

# Table of Contents

## Preface

### A Review of the Stages of Work Hardening

A.D. Rollett and U.F. Kocks 1

### The Effects of the Core Structure of Dislocations: The Case of Li<sub>2</sub> Alloys

F.R.N. Nabarro 19

### Structure and Properties of Grain Boundaries

J. Thibault 33

### Texture Development during Deformation: New Results in Complex Systems

H.R. Wenk 45

### Organized Dislocation Structures

F. Louchet 57

### Continuum Mechanics Approach to Collective Behavior of Dislocations

J. Kratochvíl 71

### Plastic Deformation and Dynamical Systems

G. Saada 87

### 3D Simulation of Dislocation Motion on a Lattice: Application to the Yield Surface of Single Crystals

G.R. Canova, Y. Bréchet, L.B. Kubin, B. Devincre, V. Pontikis and M. Condat 101

### Dislocations in Two-Dimensional Systems, Topology and Thermodynamics

N. Rivier 107

### Defects in Smectic and Liquid Crystals

P. Oswald 121

### Properties of Vortices in Layered Superconductors

D. Feinberg 135

### Simulations of Relaxation, Pinning and Melting in Flux Lattices

H.J. Jensen 151

### Thermodynamics of Stressed Solids, Precipitation on Dislocations

F.C. Larché 173

### Dislocations and Polytypic Phase Transformations

P. Pirouz and P.M. Hazzledine 183

### Investigations of High Strain Deformation Using Model Composite Systems

W.J. Poole and J.D. Embury 217

### Dislocations in Multilayers

J. Grilhé 233

### Plastic Deformation of Nanocrystalline Metals

J.R. Weertman and P.G. Sanders 249

### Dislocations in Silicon Based Heterostructures

B. Leroy 263

### Contributions of Scanning Probe Microscopy and Spectroscopy to the Investigation of Microstructures and Their Physical Properties

