

Table of Contents

Preface

I. Oxide Reaction Chemistry

Acidity Measurement

Electrochemical Behaviour of Dissolved CaO in Molten CaCl₂ G.M. Haarberg, N. Aalberg, K.S. Osen and R. Tunold	5
pO² Sensor in Molten Chlorides: Precise Calibration and Uses S. Bouvet and Y. Bertaud	11
Oxoacidity Effect on Metallic Oxide Dissolution Reactions in Fused Chlorides J. Schenin-King and G. Picard	13

Separation and Selective Reactions

Three-Dimensional Reactivity Diagrams for Reaction Chemistry in Molten Chlorides G. Picard	25
Molten Salt Separation of Baryum Sulfate from a Brazilian Baryte Ore R.L. Combes, L.F. Medina and S.L. Koeller	41
Separation of Tin and Indium Traces from Zinc/Lead Matrixes in Molten Chlorides M. Garcia, Y. Castrillejo, P. Pasquier and G. Picard	47
Chemical and Electrochemical Behaviour of Nickel Ion in the PbCl₂-KCl Melt at 475°C Y. Castrillejo, S. Palmero, R. Pardo and P. Sanchez Batanero	57

II. Structural Studies of Salts and Interfaces

Raman Study on the SO₃-K₂S₂O₇ Molten System R.W. Berg, F. Borup and N.J. Bjerrum	69
Raman Spectroscopic Studies in the Molten System CsCl-NbCl₅-NbOCl₃ C. Rosenkilde and T. Østvold	87
Structural Modelling of a Molten Salt by a Monte-Carlo Method S. Grandjean, L. Mouron, J.J. Legendre and G. Picard	99
<i>Ab Initio</i> and Molecular Dynamics Studies of Molten NaCl-Graphite Interfaces G. Rouillet, J.J. Legendre, D. Filliaudeau and G. Picard	105

III. Refractory Metals and Alloys

Niobium

Investigations of the Complex and Redox Chemistry of K₂NbF₇ Dissolved in NaCl-KCl Melts with Oxide Additions J.H. von Barner, R.W. Berg, Y. Berghoute and F. Lantelme	121
---	-----

Titanium and Molybdenum

Influence of Nature of the Alkali Metal Cation on Ti(III)- e = Ti(IV) Electrochemical Process in Chloride Melts S.V. Devyatkin and G. Kaptay	129
--	-----

Contribution to the Electrochemistry of Ti in Fused Salts N. Ene	139
Electrochemical Study of Molybdenum Solutions at 500°C J. Bouteillon, J.C. Gabriel, J.C. Poignet and J.M. Roman	147
Electrodeposition of Molybdenum from $\text{KF-K}_2\text{MoO}_4\text{-SiO}_2$ Melts A. Silný, P. Zatko, M. Makyta and J. Sýkorová	155
Electrochemical Study of Molybdenum in $\text{KF-K}_2\text{MoO}_4\text{-B}_2\text{O}_3$ Melts at 860°C: Chronopotentiometry and Voltametry M. Makyta, T.A. Utigard and P. Zatko	161

IV. Light Metals Electrolysis Processes

Aluminium and Neodymium

Reactions between Molten Electrolyte - Sodium - Carbon and Air within the Cathode during Aluminium Electrolysis H.A. Øye	173
Raman Spectra of Neodymium (III) Chloride-Alkali Chloride Melts and of Solid Compounds G.M. Photiadis, G.A. Voyiatzis and G.N. Papatheodorou	183
The Kinetics and Mechanism of Al(III)/Al Electrode Reaction in Cryolite - Alumina Melts J. Thonstad and A. Kiszka	195

Investigations on Cell and Electrode Materials

Oxygen-Evolving Anodes for High-Temperature Electrolysis R. Keller	209
A Study on the Solubility of SnO_2 in Cryolite-Based Melts H. Xiao, J. Thonstad and S. Rolseth	215
Chemical and Electrochemical Behaviour of Some 'New Materials' in Molten Salts to be Used for Aluminium Electrolysis S.N. Akhmedov, G. Kaptay, Y.V. Borisoglebskii, E.S. Gorlanov, M.I. Karimov and M.M. Vetyukov	231
Thermodynamics of $\text{Y}_2\text{O}_3\text{-LiF-YF}_3$ Melts R.G. Reddy and S. Kumar	233
Electrochemical Behaviour of the Ceramical $\text{NiO-Li}_2\text{O}$ Anode in Molten $\text{CaCl}_2\text{-CaO}$ Mixture N.M. Barbin, A.B. Dubovtsev, V.N. Nekrasov and L.E. Ivanovsky	243

V. Energetic Relevant Systems

Fuel Cells

Electrochemical Sensors and Fuel Cells: The Solid State Alternative C.B. Alcock	255
Electrochemical Corrosion Studies on Molten Carbonate Fuel Cell Components I. Uchida, H. Matsuyama and T. Nishina	273
Investigation on the Kinetics and Stability of NiO(Li) and $\text{La}_{0.8}\text{Sr}_{0.2}\text{CoO}_3$ in Molten Carbonates by Means of Electrochemical Impedance Spectroscopy L. Giorgi, M. Carewska, E. Simonetti, S. Scaccia, F. Croce and A. Pozio	285
Electroreduction of Oxygen under Pressurized Conditions in Molten Carbonate Media I. Uchida, K. Yamada and T. Nishina	303

Design of a Rotating and Hanging Meniscus Rotating Disk Electrode for Molten Carbonates W.H.A. Peelen, K. Hemmes and J.H.W. de Wit	319
--	-----

Others Prospective Investigations

Diffusion of Impurities in Liquid Metal Using Solid Electrolytes C.A.C. Sequeira	329
Hydride-Containing Molten Salts and their Technology Implications B.Y. Liaw	345
Ostwald Ripening in a Molten Salt Medium C.B. Alcock, J. Butler, S. Das Gupta, J.K. Jacobs and A. Majumdar	359
Structure and Transport Properties of Molten $\text{NH}_4\text{H}_2\text{PO}_4$ upon Addition of Solid CaHPO_4 J.A. Svenningsen and H.A. Øye	377

VI. Low-Temperature Molten Salts

Electrolyte-Amide Molten System: Micellar and Supercapacitive Systems G. Berchiesi, F. Farhat, C. Santini and G. Vitali	385
Electrochemical Insertion of Magnesium in Vanadium Bronzes Using Room Temperature Molten Salts as an Electrolyte P. Novák, W. Scheifele and Ö. Haas	389
Electrochemical Reduction of SO_2 from Molten Amides at n-Type Semiconductor Electrodes V. Mathew and R. Narayan	397
Electrochemical Studies in Low Temperature Amide Melts M.O.S.P. Caldeira and C.A.C. Sequeira	407
