

# Table of Contents

## Preface

## I. Conventional and Novel Electrode Materials

<b>Electrode Materials</b>	
B. Łosiewicz, G. Dercz and M. Popczyk	3
<b>Intermetallic Compounds as Catalysts in the Reaction of Electroevolution/Absorption of Hydrogen</b>	
B. Łosiewicz, M. Popczyk, I. Napłoszek and A. Budniok	16
<b>Multi-Phased Electrode Materials for the Electroevolution of Oxygen</b>	
B. Łosiewicz, M. Popczyk, I. Napłoszek and A. Budniok	23
<b>Amorphous Ni-P Electrode Materials</b>	
B. Łosiewicz, G. Dercz and M. Popczyk	32
<b>New Ni-Me-P Electrode Materials</b>	
B. Łosiewicz, M. Popczyk and P. Osak	39
<b>Characterization of Composite Coatings Obtained by Electrodeposition</b>	
B. Łosiewicz, I. Napłoszek, M. Popczyk and A. Budniok	49
<b>Physical and Chemical Characterization of Ni+MoO<sub>2</sub> Composite Electrocoatings</b>	
B. Łosiewicz, G. Dercz and M. Popczyk	58

## II. Electrodeposition of Composite Electrocatalysts

<b>Electrodeposition Mechanism of Composite Coatings</b>	
B. Łosiewicz	65
<b>Characteristics of the Galvanic Baths for Electrodeposition of Nickel Coatings Using the Hull Cell</b>	
M. Szklarska, A. Smołka, M. Popczyk and B. Łosiewicz	79
<b>The Role of Ni(II) Ion Adsorption onto TiO<sub>2</sub> in the Electrodeposition of Composite Ni-P+TiO<sub>2</sub> Coatings</b>	
B. Łosiewicz	89
<b>Relaxation Characteristics of the Electrodeposition Process of Composite Ni-P+TiO<sub>2</sub>+PTFE and Ni-P+Ni(OH)<sub>2</sub>+PTFE Coatings</b>	
B. Łosiewicz	101
<b>Electrodeposition Process of Composite Ni-P+Ni(OH)<sub>2</sub>+PTFE Coatings</b>	
B. Łosiewicz and M. Popczyk	108
<b>DC Current Electrodeposition of High Mo Content Ni-Mo Alloy Coatings from Alkaline Solutions</b>	
B. Łosiewicz, G. Dercz and M. Popczyk	116
<b>Electrodeposition of the Ni+MoS<sub>2</sub> Composite Electrocatalysts</b>	
B. Łosiewicz, G. Dercz and M. Popczyk	125
<b>Electrodeposition of the Ni-Mo+MoO<sub>2</sub> Composite Electrocoatings</b>	
B. Łosiewicz, G. Dercz and M. Popczyk	132

## III. Structure of Electrode Materials

<b>Effect of Phosphorus on the Structure of Nickel Electrocoatings</b>	
B. Łosiewicz, G. Dercz, M. Popczyk, M. Szklarska and A. Smołka	141
<b>Effect of Heat Treatment on the Structure of Ni-P Electrocoatings</b>	
B. Łosiewicz and M. Popczyk	148
<b>Production and Structure of Ni-W and Ni+W Coatings</b>	
M. Popczyk and B. Łosiewicz	153

<b>Electrodeposition and Thermal Treatment of Nickel Coatings Containing Cobalt</b>	158
M. Popczyk, B. Łosiewicz, E. Łagiewka and A. Budniok	
<b>Production and Structure of Nickel-Phosphorus Electrolytic Coatings Modified with Metallic Tungsten or Nickel Oxide</b>	163
M. Popczyk, B. Łosiewicz, E. Łagiewka and A. Budniok	
<b>Electrolytic Production and Structure of Ni+Al+Ti Composite Coatings</b>	168
I. Napłoszek, E. Łagiewka, A. Budniok, M. Popczyk, G. Dercz and B. Łosiewicz	
<b>Electrodeposition and Thermal Treatment of Ni+W+Si and Ni+W+Mo+Si Composite Coatings</b>	172
M. Popczyk, B. Łosiewicz, E. Łagiewka and A. Budniok	

