

Table of Contents

Preface, Programme and Organising Committee

Chapter 1: Electrical Engineering, Electric Drive and Electromechanical Systems

The Influence of Main Pump with High-Voltage Variable Frequency Drives on Electric Motors Periodic Repair V.A. Shabanov, M.I. Khakimyanov and E.F. Khakimov	3
Assessment of Performance Factors of Hybrid Electric Vehicle Powertrain M.V. Yaroslavtsev, N.I. Schurov and E.A. Belova	7
Simulator for Electric Drives Research A. Ziuzev, K. Nesterov and M. Mudrov	12
Modes of Traction Power Supply System in Case of Electric Rolling Stock Equipped with Energy Storage E. Spiridonov, N. Shchurov and A. Larin	19
Mathematical Model of Brushless DC Motor in Phase Loss Operation Mode G. Odnokopylov and A. Bragin	24
Investigation of Winding Circuit Effect on Characteristics of Permanent Magnet Synchronous Machines with Fractional Slot Concentrated Winding G.B. Vialcev, D.M. Toporkov and O.E. Gubareva	30
Calculation Method of Pure Resistance and Inductance of Ore-Thermal Furnaces Electrode Holder Tubes L.P. Goreva, A.Y. Ignatenko and A.V. Bordunova	35
Full Order Observer for Speed Estimation of Vector Controlled Induction Motor Drive A. Zaki Diab, D. Kotin, V. Anosov and O. Slepcev	40
Physical Modeling of Induction Internal Fault G. Elgina, E. Ivoylov and S.M. Slobodyan	46
The Hydro-Unit of Mini-Hydroelectric Power Station on the Basis of the Double Fed Induction Machine R.H. Diyorov and D.A. Kuznetsov	52
Active Power Losses in Pressure Rings for Contact Shoes of Ore-Thermal Furnace V. Serikov, D. Vlasov and L. Goreva	57
The Study of Heating Mode Temperature Behavior of Non-Magnetic Pieces in an Induction System with Permanent Magnets A. Aliferov, V. Promzelev and A. Morev	61
Induction Motor Drive Parameters Identification Applying Difference Schemes E. Bolovin, A. Glazyrin and V. Polichshuk	65
Features of Transport Electrical Energy Storages Parameters Calculation V.V. Biryukov and A.S. Borgoyakov	69
Winding Factor of Permanent Magnet Synchronous Machines with Fractional Slot Concentrated Windings V. Korneev, A. Pristup and O.E. Gubareva	73
Multi-Channel Controlled Object G. Simakov, Y. Filyushov and I. Skokova	77
Bearing Fault Diagnostic of Induction Motor by Stator Currents Analysis Based on Park's Vectors Approach N. Safin, V. Prakht and V. Dmitrievskii	83
Analysis of In-Plant Power Supply Load Center with Powerful Synchronous Motors and Generators of Industrial Power Station G.P. Kornilov, T.R. Khrashin and I.R. Abdulveleev	90
MHD Device for Transportation, Dosing and Heating Molten Metals D. Mikhaylov, M. Khatsayuk and K. Mikhaylov	95
Research of Four-Zone Converter in Regenerative Braking Mode M. Dzhaborov, S. Myatezh and V. Ivanov	101

