

# Table of Contents

## Foreword

<b>Electrical Properties of Metal Oxides at Elevated Temperatures</b> T. Bak, J. Nowotny and C.C. Sorrell	1
<b>Electrochemical Techniques in Studies of Solid Ionic Conductors</b> S.P. Jiang, J.G. Love and S.P.S. Badwal	81
<b>Electrochemical Aspects of Ionic Solids</b> B.Y. Liaw	133
<b>Equilibrium Electrical Property Measurements in Electroceramics</b> B.-. Hong, S.J. Ford and T.O. Mason	163
<b>Materials and Characterization of Solid Oxide Fuel Cell</b> T. Kawada and H. Yokokawa	187
<b>Defect-Related Properties of Nuclear Materials Studied by Electrical Method</b> T. Matsui	249
<b>Electrochemical Titration in Study of Nonstoichiometric Compounds</b> Y.D. Tretyakov, A.F. Maiorova and Y.M. Berezovskaya	283
<b>Electrical Properties of Grain Boundaries in Ceramic Semiconductors</b> K. Mukae	317
<b>Experiments to Determine the Cross Effect between Ionic Flow and Electronic Flow in an Oxide <math>A_{1-\delta}O</math> with Prevailing Electronic Conduction</b> H.I. Yoo	331
<b>Electrical Properties of Anhydrous Iron Oxides</b> C. Gleitzer	355
