

Table of Contents

Foreword

Methods of Powder Diffraction for the Study of Phase Transitions

J. Ihringer 3

Domains and Interfaces near Ferroic Phase Transitions

W. Schranz 41

Domain Structures in Ferroelastic Materials: Case of Rare Earth Sesquioxides

M. Ben Salem and B. Yangui 61

Influence of Lattice Defects on the Properties of Ferroelectrics

B. Hilczer 95

Structural Phase Transitions in High-Temperature Superconductors

H.M. Tatarenko and G.E. Nihoul 129

Diffuse Transitions in Mixed Ferroelectrics

D. Pandey 177

Twins and Domain Structure of YBaCuO

M. Déchamps, D. Favrot-Colson and A. Rosová 217

Ferroelastic Incommensurate Phases

P. Saint-Grégoire 237

Phase Transitions of Quartz

G. Dolino and P. Bastie 285

Theory of Reconstructive Phase Transitions in Crystals of the Elements and Related Structures

P. Tolédano and V. Dmitriev 311

Martensitic Transformation and Thermomechanical Properties

G. Guénin 339

The Amorphous to Crystalline Phase Transition and Vice Versa

J. Marfaing and W. Marine 393