Research of Mathematical Model for an Examinee Object at Test Bench Helicopter's Transmission	
A.M. Borodin, Y.V. Pankratz and K.E. Karacheva	106
Radiation-Resistant Valve-Inductor-Type Motor as a Part of Technological Installation for Recycling Nuclear Industrial Waste	
A. Gayfutdinov, A. Plastun and M. Baranov	111
The Research of Energetic Characteristics of Induction Smelting Crucible Furnaces	
A. Kislov, O. Talipov, K. Karmenov and S. Toraigirov	116
Definition of the Transfer Function Parameters of Asynchronous Motor as an Object of Temperature Control	
A. Pugachev and G. Fedyaeva	124
Reasoning of the Use of TVR-IM Electric Drives of Closed-Loop Type by the Angular Velocity Observer for Solving Technological Problems	
V. Timoshkin, A. Glazyrin and L. Kozlova	131
Direct Current Cascade Regulators Based on Resonance Structures with Switching Capacitors	
L.G. Zotov, A.V. Gromtsev, A.G. Volkov, A.D. Mektiev and Y.S. Tishininov	136
Active Stabilization of Axial Position of Rotor in Electric Machine	
I. Dymov and D. Kotin	141
Efficiency Upgrading Techniques of Diesel Engine Start-Up Process Analysis	
S.V. Makarov, M.G. Gurov and M.A. Smirnov	144
Energy-Saving Reversible Electric Drive Based on Active Front End Rectifier and Voltage Source Inverter	
A.A. Radionov, A.S. Maklakov and E.A. Karyakina	150
Applying of the Stator Rotation to Increase Controllability of AC Electrical Machines	
V.M. Cheban and R.A. Tolkatsky	155
Research on the Metrological Characteristics and Voltage Transformer with Open Core Antiresonance Properties	
V.D. Lebedev and A.A. Yablokov	160
Wind Turbine Speed Control with Maximum Power Extracting Based on Fuzzy Logic	
V.Z. Manusov and S.K. Khaldarov	168
Analysis of Higher Harmonic Components Influence on the Electric Circuit at Induction Motor Functioning Equipped with Adjustable-Frequency Electric Drive	
T.V. Myateg	173

Chapter 2: Properties of Materials, Electrophysical and Mechanical Methods and Technologies of Materials Processing

Research of MHD Influence during Preparation and Casting Aluminum Melt in Electromagnetic Field	
M. Khatsayuk, V. Timofeev and D. Mikhaylov	181
Analysis of Physical Processes in a Holding Electrical Furnace	
V. Timofeev and S. Perfilov	188
Electromagnetic Modification of Aluminium Ingots in Rotary Casting Machine	
A. Avdulov, I. Gudkov and J. Avdulova	193
Optimization of Technological Modes of Coating a Copper Sublayer before Silvering Aluminum Electrical Contacts	
P.V. Rogozhin, S.Y. Ganigin and M.V. Nenashev	199
Problem Oriented Simulation of Heating Stage in Technological Chain for Metal Hot Forming	
Y. Pleshivtseva, S. Korshikov and E. Makarov	203
Phases Quantification in Duplex Stainless Steels Weldments	
M. Breda, S.A. Ontiveros Vidal, J. Basoni and I. Calliari	209
Technological Aspects of Copper Plug-In Electrical Contacts Replacement by Aluminium	
N.M. Satdarova, P.V. Rogozhin and M.V. Nenashev	215
The Influence of the Central Electrode Material on Coaxial Magnetic Plasma Accelerator Operation	
K. Shatrova, I. Shanenkov and A.Y. Pak	222

