

Table of Contents

Preface

Chapter 1: Circular Economy

Copper Availability from the Recycling of Electric Vehicles in Europe, North America and China: A Model Based Estimation until 2050

M. Soulier and D. Goldmann 3

Potential Contribution of Secondary Materials to Overall Supply - The Example of the European Cobalt Cycle

S. Glöser-Chahoud and F. Schultmann 11

Predictive and Flexible Circular Economy Approaches for Highly Integrated Products and their Materials as Given in E-Mobility and ICT

C. Knieke, S. Lawrenz, M. Fröhling, D. Goldmann and A. Rausch 22

Allocation Procedures for Generic Cascade Use Cases - An Evaluation Using Monte Carlo Analysis

M. Rehberger and M. Hiete 32

Chapter 2: Recycling Technology

Recycling of Lithium Iron Phosphate Batteries: Future Prospects and Research Needs

T. Elwert, Q.S. Hua and K. Schneider 49

Integrated Direct Carbonation Process for Lithium Recovery from Primary and Secondary Resources

M. Bertau and G. Martin 69

Efficient Process for Li-Ion Battery Recycling via Electrohydraulic Fragmentation

J. Öhl, D. Horn, J. Zimmermann, R. Stauber and O. Gutfleisch 74

Liquid-Liquid Extraction and Chromatography Process Routes for the Purification of Lithium

A. Schmidt, F. Mestmäcker, L. Brückner, T. Elwert and J. Strube 79

Recycling of Printed Circuit Boards Employing Supercritical Carbon Dioxide

K. Egerer, F. Brandl, N. Golzari and S. Beuermann 100

Silicon Waste from the Photovoltaic Industry - A Material Source for the Next Generation Battery Technology?

M. Beier, C. KRÄNERT, J. Friedrich, U.A. Peuker, T. Leißner, M. Gröschen and V. Ischenko 107

Selective Separation Using Fluid-Liquid Interfaces

T. Leistner, M. Türk, A. Weber, C. Weber and U.A. Peuker 113

Carrier Flotation: State of the Art and its Potential for the Separation of Fine and Ultrafine Mineral Particles

K. Eckert, E. Schach, G. Gerbeth and M. Rudolph 125

Cues to Greater Recycling Efficiency - Characterization of a Crushed Mobile Phone by Mineral Liberation Analysis (MLA)

D. Sandmann, H.G. Jäckel and J. Gutzmer 134

Chapter 3: Recycling Materials

Review: Possibilities of Steel Scrap Decopperization

E.F. Sandig, D. Chebykin, V.V. Prutchykova, O. Fabrychnaya and O. Volkova 145

Copper-Alloyed PHFP Steel for Energy-Efficient and Distortion-Reduced Production of Cold-Formed, High-Strength Structural Components

S. Meiler, F. Hoffmann, H. Schwich, R. Kawalla, W. Bleck and U. Prahl 161

Corrosion of Carbon Free and Bonded Refractories for Application in Steel Ingot Casting: An Approach for Improving Steel Quality

J. Fruhstorfer, J. Hubálková, T. Leißner, U.A. Peuker and C.G. Aneziris 166

Synthesis of High Performance Geopolymers by Wet Milling of Blast Furnace Slags

U.A. Peuker

177

Bundling Analytical Capacities to Understand Phase Formation in Recycling of Functional Materials

U.E.A. Fittschen, R. Möckel, M. Schreiner, M. Klinger, M. Radtke, B. Meyer, S. Guhl, A. Renno, J. Godinho, R. Gloaguen and J. Gutzmer

183
