

Table of Contents

Preface

I. Dielectric, Piezoelectric and Ferroelectric Ceramics

Domain Contribution to Elastic Nonlinearity in Pb(Zr, Ti)O₃-Based Piezoelectric Ceramics M. Hagiwara, T. Hoshina, H. Takeda and T. Tsurumi	3
Fabrication of Lead Zirconate Titanate Thin Films by Inkjet Printing A. Shimofuku, O. Machida, A. Takeuchi, Y. Akiyama and E. Ohta	7
Preparation and Characterization of Spherical Fine Nickel Particles by Ultrasonic Spray Pyrolysis T. Kodera, T. Oomura, Q. Wu, R. Minami and T. Ogihara	11
One-Axis-Oriented Crystal Growth of Lead Zirconate Titanate Thin Films on Metal Substrates Using Perovskite-Type Oxide Nanosheet Layer Y. Minemura, Y. Kondoh, H. Funakubo and H. Uchida	15
TEM Analysis of the Nanostructure of Pb(Mg_{1/3}Nb_{2/3})O₃ Thin Films by MOD Method Y. Misaka, T. Kiguchi, K. Sato, T. Nishimatsu, T. Yamada, N. Usami and T.J. Konno	19
Preparation of Barium Titanate Nanoparticles with Necking Structure/Polymer Complex and their Dielectric Properties S. Tsukamoto, I. Fujii, K. Nakashima, T. Takei, N. Kumada, S. Wada, T.S. Suzuki, T. Uchikoshi and Y. Sakka	23
Preparation of Barium Titanate Grain-Oriented Ceramics by Electrophoresis Deposition Method under High Magnetic Field Using Single-Domain Nanoparticles S. Wada, T. Kita, I. Fujii, K. Nakashima, T. Takei, N. Kumada, T. Suzuki, T. Uchikoshi, Y. Sakka, Y. Miwa, S. Kawada, M. Kimura and Y. Kuroiwa	27
Microstructure Control of Porous Barium Titanate Ceramics and their Sensor Properties K. Maeda, I. Fujii, K. Nakashima, G. Fujimoto, K. Suma, T. Sukigara and S. Wada	32
Synthesis and Characterization of BaTiO₃ Fine Powders by Pulse Jet Spray Pyrolysis K. Myoujin, T. Kodera, R. Minami, T. Omura, T. Ogihara and N. Yamada	36
Domain Dynamics under Unipolar Electric Fields for BaTiO₃ Single Crystals S. Ishikawa, Y. Kitanaka, Y. Noguchi, M. Miyayama, C. Moriyoshi and Y. Kuroiwa	40
Improvement of Insulation Reliability of BaTiO₃-Based Ceramics Using Mixed Conductive Electrode D. Yoshidome, T. Hoshina, H. Takeda, Y. Sakabe and T. Tsurumi	44

II. Lead-Free Piezoelectric Ceramics

Polarization Switching Dynamics of Ferroelectric (Bi_{0.5}Na_{0.5})TiO₃ Single Crystals K. Yanai, H. Onozuka, Y. Kitanaka, Y. Noguchi, M. Miyayama, C. Moriyoshi and Y. Kuroiwa	51
Preparation of BiFeO₃-BaTiO₃ Based Thick Films by Screen Printing T. Futakuchi, T. Kakuda and Y. Sakai	55
Synthesis and Properties of Mn-Doped (Bi_{0.5}Na_{0.5})TiO₃ Thin Films by Chemical Solution Deposition N. Makino, B.Y. Lee, M. Moriya, W. Sakamoto, T. Iijima and T. Yogo	59
Mossbauer Spectra of ⁵⁷Fe-Enriched BiFeO₃ Thin Films Fabricated on SiO₂/Si Substrates by Chemical Solution Deposition Process K. Tanaka, Y. Tsukamoto, S. Okamura and Y. Yoshida	63
Preparation of Barium Titanate/Strontium Titanate Accumulation Ceramics with Necking Structure of Strontium Titanate Nanocubes K. Nakashima, S. Iwatsuki, I. Fujii and S. Wada	67
Preparation of Bismuth Based Perovskite Oxides and their Electric Properties I. Fujii, A. Shimamura, K. Nakashima, N. Kumada, H. Funakubo, Y. Kuroiwa and S. Wada	71

