

Table of Contents

Preface

PART I. Invited Papers

Impurity Diffusion in Pure Metals G. Neumann	3
Anomalous Fast Diffusion in Metals C. Herzig	23
Diffusion of Very Light Particles (Hydrogen, μ^+, π^+) in Metals A. Seeger	39
Diffusion in Dilute Alloys A.D. Le Claire	82
Tracer Diffusion in Concentrated Alloys T. Hehenkamp	100
Chemical Diffusion T. Heumann	117
Diffusion under High Pressures D. Lazarus	134
Diffusion Mechanisms in Grain Boundaries in Metals N.L. Peterson	145
Diffusion at the Surface of Metals B. Perrailon, V. Pontikis and Y. Adda	163
The Role of Diffusion in High Temperature Corrosion of Metallic Materials S. Mrowec	181
Light Atom Diffusion and Tunneling in Metals H. Wipf	209
Diffusion of C, N and O in Metals D. Bergner	223
Novel Experimental Methods J. Philibert	241
Tracer Diffusion in Intermetallic Compounds H. Bakker	266
Diffusion in Metallic Glasses Y. Limoge, G. Brébec and Y. Adda	285
The Relation between Self-Diffusion and Equilibrium Defects Parameters and Characteristics of Monoatomic Crystals S.M. Klotsman	303

PART II. Contributed Papers

POSTER SESSION A, Chairman: K. Hirano

Impurity Diffusion in Solid Sodium L.W. Barr and F.A. Smith	325
Isotope Effect Measurement for Impurity Diffusion in Copper, Silver and Gold C. Herzig, H.J. Rockosch and R. Hilgedieck	330
Diffusion of Mo and W in Al N. v. Chi and D. Bergner	334
Volume Diffusion of Simple and Transition Metal Impurities in Nickel Monocrystals A.B. Vladimirov, V.N. Kaigorodov, S.M. Klotsman and I.S. Trachtenberg	338

Self-Diffusion in Tantalum D. Weiler, K. Maier and H. Mehrer	342
Diffusion of Tungsten-Series Impurities in Tungsten Single Crystals N.K. Archipova, L.M. Veretennikov, S.M. Klotsman, I.P. Polikarpova, G.N. Tatarinova and A.N. Timofeev	347
Electromigration in Niobium Y. Serruys and G. Brébec	351
Fast Solute Diffusion in Pure Zirconium and in a Zirconium-Titanium Alloy G.V. Kidson	356
Magnetic Anomaly of Cobalt Diffusion in α-Iron H. Mehrer, D. Höpfel and G. Hettich	360
Interaction of Trivalent Solutes with Vacancies in Ag, Au and Mg T. Górecki	365
Effective Vacancy Formation Energy and the Solute-Vacancy Binding Energy in Binary Cu- and Ag-Base Alloys T. Górecki and Z. Michno	369
Diffusion of Co-58 in Dilute CuCoSi Alloys D.L. Beke, I. Gődény, G. Erdélyi, F.J. Kedves and B. Albert	374
Diffusion of Zn-65 in Dilute AlMn Alloys D.L. Beke, G. Erdélyi, I. Gődény and F.J. Kedves	378
Vacancy Jump Frequency Ratios in Diluted CuSn-Alloys A. Neidhardt, U. Reinhold and G. Krautheim	382
Self-Diffusion of Iron in the Iron Alloys with BCC Lattice J. Kučera, B. Million and J. Růžicková	386
Diffusion in Dilute Iron-Tin Alloys A. Kumagai, Y. Iijima and K. Hirano	389
The Effect of Hydrostatic Pressure on Self-Diffusion in Gold M. Werner and H. Mehrer	393
The Effects of Hydrostatic Pressure on the Diffusion of Zn-65 in Aluminium G. Erdélyi, D.L. Beke, I. Gődény, L. Gergely and F.J. Kedves	398
Interdiffusion in Gold-Iron Alloys Y. Iijima, K. Hirano, T. Ohzeki and K. Suzuki	401
Frame of Reference and Intrinsic Diffusion Coefficients for Binary Interdiffusion M. Onishi and T. Shimozaki	405
Self-Diffusion in Liquid Metals N. Petrescu, L. Ganovici, M. Petrescu and I. Ganovici	409

POSTER SESSION B, Chairman: B.B. Bokstein

Grain Boundary Structure and Diffusion: A Molecular Dynamics Simulation Study M. Guillopé, V. Pontikis and G. Ciccotti	415
Diffusivity of In in Cu along Stationary and Migrating Grain Boundaries W. Gust, A. Lodding, H. Odélius, B. Predel and U. Roll	418
Diffusivity of Grain Boundaries in Aluminium Bi-Crystals K. Przybyłowicz	422
Diffusion in Crystals with Dislocations A.D. Le Claire and A. Rabinovitch	428
Observation of the Diffusion of Cottrell Atmospheres of Impurities Round the Dislocations by Ultrasonic Measurements G. Gremaud, M. Bujard, H. Li-Ping and W. Benoit	434
Diffusion of Nitrogen in Molybdenum at Low Temperatures G. Haneczok, T. Poloczek and J.W. Moron	438
Activation Energies of Nitrogen Diffusion, Nitrides Precipitation and Resolution in α-Fe-N J. Rasek	442
Diffusion of Helium in Gold P. Jung and V. Sciani	446

Hydrogen Diffusion in Solid Aluminium K. Papp and E. Kovacs-Csetényi	450
The Compensation Effect in Diffusion and the Energetics of Substances S. Wach	454