Development of the Combined Technique of Manufacturing the Elongated Shaped Charges with Advanced Efficiency I. Shirokov, A. Nurmukhametov and M.S. Grechukhina	226
Induction Assisted Hybrid-Welding Processes to Join Heavy-Walled Steel Components J. Neumeyer and B. Nacke	231
New Technology for Electromagnetic Levitation Melting of Metals S. Spitans, E. Baake and A. Jakovics	237
Numerical Simulation and Investigation of High Frequency Tube Welding Process A. Nikanorov, E. Baake and J. Neumeyer	245
Numerical Calculation of Temperature and Microstructure for Induction Surface Hardening D. Schlesselmann, A. Nikanorov and B. Nacke	251
Dynamics of Electrical Conduction Field of the Sliding Current Collector V.S. Deeva and S.M. Slobodyan	258
Electroplastic Effect E. Beridze, C. Gennari, F. Michieletto and M. Forzan	264
Influence of Laser Cladding Parameters on γ-TiAl Coatings I.N. Maliutina, H. Si-Mohand and R. Piolet	273
Formation of Metal-Intermetallic Laminate Composites by Spark Plasma Sintering of Metal Plates and Powder Work Pieces D.V. Lazurenko, V.I. Mali and A. Thoemmes	277
Formation of a Transition Zone Structure in Welded Joints between Dissimilar Steels A. Nikulina, A. Smirnov and A. Chevaminskaya	283
Numerical Modeling of Steel Surface Hardening in the Process of High Energy Heating by High Frequency Currents V. Skeebe, V. Ivancivsky and V. Pushnin	288
Advantages of High-Precision Plasma Cutting for Processing Bimetallic Compositions K. Rakhmyanov, A. Rakhmyanov and A. Zhuravlev	294
Formation of Sintered “PN85Yu15 – Ni” Powder Composites by Using the SPS Method L.I. Shevtsova, A. Anisimov and S. Nagavkin	299
Structure of the Steel Surface-Alloyed with Titanium, Vanadium and Carbon in the Process of Powder Welding by a High-Energy Electron Beam D. Mul, N.V. Martyshev and D. Terentyev	305
Increase of NaNO_3 Electrolyte Reaction Capability by Laser Irradiation for Electrochemical Machining N. Gaar, A. Zhuravlev and A. Loktionov	312
Structure and Properties of Welded Joints of Titanium Substrates with Ti-Ta Corrosion Resistant Coatings P.N. Komarov, A.A. Ruktuev and M.G. Golkovski	316
Electrolyte Pressure Influence on the Speed of Steel 110G13L Electrochemical Dissolution during Electrochemical Jet Machining V. Yanpolskiy, B. Krasilnikov and K. Rakhimyanov	321
Influence of Smelting Technology on Properties of Soft Magnetic Fe-B-Si Alloys V.V. Konashkov and V. Tsepelev	326
Selective Laser Melting of the Inconel 718 Nickel Superalloy V.S. Sufiarov, E.V. Borisov and I.A. Polozov	333
Mechanical Alloying of Hard Magnetic Materials with Samarium A.A. Popovich, N. Razumov and A.S. Verevkin	339
Microstructural and Tribological Characterization of Atmospheric Plasma-Nitrided HS6-5-2C Tool Steel Y. Lizunkova, A. Tyurin and T. Hassel	345
Perspective of High Energy Heating Implementation for Steel Surface Saturation with Carbon N.V. Plotnikova, A. Losinskaya, V. Skeebe and E. Nikitenko	351
Study of the Temperature Effect on the Structure and Thickness of Hot-Dip Zinc Coatings on Fixing Products O. Bondareva	355
Rapid Carburization of Cylindrical Parts Using a High Energy Electron Beam A. Losinskaya, D. Golovin, I. Bataev and A.M. Jorge	360

