

## Table of Contents

### Preface

#### Transport in Oxides in an Oxygen Potential Gradient

M. Martin 1

#### Transport Processes during the Oxidation of Metals

F. Gesmundo 57

#### Phenomenology of the Diffusion Controlled Reactions in Solids, High Temperature Oxidation of Metals

M. Danielewski 103

#### Point Defects and the Electronic Structure of Nonstoichiometric Compounds

A. Stoklosa 135

#### Surface Vs. Bulk Defect Structure and Chemical Diffusion in CoO

J. Nowotny and M. Rekas 169

#### Simple Oxidation Rate Law for Metal Spheres

A.T. Fromhold 215

#### Corrosion Processes Related to Superalloys used in Gas Turbines

J. Steinmetz, P. Steinmetz and A.M. Huntz 223

#### Matter Transport and Corrosion Kinetics of Metals and Alloys at High Temperature

J.P. Larpin and J.C. Colson 277

#### Oxidation of Metals in Sulfur Dioxide Atmosphere

J. Gliewicz-Wolter 303

#### The Influence of Reactive Elements on the High Temperature Oxidation Behavior of Alumina-Forming Materials

J. Jedlinski 335

#### Sensitisation in Stainless Steels

C.J. Moss 391
