. Čížek, O. Melikhova, W. Anwand, T.E. Konstantinova and I.A. Danilenko

155

Chapter IX

Mechanical Activation of Mn-O Oxides: Structural Phase Transitions, Magnetism and Oxygen Isotope Exchange

A.Y. Fishman, T.E. Kurennyykh, V.Y. Mitrofanov, E.A. Pastukhov, S.A. Petrova, S.A. Uporov, V.B. Vykhodets and R.G. Zakharov

175

Chaper X

Peculiarities of Structure and Texture of High-Strength Cu-Nb Composites

E.N. Popova and V.V. Popov

201