Effect of Copper on the Friction Properties of Gray Cast Iron N. Stepanova, E. Lozhkina and A. Razumakov	364
Electron-Beam Cladding of Boron Carbide on Low-Alloyed Steel at the Air Atmosphere D.S. Krivezhenko, I.S. Laptev and T.A. Zimoglyadova	369
Evaluation of Wear Resistance of Products on the Basis of Mechanically Activated Materials A. Sobachkin, A.A. Sitnikov and A.P. Sviridov	374
Reliability Increase of Dissimilar Steel Welded Joints A. Chevaminskaya, A. Nikulina and N. Plotnikova	378
Combined Thermomechanical Treatment for the Mining Industry A. Popelyukh, M. Yurkevich and P. Popelyukh	382
Development of a Force Parameter Model for a New Severe Plastic Deformation Technique – Multi-ECAP-Conform E.I. Fakhretdinova, G.I. Raab and M.M. Ganiev	386
Impact of Local Weld Pool Zones on the Heterogeneous Material Structure V.G. Burov, Z.B. Bataeva and E.A. Drobyaz	391
Computer Simulation of the Drawing Process of Cylindrical Cups Taking into Account the Microstructure of the 5056 Alloy S.V. Voronin, V.D. Yushin and G.Z. Bunova	395
Rapid Determining of the Optimum Operation Mode for Abrasive Waterjet Cutting Process by Means of Acoustic Emission A. Galinovskij, M.I. Abashin and M.V. Khafizov	401
Researches Structure and Properties of Self-Fluxing Coating, Obtained by Air-Plasma Spraying E. Kornienko, A. Smirnov and V. Kuzmin	405
New Criterion for Prediction of Amorphous Alloy Compositions: A Combination of Dense Packing of Spheres and the Lambda Criterion through the Coordination Number C.O. Silva Nascimento and A.M. Jorge	411
Electron-Beam Surfacing Wear-Resistant Coatings, Reinforced Refractory Metal's Borides E. Drobyaz, T. Zimoglyadova and V. Gromov	419
Fabrication of Multi-Layered Ti-Ta-Zr Coatings by Non-Vacuum Electron Beam Cladding V.V. Samoylenko, D.V. Lazurenko, O.G. Lenivtseva and V.S. Lozhkin	424
Investigation of the Phase Composition of the Diffusion Zone in the Al-Ni-Cr Composite Material V.G. Shmorgun, A.O. Taube and A.V. Krokhaliev	430
Influence of the Fe Content on the Texture of the Hot Rolled 3104 Alloy E.V. Aryshenskii, M.S. Tepterev and I. Latushkin	434
Impact of Electrolytic-Plasma Nitriding on 34CrNi1Mo Steel Surface Layer Properties M. Skakov, L. Yerygina and M. Scheffler	439
Processing and Characterization of Amorphous/Nanocrystalline Al_{87.5}Ni₄Sm_{8.5} Particles Reinforced Crystalline Al Matrix Composites M.M. Peres, L.C.R. Aliaga, C. Bolfarini, C.S. Kiminami, W.J. Botta Filho and A.M. Jorge	444
Development of the Process of Pseudo-Ligatures Manufacturing from Aluminum and Nickel Powders for the Modification of Alloys E. Nosova, A.A. Kuzina and A.V. Kuts	452
Development Modes of Prior Free Sintering to Form a High-Density Fine Grain Ceramics after HIP S. Veselov, N. Belousova, R. Timarevskiy and N. Cherkasova	457
Estimation of Physical Impact Efficiency in Modifying Cast Alloys Used in Mechanical Engineering V. Deev, O. Prikhodko and O. Gutak	461
Optimization of a Specimen Size for the Determination of the Diffusible Hydrogen Content in Metals O.V. Panchenko, A.M. Levchenko and V.A. Karkhin	466
Evaluating the Effectiveness of Axial and Isostatic Pressing Methods of Ceramic Granular Powder N. Belousova, S. Veselov, D. Anufrienko and O. Goryainova	472
Relationship between Quenching Deformations and Machining Allowance N. Pavlushenko, A. Bachurin and N. Ryngach	478

Technological Peculiarities Providing the Surface Quality Parameters at Ultrasonic Surface Hardening	
K. Rakhmyanov, J. Semyonova and A. Eryomina	482
Numerical Simulation of Parts Quenching Deformation	
I. Osipov, A. Bachurin and N. Kurlaev	487
Technological Inheritance of Waviness at Milling	
M.K. Vitvinov, S.L. Leonov and A.A. Sitnikov	491
Effect of Heat-Treatment on the Interface Microstructure of Explosively Welded Stainless Steel – Bronze Composite	
I.N. Maliutina, V.I. Mali, K.A. Skorokhod and A.A. Bataev	495
Earing and Anisotropy Indices of Texture Components in the Hot-Rolled 3104 Alloy	
E.V. Aryshenskii, A.F. Grechnikova and V.V. Yashin	501
Obtaining the Nanostructured Nitride Composition TiN-BN Powder by the Self-Propagating High-Temperature Synthesis from the Azide $\text{KBF}_4\text{-NaN}_3\text{-Na}_2\text{TiF}_6$ and $\text{NH}_4\text{BF}_4\text{-NaN}_3\text{-Na}_2\text{TiF}_6$ Systems	
I. Kerson and L. Shiganova	507
The Influence of Molding Powder Breakup on the Sintered Ceramic Quality	
N. Belousova, S. Veselov, R. Kuzmin and E. Melnikova	513
Investigation of the Process of Mechanical Alloying of Iron by Austenite Forming Elements	
A.A. Popovich and N. Razumov	519
A Scheme for Hydrogen Evolution from Natural Gas	
M.A. Bubenchikov, A.I. Potekaev and A.M. Bubenchikov	525
Experimental Study of Geometrical Parameters of Abrasive Grains in Modeling their Cutting Edges with the Surface of Rotation	
A.P. Osipov, V. Fedotov and A.A. Zharov	529

