

Table of Contents

Stress Distributions in an Annular Disk Possessing Stress Induced Material Anisotropy	1
N.N. Alexandrova and P.M.M. Vila Real	
Numerical Analysis of Triaxial Residual Stresses in Quenched 316H Stainless Steel	7
A. Andrade Campos and F. Teixeira Dias	
Texture Evolution during High Temperature Plane Strain Compression of High Silicon Steels	15
P. Rodriguez-Calvillo and Y. Houbaert	
Fracture Toughness of Iron Boride Layers Obtained by Paste Boriding Process	21
G. Ramírez, I. Campos-Silva and A.S. Balankin	
Self-Affine Patterns of Boride Layers	27
I. Campos-Silva, G. Ramírez, A.S. Balankin and R. Torres	
Modeling and Simulation of Resin Filling and Cure Processes in Molds Partially Filled with Porous Media	33
V.A.F. Costa	
On the Thermal Conductivity of Adhesively Bonded and Sintered Hollow Sphere Structures (HSS)	39
T. Fiedler and A. Öchsner	
Influence of the Morphology of Joining on the Heat Transfer Properties of Periodic Metal Hollow Sphere Structures	45
T. Fiedler and A. Öchsner	
Calculation of the Effective Thermal Conductivity in Composites Using Finite Element and Monte Carlo Methods	51
T. Fiedler, A. Öchsner, N. Muthubandara, I.V. Belova and G.E. Murch	
A Thermodynamical Model for Analysis of Isothermal Phase Transformations under High Pressure	57
V. Grigorova and D. Roussev	
Comparison between the Thermodynamical Behaviour of PdTe₂ and PtTe₂, while Subjected Isothermally to High Pressure	63
V. Grigorova, D. Roussev and S. Jobic	
Fracture Toughness and Crack Deflection in Porous Multilayered Ceramics: Application to NiO-YSZ	69
N. Joulaee, A. Makradi, S. Ahzi and M.A. Khaleel	
Finite Element Analysis of Temperature and Density Distributions in Selective Laser Sintering Process	75
L. Dong, A. Makradi, S. Ahzi and Y. Remond	
Comparison between Self-Consistent and Intermediate Approaches for the Simulation of Large Deformation Polycrystal Viscoplasticity	81
S. M'Guil, S. Ahzi, H. Youssef, J. Grácio and M.A. Khaleel	
Evaluation of Transmission Conditions for a Thin Heat-Resistant Inhomogeneous Interphase in Dissimilar Material	87
G. Mishuris, W. Miszuris and A. Öchsner	
Finite Element Verification of Transmission Conditions for 2D Heat Conduction Problems	93
G. Mishuris, W. Miszuris and A. Öchsner	
Flux Evaluation in Anisotropic Heat Conduction Using the Modified Local Green's Function Method (MLGFM): Comparative Studies	100
P.A. Muñoz-Rojas and M. Vaz	
Modeling the Longitudinal Temperature Evolution of a Chirped Fiber Bragg Grating Submitted to Temperature Gradients	106
B. Neto and P.S. André	
The Effective Conductivity of 2D Porous Materials with Temperature Dependent Material Properties	112
E. Pesetskaya, A. Öchsner and S. Rogosin	
Two Different Approaches for the Effective Conductivity Investigation of 2D Porous Materials with Temperature Dependent Material Properties	118
E. Pesetskaya, T. Fiedler and A. Öchsner	

Design of an Induction Glass Melting Furnace by Means of Mathematical Modelling Using the Finite Element Method	
I. Arellano, G. Plascencia, E. Carrillo, M.A. Barrón, A. Sánchez and J. Gutiérrez	124
Estimation of the Heat Flux Through Furnace Side Walls Protected with Water Cooled Cooling Devices	
G. Plascencia, T.A. Utigard, J. Gutiérrez, D. Jaramillo, V. Mayagoitia and M.L. Hernández-Pichardo	130
Heat Conduction of 2D Composite Materials with Symmetric Inclusions: a Model and Reduction to a Vector-Matrix Problem	
M. Dubatovskaya and S. Rogosin	136
Hele-Shaw Model for Melting/Freezing with Two Dendrites	
S. Rogosin and T. Vaitekhovich	143
Intermediates in Ring-Disc Electrode Processes	
C.A.C. Sequeira	152
Vibration Analysis of a Ni-Ti Shape Memory Alloy Rod	
M. Ghazinejad and A. Shokuhfar	164
SPH as an Inverse Numerical Tool for the Prediction of Diffusive Properties in Porous Media	
A.C.M. Sousa and F. Jiang	171
Evaluation of Thermal and Mechanical Filler Gas Influence on Honeycomb Structures Behavior	
M. Vesenjak, A. Öchsner and Z. Ren	190
Thermal Post-Impact Behavior of Closed-Cell Cellular Structures with Fillers – Part I	
M. Vesenjak, A. Öchsner and Z. Ren	196
Thermal Post-Impact Behavior of Closed-Cell Cellular Structures with Fillers – Part II	
M. Vesenjak, Z. Žunić, A. Öchsner and Z. Ren	202
 Special Session on Phase change: Multiscales and strong coupling	
	208
Amplification of the Thermocapillary Convection during Evapo-Condensation Cycle in Heat Pipes	
R. Bennacer and M. El Ganaoui	209
Investigation of Evaporation and Diffusion Phenomena in Porous Media	
R. Bennacer and K. Sefiane	215
A Model for Rapid Solidification for Plasma Spraying	
S. Ben Naoua, M. El Ganaoui, H. Sammouda and P. Fauchais	223
 Special Session on Nanostructures and Materials	
	231
Design of Moving Components of an Ultra Precision Machine Tool for Nanometric Machining	
M. Vahdati and A. Shokuhfar	232
A New Inorganic Membrane: TiO₂ Ultrafilter Based on Functionally Graded Porous Alumina	
C. Falamaki and J. Veysizadeh	239
An Experimental Study on Synthesis and Characterization of Silica Nanoparticles Prepared by Sol-Gel Method	
A. Shokuhfar, T. Shokuhfar, M. Ghazinejad, R. Babazade and S. Tabatabae	245
Production of Zinc Oxide Nanoparticles by Liquid Phase Processing: an Investigation on Optical Properties	
M. Vafaee and H. Youzbashizade	252
Characterization of Al/SiC Nanocomposite Prepared by Mechanical Alloying Method	
A. Shokuhfar, M.R. Dashtbayazi, M.R. Alinejad and T. Shokuhfar	257
Effect of Micron and Nano Size Oxide Material Additives on Reaction Sintering, Micro Structural and Physical Properties of Al₂TiO₅ Based Ceramics	
G. Naderi, A. Shokuhfar, H.R. Rezaie, R. Naghizadeh and T. Shokuhfar	266