POSTER SESSION C, Chairman: S. Ceresara

Structural and Superconducting Properties of the Nb₃Al Compound Obtained by Low Temperature Diffusion M. Asdente, M. Ceresara, M. Pascucci and N. Sacchetti	461
Cr-51 Diffusion in Cr₃Si Single Crystals M. Jurisch and D. Bergner	465
Periodic Structures in Ternary Diffusion Couples K. Osinski, A.P. Gehring, G.F. Bastin and F.J.J. van Loo	469
Diffusion of V⁴⁸ in the A15 Intermetallic Compound V₃Ga A. van Winkel, M.P.H. Lemmens, A.W. Weeber and H. Bakker	473
Gorskii-Effect in Concentrated α'-PdH_x C. Hagen, A. Verbruggen and R. Griessen	478
Spin Lattice Relaxation of Protons in Zirconium-Uranium Hydride I. Ursu, M. Bogdan, D.E. Demco, D. Lupu and A. Biris	482
Sims Analysis of the Diffusion of Ge in Si P. Dorner, W. Gust, A. Lodding, H. Odelius, B. Predel and U. Roll	488
Isotope Effect of Ge Diffusion in Silicon U. Södervall, U. Roll, B. Predel, H. Odelius, A. Lodding and W. Gust	492
Vacancy Migration Energy as Determined from Exoelectron Emission Measurements on Cold-Rolled Aluminium and Cadmium C. Górecki	499
Potentialities of Sims in the Delineation of Volume Diffusion: The Cu-In System W. Gust, A. Lodding, H. Odelius, C. Ostertag, B. Predel and U. Roll	503
Diffusion Coefficient of ¹¹⁰Ag into Zn near the Boiling Point Determined by Absorption Method P. Kubíček and B. Wozniaková	507
Resistometric Method for Determination of Diffusion Coefficients of Volatile Solutes L. Lipták, A. Kele, L. Uray and I. Gaál	512
Measurement of Small Diffusion Coefficients with Sims M.P. Macht, V. Naundorf and R. Döhl	516
Multidilatometric Method for Measurements of the Electromigration of Hydrogen in Metals A. Verbruggen and R. Griessen	519
Migration of In Impurities in Ag Pt Alloys Studied with PAC Method K. Królas and M. Marszałek	523

POSTER SESSION D, Chairman J. Kucera

Creep and Zn Self-Diffusion in Al-Zn Solid Solutions J. Čermák, M. Pahutová and J. Kučera	529
Determination of Diffusion Coefficient of Magnesium in Al-Mg Alloy K. Kováčová and M. Šipöcz	533
Metastable States Controlled by Diffusion in Al-Cu System L. Kertész, J. Kollár, M.A. Ahmed, A. Szász, L. Csordás and F. Schuszter	537
Forming of a Transitional State by Diffusion in AlMgSi Alloy L. Kertész, J. Kollár, J. Kojnok and F. Schuszter	543
Decomposition of the Heusler Alloy Cu_{2.00}Mn_{1.00}Al_{1.00} during the Isochronal Annealing R. Abdank-Kozubski and J. Sołtys	549
Investigation of Precipitation and Dissolution Kinetics by TEP in AlFe Alloys I.A. Szabó, G. Erdélyi, D.L. Beke and F.J. Kedves	552

Quantitative Determination of the Growth of a Bugle and Dent Zone during Diffusion in the Cu/Ni System	
V. Ruth and J. Klatte	556
Theoretical Considerations on the Growth Kinetics of Spherical Precipitates in Supersaturated Alloys	
O. Simmich and H. Löffler	560
Models of the "Order-Disorder" Transitions in Ternary Alloys with Cubic Structures	564
X-Ray Diffraction Study of the Processes of Ordering of Atoms in Ternary Alloys with Cubic Structures	
J. Soltys	568
Resistometrical and Small Angle X-Ray Investigation of Al Atoms Redistribution in the Superplastic Zn-Al Alloy	
P. Vostrý, V. Hašlar, P. Málek and J. Pleštil	572
Diffusional Stress Relaxation around Second Phase Particles: An Experimental Study	
P. Harmat, J. Major and I. Gaál	576
Multiphase Diffusion in some Related Ternary Metal Systems	
F.J.J. van Loo and G.F. Bastin	580
Diffusion of Aluminium in Mechanically Activated Steel	
G. Hoetzs, H. Foerster and J. Reschke	593
Study of Diffusion Induced Recrystallization in the System W-Ni	
L. Kozma, I. Gaál and L. Bartha	597
Diffusion during Plastic Deformation of Zinc	
P. Lukáč, Z. Trojanová and P. Vostrý	601
Relation between Dopants, Impurities and the Fracture Character of Tool Steels	
F. Pavlyák, L. Domonkos and G. Hárs	605
The Surface Berylliding of Copper	
S. Gâdea, N. Petrescu, M. Petrescu and I.M. Britchi	609
Internal Oxidation in Tungsten	
L. Lipták, A. Kele, J. Major, L. Uray and I. Gaál	612
Alloy Al-Sc Age-Hardening Kinetics	
M.E. Drits, L.S. Toropova, U.G. Bikov and Anastaseva	616
The Influence of Solidification Rate on Microsegregation of Alloys	
B. Dukiet-Zawadzka	624

PART III. Open Discussions

ROUND TABLE DISCUSSION 1	631
ROUND TABLE DISCUSSION 2	655