Chapter 3: Researching and Designing of Machines and Mechanisms

Laser Interferometry Method of Stress Determination in Loaded Cutting Tool Parts	
R.Y. Nekrasov, I.V. Soloviev and U.S. Putilova	537
Features of Velocity and Pressure Fields Formation in the Centrifugal Dust Collector	
Y. Buligin, L. Alexeenko and D. Koronchik	542
A Method of Processing of Involute Profiles of Large-Module Gear Wheels	
S.G. Emelyanov, S.A. Chevychelov and P.P. Chistyakov	546
Assemblability and Mobility of Bricard's Linkage Modifications	
M.G. Yarullin and I.A. Galiullin	552
Temperature Operation Mode of Hydraulic Pressure Rings for Contact Shoes in Ore-Thermal Furnace	
A. Dobrov, D. Vlasov and R. Bikeev	557
Optical Clocks and Thermal Fields Impact	
M.G. Gurov and E.G. Gurova	561
Design Optimization of Small Shaped Charges with the Use of Complex Casing	
A.T. Nurmukhametov, A.G. Popov and D.A. Demoretsky	566
The Definition of Underground Vehicles' Running Resistance	
E. Langeman, A. Kulekina, V. Biryukov and D. Shmakov	570
Power Characteristics of the Vibration Isolators	
E.G. Gurova, M.G. Gurov and V.V. Ivanov	575
Enhancement of Hybrid Electric Vehicle Powertrain Performance	
N.I. Schurov, M.V. Yaroslavl'tsev and D.M. Strelnikova	580
Development of the Thermal Equivalent Circuit for Evaluating the Capacity of High Voltage Cables in Real Time	
E. Zaytsev and V. Lebedev	586
Innovative Means of Increasing the Adjustment Ability of Wind Turbine	
N. Zubova, S. Udalov and A. Achitaev	592
Origin and Development of the Stress-Corrosion Defects in Large Diameter Steel Pipes of High-Pressure Gas Pipelines	
A. Afanasyev, A. Melnikov and M. Vaskov	597

Measurement of Liquid Droplet Evaporation Rate under the Conditions of Intense Heating E. Orlova and D. Feoktistov	603
Solution to Problem of Heating of Metal in the Furnace Taking into Account Pulse Nature of Heating G.M. Druzhinin, Y.A. Samoylovich and E.V. Popov	609
Partial Discharges Registration in Transformer Oil at the ‘Point-Plane’ Electrode System A. Bychkov, S. Korobeynikov and A. Ovsyannikov	615
Use of Vortex Wind Power Plant in the Climatic Conditions of Middle Volga - Stator Calculation Method S.S. Dostovalova, V.V. Biryuk and D.A. Uglanov	621
Migration of Nanoparticles in Operating Media of Heat Exchange Systems M.A. Bubenchikov, A.I. Potekaev and A.M. Bubenchikov	627
Influence of High-Frequency Gas-Dynamic Unsteadiness on Heat Transfer in Gas Flows of Internal Combustion Engines L.V. Plotnikov, B.P. Zhilkin and Y.M. Brodov	631
Research on Heat Conductivity with a Time-Varying Heat Source A.V. Eremin, E.V. Stefanyuk and L. Abisheva	637
Creep Inverse Problem of the Power Reactor Fuel Assembly Elements Contact Interaction M. Gusev and V. Danilov	643
Numerical Studies of Gas-Dynamic Characteristics in a Compressor of a Turbocharger of the Transport Diesel R. Khasanov, V. Gureev and A. Khairullin	649
The Transient Processes Simulation of Kaplan Turbine Operating in Propeller Modes G. Glazyrin, Y. Kazantsev and N. Tverdokhlebov	655
Mathematical Modelling of Methane-Air Combustion in a Channel with a Porous Axial Insert A.I. Baygulova, A.M. Bubenchikov and O.V. Matvienko	660
Research of Spraying, Ignite and Incineration ACLF in the Boiler with Cyclone Furnace Extansion E.E. Boyko and Y.V. Ovchinnikov	664
Determination of Space and Time Dependent Function of Internal Heat Source in Heat Conductivity Equation A. Diligenskaya and A. Mandra	668
Justification of Well Type and Design Depending on Depletion Mechanism of High-Viscosity Oil Production V. Khanzhina, A. Kovalev and A. Zinoviev	674
Two-Phase Filtration Model for Nonlinear Viscoplastic Oil and Hard Water Drive A. Markelova, A. Trifonov and V. Olkhovskaya	679

