

Table of Contents

Preface

I. Conventional and Novel Electrode Materials

Electrode Materials

B. Łosiewicz, G. Dercz and M. Popczyk 3

Intermetallic Compounds as Catalysts in the Reaction of Electroevo- lution/Absorption of Hydrogen

B. Łosiewicz, M. Popczyk, I. Napłoszek and A. Budniok 16

Multi-Phased Electrode Materials for the Electroevo- lution of Oxygen

B. Łosiewicz, M. Popczyk, I. Napłoszek and A. Budniok 23

Amorphous Ni-P Electrode Materials

B. Łosiewicz, G. Dercz and M. Popczyk 32

New Ni-Me-P Electrode Materials

B. Łosiewicz, M. Popczyk and P. Osak 39

Characterization of Composite Coatings Obtained by Electrodeposition

B. Łosiewicz, I. Napłoszek, M. Popczyk and A. Budniok 49

Physical and Chemical Characterization of Ni+MoO₂ Composite Electrocoatings

B. Łosiewicz, G. Dercz and M. Popczyk 58

II. Electrodeposition of Composite Electrocatalysts

Electrodeposition Mechanism of Composite Coatings

B. Łosiewicz 65

Characteristics of the Galvanic Baths for Electrodeposition of Nickel Coatings Using the Hull Cell

M. Szklarska, A. Smółka, M. Popczyk and B. Łosiewicz 79

The Role of Ni(II) Ion Adsorption onto TiO₂ in the Electrodeposition of Composite Ni-P+TiO₂ Coatings

B. Łosiewicz 89

Relaxation Characteristics of the Electrodeposition Process of Composite Ni-P+TiO₂+PTFE and Ni-P+Ni(OH)₂+PTFE Coatings

B. Łosiewicz 101

Electrodeposition Process of Composite Ni-P+Ni(OH)₂+PTFE Coatings

B. Łosiewicz and M. Popczyk 108

DC Current Electrodeposition of High Mo Content Ni-Mo Alloy Coatings from Alkaline Solutions

B. Łosiewicz, G. Dercz and M. Popczyk 116

Electrodeposition of the Ni+MoS₂ Composite Electrocatalysts

B. Łosiewicz, G. Dercz and M. Popczyk 125

Electrodeposition of the Ni-Mo+MoO₂ Composite Electrocoatings

B. Łosiewicz, G. Dercz and M. Popczyk 132

III. Structure of Electrode Materials

Effect of Phosphorus on the Structure of Nickel Electrocoatings

B. Łosiewicz, G. Dercz, M. Popczyk, M. Szklarska and A. Smółka 141

Effect of Heat Treatment on the Structure of Ni-P Electrocoatings

B. Łosiewicz and M. Popczyk 148

Production and Structure of Ni-W and Ni+W Coatings

M. Popczyk and B. Łosiewicz 153

Electrodeposition and Thermal Treatment of Nickel Coatings Containing Cobalt M. Popczyk, B. Łosiewicz, E. Łągiewka and A. Budniok	158
Production and Structure of Nickel-Phosphorus Electrolytic Coatings Modified with Metallic Tungsten or Nickel Oxide M. Popczyk, B. Łosiewicz, E. Łągiewka and A. Budniok	163
Electrolytic Production and Structure of Ni+Al+Ti Composite Coatings I. Napłoszek, E. Łągiewka, A. Budniok, M. Popczyk, G. Dercz and B. Łosiewicz	168
Electrodeposition and Thermal Treatment of Ni+W+Si and Ni+W+Mo+Si Composite Coatings M. Popczyk, B. Łosiewicz, E. Łągiewka and A. Budniok	172