R. Wiesendanger 281

### Continuum Modelling of Interfacial Decohesion

X.P. Xu and A. Needleman 287

### Organization of Rupture

D. Sornette, C. Cowie, P. Miltenberger, A. Sornette and C. Vanneste 303

### Environment Sensitive Fracture Mechanisms

T. Magnin 319

### Soft Magnetic Materials: Microstructure and Properties

J. Degaueque 335

### Complex Microstructures Analysis: Fracture Surfaces as an Example

E. Bouchaud 353

### Dislocation Cell Formation in a 2D Simulation

I. Groma and G.S. Pawley 369

<b>Theory and Computer Simulation of Dislocation Structure Relaxation During Annealing</b>	375
S.B. Goryachev and A.V. Shalenkov	
<b>Disordered Planar Arrays of Dislocations: Types of the Disorder and Energy</b>	381
A.A. Nazarov, R. Valiev and A.E. Romanov	
<b>Mean Stresses and Long-Range Internal Stresses in Cyclically Deformed Polycrystalline Copper Studied by High Resolution X-Ray Line Profile Analysis</b>	387
T. Ungár, A. Borbély, H. Biermann, G. Hoffmann and H. Mughrabi	
<b>Non-Local Behavior of Metals</b>	
D. Muller, X. Lemoine, M. Berveiller and J. Kratochvíl	393
<b>Nonlocality in Dynamical Model of Dislocation Pattern Formation</b>	
R. Sedláček	399
<b>Lattice Defects in the Process of Fatigue in Crystalline Materials</b>	
J. Polák	405
<b>Role of Dynamical Processes at Discontinuous Deformation of Aluminium</b>	
M.A. Lebyodkin and V.S. Bobrov	411
<b>Geometric Instability of Deformation of Structurally Inhomogeneous Samples</b>	
V.I. Eremin	417
<b>Plastic Instabilities in Al-3% Mg</b>	
P. Lukáč, J. Balík, F. Chmelík and Z. Trojanová	423
<b>An Example of a Correlation between Microscopic and Macroscopic Mechanical Properties: The Prismatic Glide of Titanium</b>	
S. Farenc, D. Caillard and A. Couret	429
<b>Thermomechanical Coupling &amp; Tearing Resistance of the 2091 Al-Li Alloy</b>	
D. Delafosse and L.P. Kubin	435
<b>Analysis of Local Rotations in a Deformed Two Phase Alloy</b>	
L. Guétaz and J. Pénisson	443
<b>Measuring APB and CSF Energies in Ni<sub>3</sub>Al with Weak-Beam TEM and Image Simulations</b>	
K.J. Hemker and M.J. Mills	449
<b>TEM 'In Situ' Deformation at Room Temperature of a γ/γ' Superalloy: Propagation of Dislocations in γ Channels</b>	
A. Coujou, M. Benyoucef and N. Clément	455
<b>Characteristics of Dislocation Motion in Ni<sub>3</sub>(Al, Hf)</b>	
J. Bonneville, P. Späthig and J. Martin	461
<b>Evolution of Slip Mode with Temperature in Fatigued Ni-15 at.% Al γ/γ' Single Crystals</b>	
C. Monier, M. Cornet and P. Veysiére	467
<b>Particle-Dislocation Interaction in Dispersion Strengthened Intermetallics</b>	
E. Göhring and E. Arzt	473
<b>Dislocations Generation at the Edge of an Arsenic Implanted Area</b>	
B. Leroy and O. Cain	479
<b>Dislocations Multiplication in an Arsenic Doped Area Surrounded by a Trench</b>	
B. Leroy and O. Cain	485
<b>Dislocation-Gold Interactions in FZ and CZ Silicon: The Role of Self-Interstitials</b>	
B. Pichaud, G. Mariani, W.J. Taylor and W.S. Yang	491
<b>Charged Dislocations in Germanium</b>	
A. Korner and H.O.K. Kirchner	497
<b>Impurity Effects on the Dislocation Structure in GaAs</b>	
P. Sitch, R. Jones, M.I. Heggie and S. Öberg	501
<b>The Use of Dislocations as an 'Atomic Saw' to Cut 2D Structures - Interest for Plasticity Studies</b>	
J.P. Peyrade, F. Voillot, M. Goiran, C. Guasch, E. Bedel, C. Fontaine, H. Atmani and A. Rocher	507
<b>Microplasticity and Microbrittleness of HTSC Single Crystals and Ceramics: Influence of Microstructural Inhomogeneities and Temperature</b>	
L.S. Fomenko, S.V. Lubenets and V.D. Natsik	513
<b>On the Mechanical Properties of C<sub>60</sub> Fullerite Crystals</b>	
V.S. Bobrov, R.A. Dilanyan, L.S. Fomenko, M.A. Lebyodkin, S.V. Lubenets and V.I. Orlov	519
<b>Segregation of Secondary Phase Particles near Dislocations in NaCl:Ni(2+) Crystals</b>	
M. Suszynska	527

<b>Internal Vibrations of Cores of Screw Dislocations in B.C.C. Metals</b>	533
F. Kroupa	
<b>Continuum Theory of Dislocations in Angular Coordinates</b>	539
P. Dlużewski	
<b>Stress Effect on Dislocation Motion in BCC Crystal</b>	545
J. Cserti, G. Tichy and V. Vitek	
<b>The Effect of the Vacancy Pipe Diffusion on Creep of <math>\alpha</math>-Iron</b>	551
A.I. Ryazanov, V.A. Borodin, Y.R. Kevorkyan and V.V. Kolomytkin	
<b>Scattering of Electrons by Dislocations: Theory and Application</b>	557
M. Müller, M.J. ZEHETBAUER, F. Sachsl Lehner and V. Gröger	
<b>Brittle Fracture of Materials due to Growing Grain Boundary Bubbles and Cracks</b>	563
A.I. Ryazanov, V.A. Borodin and V.M. Manichev	
<b>Low Temperature Plasticity of Amorphous Metallic Alloys</b>	569
E.D. Tabachnikova, P. Diko, V. Ocelík and P. Duhaj	
<b>Internal Stress Contribution to the Yield Stress Anisotropy of Amorphous Alloy Ribbons</b>	575
V.Z. Bengus, P. Duhaj, E.B. Korolkova and V. Ocelík	
<b>Atomistic Simulation of a Screw Dislocation near the Coherent Interface between Two Elastic Media of Different Moduli</b>	581
I. Lardon, J. Lépinoux and P. Beauchamp	
<b>Twin Boundaries Dynamics and Their Influence on Superconducting Properties of YBaCuO Crystals</b>	587
V.I. Nikitenko, L.A. Dorosinskii, A.A. Polyanskii and V.K. Vlasko-Vlasov	
<b>Non-Stick Quasicrystalline Coatings and Nano-Sized Precipitates</b>	593
N. Rivier	
<b>A Model Describing Deformation Twinning in BCC Metals</b>	601
K.P.D. Lagerlöf	
<b>Basal Twinning in Sapphire (<math>\alpha</math>-Al<sub>2</sub>O<sub>3</sub>)</b>	607
K.P.D. Lagerlöf, B.F. Lawlor, T. Geipel, P. Pirouz, A.H. Heuer and J.B. Bilde-Sørensen	
<b>Modelling Dislocation Patterns by Molecular Dynamics</b>	613
J.M. Salazar and R. Fournet