Chapter 4: Energy Systems, Delivery and Distribution of Energy

Customer-Oriented Approach to Power Supply Reliability Ensuring M. Vasilyeva	685
Efficiency of Equipment State Assessment System Implementation A.I. Khalyasmaa, D.A. Baltin and N.A. Babushkina	690
Power Flow Calculation Realization in Software for Grids with Four-Phase Power Lines D.I. Bliznyuk, P.Y. Bannykh and A.I. Khalyasmaa	694
Electric Power Systems KIT - Siemens 3API DT 145kV Circuit-Breaker O. Vozisova, A. Egorov and A. Trembach	699
Testbed Based on Hybrid Real-Time Power System Simulator for Setting up and Testing of Protection and Control Systems M.V. Andreev, A.S. Gusev and A.O. Sulaymanov	704
Analysis of Ice Melting System O. Akhmedova and A. Soshinov	710
Microgrid Operation under Frequency Control Method D.V. Armeev, A.Y. Arestova and Y.A. Abramova	716

Simplified Model of Flywheel Energy Storage as a Part of the Russky Island Power Network Type	
O. Gorte and M. Khmelik	722
Implementation of the Method of Lagrange for Optimal Modes of Energy System of Tajikistan	
S.M. Sultonov, Y.A. Sekretarev and S.V. Mitrofanov	726
Consumption Schedule Leveling by Implementation of Two-Rate Capacity Payment	
I.D. Polyakov, S.A. Dmitriev and P.V. Chusovitin	732
The Use of Line Surge Arresters to Provide Safety of Live Working	
S.A. Kazakova	738
The Basic Principles of Controlled Switching and Synchronous Vacuum Circuit Breaker Application in Local Distribution Networks	
D. Shevtsov, D. Pavluchenko and E. Prohorenko	743
Advanced Simulation of the Power Electronic Converters of VSC FACTS and HVDC in Hybrid Real Time Simulators of Power System	
Y.S. Borovikov, A.S. Gusev and R.A. Ufa	749
Prospects for the Use of Portfolio Approach to Energy Companies	
A.G. Rusina, G.L. Rusin and E.S. Gorevaya	755
Multi-Agent Regulation of Voltage in Smart Grid System with the Use of Distributed Generation and Customers	
A.G. Fishov, I.L. Klavsuts and D.A. Klavsuts	761
Evaluation of the Possibility of Using Solid Fuels to Generate Power	
M.S. Grechukhina, P. Condratenko and A. Mourzin	768
Optimal Power Distribution among Hydropower Units Taking into Account Head Loss in Units' Trash Screens	
G. Glazyrin, N. Tverdokhlebov and Y. Kazantsev	774
Statistical Analysis of Estimating Oiled-Filled Electrical Equipment Status	
N.N. Kerimkulov and V.M. Levin	780
The Operating Condition Estimation of the Equipment in Decision-Making Process in the Hydro Power Plant Control	
Y. Panova, V. Derbenev and A. Zhdanovich	785
Triple Power Effect in Power Supply Systems of Buildings due to Automated Energy-Efficient Windows	
N. Smirnov, V. Zakharov and Y. Kolosova	790
Calculation Methodology Determining Reliability of the Thermal Power Station Electrical Facilities	
S.A. Evdokimov, O.I. Karandaeva and Y.N. Kondrashova	796
Thermodynamic Method of Glaze Ice Monitoring on Air Lines Wires	
D.E. Titov, A.G. Soshinov and N.J. Shewchenko	803
Automatic Control Principles of Thermal Station Output Parameters on the Basis of Controlled Electric Drives	
A. Karandaev, V. Khramshin and E. Khramshina	808
Energy Saving in the Hot Water Supply Systems of Buildings	
V. Khramshin, A. Karandaev and A.A. Radionov	815