IV. Electrochemical Properties of Solid State Electrocatalysts

Aims of Electrocatalysis B. Łosiewicz and M. Popczyk	179
Hydrogen Evolution Reaction on Nickel-Phosphorus+Titanium Oxides Composite Electrocoatings B. Łosiewicz	187
Tailoring Structural and Electrochemical Properties of Composite Ni-Based Electrocoatings B. Łosiewicz and M. Popczyk	200
Cyclic Voltammetry Studies on Electrochemical Behavior of the Composite Ni-P+TiO₂ Electrocatalysts in Alkaline Solutions B. Łosiewicz, M. Popczyk and A. Budniok	207
Comparison of Electrocatalytic Activity of the Composite Ni-P+NiO and Ni-P+Ni(OH)₂ Coatings for Hydrogen Evolution B. Łosiewicz and M. Popczyk	213
Production and Electrochemical Characterization of Nickel Based Composite Coatings Containing Chromium Group Metal and Silicon Powders M. Popczyk, J. Kubisztal, B. Łosiewicz and A. Budniok	219
Comparison of Electrochemical Properties of Ni+MoS₂ and Ni Coatings in an Alkaline Solution M. Popczyk and B. Łosiewicz	225
Influence of Thermal Treatment on the Electrochemical Properties of Ni+Mo Composite Coatings in an Alkaline Solution M. Popczyk, B. Łosiewicz, E. Łągiewka and A. Budniok	231
The Influence of Temperature of Electrodeposition on the Electrochemical Properties of Ni+MoS₂ Composite Coatings M. Popczyk and B. Łosiewicz	237
The Influence of Temperature of Electrodeposition on the Electrochemical Properties of Ni Coatings M. Popczyk and B. Łosiewicz	242
Effect of Sodium Hypophosphite Content in the Electroplating Bath on the Electrochemical Properties of Ni-P Alloy Coatings M. Popczyk and B. Łosiewicz	246
The Hydrogen Evolution Reaction on Fe Electrode Material in 1 M NaOH Solution M. Popczyk and B. Łosiewicz	252
Comparison of Electrochemical Properties of Ni+NiAl and Ni Coatings in an Alkaline Solution M. Popczyk, B. Łosiewicz and A. Budniok	258
The Influence of Temperature of Electrodeposition on the Electrochemical Properties of Ni+MoS₂+Mo Composite Coatings M. Popczyk and B. Łosiewicz	263
The Influence of Current Density of Electrodeposition on the Electrochemical Properties of Ni-Mo Alloy Coatings M. Popczyk and B. Łosiewicz	269
The Hydrogen Evolution Reaction on Ni Electrode Material Modified with Molybdenum(IV) Oxide and Chromium(III) Oxide Powders M. Popczyk and B. Łosiewicz	273

Effect of Molybdenum(IV) Oxide on the Process of Hydrogen Evolution on Ni+Mo Electrolytic Composite Coatings M. Popczyk and B. Łosiewicz	277
Electrochemical Characterization of Nickel-Based Composite Coatings Containing Molybdenum or Tungsten Nanopowders M. Popczyk, B. Łosiewicz and A. Budniok	283
Effect of Molybdenum Powder Granulation on Electrochemical Properties of Ni+Mo Composite Coatings M. Popczyk, B. Łosiewicz and A. Budniok	288
Influence of Surface Development of Ni/W Coatings on the Kinetics of the Electrolytic Hydrogen Evolution M. Popczyk and B. Łosiewicz	293
Electrochemical Characterization of Nickel-Phosphorus Based Coatings Containing Cobalt M. Popczyk, B. Łosiewicz, E. Łągiewka and A. Budniok	299
Influence of Thermal Treatment on the Electrochemical Properties of Ni+W+Mo+Si Composite Coatings in an Alkaline Solution M. Popczyk, B. Łosiewicz, E. Łągiewka and A. Budniok	305
Effect of Phosphorus on the Corrosion Resistance of Nickel Electrocoatings B. Łosiewicz, M. Popczyk, M. Szklarska and P. Osak	310

V. Development of Methods and Techniques for Characterization of Electrode Materials

A Coulometric Method by Local Anodic Dissolution for Measuring the Thickness of Ni/Cu Multi-Layer Electrocoatings M. Szklarska, G. Dercz, A. Smółka, M. Popczyk and B. Łosiewicz	319
Quantitative Methods Used to Describe the Structure of Iron B. Łosiewicz, A. Wala, G. Dercz and M. Popczyk	325
On Problems of Determination of the Kinetics of Hydrogen Electroevolution Reaction B. Łosiewicz and M. Popczyk	333
<i>In Situ</i> Structure-Sensitive Studies of Metal-Hydrogen Interactions by Scanning Kelvin Probe B. Łosiewicz	344
Use of Scanning Vibrating Electrode Technique to Localized Corrosion Evaluation B. Łosiewicz, M. Popczyk, M. Szklarska, A. Smółka, P. Osak and A. Budniok	353
Application of the Scanning Kelvin Probe Technique for Characterization of Corrosion Interfaces B. Łosiewicz, M. Popczyk, M. Szklarska, A. Smółka, P. Osak and A. Budniok	369
Localized Electrochemical Impedance Spectroscopy for Studying the Corrosion Processes in a Nanoscale B. Łosiewicz, M. Popczyk, A. Smółka, M. Szklarska, P. Osak and A. Budniok	383
On the Use of the Scanning Electrochemical Microscopy in Corrosion Research B. Łosiewicz, M. Popczyk, A. Smółka, M. Szklarska, P. Osak and A. Budniok	394