Preparation of Potassium Niobate/Barium Titanate Nanocomposite Ceramics with a Wide Barium Titanate Particle Size Distribution and their Dielectric Properties I. Fujii, K. Yamashita, K. Nakashima, Y. Fujikawa, D. Tanaka, M. Furukawa, E. Magome, C. Moriyoshi, Y. Kuroiwa and S. Wada	76
Preparation of Grain-Oriented Ceramics with Bismuth Potassium Titanate-Barium Titanate and their Piezoelectric Properties K. Inaba, I. Fujii, K. Nakashima, H. Hayashi, Y. Yamamoto, Y. Kuroiwa and S. Wada	80
Chemical Composition of Dielectric and Piezoelectric Properties for BaTiO₃-Bi(Mg_{1/2}Ti_{1/2})O₃-BiFeO₃ System Ceramics R. Mitsui, I. Fujii, K. Nakashima, N. Kumada, Y. Kuroiwa and S. Wada	84
Preparation of (Bi_{1/2}K_{1/2})TiO₃-Bi(Mg_{1/2}Ti_{1/2})O₃-BiFeO₃ Ceramics Withnanodomain Structure and their Piezoelectric Properties H. Kamei, I. Fujii, K. Nakashima, Y. Kuroiwa, H. Minemoto and S. Wada	88
Origin of Semiconducting Behavior of CaO Added BaTiO₃-(Bi_{1/2}Na_{1/2})TiO₃ Ceramics H. Akutsu, M.A. Zubair, T. Hoshina, H. Takeda and T. Tsurumi	92
Leakage Current and Polarization Properties of (Bi_{0.5}Na_{0.5})TiO₃-BaTiO₃ Single Crystals K. Hirano, H. Onozuka, Y. Kitanaka, Y. Noguchi and M. Miyayama	96

III. Energy Related Ceramics

Electrode Properties of Defect-Introduced Graphenes for Lithium-Ion Batteries W.Y. Lee, S. Suzuki and M. Miyayama	103
Relationship between Phonon Parameters and Oxygen Ion Conductivity for Al-Yb Co-Doped Zirconia T. Teranishi, N. Matsubara, H. Hayashi and A. Kishimoto	107
Fabrication and Evaluation of Titanium Dioxide Nanotube Thin Films by Anodic Oxidation on Transparent Electrodes Y. Okumoto, R. Kawakami, Y. Sato and S. Yoshikado	111
Synthesis and Electrical Properties of La Doped SrTiO₃ Powders by Ultrasonic Spray Pyrolysis K. Genji, K. Myoujin, T. Kodera and T. Ogihara	115
Preparation and Characterization of Mesoporous Silica and Lithium-Ion-Conductive Halocomplex Salt Composite Y. Tomita, M. Morishita, T. Okada, Sahara, A. Ichikawa, S. Ishimaru, Y. Kohno, Y. Maeda and K. Kobayashi	119
Synthesis of Carbons Added LiFePO₄ Powders by Two-Fluid Nozzle Spray Pyrolysis and Measurement the Charge-Discharge Properties T. Nakamura, T. Kodera, R. Minami and T. Ogihara	123
Effect of Surface Fluorination on the Charge/Discharge Properties of High Potential Negative Electrode TiO₂(B) for LIBs M. Saito, Y. Nakano, M. Takagi, T. Maekawa, A. Tasaka, M. Inaba, H. Takebayashi and Y. Shodai	127
Synthesis of Titania Nanotubes with Different Diameters for Dye-Sensitized Solar Cells J. Tang, T. Nakamura, T. Ogihara and J. Xiong	131
Thermally Stimulated Depolarization Current in 3 Mol% Ytria-Doped Zirconia N. Horiuchi, Y. Tsuchiya, K. Nozaki, M. Nakamura, A. Nagai and K. Yamashita	135