#### **IV. Electrochemical Properties of Solid State Electrocatalysts**

<b>Aims of Electrocatalysis</b>	
B. Łosiewicz and M. Popczyk	179
<b>Hydrogen Evolution Reaction on Nickel-Phosphorus+Titanium Oxides Composite Electrocoatings</b>	
B. Łosiewicz	187
<b>Tailoring Structural and Electrochemical Properties of Composite Ni-Based Electrocoatings</b>	
B. Łosiewicz and M. Popczyk	200
<b>Cyclic Voltammetry Studies on Electrochemical Behavior of the Composite Ni-P+TiO<sub>2</sub> Electrocatalysts in Alkaline Solutions</b>	
B. Łosiewicz, M. Popczyk and A. Budniok	207
<b>Comparison of Electrocatalytic Activity of the Composite Ni-P+NiO and Ni-P+Ni(OH)<sub>2</sub> Coatings for Hydrogen Evolution</b>	
B. Łosiewicz and M. Popczyk	213
<b>Production and Electrochemical Characterization of Nickel Based Composite Coatings Containing Chromium Group Metal and Silicon Powders</b>	
M. Popczyk, J. Kubisztal, B. Łosiewicz and A. Budniok	219
<b>Comparison of Electrochemical Properties of Ni+MoS<sub>2</sub> and Ni Coatings in an Alkaline Solution</b>	
M. Popczyk and B. Łosiewicz	225
<b>Influence of Thermal Treatment on the Electrochemical Properties of Ni+Mo Composite Coatings in an Alkaline Solution</b>	
M. Popczyk, B. Łosiewicz, E. Łagiewka and A. Budniok	231
<b>The Influence of Temperature of Electrodeposition on the Electrochemical Properties of Ni+MoS<sub>2</sub> Composite Coatings</b>	
M. Popczyk and B. Łosiewicz	237
<b>The Influence of Temperature of Electrodeposition on the Electrochemical Properties of Ni Coatings</b>	
M. Popczyk and B. Łosiewicz	242
<b>Effect of Sodium Hypophosphite Content in the Electroplating Bath on the Electrochemical Properties of Ni-P Alloy Coatings</b>	
M. Popczyk and B. Łosiewicz	246
<b>The Hydrogen Evolution Reaction on Fe Electrode Material in 1 M NaOH Solution</b>	
M. Popczyk and B. Łosiewicz	252
<b>Comparison of Electrochemical Properties of Ni+NiAl and Ni Coatings in an Alkaline Solution</b>	
M. Popczyk, B. Łosiewicz and A. Budniok	258
<b>The Influence of Temperature of Electrodeposition on the Electrochemical Properties of Ni+MoS<sub>2</sub>+Mo Composite Coatings</b>	
M. Popczyk and B. Łosiewicz	263
<b>The Influence of Current Density of Electrodeposition on the Electrochemical Properties of Ni-Mo Alloy Coatings</b>	
M. Popczyk and B. Łosiewicz	269
<b>The Hydrogen Evolution Reaction on Ni Electrode Material Modified with Molybdenum(IV) Oxide and Chromium(III) Oxide Powders</b>	
M. Popczyk and B. Łosiewicz	273

<b>Effect of Molybdenum(IV) Oxide on the Process of Hydrogen Evolution on Ni+Mo Electrolytic Composite Coatings</b>	277
M. Popczyk and B. Łosiewicz	
<b>Electrochemical Characterization of Nickel-Based Composite Coatings Containing Molybdenum or Tungsten Nanopowders</b>	283
M. Popczyk, B. Łosiewicz and A. Budniok	
<b>Effect of Molybdenum Powder Granulation on Electrochemical Properties of Ni+Mo Composite Coatings</b>	288
M. Popczyk, B. Łosiewicz and A. Budniok	
<b>Influence of Surface Development of Ni/W Coatings on the Kinetics of the Electrolytic Hydrogen Evolution</b>	293
M. Popczyk and B. Łosiewicz	
<b>Electrochemical Characterization of Nickel-Phosphorus Based Coatings Containing Cobalt</b>	299
M. Popczyk, B. Łosiewicz, E. Łagiewka and A. Budniok	
<b>Influence of Thermal Treatment on the Electrochemical Properties of Ni+W+Mo+Si Composite Coatings in an Alkaline Solution</b>	305
M. Popczyk, B. Łosiewicz, E. Łagiewka and A. Budniok	
<b>Effect of Phosphorus on the Corrosion Resistance of Nickel Electrocoatings</b>	310
B. Łosiewicz, M. Popczyk, M. Szklarska and P. Osak	

## V. Development of Methods and Techniques for Characterization of Electrode Materials

<b>A Coulometric Method by Local Anodic Dissolution for Measuring the Thickness of Ni/Cu Multi-Layer Electrocoatings</b>	319
M. Szklarska, G. Dercz, A. Smołka, M. Popczyk and B. Łosiewicz	
<b>Quantitative Methods Used to Describe the Structure of Iron</b>	325
B. Łosiewicz, A. Wala, G. Dercz and M. Popczyk	
<b>On Problems of Determination of the Kinetics of Hydrogen Electroevolution Reaction</b>	333
B. Łosiewicz and M. Popczyk	
<b>In Situ Structure-Sensitive Studies of Metal-Hydrogen Interactions by Scanning Kelvin Probe</b>	344
B. Łosiewicz	
<b>Use of Scanning Vibrating Electrode Technique to Localized Corrosion Evaluation</b>	353
B. Łosiewicz, M. Popczyk, M. Szklarska, A. Smołka, P. Osak and A. Budniok	
<b>Application of the Scanning Kelvin Probe Technique for Characterization of Corrosion Interfaces</b>	369
B. Łosiewicz, M. Popczyk, M. Szklarska, A. Smołka, P. Osak and A. Budniok	
<b>Localized Electrochemical Impedance Spectroscopy for Studying the Corrosion Processes in a Nanoscale</b>	383
B. Łosiewicz, M. Popczyk, A. Smołka, M. Szklarska, P. Osak and A. Budniok	
<b>On the Use of the Scanning Electrochemical Microscopy in Corrosion Research</b>	394
B. Łosiewicz, M. Popczyk, A. Smołka, M. Szklarska, P. Osak and A. Budniok