IV. Thin Film and Nanocrystal

Fabrication of Nanoporous Titanium Dioxide Films Using Aerosol Deposition K. Yuuki, Y. Sato and S. Yoshikado	141
Dipole-Dipole Interaction Model for Oriented Attachment of BaTiO₃ Nanocrystals Revisited K. Yasui and K. Kato	145
Structure and Properties of Thin Films Consisting of Single Crystalline BaTiO₃ Nanocubes K. Mimura and K. Kato	149

Crystal Structures and Surface Morphologies of LaGaO₃-Based Epitaxial Thin Films Grown by a Pulse Laser Deposition Method	
A. Matsunaga, Y. Kitanaka, R. Inoue, Y. Noguchi, M. Miyayama and K. Itaka	153
Characterization of Cu₂O Thin Film Grown by Molecular Beam Epitaxy	
T. Oshima, M. Nohara, T. Hoshina, H. Takeda and T. Tsurumi	157
Temperature Dependence of Resistivity of MoSi₂-Si Composite Thin Films	
R. Kanai, S. Hikita, Y. Sato and S. Yoshikado	161
Preparation of BaZrO₃ Nanocrystals at Low Temperature	
K. Nakashima, I. Fujii and S. Wada	165
Preparation of Barium Titanate/Strontium Titanate Nanocube Accumulation Ceramics and their Dielectric Property	
S. Tsukamoto, S. Iwatsuki, I. Fujii, K. Nakashima and S. Wada	169
Improvement of the Stability of X-Ray Emission by Thermal Excitation of a Pyroelectric Single Crystal	
F. Naruse, H. Honda, Y. Nakanishi, S. Fukao, Y. Sato, Y. Ito and S. Yoshikado	174

V. Semiconductor, Magnetic, Optical, and Sensor Ceramics

Analysis of Grain-Boundary in SrCoO₃-Doped ZnO Varistors and its Electrical Characteristics	
E. Koga, M. Hogiri and Y. Higashi	181
TEM Study for Self-Orientated LaNiO₃ Film along [100]	
N. Sakamoto, K. Ozawa, K. Murakoshi, T. Ohno, T. Kiguchi, T. Matsuda, T.J. Konno, N. Wakiya and H. Suzuki	185
Oxygen Diffusion in Rare-Earth Doped BaTiO₃ Ceramics	
I. Sakaguchi, S. Hirose, T. Furuta, K. Watanabe, K. Kageyama, S. Hishita, H. Haneda and N. Ohashi	189
UV-Visible Faraday Rotators Based on Rare-Earth Fluoride Single Crystals: LiREF₄ (RE=Tb, Dy, Ho, Er and Yb), PrF₃ and CeF₃	
V. Vasyliiev, E.G. Villora, M. Nakamura, Y. Sugahara and K. Shimamura	194
Fabrication of Bismuth-Based Zinc Oxide Varistors with High Varistor Voltage by Addition of Tin and Yttrium Oxides	
Y. Tokoro, T. Watanabe, Y. Sato and S. Yoshikado	198
Low-Temperature Fabrication of Dye-Sensitized ZnO Electrodes via Zinc Hydroxide Acetate by Utilizing Liquid Phase	
S. Ueno, H. Utsunomiya and S. Fujihara	202
Fabrication of Nanostructured Zinc Oxide Films on Plastic Substrates by Pyrolysis Method and their Application to Dye-Sensitized Solar Cells	
H. Utsunomiya, S. Ueno and S. Fujihara	206
Influence of Catalyst Loading Method on Titania-Based Optical Hydrogen Gas Sensing Properties	
J. Hamagami, R. Araki, S. Onimaru, G. Kawamura and A. Matsuda	210
Synthesis and the Luminescent Properties of Silicate NaAlSiO₄:Eu²⁺ Phosphor Using SiO Powder as a Silica Source	
T. Abe, K. Toda, K. Uhematsu, M. Sato, T. Ishigaki, K.B. Sung, D.S. Jo, T. Masaki and D.H. Yoon	214
Effects of Thermal Annealing for Barium and Silicon-Added Bismuth Based Zinc Oxide Varistors on Electrical Properties and Grain Boundary Structure	
A. Kubota, Y. Sato and S. Yoshikado	218
